Criminal Justice - Peter Joyce 2022-07-29

This book offers a comprehensive and engaging introduction to the criminal justice system of England and Wales. Starting with an overview of the main theories of the causes of crime, this book explores and discusses the operation of the main criminal justice agencies including the police, probation and prison services and the legal and youth justice systems. The fourth edition has been revised, updated, expanded and features a new expert co-author. This book offers a lively and critical discussion of some of the main themes in criminal justice, from policy-making and crime control, to diversity and discrimination, to the global dimensions of criminal justice, including organised crime and the role performed by transnational policing organisations to combat it. Key updates to this new edition include: increased discussion of the measurement, prevention and detection of crime; a revised chapter on the police which discusses the principle of policing by consent,

police methods, power and governance, and the abuse of power; further discussion of pressing contemporary issues in criminal justice, such as privatisation, multi-agency working, community-based criminal justice policy and the impact of the Covid-19 pandemic on the delivery of criminal justice policy; a revised chapter that deals in detail with new and emerging forms of criminality and the response of the UK and global criminal justice system to these developments. This accessible text is essential reading for students taking introductory courses in criminology and criminal justice. A wide range of useful features include review questions, lists of further reading, timelines of key events and a glossary of key terms.

Crime Prevention in the 21st Century - Benoit LeClerc 2016-08-27

This volume brings together a series of original contributions made by international experts dedicated to guiding efforts in preventing crime. The collection is divided into seven sections that

cover cutting edge approaches to crime prevention: 1) the offenders' perspective on crime prevention 2) crime script analysis 3) crime mapping and spatial analysis 4) social network analysis 5) agent-based modelling 6) crime-proofing legislations 7) technologies of crime prevention Each section includes one theoretical chapter to introduce the research approach followed by a series of empirical/applied contributions. The theoretical chapter aims to introduce and explain the approach of interest and discusses under which circumstances this strategy could best assist crime prevention. The objective of empirical/applied contributions is simply to showcase how these approaches can be apply. This collection can be seen as the end result of the convergence of novel ideas and analytical skills in the area of crime and crime prevention worldwide. It will be of interest to researchers in Criminology and Criminal Justice, as well as related fields like Sociology and Psychology,

Security, Urban Planning, and Public Policy. *Sexual Offending Against Children* - Tony Morrison 1994

Male sexual offending against children is a serious and widespread problem in Britain and the USA. Increasing awareness of this disturbing fact has led to great public and professional interest in how to deal with sex offenders. *Sexual Offending Against Children: Assessment and Treatment of Male Abusers* is the first book written specifically by UK professionals about practice, and it brings together people experienced in working with sex offenders and their families in a range of community based and institutional settings. The editors and contributors reflect the development, achievement and challenges of practice in the UK, stressing the multi-disciplinary context in which such practice needs to be undertaken. They describe the assessment, treatment and management of sexual offenders who assault children, and consider the impact of such work

on individual practitioners and implications for managers and their agencies. The book covers both the theoretical and practical issues raised by working with those who sexually assault children, and demonstrates clearly the application of research and theory in practice. With its practical approach, linked to a clear and firm theoretical base, *Sexual Offending Against Children: Assessment and Treatment of Male Abusers* will be invaluable to students, teachers and professionals in Social Work, Social Policy and Psychology, as well as to those in the Police and Prison Services who work with child sexual offenders.

Pagan Consent Culture - Christine Hoff Kraemer 2016

In this collection, Druids, Wiccans, Heathens, Polytheists, and others show how to ground good consent practices in Pagan stories, liturgies, and values. Although many Pagans see the body and sexuality as sacred, Pagan communities still struggle with the reality of assault and abuse. To

build consent culture, good consent practices must be embraced by communities, not just by individuals--and consent is about much more than sexuality. Consent culture begins with the idea of autonomy, with recognizing our right to control our bodies in all areas of life; and it is sustained by empathy, the ability to understand and share the emotional states of others.

The Sex Offender Register - Terry Thomas 2021-04-12

The Sex Offender Register examines the origins, history, structure and legalities of the UK sex offender register, and explores how political and public opinion has influenced the direction the policy of registration has taken. Delving into the origins of the UK sex offender register and how the registration policy has evolved, this book provides an understanding of the register and its contribution to public protection while attempting to see the register as a policy that

has grown and developed and as having an organic life of its own. The sex offender register is designed as a form of public protection rather than a punishment, requiring offenders to notify the police of their circumstances and to accept a degree of offender management from the police. The book:

- puts the development of the register in its political, social and ethical context
- considers the position of children and young people as offenders
- outlines the movement of registered offenders across international borders
- analyses how offenders can be removed from the register
- explores how other countries in the UK manage sex offenders through registers
- asks questions about the efficacy of the register and what contribution it makes to public protection
- looks at specific aspects of registration including the management of information
- delves into the experience of life on the register
- examines the influence of public opinion
- discusses the role of the police as custodians of the register and as

offender managers. Exploring the different pressures brought to bear on the register, this book provides an authoritative starting point for police officers, social workers, probation officers, magistrates, students of Criminology, Criminal Justice and Policing, and the general reader wanting to understand where the UK sex offender register originated from and how it operates today.

The Ethics of Total Confinement - Bruce A. Arrigo 2011-06-29

In three parts, this volume in the AP-LS series explores the phenomena of captivity and risk management, guided and informed by the theory, method, and policy of psychological jurisprudence. The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent "conditions of control." These conditions impose barriers to justice and set limits on citizenship for one and all. Situated at the nexus of political/social theory, mental health law and jurisprudential ethics, the book examines and critiques

constructs such as offenders and victims; self and society; therapeutic and restorative; health; harm; and community. So, too, are three "total confinement" case law data sets on which this analysis is based. The volume stands alone in its efforts to systematically "diagnose" the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting: (1) the rights of juveniles found competent to stand criminal trial, the mentally ill placed in long-term disciplinary isolation, and sex offenders subjected to civil detention and community re-entry monitoring; (2) the often unmet needs of victims; and (3) the demands of an ordered society. Carefully balancing sophisticated insights with concrete and cutting-edge applications, the book concludes with a series of provocative, yet practical, recommendations for future research and meaningful reform within institutional practice, programming, and policy. The Ethics of Total Confinement is a thought-

provoking and timely must-read for anyone interested in the ethical and legal issues regarding madness, citizenship, and social justice. "It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us. Instead, the path forward must run through a return to the ethical and psychological roots of security and justice. The Ethics of Total Confinement is a quantum step forward in defining and advancing that path."--Jonathan Simon , Adrian A. Kragen Professor of Law, Jurisprudence and Social Policy Program, UC Berkeley School of Law "This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness. It focuses on three outcast groups--juveniles tried as adults, people with mental illness subjected to hospitalization, and sex offenders committed as dangerous--and, based on an innovative analysis

of the relevant caselaw and empirics, shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest, most uninformed fears. Relying on Aristotelian philosophy, therapeutic and restorative principles, and commonsense justice, the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing."--Christopher Slobogin, Milton Underwood Professor of Law, Vanderbilt University Law School "The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines. By bridging gaps among relevant disciplines, the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological, ethical, or

justice-based standards. The book's provocative conclusions and recommendations offer much food for thought and suggest potential directions for action."--Dennis Fox, Emeritus Associate Professor of Legal Studies and Psychology, University of Illinois at Springfield "The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept. It is a book that synthesises in creative new ways reformist visions of justice, virtue and the cultivation of habits of character. This is profound work that opens new paths to dignity, healing and social justice."--John Braithwaite, Australian Research Council Federation Fellow, Australian National University "The Ethics of Total Confinement offers a useful and wide-ranging perspective grounded in psychological jurisprudence. With its emphasis on the harm done to those most vulnerable to extremes of risk-management, this volume makes a welcome addition to the literature on confinement."--Lorna Rhodes, Professor, Department of Anthropology,

University of Washington "The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices, aspiring to greater justice and human flourishing for all. A timely intervention of this kind is most welcome."--George Pavlich, Associate Vice-President (Research), Professor of Law and Sociology, University of Alberta

and critical issues regarding the various mechanisms designed to control sex offenders. It shows that the social problem of sex offending is not apparently resolvable by any of the means currently employed. A large array of procedures are used in the attempt to control the difficult population of sex offenders, including: imprisonment, institutional and community treatment, community monitoring by probation and parole, electronic monitoring, registration as a sex offender, community notification of an offender's status, strict limits on behavioral movement in the community, and residence restrictions. However, these constraints on behavior are almost completely the result of public outrage regarding sensational sex crimes, overreaction of media coverage that produce inaccurate statements of potential community risk, and the efforts of the legal profession and politicians to quell this anger and foreboding by enacting legislation that supposedly confronts the risk. This book demonstrates that we have

constructed a massive edifice of community control that is socially and politically driven and which has largely failed to contain sex crime.

Managing Sex Offender Risk - Hazel Kemshall 2004

Based on key research into assessment, treatment and recidivism, this book offers practical guidance on improving intervention techniques with sex offenders. The contributors explore the monitoring and surveillance strategies and cognitive-behavioural techniques currently used both in prison and in the community, and give clear directions for future practice. Providing a detailed overview of the typologies and characteristics of offenders, they suggest strategies for managing different kinds of offender, including children and young people who are sexually aggressive. The Sex Offenders Act and the Crime and Disorder Act emphasise the need for effective community management of the predatory paedophile. Reviewing the recent growth in multi-agency approaches to this

challenge, the book discusses how police, prisons and social work departments can share information and collaborate effectively, and will be essential reading for probation officers, prison staff, social workers and anyone involved in the assessment and management of sex offenders.

The Good Lives Model for Adolescents who Sexually Harm - Bobbie Print 2013

Community-Based Operations Research -

Michael P. Johnson 2011-09-18

This edited volume is an introduction to diverse methods and applications in operations research focused on local populations and community-based organizations that have the potential to improve the lives of individuals and communities in tangible ways. The book's themes include: space, place and community; disadvantaged, underrepresented or underserved populations; international and transnational applications; multimethod, cross-disciplinary and comparative

approaches and appropriate technology; and analytics. The book is comprised of eleven original submissions, a re-print of a 2007 article by Johnson and Smilowitz that introduces CBOR, and an introductory chapter that provides policy motivation, antecedents to CBOR in OR/MS, a theory of CBOR and a comprehensive review of the chapters. It is hoped that this book will provide a resource to academics and practitioners who seek to develop methods and applications that bridge the divide between traditional OR/MS rooted in mathematical models and newer streams in 'soft OR' that emphasize problem structuring methods, critical approaches to OR/MS and community engagement and capacity-building.

Challenges in the Management of People Convicted of a Sexual Offence - Kasia Uzieblo

develop the most evidence-based, fit-for-purpose approach in responding to and preventing it. Sexual abuse is a multi-disciplinary, international issue that exists at the crossroads of theory, practice, and research. Therefore, the book is future-facing and asks the reader to critically reflect upon current and future research and practice, and to ask: what next? In doing this the book examines the theory, research, and practice on a range of topics including, grooming behaviors, risk management, risk assessment, sexual fantasies, professional engagement, and policy development. These, and other essential topics for effective and efficient care for people who

have committed sexual offenses, are addressed as part of the ultimate goal to reduce and even eliminate sexual victimization in the future.

Sex Offenders in the Community - Amanda Matravers 2013-10-18

This book explores current criminal justice responses to the management of individuals who are convicted of sexual offences. It aims to help policy-makers, practitioners and students to develop an informed position on this complex and increasingly controversial issue. Although the focus is primarily upon the UK context, contributions from North America (USA and Canada) provide an important comparative perspective.
