Modern Algorithms of Cluster Analysis - Slawomir Wierzchon 2017-12-29

This book provides the reader with a basic understanding of the formal concepts of the cluster, clustering, partition, cluster analysis etc. The book explains feature-based, graph-based and spectral clustering methods and discusses their formal similarities and differences. Understanding the related formal concepts is particularly vital in the epoch of Big Data; due to the volume and characteristics of the data, it is no longer feasible to predominantly rely on merely viewing the data when facing a clustering problem. Usually clustering involves choosing similar objects and grouping them together. To facilitate the choice of similarity measures for complex and big data, various measures of object similarity, based on quantitative (like numerical measurement results) and qualitative features (like text), as well as combinations of the two, are described, as well as graph-based similarity measures for (hyper) linked objects and measures for multilayered graphs. Numerous variants demonstrating how such similarity measures can be exploited when defining clustering cost functions are also presented. In addition, the book provides an overview of approaches to handling large collections of objects in a reasonable time. In particular, it addresses grid-based methods, sampling methods, parallelization via Map-Reduce, usage of tree-structures, random projections and various heuristic approaches, especially those used for community detection.

Homoerotic Sensibilities in Late Imperial China - Cuncun Wu 2004-08-02

Homoerotic Sensibilities in Late Imperial China is the richest exploration to date of late imperial Chinese literati interest in male love. Employing primary sources such as miscellanies, poetry, fiction and 'flower guides', Wu Cuncun argues that male homoeroticism played a central role in the cultural life of late imperial Chinese literati elites. Countering recent arguments that homosexuality was marginal and disparaged during this period, the book also seeks to trace the relationship of homoeroticism to status and power. In addition to historical portraits and analysis, the book also advances the concept of 'sensibilities' as a method for interpreting the complex range of homoerotic texts produced in late imperial China.

An Introduction to Zooarchaeology - Diane Gifford-Gonzalez 2018-04-03

This volume is a comprehensive, critical introduction to vertebrate zooarchaeology, the field that explores the history of human relations with animals from the Pliocene to the Industrial Revolution. The book is organized into five sections, each with an introduction, that leads the reader systematically through this swiftly expanding field. Section One presents a general introduction to zooarchaeology, key definitions, and an historical survey of the emergence of zooarchaeology in the Americas, Europe, Asia, and Africa, and introduces the conceptual approach taken in the book. This volume is designed to allow readers to integrate data from the book along with that acquired elsewhere within a coherent analytical framework. Most of its chapters take the form of critical "review articles," providing a portal into both the classic and current literature and contextualizing these with original commentary. Summaries of findings are enhanced by profuse illustrations by the author and others.

Combating Homophobia - Michael Groneberg 2011

Discrimination based on sexual orientation and gender identity concerns everybody, but it is foremost lesbian and gay persons who have to deal with it, especially when confronting the discovery of their homosexuality as a child or adolescent. In this book, education practitioners working with youth and researchers - from social, political, and educational sciences, as well as theology and philosophy - raise awareness of the wide spectrum of homophobia and offer solutions to the suffering it engenders in youths. The book will be helpful for parents, teachers, and others who are responsible for youth and education. It reviews concrete knowledge, combines it with scientific approaches, and identifies the need for further research. (Series: Gender-Diskussion - Vol. 13)

Clothing Sacred Scriptures - David Ganz 2018-12-03

According to a longstanding interpretation, book religions are agents of textuality and logocentrism. This volume inverts the traditional perspective: its focus is on the strong dependency between scripture and aesthetics, holy books and material artworks, sacred texts and ritual performances. The contributions, written by a group of international specialists in Western, Byzantine, Islamic and Jewish Art, are committed

to a comparative and transcultural approach. The authors reflect upon the different strategies of »clothing« sacred texts with precious materials and elaborate forms. They show how the pretypographic cultures of the Middle Ages used book ornaments as media for building a close relation between the divine words and their human audience. By exploring how art shapes the religious practice of books, and how the religious use of books shapes the evolution of artistic practices this book contributes to a new understanding of the deep nexus between sacred scripture and art.

Darwin-Inspired Learning - Carolyn J. Boulter 2015-01-19

Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas, and their far reaching effects, continue to challenge and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on: • active learning • hands-on enquiry • critical thinking • creativity • argumentation • interdisciplinarity. In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young

people with the living world through critical and creative thinking modeled on Darwin's life and science.
