Dental Secrets - Stephen T. Sonis 2014-08-16
Offering practical tips and expert answers to topics in dentistry and oral medicine, Dental Secrets, 4th Edition provides an ideal preparation tool for exams, clinical rotations, and board certification. A concise, illustrated Q&A format covers key areas such as oral pathology and radiology, periodontology, endodontics, restorative dentistry, prosthodontics, orthodontics, infection control, and oral and maxillofacial surgery. Written by Stephen Sonis and a team of expert contributors, this mini-reference makes it easier to prepare for real-world clinical scenarios and review for

the NBDE and other certification exams. Over 2,000 questions include concise answers for core topics in dentistry and oral medicine, providing valuable pearls, tips, memory aids, and 'secrets.' Question-and-answer format makes this the perfect review tool for certification exams, a clinical refresher, or a quick reference guide. Over 100 illustrations, tables, and bulleted lists highlight key information. Expert contributors share practical tips, answers, and secrets on safe and effective dentistry practice. UPDATED content includes the latest advances in the science and practice of dentistry, including CBCT, CAMBRA, new methods for diagnosing

caries, mini dental implants, platform switching, early childhood caries (ECC), and more. NEW illustrations provide high-quality dental images. NEW two-color design highlights questions and other features such as tables, boxes, and bulleted lists, making it easier to find information. Three NEW contributors — Nathaniel Treister, Jennifer Frustino, and David Kim — provide fresh insight in the chapters on treatment planning and oral diagnosis, periodontology, restorative dentistry, and prosthodontics.

These include Hispania, French Review, German Quarterly and World Literature Today.

Understanding Research in Personal

Relationships - William Dragon 2005-05-01
Understanding Research in Personal Relationships is a comprehensive introduction to the key readings on human and close relationships. Organized into twelve thematic chapters with editorial commentary throughout, the editors offer a critical reading of the major research articles in the field of relationship studies published in the last few years. Scholarly papers, two per chapter, are presented in an abridged form and critiqued in a carefully

structured way that instructs students on the way to read research, and to critically evaluate research in this field. The book, therefore, has a thoroughly didactic focus as the student is given historical, theoretical and methodological contexts to each article as well as an explanation of key terms and ideas.

Mental Representation in Health and Illness

- J.A. Skelton 2012-12-06

How do individuals conceive illness and symptoms? Do their conceptions conflict with the physician's views of their illness, and what happens if they do? This book thoroughly explores the field of disease representation, describes and discusses lay illness models in a variety of social, historical and cultural contexts.

The Psychology of the Dentist-Patient Relationship - Stephen Bochner 2012-12-06

The Psychology of the Dentist-Patient Relationship acquaints dentists with the underlying interpersonal dynamics of their professional work. The author has reviewed the dental and psychological literature about the behavior of dentists and their patients, and used this evidence to evaluate critically the various theoretical models of the dentist-patient relationship. A major aim of this book is to show how the application of soundly based psychological theory and practice can improve patient management, reduce the stress of practicing dentistry, and contribute to the design of effective community dental health campaigns.

Evocative Autoethnography - Arthur Bochner 2016-03-21

This comprehensive text is the first to introduce evocative autoethnography as a methodology and a way of life in the human sciences. Using numerous examples from their work and others, world-renowned scholars Arthur Bochner and Carolyn Ellis, originators of the method, emphasize how to connect intellectually and emotionally to the lives of readers throughout the challenging process of representing lived

experiences. Written as the story of a fictional workshop, based on many similar sessions led by the authors, it incorporates group discussions, common questions, and workshop handouts. The book: describes the history, development, and purposes of evocative storytelling; provides detailed instruction on becoming a story-writer and living a writing life; examines fundamental ethical issues, dilemmas, and responsibilities; illustrates ways ethnography intersects with autoethnography; calls attention to how truth and memory figure into the works and lives of evocative autoethnographers.
