Reference Books Bulletin, 1994-1995 - Sandy Whiteley 1996

Arranged by broad subject and indexed by narrow subject, by format and by title, this annual publication offers an overview of the reference materials published during 1994.

[The Cumulative Book Index](#) - 1995

Undressing Lesbian Sex - Elaine Creith 1996

A provocative, lively and informative book containing a down-to-earth review of lesbian sex which explores what lesbians do, how they do it and how often. Contains informed discussion on many issues affecting lesbian sexual health and well-being, including the latest thinking on HIV/AIDS, the SM debate, social lubricants, the lesbian 'bed-death' theory, monogamy and non-monogamy, the impact of long-term illness on sexual relationships, abuse and safer sex information. Accessible, entertaining and original, *Undressing Lesbian Sex* is the first British book on the subject and it is based on extensive empirical research in this country. The results of the UK's first-ever lesbian sex survey, which was widely distributed throughout the country, are analysed and explored here in the broader context of lesbian life in the nineties.

Chicago Tribune Index - 1993

[Choice's Outstanding Academic Titles, 1998-2002](#) - Rebecca Ann Bartlett 2003

Current Catalog - National Library of Medicine (U.S.)

First multi-year cumulation covers six years: 1965-70.

Reference Books Bulletin, 1993-1994 - Sandy Whiteley 1994

Walford's Guide to Reference Material: Science and technology -

Albert John Walford 1999

A revised and updated guide to reference material. It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area, be it journal article, CD-ROM, on-line database, bibliography, encyclopaedia, monograph or directory. It features full critical annotations and reviewers' comments and comprehensive author-title and subject indexes. The contents include: mathematics; astronomy and surveying; physics; chemistry; earth

sciences; palaeontology; anthropology; biology; natural history; botany; zoology; patents and interventions; medicine; engineering; transport vehicles; agriculture and livestock; household management; communication; chemical industry; manufactures; industries, trades and crafts; and the building industry.

Cumulative Book Index - 1995

A world list of books in the English language.

Resources in Education - 1994

[Periods in Pop Culture](#) - Lauren Rosewarne 2012

Periods in Pop Culture: Menstruation in Film and Television, by Lauren Rosewarne, investigates the portrayals of menstruation in film and television, spotlighting a paradox of a common bodily occurrence still causing controversy, fear, and offense. This is the first book to focus exclusively on media representations of menstruation and to undertake a comprehensive analysis of its depictions.

National Library of Medicine Current Catalog - National Library of Medicine (U.S.) 1965

Guide to Reference Books - Robert Balay 1996

Presents an annotated bibliography of general and subject reference books covering the humanities, social and behavioral sciences, history, science, technology, and medicine.

[Books In Print 2004-2005](#) - Bowker Editorial Staff 2004

[The SAGE Encyclopedia of Communication Research Methods](#) - Mike Allen 2017-04-11

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.
