Beyond Gender Binaries - Rita Santos 2018-12-15

While transgender people have been called many different things by different cultures, they have always existed. This book traces the history of how transgender, third gender, and other varieties of gender-nonconforming individuals have functioned in various societies. It documents how different societies' understanding of sex and gender has changed over time. Readers will explore how different cultures viewed these individuals as well as how their legal rights have evolved (or devolved). They will meet some of the historical figures that paved the way for so many others to live their truth.

Body in Medical Culture, The - Elizabeth Klaver 2009-04-16

2010 CHOICE Outstanding Academic Title How do concepts and constructions of the body shape people's experiences of agency and objectification within medical culture? As an object of scrutiny, the medicalized body occupies center stage in the work of doctors, nurses, medical examiners, and other medical professionals who mediate broader cultural understandings of pathology, illness, and the various physical transformations associated with life and death. *The Body in Medical Culture* explores how the body functions within medical culture and examines the metaphors and models of the body used to understand medical phenomena, including disease, diagnostic practices, wellness, anatomy, surgery, and medical research. Scholars from a wide range of disciplines engage representations of bodies, including polio and masculinity, sex reassignment surgery, drug marketing, endography, "designer vaginas," and hospital humor in order to challenge the normalcy of the passively objectified medicalized body.

Transgender Communication Studies - Jamie C. Capuzza 2015-02-05

Transgender Communication Studies: Histories, Trends, and Trajectories brings scholarship in transgender studies to the forefront of the communication discipline. Leland Spencer and Jamie Capuzza provide a broad foundation that documents the evolution of transgender communication studies and challenges fundamental assumptions about the relationship between communication and identity. The contributors explore the political conditions these practices create for persons across

the spectrum of gender identities and sexual orientations, placing them in the subdisciplines of human communication, media, and public and rhetorical communication. The collection also looks to the future of transgender research with suggestions and directives for continued work. This comprehensive study inspires critical thinking about gender identity and transgender lives from within the vocabularies and methodologies of communication studies.

Beyond Magenta - Susan Kuklin 2014-02-11

A 2015 Stonewall Honor Book A groundbreaking work of LGBT literature takes an honest look at the life, love, and struggles of transgender teens. Author and photographer Susan Kuklin met and interviewed six transgender or gender-neutral young adults and used her considerable skills to represent them thoughtfully and respectfully before, during, and after their personal acknowledgment of gender preference. Portraits, family photographs, and candid images grace the pages, augmenting the emotional and physical journey each youth has taken. Each honest discussion and disclosure, whether joyful or heartbreaking, is completely different from the other because of family dynamics, living situations, gender, and the transition these teens make in recognition of their true selves.

Omnigender - Virginia R. Mollenkott 2007

"In *Omnigender*, winner of a Lambda Literary Award, Mollenkott bridges traditional religious doctrine and secular postmodern theory related to gender. Through an examination of the Hebrew and Christian scriptures and church history, and the exploration of other religions and cultures, she honors the experiences of people who do not fit within the traditional binary concept of gender: intersexual, transsexual, or otherwise transgendered individuals. This revised and expanded edition includes a new section on the sexuality of Jesus, updated factual information, and insights from more than 36 recent sources."--BOOK JACKET.

Identifying as Transgender - Sara Woods 2016-12-15

This great guide is a much-needed way to introduce young readers to the gender galaxy. Readers will become familiar with some of the many gender identities a person can have, such as trans man, trans woman,

gender fluid, bigender, or two-spirit. They'll learn about bodies beyond the gender binary, as well as the differences between gender expression, gender identity, and sexuality. A chapter on transphobia and cissexism acknowledges the discrimination and mistreatment that trans people face, but the support that trans communities can provide is also emphasized. Perfect for both transgender teens and young trans allies.

Body Alchemy - Loren Cameron 1996

Cameron's intensely personal photo documentary of female-to-male transsexuals.

Mirror Image - Nancy Hunt 1978

In the Darkroom - Susan Faludi 2017-05-02

PULITZER PRIZE FINALIST ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR WINNER OF THE KIRKUS PRIZE When feminist writer Susan Faludi learned that her seventy-six-year-old father—long estranged and living in Hungary—had undergone sex reassignment surgery, the revelation would launch her on an extraordinary inquiry into the meaning of identity in the modern world and in her own haunted family saga. How was this new parent who identified as “a complete woman now” connected to the silent, explosive, and ultimately violent father she had known, the photographer who'd built his career on the alteration of images? Faludi chases that mystery into the recesses of her suburban childhood and her father's many previous incarnations: American dad, Alpine mountaineer, swashbuckling adventurer in the Amazon outback, Jewish fugitive in Holocaust Budapest. When the author travels to Hungary to reunite with her father, she drops into a labyrinth of dark histories and dangerous politics in a country hell-bent on repressing its past and constructing a fanciful—and virulent—nationhood. Faludi's struggle to come to grips with her father's metamorphosis takes her across borders—historical, political, religious, sexual—to bring her face to face with the question of the age: Is identity something you “choose,” or is it the very thing you can't escape?

FTM: Female-to-male Transsexuals in Society - Holly Devor 1997

FTM: Female-to-Male Transsexuals in Society provides a compassionate,

intimate, and incisive look at the life experiences of forty-five female-to-male transsexuals. Until now, little has been known about these individuals, and questions persist about them. Who are they? How do they come to know themselves as transsexual? What do they do about it? How do their families cope? Who loves them? What does it mean for the rest of us? To answer these and other questions, Holly Devor spent many years compiling in-depth interviews and researching the lives of transsexual and transgendered people, many of whom became her friends. She traces the everyday and significant events that coalesce in transsexual identity, culminating in gender and sex transformation. After an introduction which grounds the discussion in historical and theoretical contexts, the author takes a life course approach to understanding female-to-male transsexualism. Using her subjects' own words as illustrations, Devor looks at how childhood, adolescent, and adult experiences with family members, peers, and lovers work to shape and clarify female-to-male transsexuals' images of themselves as people who should be men.

An Anthropology of Gender Variance and Trans Experience in Naples - Marzia Mauriello 2021-10-26

This book recounts the author's fieldwork among the trans and gender-variant communities in Naples. This is where a gender-variant figure, the femminiello, has found a safe environment within the city's historical poorest neighborhoods, the so-called “quartieri popolari”, which were and continue to be culturally and socially connoted. The femminielli, who can be read as “suspended” figures between the feminine and the masculine, provide the background for a discourse on the meanings that genders and sexualities have assumed in modern Naples. This is done with significant openings to theoretical reasoning that is both extraterritorial and multidisciplinary. Starting from the micro context, the aim of the book is to explore the breadth and complexity of the gender variant and trans experience, with particular reference to the changing meanings of the body, which are also tied to the collective images of beauty in contemporary times.

Bisexuality and Transgenderism - Fritz Klein 2012-12-06

Explore the common ground—and the important differences—between bisexuality and transgenderism! This book, guaranteed to provoke debate and discussion of sexuality and gender, is the first devoted exclusively to the relationship between transgenderism and bisexuality. Combining the work of scholars and activists, professional writers and lay people, *Bisexuality and Transgenderism: InterSEXions of the Others* presents ideas, thoughts, feelings, and insights from a variety of contributors who are committed to understanding—and deepening our understanding of—gender and sexuality. You'll find scholarly essays, narratives, poetry, and a revealing interview with four male-to-female transsexuals, two of whom are married to women who also participate in the discussion. In addition, the book includes insightful chapters by well-known advocates of transgenderism, including Jamison "James" Green, Coralee Drechsler, and Matthew Kailey. The editors of *Bisexuality and Transgenderism: InterSEXions of the Others* make the provocative but crucial claim that the larger queer community looks at "B" and "T" lives as mere "add-ons" to "L" and "G." In this book they focus attention on bisexuality and transgenderism—moving the "margins" to center stage and exploring how sexuality, gender, desire, and intimacy are constructed and circulate in our society. The book's inclusion of voices and scholarship from Eastern cultures challenges our understanding of sexuality and gender constructions all the more, giving this collection a global scope. Here is a sample of what *Bisexuality and Transgenderism: InterSEXions of the Others* examines: biphobia and transphobia within the United States' gay and lesbian community the bi/trans and subversive aspects of the works and images of cultural icons Angelina Jolie and Sandra Bernhardt how bisexual and transgendered identities are socially constructed through relationships the false promise of pomosexual play—why the concepts of postmodern sexuality fail to rewrite the construction of gender why swingers who practice bisexual and transgender behavior are often disdained and marginalized by other GLBT people suicidal thoughts and other mental health concerns of bisexual males and females, as well as transgender people Eastern perspectives on sexual/gender identities—with revealing chapters on

gender identity in Japan and Indonesia

Clinical Uro-Andrology - Vincenzo Mirone 2015-02-12

In this volume, undisputed leading experts from Europe and beyond come together to cover the field of andrology in its entirety, providing a guide that will be of value to urologists and other physicians in their daily clinical practice. It is designed for a wide audience, including both those coming into contact with andrological issues for the first time and more experienced readers requiring updated guidelines and advice on the most controversial and thorny issues. A wide range of topics is covered, including male genital abnormalities, disorders of pubertal development, gender identity disorders, Peyronie's disease, sexual dysfunction, hypogonadism and infertility, urogenital infections, urogenital cancers, and andrological emergencies. *Clinical Andrology* will prove an invaluable quick consulting tool, rigorous in its scientific content but at the same time easy to read and rich in images and tables.

Gender Reversals and Gender Cultures - Sabrina Petra Ramet 2002-11

This collection of original essays explores the historical and cultural diversity of the experience of gender reversal over an exceptional geographical and chronological range. Topics covered include anthropology, history, literature.

Making the Body Beautiful - Sander L. Gilman 2021-12-07

Nose reconstructions have been common in India for centuries. South Korea, Brazil, and Israel have become international centers for procedures ranging from eyelid restructuring to buttock lifts and tummy tucks. Argentina has the highest rate of silicone implants in the world. Around the globe, aesthetic surgery has become a cultural and medical fixture. Sander Gilman seeks to explain why by presenting the first systematic world history and cultural theory of aesthetic surgery. Touching on subjects as diverse as getting a "nose job" as a sweet-sixteen birthday present and the removal of male breasts in seventh-century Alexandria, Gilman argues that aesthetic surgery has such universal appeal because it helps people to "pass," to be seen as a member of a group with which they want to or need to identify. Gilman begins by addressing basic questions about the history of aesthetic

surgery. What surgical procedures have been performed? Which are considered aesthetic and why? Who are the patients? What is the place of aesthetic surgery in modern culture? He then turns his attention to that focus of countless human anxieties: the nose. Gilman discusses how people have reshaped their noses to repair the ravages of war and disease (principally syphilis), to match prevailing ideas of beauty, and to avoid association with negative images of the "Jew," the "Irish," the "Oriental," or the "Black." He examines how we have used aesthetic surgery on almost every conceivable part of the body to try to pass as younger, stronger, thinner, and more erotic. Gilman also explores some of the extremes of surgery as personal transformation, discussing transgender surgery, adult circumcision and foreskin restoration, the enhancement of dueling scars, and even a performance artist who had herself altered to resemble the Mona Lisa. The book draws on an extraordinary range of sources. Gilman is as comfortable discussing Nietzsche, Yeats, and Darwin as he is grisly medical details, Michael Jackson, and Barbra Streisand's decision to keep her own nose. The book contains dozens of arresting images of people before, during, and after surgery. This is a profound, provocative, and engaging study of how humans have sought to change their lives by transforming their bodies.

After Eunuchs - Howard Chiang 2018-08-07

For much of Chinese history, the eunuch stood out as an exceptional figure at the margins of gender categories. Amid the disintegration of the Qing Empire, men and women in China began to understand their differences in the language of modern science. In *After Eunuchs*, Howard Chiang traces the genealogy of sexual knowledge from the demise of eunuchism to the emergence of transsexuality, showing the centrality of new epistemic structures to the formation of Chinese modernity. From anticastration discourses in the late Qing era to sex-reassignment surgeries in Taiwan in the 1950s and queer movements in the 1980s and 1990s, *After Eunuchs* explores the ways the introduction of Western biomedical sciences transformed normative meanings of gender, sexuality, and the body in China. Chiang investigates how competing definitions of sex circulated in science, medicine, vernacular culture, and

the periodical press, bringing to light a rich and vibrant discourse of sex change in the first half of the twentieth century. He focuses on the stories of gender and sexual minorities as well as a large supporting cast of doctors, scientists, philosophers, educators, reformers, journalists, and tabloid writers, as they debated the questions of political sovereignty, national belonging, cultural authenticity, scientific modernity, human difference, and the power and authority of truths about sex. Theoretically sophisticated and far-reaching, *After Eunuchs* is an innovative contribution to the history and philosophy of science and queer and Sinophone studies.

Beyond Magenta - Susan Kuklin 2015-03-10

A 2015 Stonewall Honor Book A groundbreaking work of LGBT literature takes an honest look at the life, love, and struggles of transgender teens. Author and photographer Susan Kuklin met and interviewed six transgender or gender-neutral young adults and used her considerable skills to represent them thoughtfully and respectfully before, during, and after their personal acknowledgment of gender preference. Portraits, family photographs, and candid images grace the pages, augmenting the emotional and physical journey each youth has taken. Each honest discussion and disclosure, whether joyful or heartbreaking, is completely different from the other because of family dynamics, living situations, gender, and the transition these teens make in recognition of their true selves.

Transgender Nation - Gordene Olga MacKenzie 1994

Looks at the male-to-woman transgenderist and transsexual from a sociological and sociopolitical perspective, arguing that it is not the individual transgenderists who are sick and need treatment, but the society that condemns them. Considers the history of the transgender movement, categories of sex, and contemporary medical and popular ideology. No index. Paper edition (unseen), \$14.95. Annotation copyright by Book News, Inc., Portland, OR

Ftm - Aaron Devor 2016-08-29

In this ground-breaking study, Aaron Devor provides a compassionate, intimate, and incisive look at the life experiences of forty-five trans men.

Emerging into 21st-century political and social conversations, questions persist. Who are they? How do they come to know themselves as men? What do they do about it? How do their families respond? Who are their lovers? What does it mean for everyone else? To answer these and other questions, Devor spent years compiling in-depth interviews and researching the lives of transsexual and transgender people. Here, he traces the everyday and significant events that coalesce into trans identities, culminating in gender and sex transformations. Using trans men's own words as illustrations, Devor looks at how childhood, adolescence, and adult experiences with family members, peers, and lovers work to shape and clarify their images of themselves as men. With a new introduction, Devor positions the volume in twenty-first century debates of identity politics and community-building and provides a window into his own self-exploration as a result of his research.

Shimmering Images - Eliza Steinbock 2019-03-22

In *Shimmering Images* Eliza Steinbock traces how cinema offers

alternative ways to understand gender transitions through a specific aesthetics of change. Drawing on Barthes's idea of the "shimmer" and Foucault's notion of sex as a mirage, the author shows how sex and gender can appear mirage-like on film, an effect they label shimmering. Steinbock applies the concept of shimmering—which delineates change in its emergent form as well as the qualities of transforming bodies, images, and affects—to analyses of films that span time and genre. These include examinations of the fantastic and phantasmagorical shimmerings of sex change in Georges Méliès's nineteenth-century trick films and Lili Elbe's 1931 autobiographical writings and photomontage in *Man into Woman*. Steinbock also explores more recent documentaries, science fiction, and pornographic and experimental films. Presenting a cinematic philosophy of transgender embodiment that demonstrates how shimmering images mediate transitioning, Steinbock not only offers a corrective to the gender binary orientation of feminist film theory; they open up new means to understand trans ontologies and epistemologies as emergent, affective, and processual.
