Symposium (Esprios Classics) - Plato 2021-11-22

Plato (428/427 or 424/423 - 348/347 BC) was an Athenian philosopher during the Classical period in Ancient Greece, founder of the Platonist school of thought and the Academy, the first institution of higher learning in the Western world. He is widely considered one of the most important and influential individuals in human history, and the pivotal figure in the history of Ancient Greek and Western philosophy, along with his teacher, Socrates, and his most famous student, Aristotle. Plato has also often been cited as one of the founders of Western religion and spirituality. The so-called neoplatonism of philosophers such as Plotinus and Porphyry greatly influenced Christianity through Church Fathers such as Augustine.

Directed by Desire - June Jordan 2012-12-28

"Directed by Desire . . . is a powerful addition to the entire canon of American poetry."—Booklist
Now in paperback, *Directed by Desire* is the definitive overview of June Jordan's poetry. Collecting the finest work from Jordan's ten volumes, as well as dozens of "last poems" that were never published in Jordan's lifetime, these more than six hundred pages overflow with intimate lyricism, elegance, fury, meditative

solos, and dazzling vernacular riffs. As Adrienne Rich writes in her introduction, June Jordan "wanted her readers, listeners, students, to feel their own latent power—of the word, the deed, of their own beauty and intrinsic value." From "These Poems": These poems they are things that I do in the dark reaching for you whoever you are and are you ready? The cloth edition of *Directed by Desire* was selected as a Library Journal Poetry Book of the Year and received the Lambda Book Award for Lesbian Poetry. June Jordan taught at UC Berkeley for many years and founded Poetry for the People. Her twenty-eight books include poetry, essays, fiction, and children's books. She was a regular columnist for *The Progressive* and a prolific writer whose articles appeared in *The Village Voice*, *The New York Times*, *Ms. Magazine*, and *The Nation*. After her death in 2002, a school in the San Francisco School District was renamed in her honor.

Psychology in Everyday Life - David G. Myers 2011-02-18

Creating an exceptionally student-friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful. It's about using that type of format to provide a clear portrait of psychological science, concise but not oversimplified, all while continually answering the recurring student question: "What does this have to do with me?" David Myers' brief introduction to psychology, *Psychology in Everyday Life*, certainly does offer brief, easily manageable chapters and a colorful, image-rich design (both shaped by extensive research, class testing, and instructor/student feedback). But what makes it such an exceptional text is what flows through those chapters—rich presentations of psychology's core concepts and field-defining research, examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that is instantly recognizable as Myers'. The new edition of *Psychology in*

Everyday Life offers an extraordinary amount of new research, effective new inquiry-based study tools, and further design innovations, all while maintaining its trademark brevity and clean layout. And it is accompanied by an innovative media/supplements of the same scope as all of David Myers' more comprehensive textbooks.

The Palgrave Handbook of Intersectionality in Public Policy - Olena Hankivsky 2019-02-01

Grounded in black feminist scholarship and activism and formally coined in 1989 by black legal scholar Kimberlé Williams Crenshaw, intersectionality has garnered significant attention in the field of public policy and other disciplines/fields of study. The potential of intersectionality, however, has not been fully realized in policy, largely due to the challenges of operationalization. Recently some scholars and activists began to advance conceptual clarity and guidance for intersectionality policy applications; yet a pressing need remains for knowledge development and exchange in relation to empirical work that demonstrates how intersectionality improves public policy. This handbook fills this void by highlighting the key challenges, possibilities and critiques of intersectionality-informed approaches in public policy. It brings together international scholars across a variety of policy sectors and disciplines to consider the state of intersectionality in policy research and analysis. Importantly, it offers a global perspective on the added value and "how-to" of intersectionality-informed policy approaches that aim to advance equity and social justice.

Understanding Race, Class, Gender, and Sexuality - Lynn Weber 2010

Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition, is the only text that develops a theoretical framework for the analysis of intersectionality. Weber argues that these social systems are historically and geographically contextual power relationships that are simultaneously expressed and experienced at both the macro level of social institutions and the micro level of individual lives and small groups. This is also the only text that teaches students how to apply the theory to their own analyses. Originally published in its first edition as two separate books, the second edition integrates the main text and the case

studies into one volume. As in the previous edition, Weber uses education as an extended example to show students how to conduct a race, class, gender, and sexuality analysis. With completely updated data, this edition adds important new research in sexuality, globalization, and education. It also features new case studies, including one on Hurricane Katrina and another on the 2008 Presidential election. Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition, can be used in a variety of courses: in social inequality, communication, women's and gender studies, ethnic studies, American studies, sociology, political science, human services, and public health.

Sex-linked Inheritance in Drosophila -

Thomas Hunt Morgan 2022-08-10

The following book was written by Thomas Hunt Morgan and Calvin Bridges, and made the former world-famous. It was in the studies covered in the following publication that Morgan discovered that genes are carried on chromosomes and are the mechanical basis of heredity. These discoveries formed the basis of the modern science of genetics; and he would later win the Nobel Prize in Physiology or Medicine in 1933 for his findings.

On Intersectionality - Kimberle Crenshaw 2019-09-03

A major publishing event, the collected writings of the groundbreaking scholar who "first coined intersectionality as a political framework" (Salon) For more than twenty years, scholars, activists, educators, and lawyers--inside and outside of the United States--have employed the concept of intersectionality both to describe problems of inequality and to fashion concrete solutions. In particular, as the Washington Post reported recently, "the term has been used by social activists as both a rallying cry for more expansive progressive movements and a chastisement for their limitations." Drawing on black feminist and critical legal theory, Kimberlé Crenshaw developed the concept of intersectionality, a term she coined to speak to the multiple social forces, social identities, and

ideological instruments through which power and disadvantage are expressed and legitimized. In this comprehensive and accessible introduction to Crenshaw's work, readers will find key essays and articles that have defined the concept of intersectionality, collected together for the first time. The book includes a sweeping new introduction by Crenshaw as well as prefaces that contextualize each of the chapters. For anyone interested in movement politics and advocacy, or in racial justice and gender equity, *On Intersectionality* will be compulsory reading from one of the most brilliant theorists of our time.

The Robbers Cave Experiment - Muzafer Sherif 2010-03-01

Originally issued in 1954 and updated in 1961 and 1987, this pioneering study of "small group" conflict and cooperation has long been out-of-print. It is now available, in cloth and paper, with a new introduction by Donald Campbell, and a new postscript by O.J. Harvey. In this famous experiment, one of the earliest in inter-group relationships, two dozen twelve-year-old boys in summer camp were formed into two groups, the Rattlers and the Eagles, and induced first to become militantly ethnocentric, then intensely cooperative. Friction and stereotyping were stimulated by a tug-of-war, by frustrations perceived to be caused by the "out" group, and

by separation from the others. Harmony was stimulated by close contact between previously hostile groups and by the introduction of goals that neither group could meet alone. The experiment demonstrated that conflict and enmity between groups can be transformed into cooperation and vice versa and that circumstances, goals, and external manipulation can alter behavior. Some have seen the findings of the experiment as having implications for reduction of hostility among racial and ethnic groups and among nations, while recognizing the difficulty of control of larger groups.

Intersectional Approach - Guidroz Kathleen 2010-05-07

Intersectionality, or the consideration of race, class, and gender, is one of the prominent contemporary theoretical contributions made by scholars in the field of women's studies that now broadly extends across the humanities, social sciences, and natural sciences. Taking stock of this transformative paradigm, *The Intersectional Approach* guides new and established researchers to engage in a critical reflection about the broad adoption of intersectionality that constitutes what the editors call a new "social literacy" for scholars. In eighteen essays, contributors examine various topics of interest to students and researchers from a feminist perspective as well as through their respective disciplines, looking specifically at gender inequalities related to globalization, health, motherhood, sexuality, body image, and aging. Together, these essays provide a critical overview of the paradigm, highlight new theoretical and methodological advances, and make a strong case for the continued use of the intersectional approach both within the borders of women's and gender studies and beyond.

Prehistoric, Ancient Near Eastern & Aegean Textiles and Dress - Marie-Louise Nosch 2014-09-30

Textile and dress production, from raw materials to finished items, has had a significant impact on society from its earliest history. The essays in this volume offer a fresh insight into the emerging interdisciplinary research field of textile and dress studies by discussing archaeological, iconographical and textual evidence within a broad geographical and chronological spectrum. The thirteen chapters explore issues, such as the analysis of textile tools, especially spindle whorls, and textile imprints for reconstructing textile production in contexts as different as Neolithic Transylvania, the Early Bronze Age North Aegean and the Early Iron Age Eastern Mediterranean; the importance of cuneiform clay tablets as a documentary source for both drawing a detailed picture of the administration of a textile industry and for addressing gender issues, such as the construction of masculinity in the Sumerian kingdoms of the 3rd millennium BC; and discussions of royal and priestly costumes and clothing ornaments in the Mesopotamian kingdom of Mari and in Mycenaean culture.

Textile terms testify to intensive exchanges between Semitic and Indo-European languages, especially within the terminology of trade goods. The production and consumption of textiles and garments are demonstrated in 2nd millennium Hittite Anatolia; from 1st millennium BC Assyria, a cross-disciplinary approach combines texts, realia and iconography to produce a systematic study of golden dress decorations; and finally, the important discussion of fibres, flax and wool, in written and archaeological sources is evidence for delineating the economy of linen and the strong symbolic value of fibre types in 1st millennium Babylonia and the Southern Levant. The volume is part of a pair together with Greek and Roman Textiles and Dress: An Interdisciplinary Anthology edited by Mary Harlow and Marie-Louise Nosch.
