Coping Strategies Following Sexual Harassment Carolyn Julie Neilson 1996

Sexual Harassment at a University Marta Vohlídalová 2012 The aim of this chapter is to show how students react to sexual harassment initiated by professors and what strategies they use to cope with the situation, given that the issue of sexual harassment is marginalised, and Czech universities have no anti-harassment policies in place. Students are forced to cope with harassment on their own. The strategies they adopt can be divided into three types: participatory, passive tolerance and active resistance. Analysis showed that students often experienced serious problems when dealing with this conduct.

Women's Perceptions of Helpful and Hindering Incidents in Coping with Sexual Harassment Tracey Garber 2010 This qualitative study employed the Critical Incident Technique to examine women's perceptions of helpful and hindering incidents in experiences of coping with sexual harassment. Fifteen women completed individual interviews as participants for the study. Incidents were extracted from interview data and sorted into helpful and hindering incidents in the context of actions of participants versus actions of others. Fifteen major categories and nine subcategories were formed. Emotional support, seeking social support (i.e., protecting younger coworkers, banding together with other women, confiding in female coworker), and incidents which helped stop the harassment were described as significantly helpful. Incidents in which harassment did not stop or was perceived to get worse, or incidents in which the participant did not feel emotionally supported and even blamed for being in the situation were described as significantly hindering. Implications for counseling practice and employers are presented and recommendations for future research are discussed. --P.ii.

Lean In Sheryl Sandberg 2013-03-12 Sheryl Sandberg's *Lean In* is a massive cultural phenomenon and its title has become an instant catchphrase for empowering women. The book soared to the top of bestseller lists internationally, igniting global conversations about women and ambition. Sandberg packed theatres, dominated opinion pages, appeared on every major television show and on the cover of *Time* magazine, and sparked ferocious debate about women and leadership. Ask most women whether they have the right to equality at work and the answer will be a resounding yes, but ask the same women whether they'd feel confident asking for a raise, a promotion, or equal pay, and some reticence creeps in. The statistics, although an improvement on previous decades, are certainly not in women's favour - of 197 heads of state, only twenty-two are women. Women hold just 20 percent of seats in parliaments globally, and in the world of big business, a meagre eighteen of the Fortune 500 CEOs are women. In *Lean In*, Sheryl Sandberg - Facebook COO and one of *Fortune* magazine's Most Powerful Women in Business - draws on her own experience of working in some of the world's most successful businesses and looks at what women can do to help themselves, and make the small changes in their life that can effect change on a more universal scale.

Sexual Abuse Olivia Parsons 2016 Approximately 1 in 4 girls and 1 in 6 boys below the age of 18 are victims of child sexual abuse (CSA) according to the Centers for Disease Control and Prevention. A wealth of peer-reviewed literature has investigated interventions for child victims and adult survivors of CSA; however, there has been a lack of focus on the therapeutic needs of nonoffending parents and caregivers (NOPC) of child victims. In the wake of their children's sexual abuse, NOPC are at risk of a host of mental health disorders, and researchers estimate their symptomology continues for two years following the disclosure or discovery. *Sexual Abuse: Intervention, Coping Strategies and Psychological Impact* begins with a framework for group counseling for NOPC, and discusses alternative and parallel interventions for NOPC while providing recommendations for future research. Chapter Two continues on to provides an overview of CSA and intervention in India. Chapter Three focuses on two historically persecuted groups, Orthodox Jews and Muslims, and the religious values that may enhance culturally competent interviewing skills in child sexual abuse interviews. Chapter Four presents potential cognitive mediators associated with the psychological impact of childhood sexual abuse by reviewing past and current literature on the effects of this type of abuse. Chapter Five addresses the gap in current knowledge and understanding of male sexual abuse.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Definitions and Coping Suggestions for Victims of Sexual Harassment Among Nontraditional American and Japanese College Students Cari L. Colton 1997 "Sexual harassment is a problem for many women in the workplace, both within the United States and internationally, that brings about consequences not only for the individuals involved, but also for organizations (Hanish, 1996). Research has suggested that perceptions of sexual harassment may vary based on several variables (e.g. gender, cultural background, and sex-role identity). The current study focused on the effects of gender and culture (American vs. Japanese) on perceptions of and suggestions for coping with sexual harassment among nontraditional persons. Information regarding gender, culture, and sex-, role identity was collected from study participants. Participants were then given four scenarios depicting situations of sexual harassment, varying on level of ambiguity and situation setting, and asked 1) to rate the degree to which the scenario represented an incident of sexual harassment and 2) the likelihood of recommending various coping suggestions to victims. Statistical analyses found no significant differences in perceptions of sexual harassment for obvious scenarios. Significant

culture and culture by gender effects showed that Japanese participants were more likely to rate the ambiguous workplace scenario as sexual harassment, with Japanese males' ratings highest. A significant gender effect was found for the ambiguous school scenario, with females rating the situation as more sexually harassing than did males. In regard to coping suggestions, general trends indicate that Japanese participants were more likely to recommend private coping strategies, while American participants were more likely to recommend public coping strategies"--Document.
