**Quirky, Yes---Hopeless, No** - Beth Wagner  
Brust 2009-08-04

In Quirky, Yes—Hopeless, No, Dr. Cynthia La Brie Norall and Beth Brust present short lessons, structured around specific topics from A-Z that address the social challenges faced by Asperger's children and teens. Since everyday "people skills" do not come naturally to children with Asperger's, they need training in such simple activities as:

- How to greet others and make eye contact
- How to let go and move on to new tasks
- How to cooperate and ask for help
- How to pay compliments
- How to discern someone's true intentions
- How to handle teasing and bullying
- How not to be rude.

Based on Dr. Norall's twenty years of experience diagnosing and treating thousands with Asperger's, this book will share her insights gained from helping so many friendless Asperger's children become more approachable, less stuck, and finally able to make, and keep, a

friend or two. "This is a fantastic book for helping people on the autism spectrum learn social skills."--Temple Grandin, author of The Way I See It: A Personal Look at Autism and Asperger's

Relationship Development Intervention with Children, Adolescents and Adults - Steven Gutstein 2002-02-15

Yet establishing and maintaining such bonds is particularly difficult for people on the autism spectrum. This volume contains over 200 enjoyable and stimulating activities and exercises ranging over the entire gamut of social and emotional development, and is applicable to anyone, regardless of diagnosis, but will be particularly valuable for those on the autism spectrum. **Awakening Children's Minds** - Laura E. Berk  
2004-05-06

Parents and teachers today face a swirl of conflicting theories about child rearing and educational practice. Indeed, current guides are contradictory, oversimplified, and at odds with current scientific knowledge. Now, in *Awakening Children's Minds*, Laura Berk cuts through the confusion of competing theories, offering a new way of thinking about the roles of parents and teachers and how they can make a difference in children's lives. This is the first book to bring to a general audience, in lucid prose richly laced

with examples, truly state-of-the-art thinking about child rearing and early education. Berk's central message is that parents and teachers contribute profoundly to the development of competent, caring, well-adjusted children. In particular, she argues that adult-child communication in shared activities is the wellspring of psychological development. These dialogues enhance language skills, reasoning ability, problem-solving strategies, the capacity to bring action under the control of thought, and the child's cultural and moral values. Berk explains how children weave the voices of more expert cultural members into dialogues with themselves. When puzzling, difficult, or stressful circumstances arise, children call on this private speech to guide and control their thinking and behavior. In addition to providing clear roles for parents and teachers, Berk also offers concrete suggestions for creating and evaluating quality educational environments--at home, in child care, in preschool, and in primary school--and

addresses the unique challenges of helping children with special needs. Parents, Berk writes, need a consistent way of thinking about their role in children's lives, one that can guide them in making effective child-rearing decisions. Awakening Children's Minds gives us the basic guidance we need to raise caring, thoughtful, intelligent children.
