Utopia - Alistair Fox 1993

Thomas More's Utopia remains indisputably the most potent work in the genre of writing that it initiated and in fact named. Since it was published in 1516 - in a Tudor-ruled England responding to the wave of humanist thought sweeping across Europe - this fantasy voyage has inspired centuries of social reformers, who have embraced More's fiction as a realistic blueprint for a new, ideal society. On the literary side, writers from Jonathan Swift to George Orwell have plied the genre More invented, and yet none has arrived at a conclusion more prophetic than the original: that the dogged quest for an imagined ideal generates doubt that this ideal would be as attractive in practice as in theory, and that, given what we know of human nature, such an ideal could ever be implemented. In Utopia: An Elusive Vision Alistair Fox places More's masterwork in the context of the reform aspirations of early-sixteenth-century European humanists, tracing the stages of its composition to show how and why the book came to be inherently paradoxical and showing us why the book in many ways presaged the rise of Martin Luther and the watershed Protestant Reformation. Fox lucidly explores the complex, equivocal nature of More's vision, which, he contends, was conditioned not only by More's recognition that people's desire for ideal social order conflicts with many of their most basic impulses but also by his propensity for seeing most issues simultaneously from contradictory perspectives. This paradox and tension led More to create a fiction that, according to Fox, allows human imperfection to interrogate the validity of the "ideal" society the fiction presents, without confirming or subverting it. With Utopia More encourages readers to explore what he reveals to be a perpetual dilemma in utopianism itself. Fox concludes that, by thus encompassing and provoking the full range of reactions that subsequent utopias and "dystopias" would likely elicit, More's Utopia is both the prototype and epitome of the utopian genre itself. Fox's engaging study is the most extensive treatment of Utopia to date, examining the work as one which evolved in response to More's changing emotional perceptions and treating More's text as a vehicle for intellectual exploration rather than a definitive proclamation. Utopia: An Elusive Vision, replete with historical detail and an overview of criticism

of More's text through four centuries, allows readers to discern for themselves the features that contribute to Utopia's intellectual and rhetorical complexity.

Megalithic Research in the Netherlands, 1547-1911 - Jan Albert Bakker 2010

The impressive megalithic tombs in the northeastern Netherlands are called 'hunebedden', meaning 'Giants' graves'. These enigmatic Neolithic structures date to around 3000 BC and were built by the Funnelbeaker, or TRB, people. The current interpretation of these monuments, however, is the result of over 400 years of megalithic research, the history of which is recorded in this book. The medieval idea that only giants could have put the huge boulders of which they were made into position was still defended in 1660. Others did not venture to explain how hunebeds could have been constructed, but ascribed them to the most ancient, normally sized inhabitants. 16th-century writings speculated that Tacitus was referring to hunebeds when he wrote about the 'Pillars of Hercules' in Germania. Titia Brongersma is the first person recorded to do excavations in a hunebed, in 1685. The human bones she excavated were from normally sized men and suggested that such men, not giants, had constructed the hunebeds. Other haphazard diggings followed, but much worse was the invention of stone covered dikes which required large amounts of stone. This launched a widespread collection of erratic boulders, which included the hunebeds. Boundary stones were stole and several hunebeds were seriously damaged or they vanished completely. Such actions were forbidden in 1734, by one of the earliest laws protecting prehistoric monuments in the world. From the mid 18th century onwards a variety of eminent but relatively unknown researchers studied the hunebeds, including Van Lier (1760), Camper and son (1768-1808), Westendorp (1815), Lukis and Dryden (1878) and Pleytet (1877-1902). This intriguing history of ancient hunebed research ends in 1912, when the modern, systematic excavations of complete hunebeds began and continued until 1985. In the Introduction, a brief general review is given of the present knowledge and ideas about the Hunebed Builders, who lived some 5000 years ago during the Stone Age. The book is illustrated with a large number of drawing and prints from the 16th to the 20th century. An extensive summary in German is included. A brief description of all 53 existing hunebeds and 21-24 excavated demolished ones is included in the appendices.

The Girdle of Chastity - Eric John Dingwall 1992

Ceci N'est Pas Une Hache - Karsten Wentink 2006

As early as the 19th century discoveries of groups of large axes puzzled those confronted with them. The fact that most were found in waterlogged places increased the speculation as to the nature of the deposits. This thesis is concerned with the character and significance of TRB flint axe depositions. The first part is mainly concerned with the question of selective deposition and how it was structured. By means of

metrical, spatial and functional analysis, patterns are explored that can shed light on the actions performed by people in the past. The second part deals with the meaning and significance of TRB flint axe depositions. Why did people in the past do the things they did, how were these actions meaningful and important? Using sociological theory and ethnographic evidence an interpretation is presented based on the empirically observed patterns.

The Medieval Chastity Belt - A. Classen 2007-03-19

The chastity belt is one of those objects people have commonly identified with the 'dark' Middle Ages. This book analyzes the origin of this myth and demonstrates how a convenient misconception, or contorted imagination, of an allegedly historical practice has led to profoundly flawed interpretations of control mechanisms used by jealous husbands.

A.I.D. and the Universities - John William Gardner 1964

The TRB West Group - Jan Albert Bakker 2009

A classic study of the pottery of the TRB West group, originally published in 1979. Bakker deals with the research history and typochronology of the TRB pottery. Also he gives a detailed account of the other TRB finds

such as flint and stone artefacts and of course the most important TRB sites. Over the years this book has become a standard-work for anyone who is interested in hunebeds and their makers. The author has written a new introduction to this reprint in which he describes how the book of 1979 came together and the research that has been carried out since then.

The Oxford Handbook of Wetland Archaeology - Francesco Menotti 2013
