Professional Sexual Misconduct in Institutions - Werner Tschan 2013-10-01

Essential reading about a notoriously difficult problem: how abusive professionals manipulate their clients and what we as organizations and individuals can do about it Professional sexual misconduct (PSM) is a problem that is notoriously difficult to address and that can be a minefield for all concerned - for victims, for the institutions where it takes place, and also because outstanding and supposedly responsible members of society may be accused of abuse. Here, Werner Tschan, one of the world's leading experts on the prevention of PSM, outlines an up-to-date approach to PSM and other professional disruptive behaviors. He describes practical ways to prevent PSM, as well as effective treatments for victims and those accused. Using examples from real-life cases from around the world, he also discusses how PSM is a societal problem and what we can do to stop it. Recent headline cases involving a variety of organizations - medical, media, church, schools, sport, industry - show that institutions can be ideal environments for PSM and so great emphasis is placed in this volume on preventive measures that we can and must take at an institutional level. With clear, jargon-free writing, this book is essential reading for all professionals interested in preventing and dealing with PSM, as well as of interest to victims and their families as well.

*Missbrauchtes Vertrauen* - Werner Tschan 2005

Dass Helfer selbst zu Tatern werden, scheint unfassbar. Tatsache ist es dennoch. Psychotherapeuten, Psychiater, Psychologen, Seelsorger, Lehrer und Trainer sind nur einige der Berufsgruppen, die eine strukturelle Machtposition gegenüber ihrer Klientel innehaben. Diese Position macht manche Fachleute anfallig für Fehlverhalten und Machtmissbrauch, indem sie das Vertrauensverhältnis zur Befriedigung eigener sexueller Bedürfnisse ausnutzen. In diesem Buch werden Ablauf und Folgen von Grenzverletzungen aus unterschiedlichen Perspektiven aufgezeigt und Grundkenntnisse aus der Forensik, Traumalogie, angewandten Ethik, Sexualmedizin, Präventivmedizin und den Rechtswissenschaften vermittelt. Für die Praxis werden das 5-Schritte-Programm zur Opferhilfe, das Boundary-Training als Rehabilitationsmodell für Täter-Fachleute sowie Lösungsansätze für Institutionen und Behörden vorgestellt. Das Thema Grenzverletzungen richtet sich nicht nur an Psychotherapeuten, Psychiater, Psychologen, Beratungsstellen und Behörden, sondern ist durch die transdisziplinäre Darstellung von grossem Interesse für Juristen, Gerichtsbehörden, Lehrer und in der Erwachsenenbildung Tätige, Seelsorger und Kirchenbehörden, Pflegepersonal und Mitarbeiter im Gesundheitswesen sowie für die interessierte Öffentlichkeit.

*Working with Adult Survivors of Childhood Sexual Abuse* - Liezel Anguelova 2018-03-20

This book provides a framework for addressing the extended treatment needs of adult survivors of child sexual abuse. It is based on a therapeutic intervention model that provides flexibility for therapists to work according to their training and skills set while incorporating practical techniques structured around the needs of survivors. The book begins by providing therapists with crucial information about sex abuse survivors—such as ethical considerations, types of abuse, the stages of abuse, and the effects of the abuse on the child—as well as a method useful in the putting together of an abuse profile which ultimately assists in identifying treatment needs. The second part of the book provides client homework exercises for

treatment and covers working with memories; denial; problematic emotions such as guilt, self-blame, and shame; depression and anxiety; sexuality; as well as parents, partners, and more. This accessible yet comprehensive guide will be of utmost use to mental health professionals who work with adult survivors of childhood sexual abuse.

Surviving and Moving On - Kim McGregor 2014-01-21

This book is essential reading for any survivor of child sexual abuse, female or male. Many survivors of sexual abuse have not always been believed or supported through their developmental years. They have had to cope on their own, dealing with the aftermath of the abuse in whatever ways they could. This book offers ideas and techniques for understanding and healing which adult survivors in particular may find useful. It tends to be written with women in mind, but much of the information and many of the exercises may be useful for male survivors as well. This book will also be useful for the partners, families and friends giving support and encouragement to survivors who are healing themselves from the effects of abuse. Many survivors want those around them to understand what they've survived and its effects on their life. Part 1 provides information about child sexual abuse - what it is, why children remain silent about it, some of the effects abuse can have on a survivor's life and how these can be minimised, and who the offenders are. Part 2 is for survivors, helping them to understand and to cope with their unique experience of child sexual abuse. Part 3 is specifically for supporters and caregivers of survivors.

Implicit Memory and Metacognition - Lynne M. Reder 2014-01-14

Metacognition is a term that spans many sub-areas in psychology and means different things to different people. A dominant view has been that metacognition involves the monitoring of performance in order to control cognition; however, it seems reasonable that much of this control runs implicitly (i.e., without awareness). Newer still is the field of implicit memory, and it has different connotations to different sub-groups as well. The editor of this volume takes it to mean that a prior experience affects behavior without the individual's appreciation (ability to report) of this influence. Implicit memory and metacognition seem to be at two opposite ends of the spectrum -- one seemingly conscious and control-oriented, the other occurring without subjects' awareness. Do these processes relate to each other in interesting ways, or do they operate independently without reference to each other? The relatively novel conjecture that much of the control of cognition operates at an implicit level sparked Reder's desire to explore the interrelationship between the two fields. Developed within the last two decades, both fields are very new and generate a great deal of excitement and research interest. Hundreds of articles have been written about metacognition and about implicit memory, but little if any material has been published about the two areas in combination. In other words, Metacognition and Implicit Memory is the first book attempting to integrate what should be closely linked efforts in the study of cognitive science.

Well-Being Research in South Africa - Marié P. Wissing 2013-05-13

This is the first book to bring together examples of research in positive psychology / psychofortology conducted in the multi-cultural South African context with its diverse populations and settings. The volume reflects basic as well as applied well-being research in the multicultural South African context, as conducted in various contexts and with a variety of methods and foci. Theoretical, review, and empirical research contributions are made, reflecting positivist to constructivist approaches, and include quantitative, qualitative, and mixed-method approaches. Some findings support universality assumptions, but others uncovered unique cultural patterns. Chapters report on well-being research conducted in the domains of education, work, health, and family, and in clinical, urban vs. rural, and unicultural vs. multicultural contexts. Studies span the well-being of adolescents, adults, and older people, and topics include resilience in individuals, families, and groups, measurement issues and coping processes, the role of personal and contextual variables, and facets such as hope, spirituality, self-regulation, and

interventions.

This groundbreaking study of lesbian survivors of childhood sexual abuse is a powerful and critically needed entry in the field of survival and recovery literature. 60 courageous lesbian survivors share their personal stories of recovery from the earliest stages of remembering the abuse, to understanding and ultimately overcoming the defense mechanisms that children adopt to survive it, to addressing the endemic feelings of horrible isolation and shame. This collection provides victims ways in which to become survivors, and endows them with a vision of hope for the future.

**Psikologi Untuk Indonesia Maju dan Beretika** - Neila Ramdhani (Editor) 2018-05-25

Bangsa yang besar adalah bangsa yang peduli terhadap sumber daya dan berbagai proses yang ada di bumi. Kebesaran itu tidak akan terpelihara tanpa kepedulian dari para warganya. Berbagai tindakan berkedok demi memajukan bangsa sering kali ditumpangi tujuan jangka pendek dan kepentingan orang-orang tertentu saja. Buku kedua dari Seri Psikologi untuk Indonesia ini memuat kajian utama tentang korupsi, yang hingga kini masih merupakan salah satu perilaku yang terbukti merusak generasi, baik dari kesempatan memperoleh sumber daya yang seharusnya dapat dinikmati maupun mental yang menentukan kemampuan untuk bertahan. Harapan pertama jatuh kepada proses pendidikan dan pemahaman terhadap perubahan dan dinamika perkembangan moral generasi penerus. Apa daya harapan ini masih menggelayut tanpa tahu kapan akan mendekat sehingga masih membutuhkan waktu untuk mewujudkannya. Berbagai upaya yang terkait permasalahan psikologis ini perlu memperhatikan terhadap persepsi, harapan, maupun evaluasi masyarakat terhadap apa yang dilakukan. Kepedulian dalam membangun bisnis, berkomunikasi, maupun pengembangan riset yang beretika menjadi fokus kedua dari buku ini. Bahasan lain yang juga berfokus terhadap advokasi literasi kesehatan mental, baik kepada masyarakat umum maupun anak/remaja usia sekolah hingga insan berusia emas 'lansia'. Berbagai upaya yang dilakukan akan semakin memberikan dampak positif manakala konsep pendidikan yang khas budaya Indonesia dijadikan referensi dalam mengembangkan proses menuju terciptanya insan psikologi yang dirindukan masyarakat.
