Making the Body Beautiful - Sander L. Gilman 2021-12-07

Nose reconstructions have been common in India for centuries. South Korea, Brazil, and Israel have become international centers for procedures ranging from eyelid restructuring to buttock lifts and tummy tucks. Argentina has the highest rate of silicone implants in the world. Around the globe, aesthetic surgery has become a cultural and medical fixture. Sander Gilman seeks to explain why by presenting the first systematic world history and cultural theory of aesthetic surgery. Touching on subjects as diverse as getting a "nose job" as a sweet-sixteen birthday present and the removal of male breasts in seventh-century Alexandria, Gilman argues that aesthetic surgery has such universal appeal because it helps people to "pass," to be seen as a member of a group with which they want to or need to identify. Gilman begins by addressing basic questions about the history of aesthetic surgery. What surgical procedures have been performed? Which are considered aesthetic and why? Who are the patients? What is the place of aesthetic surgery in modern culture? He then turns his attention to that focus of countless human anxieties: the nose. Gilman discusses how people have reshaped their noses to repair the ravages of war and disease (principally syphilis), to match prevailing ideas of beauty, and to avoid association with negative images of the "Jew," the "Irish," the "Oriental," or the "Black." He examines how we have used aesthetic surgery on almost every conceivable part of the body to try to pass as younger, stronger, thinner, and more erotic. Gilman also explores some of the extremes of surgery as personal transformation, discussing transgender surgery, adult circumcision and foreskin restoration, the enhancement of dueling scars, and even a performance artist who had herself altered to resemble the Mona Lisa. The book draws on an extraordinary range of sources. Gilman is as comfortable discussing Nietzsche, Yeats, and Darwin as he is grisly medical details, Michael Jackson, and Barbra Streisand's decision to keep her own nose. The book contains dozens of arresting images of people before, during, and after surgery. This is a profound, provocative, and engaging study of how humans have sought to change their lives by transforming their bodies.

Masculinities without Men? - Jean Bobby Noble 2010-10-01

Conventional ideas about gender and sexuality dictate that people born with male bodies naturally possess both a man's identity and a man's right to authority. Recent scholarship in the field of gender studies, however, exposes the complex political technologies that construct gender as a supposedly unchanging biological essence with self-evident links to physicality, identity, and power. In *Masculinities without Men?* Jean Bobby Noble explores how the construction of gender was thrown into crisis during the twentieth century, resulting in a permanent rupture in the sex/gender system, and how masculinity became an unstable category, altered across time, region, social class, and ethnicity.

The Hidden Case of Ewan Forbes - Zoë Playdon 2021-11-02

This life story of an aristocratic trans man whose secret 1968 legal case, which forced him to defend his male status, had a profound impact on trans rights for decades is a singular contribution to trans history and the ongoing struggle for trans rights.

A New Youth? - Elisabetta Ruspini 2016-03-16

A New Youth? provides a cross-cultural perspective on the challenges

and problems posed by young people's transition to adulthood. The authors address questions such as: What are the experiences of being young in different European countries? What can we learn about the differences of being young in non-European countries? Are young people developing new attitudes towards society? What are the risks associated with the transition of youth to adulthood? Can we identify new attitudes about citizenship? On a more general level, are there experiences and new social meanings associated with youth? The volume is comparative between various European and non-European countries in order to identify the emerging models of transition. These characteristics are connected with broader social, political and cultural changes: changes related to extended education, increasing women's participation in the labour market, changing welfare regimes, as well as changes in political regimes and in the representation and construction of individual identities and biographies, towards an increasing individualization. The work offers critical reflections in the realm of sociology of youth by providing broader understandings of the term 'youth'. The detailed analysis of new forms of marginality and social exclusion among young people offers valuable insight for policy development and political debate.

Debates in Transgender, Queer, and Feminist Theory - Patricia Elliot 2016-05-13

Transgender studies is a heterogeneous site of debate that is marked by tensions, border wars, and rifts both within the field and among feminist and queer theorists. Intersecting the domains of women's studies, sexuality, gender and transgender studies, *Debates in Transgender, Queer, and Feminist Theory* provides a critical analysis of key texts and theories, engaging in a dialogue with prominent theorists of transgendered identity, embodiment and sexual politics, and intervening in various aspects of a conceptually and politically difficult terrain. A central concern is the question of whether the theories and practices needed to foster and secure the lives of transsexuals and transgendered persons will be promoted or undermined - a concern that raises broader social, political, and ethical questions surrounding assumptions about gender, sexuality, and sexual difference; perceptions of transgendered embodiments and identities; and conceptions of divergent desires, goals and visions.

Queering Families - Carla A. Pfeffer 2017

This publication explores a social landscape that continues to challenge the very notion of what constitutes a 'same-sex' or an 'opposite-sex' relationship, marriage, and family.

Cybersociety 2.0 - Steve Jones 1998-07-15

Like its predecessor, the best-selling *CyberSociety*, published in 1994, *Cybersociety 2.0* is rooted in criticism and analysis of computer-mediated technologies to assist readers in becoming critically aware of the hype and hopes pinned on computer-mediated communication and of the cultures that are emerging among Internet users. Both books are products of a particular moment in time, and serve as snapshots of the concerns and issues that surround the burgeoning new technologies of communication. After a brief introduction to the history of computer-mediated communication, each essay in this volume highlights specific cyber societies and how computer-mediated communication affects the notion of self and its relation to community. Contributors probe issues of community, standards of conduct, communication, means of fixing identity, knowledge, information, and the exercise of power in social relations.

Dear Sir Or Madam - Mark Nicholas Alban Rees 1996

"Her perplexed parents saw their daughter as a very awkward adolescent. Brenda Rees hated being 'awkward', and hated even more her female role and body. No one seemed to understand that 'she' was really a 'he'. Young Brenda saw no hope of relieving this conflict; her apparently unique condition condemned her to isolation, verbal abuse and misunderstanding. She spent five useless months in a psychiatric hospital. But at the age of twenty-seven, Brenda discovered the existence of transsexualism. She was not alone, and it appeared that help was at hand." "Dear Sir or Madam tells of Brenda's struggle through adolescence and into adulthood - her search for understanding, the long

and tortuous process of becoming Mark, his legal battles and his media exposure. In becoming himself, Mark was enabled to live a richer and fuller life than he could ever have done as Brenda. The book is an account of how it is possible for a known transsexual to be accepted by society. In 1994 Mark was elected as a Borough Councillor by the people amongst whom he has lived all his life."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
Female Masculinity - Judith Halberstam 1998

Masculinity without men. In *Female Masculinity* Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among "transgender dykes"--lesbians who pass as men--and female-to-male transsexuals who may find the label of "lesbian" a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.

Dear Sir Or Madam - Mark Nicholas Alban Rees 2009

Body Parts - Christopher E. Forth 2005

In many forms of discourse, specific parts of the human anatomy may signify the whole body/person. In this volume, scholars from a variety of historical and cultural studies disciplines examine scientific, medical, popular, and literary texts, paying special attention to the different strategies employed in order to establish authority over the body through the management of a single part. By considering body parts that are usually ignored by scholars, these essays render the idea of a single, coherent body untenable by demonstrating that the body is not a transhistorical entity, but rather, deeply fragmented and fundamentally situated in a number of different contexts.

Just One of the Guys? - Kristen Schilt 2011-01-15

The fact that men and women continue to receive unequal treatment at work is a point of contention among politicians, the media, and scholars. Common explanations for this disparity range from biological differences between the sexes to the conscious and unconscious biases that guide hiring and promotion decisions. *Just One of the Guys?* sheds new light on this phenomenon by analyzing the unique experiences of transgender men—people designated female at birth whose gender identity is male—on the job. Kristen Schilt draws on in-depth interviews and observational data to show that while individual transmen have varied experiences, overall their stories are a testament to systemic gender inequality. The reactions of coworkers and employers to transmen, Schilt demonstrates, reveal the ways assumptions about innate differences

between men and women serve as justification for discrimination. She finds that some transmen gain acceptance—and even privileges—by becoming “just one of the guys,” that some are coerced into working as women or marginalized for being openly transgender, and that other forms of appearance-based discrimination also influence their opportunities. Showcasing the voices of a frequently overlooked group, *Just One of the Guys?* lays bare the social processes that foster forms of inequality that affect us all.

Sex in Transition - Amanda Lock Swarr 2012-11-20
