**Crazy Like Us** Ethan Watters 2011-03-24 It is well-known that US culture is a dominant force and a world-wide phenomenon. But it is possible that its most troubling export has yet to be accounted for? America has been the world leader in generating new mental health treatments and modern theories: it exports psychopharmaceuticals and categorises disorders, thereby defining mental illness and health. The outcome of these efforts is just now coming to light: it turns out that the US has not only been changing the way the world talks about and treats mental illness -- it has been changing the mental illnesses themselves. Watters travels from China to Tanzania to bring home the unsettling conclusion that the virus is the US: as Americanized ways of treating mental illnesses are introduced, they are in fact spreading the diseases and shaping, if not creating, the mental illnesses of our time.

For his grand finale Finke flew on the illustrious Icelandair. The result of all this time in the sky is this vibrant photographic documentation of the people who chose to work at 40,000 feet in the air.

*Personal Narrative of a Pilgrimage to El Medinah and Meccah* Sir Richard Francis Burton 1857 Richard Francis Burton (1821-90) was a British orientalist, soldier, spy, diplomat, and explorer best known for his travels in Arabia, Africa, and India. He was born in Torquay, on the southern coast of England, and was raised in France and Italy. It was there that he began to show his exceptional talent with languages by learning Latin, Greek, Italian, and French before he was 20. After two years at Oxford, he was dismissed on disciplinary grounds. He went on to join the British Army in India, where he served as an intelligence officer. Disguised as a Pashtun Muslim and supported by the Royal Geographical Society, in 1853 Burton undertook a hajj journey to the two Muslim holy cities of Mecca and Medina. His two-volume *Personal Narrative of a Pilgrimage to el Medinah and Meccah* recounts that journey. Burton spent years in preparation, mostly during his time in India. The journey first took him from England to Alexandria in Egypt, and further to Cairo, Suez, and Yanbu. From there he travelled to Medina and Mecca. Although Burton was not the first non-Muslim to perform the hajj, the accuracy of his well-documented account, including his measurements of the Kaaba in Mecca and his Victorian-era observations on Muslims (especially his copious notes on manners), brought him immediate fame. Burton begins the first volume of his work with a famed line of verse on cavalierism by the Arab poet al-Mutanabbi (915-65 AD): "I am well known to the night, the steeds, and the desert / the sword and [the guest], the paper and the pen." A controversial figure during his lifetime and a prolific writer and translator, Burton left behind 43 volumes of writing on his journeys and 30 volumes of translations, including of sensual books such as the *Kama Sutra* of Vatsyayana, *The Perfumed Garden* of the Cheikh Nefzaoui, and the *Arabian Nights*. He died in Trieste, in what was then Austria-Hungary.

[Surprise, Kill, Vanish](#) Annie Jacobsen 2019-05-14 From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

**The Knowledge Illusion** Steven Sloman 2018-03-13 "The Knowledge Illusion is filled with insights on how we should deal with our individual ignorance and collective wisdom." —Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don't even know how a pen or a toilet works. How have we achieved so much despite understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community

of knowledge. The key to our intelligence lies in the people and things around us. We're constantly drawing on information and expertise stored outside our heads: in our bodies, our environment, our possessions, and the community with which we interact—and usually we don't even realize we're doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone, sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge explains why we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. The Knowledge Illusion contends that true genius can be found in the ways we create intelligence using the community around us.

**Plane Insanity** Elliott Hester 2010-04-01 You're belted into a middle seat with burly businessmen on either side. It's 92 degrees in the cabin and someone forgot to use deodorant. A baby screams. A kid kicks the back of your seat. After two hours you haven't even left the taxiway. Welcome to modern airline travel! In *Plane Insanity*, Elliott Hester delivers stories that could only come from someone who "rides tin" for a living—a flight attendant. You'll hear about: \* the passenger from hell \* a smuggled python \* prostitutes working the lavatories \* a riot in coach-class \* a heist \* the anatomy of a carryon bag \* a malodorous couple \* the Mile-High Club \* and more! Fasten your seatbelts. After *Plane Insanity*, you'll never think of air travel the same way again.

The Bizarre Careers of John R. Brinkley R. Alton Lee 2022-08-16 By 1926, it seemed that John R. Brinkley's experimental rejuvenation cure—transplanting goat glands into aging men—had taken the nation by storm. Never mind that "Doc" Brinkley's medical credentials were shaky at best and that he prescribed medication over the airwaves via his high-power radio stations. To most in the medical field, he was a quack. But to his many patients and listeners, he was a brilliant surgeon, a savior of their lost manhood and youth. His rogue radio stations, XER and its successor XERA, eventually broadcast at an antenna-shattering 1,000,000 watts and not only were a megaphone for Brinkley's lucrative quackery but also hosted an unprecedented number of then-unknown country musicians and other guests. *The Bizarre Careers of John R. Brinkley* tells the story of the infamous "Goat Gland Doctor"—a controversial medical charlatan, groundbreaking radio impresario, and prescient political campaigner—and recounts his amazing rags-to-riches-to-rags career. A master manipulator and skilled con artist, Brinkley left behind a patchwork of myths and unreliable personal accounts that many writers have merely perpetuated—until now. Alton Lee brings Brinkley's infamous legacy to the forefront, exploring how he ruthlessly exploited the sexual frustrations of aging men and the general public's antipathy toward medical doctors. Lee leaves no stone unturned in this account of a man who changed the course of American institutions forever.

**Artificial Hells** Claire Bishop 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris;

the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

**Hell's Angels** Hunter S. Thompson 2012-08-01 Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, *Hell's Angels* is a gripping portrait, and the best account we have of the truth behind an American legend.

**Idea Man** Paul Allen 2012 What's it like to start a revolution? How do you build the biggest tech company in the world? And why do you walk away from it all? Paul Allen co-founded Microsoft. Together he and Bill Gates turned an idea writing software into a company and then an entire industry. This is the story of how it came about: two young mavericks who turned technology on its head; the bitter battles as each tried to stamp his vision on the future; and, the ruthless brilliance and fierce commitment. And finally, Allen's extraordinary step in walking away from it all to discover what it is you do after you've already changed the world.

**The Late American Novel** Jeff Martin 2011-03-10 Scholars, journalists, and publishers have turned their brains inside out in the effort to predict what lies ahead, but who better to comment on the future of the book than those who are driven to write them? The way we absorb information has changed dramatically. Edison's phonograph has been reincarnated as the iPod. Celluloid went digital. But books, for the most part, have remained the same--until now. And while music and movies have undergone an almost Darwinian evolution, the literary world now faces a revolution, a sudden

change in the way we buy, produce, and read books. In *The Late American Novel*, Jeff Martin and C. Max Magee gather some of today's finest writers to consider the sea change that is upon them. Lauren Groff imagines an array of fantastical futures for writers, from poets with groupies to novelists as vending machines. Rivka Galchen writes about the figurative and literal death of paper. Joe Meno expounds upon the idea of a book as a place set permanently aside for the imagination, regardless of format. These and other original essays by Reif Larsen, Benjamin Kunkel, Victoria Patterson, and many more provide a timely and much-needed commentary on this compelling cultural crossroad.

*Passionate Politics* Jeff Goodwin 2009-03-09 Emotions are back. Once at the center of the study of politics, emotions have receded into the shadows during the past three decades, with no place in the rationalistic, structural, and organizational models that dominate academic political analysis. With this new collection of essays, Jeff Goodwin, James M. Jasper, and Francesca Polletta reverse this trend, reincorporating emotions such as anger, indignation, fear, disgust, joy, and love into research on politics and social protest. The tools of cultural analysis are especially useful for probing the role of emotions in politics, the editors and contributors to *Passionate Politics* argue. Moral outrage, the shame of spoiled collective identities, or the joy of imagining a new and better society, are not automatic responses to events. Rather, they are related to moral institutions, felt obligations and rights, and information about expected effects, all of which are culturally and historically variable. With its look at the history of emotions in social thought, examination of the internal dynamics of protest groups, and exploration of the emotional dynamics that arise from interactions and conflicts among political factions and individuals, *Passionate Politics* will lead the way toward an overdue reconsideration of the role of emotions in social movements and politics generally. *The Data Science Design Manual* Steven S. Skiena 2017-07-01 This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to build systems for collecting, analyzing, and interpreting data. The *Data Science Design Manual* is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important design principles. This easy-to-read text ideally serves the needs of undergraduate and early graduate students embarking on an "Introduction to Data Science" course. It reveals how this discipline sits at the intersection of statistics, computer science, and machine learning, with a distinct heft and character of its own. Practitioners in these and related fields will find this book perfect for self-study as well. Desperately Seeking Self-Improvement Carl Cederström and André Spicer 2017-10-20 In these pages, the authors of the widely-acclaimed The Wellness Syndrome throw themselves headlong into the world of self-optimization, a burgeoning movement that seeks to transcend the limits placed on us by being merely human, whether the feebleness of our bodies or our mental incapacities. Cederström and Spicer, though willing guinea pigs in an extraordinary (and sometimes downright dangerous) range of techniques and technologies, had hitherto undertaken little by way of self-improvement. They had rarely seen the inside of a gym, let alone utilized apps that deliver electric shocks in pursuit of improved concentration. But, in the course of a year spent researching this book, they wore head-bands designed to optimize meditation, attempted to boost their memory through learning associative techniques (and failed to be admitted to MENSA), trained for weightlifting competitions, wrote what they (still) hope might become a bestselling Scandinavian detective story, enrolled in motivational seminars and tantra sex workshops, attended new-age retreats and man-camps, underwent plastic surgery, and experimented with vibrators and productivity drugs. André even addressed a London subway car whilst (nearly) naked in an attempt to boost attention. Somewhat surprisingly, the two young professors survived this year of rigorous research. Further, they have drawn deeply on it to produce a hilarious and eye-opening book. Written in the form of two parallel diaries, Desperately Seeking Self-Improvement provides a biting analysis of the narcissism and individual competitiveness that increasingly pervades a culture in which social solutions are receding and individual self-improvement is the only option left.

For the Win Cory Doctorow 2011 'For The Win' is a provocative and exhilarating tale of teen rebellion against global corporations from the New York Times best-selling author of 'Little Brother'.

**Soar** Tom Bunn 2013-10-01 Captain Bunn founded SOAR to develop effective methods for dealing with flight anxiety. Therapists who have found this phobia difficult to treat will find everything they need to give their clients success. Anxious flyers who have "tried everything" to no avail can look forward to joining the nearly 10,000 graduates of the SOAR program who now have the whole world open to them as they fly anxiety free wherever they want. This approach begins by explaining how anxiety, claustrophobia, and panic are caused when noises, motions—or even the thought of flying—trigger excessive stress hormones. Then, to stop this problem, Captain Bunn takes the reader step-by-step through exercises that permanently and automatically control these feelings. He also explains how flying works, why it is safe, and teaches flyers how to strategically plan their flight, choose the right airlines, meet the captain, and so on. Through this program, Captain Bunn has helped thousands overcome their fear of flying. Now his book arms readers with the information they need to control their anxiety and fly comfortably.

**The Customer Is Always Wrong** Jeff Martin 2008-10-01 From mom-and-pop general stores to big-box, strip-mall chains, it is impossible to consider the American experience without thinking about the buying-and-selling retail culture: the sales and the stockrooms, the shift managers, and the clock punchers. The Customer Is Always Wrong is a tragicomic and all-too revealing collection of essays by writers who have done their time behind the counter and lived to tell their tales. Jim DeRogatis, author of Let It Blurt, for example, describes hanging out with Al himself at Al Rocky's Music Store, while Colson Whitehead explains how three summers at a Long Island ice cream store gave him a lifelong aversion to all things dessert-like. This book not only shines a light on the absurdities of retail culture but finds the delight in it as well.

*The 2030 Spike* Colin Mason 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

**Air Confidential** Elliott Hester 2009 "What is it about air travel that brings out the craziest, rudest and most ridiculous side of human nature? After fourteen years as an air steward Elliot Hester still doesn't know. However, he does know all about crazy passengers, stressed-out crew and the infamous Mile High club. A tell-all exposé from real-life experience, this book reveals what really goes on behind the scenes and down the aisles of aeroplanes everywhere. Packed full of scandalous tales of drunkenness, debauchery and generally bad behaviour (and not just from the passengers), these stories are so funny you'll choke on your complimentary mini-pretzels."--Global Books in Print.

**The Pandemic Century** Mark Honigsbaum 2019-03-09 Like sharks, epidemic diseases always lurk just beneath the surface. This fast-paced history of their effect on mankind prompts questions about the limits of scientific knowledge, the dangers of medical hubris, and how we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

*Femininity in Flight* Kathleen Barry 2007-02-28 'Femininity in Flight' considers flight attendants as cultural icons, looking at how attendants redeployed the 'glamourization' used to sell air travel to campaign for professional respect, higher wages, and women's rights.
