Street Farm Michael Ableman 2016-08-17 *Street Farm* is the inspirational account of residents in the notorious Low Track in Vancouver, British Columbia—one of the worst urban slums in North America—who joined together to create an urban farm as a means of addressing the chronic problems in their neighborhood. It is a story of recovery, of land and food, of people, and of the power of farming and nourishing others as a way to heal our world and ourselves. During the past seven years, Sole Food Street Farms—now North America’s largest urban farm project—has transformed acres of vacant and contaminated urban land into street farms that grow artisan-quality fruits and vegetables. By providing jobs, agricultural training, and inclusion in a community of farmers and food lovers, the Sole Food project has empowered dozens of individuals with limited resources who are managing addiction and chronic mental health problems. Sole Food’s mission is to encourage small farms in every urban neighborhood so that good food can be accessible to all, and to do so in a manner that allows everyone to participate in the process. In *Street Farm*, author-photographer-farmer Michael Ableman chronicles the challenges, growth, and success of this groundbreaking project and presents compelling portraits of the neighborhood residents-turned-farmers whose lives have been touched by it. Throughout, he also weaves his philosophy and insights about food and farming, as well as the fundamentals that are the underpinnings of success for both rural farms and urban farms. *Street Farm* will inspire individuals and communities everywhere by providing a clear vision for combining innovative

Food and the City Jennifer Cockrall-King 2012-02-14 A global movement to take back our food is growing. The future of farming is in our hands—and in our cities. This book examines alternative food systems in cities around the globe that are shortening their food chains, growing food within their city limits, and taking their "food security" into their own hands. The author, an award-winning food journalist, sought out leaders in the urban-agriculture movement and visited cities successfully dealing with

"food deserts." What she found was not just a niche concern of activists but a global movement that cuts across the private and public spheres, economic classes, and cultures. She describes a global movement happening from London and Paris to Vancouver and New York to establish alternatives to the monolithic globally integrated supermarket model. A cadre of forward-looking, innovative people has created growing spaces in cities: on rooftops, backyards, vacant lots, along roadways, and even in "vertical farms." Whether it's a community public orchard supplying the needs of local residents or an urban farm that has reclaimed a derelict inner city lot to grow and sell premium market veggies to restaurant chefs, the urban food revolution is clearly underway and working. This book is an exciting, fascinating chronicle of a game-changing movement, a rebellion against the industrial food behemoth, and a reclaiming of communities to grow, distribute, and eat locally.

In his lifetime, Fred Patten (1940-2018)--one of the founders of furry fandom and a scholar of anthropomorphic animal literature--authored hundreds of book reviews that comprise a comprehensive critical survey of the genre. This selected compilation provides an overview from 1784 through the 2010s, covering such popular novels as Watership Down and Redwall, along with forgotten gems like The Stray Lamb and Where the Blue Begins, and science fiction works like Sundiver and Decision at Doona.

Rae Reads *Houses Made of Wood and Light* Michele Dunkerley 2012-03-14 American architect Hank Schubart was regarded as a genius for finding the perfect site for a house and for integrating its design into the natural setting, so that his houses appear to be as native to the forest around them as the trees and rocks. Salt Spring Island, one of the Gulf Islands in British Columbia, Canada, offered him a place to create the kind of architecture that responded to its surroundings, and Schubart-designed homes populate the island. Built of wood and glass, suffused with light, and oriented to views, they display characteristic features: random-width cedar siding, exposed beams, rusticated stonework. Over time, Schubart's homes on Salt Spring Island came to be considered uniquely Gulf Islands homes. This inviting book offers

the first introduction to the life and architecture of West Coast modernist Henry A. Schubart, Jr. (1916,–1998). While still in his teens, Schubart persuaded Frank Lloyd Wright to accept him as a Taliesin Fellow, and his year,– apprenticeship in the master,– workshop taught him principles of designing in harmony with nature that he explored throughout the rest of his life. Michele Dunkerley traces Schubart,– career from his early practice in San Francisco at the noted firm Wurster, Bernardi & Emmons, to his successful firm with Howard Friedman, to his most lasting professional achievements on Salt Spring Island, where he became the de facto community architect, designing more than 230 residential, commercial, educational, and religious projects. Drawing lessons from his mentors over his decades on the island, he forged an everyday architecture with his mastery of detail and inventiveness. In doing so, he helped define how the island could grow without losing its soul. Color photographs and site plans display Schubart,– remarkable homes and other commissions.
