Cues - Vanessa Van Edwards 2022-03-03

It's not enough to have great ideas. You also need to know how to communicate them. What makes someone charismatic? Why do some people captivate a room, while others have trouble managing a small meeting? What makes some ideas spread, while other good ones fall by the wayside? Cues - the tiny signals we send to others 24/7 through our body language, facial expressions, word choices and vocal inflection - have a massive impact on how we, and our ideas, come across. Our cues can either enhance our message or undermine it. In this entertaining

and accessible guide to the hidden language of cues, Vanessa Van Edwards teaches you how to convey power, trust, leadership, likability and charisma in every interaction. You'll learn: - Which vocal cues make you sound more confident - Which body language cues assert, 'I'm a leader, and here's why you should join me' - Which verbal cues to use in pitches, branding and emails to increase trust (and generate excitement about interacting with you) - Which visual cues you are sending in your profile pictures, clothing and professional brand Whether you're pitching an investment, negotiating a job offer or having a tough conversation with a colleague, Cues can help you improve your relationships, express empathy and create meaningful connections with lasting impact. 'A must-have guide to becoming an unstoppable force' - Mel Robbins 'Packed with invaluable strategies for maximizing your message, Van Edward's energy will inspire you to become the best possible version of yourself' -

Unprotected - Miriam Grossman 2007-08-28

Our campuses are steeped in political correctness—that's hardly news to anyone. But no one realizes that radical social agendas have also taken over campus health and counseling centers, with dire consequences. Psychiatrist Miriam Grossman knows this better than anyone. She has treated more than 2,000 students at one of America's most prestigious universities, and she's seen how the anything-goes, women-are-just-like-men, "safer-sex" agenda is actually making our sons and daughters sick. Dr. Grossman takes issue with the experts who suggest that students problems can be solved with free condoms and Zoloft. What campus counselors and health providers must do, she argues, is tell uncomfortable, politically incorrect truths, especially to young patients in their most vulnerable and confused moments. Instead of platitudes and misinformation, it's time to offer them real

protection.

The Happiness Effect - Donna Freitas
2017
Sexting. Cyberbullying. Narcissism. People-and especially the media-are consumed by fears about the effect of social media on young people. We hear constantly about the dangers that lurk online, and about young people's seemingly pathological desire to share anything and everything about themselves with the entire world. Donna Freitas has traveled the country, talking to college students about what's really happening on social media. What she finds is that, while we focus on the problems that make headlines, we are ignoring the seemingly mundane, but much more widespread, problems

that occur every day. Young people, she shows, feel enormous pressure to look happy all the time-and not just basically content, but blissful, ecstatic, inspiring and successful in their personal, professional, and academic lives-regardless of how they actually feel. Of course, these young adults are not that happy, at least not all of the time, and the constant exposure to the seemingly perfect lives of other people on social media only makes them feel worse. What's more, far from wanting to share everything about themselves, they are terrified of sharing something that will come back to haunt them later in life. The rise of social media has brought about a dramatic cultural shift: the need to curate a perfect identity online that often has little to do with reality. The consequences, Freitas shows, can be very real. Drawing on an online survey and in-person interviews with students from thirteen campuses around the U.S, Freitas offers a window into the social media generation and how they use Facebook,

Snapchat, and Twitter, and other online platforms. She presents fascinating insights about how these people are consciously creating alternate identities for themselves, while also suffering from the belief that the other people they encounter online really are as perfect as their profiles appear. This is an eye-opening look at the real world of social media today

The Women of the Far Right - Eviane Leidig
2023-09-19

On mainstream social media platforms, far-right women make extremism relatable. They share Instagram stories about organic foods that help pregnant women propagate the “pure” white race and post behind-the-scenes selfies at antivaccination rallies. These social media personalities model a feminine lifestyle, at once promoting their personal brands and radicalizing their followers. Amid discussions of issues like dating, marriage, and family life, they call on women to become housewives to counteract the corrosive effects of feminism and champion the Great Replacement conspiracy theory, which motivated massacres in Christchurch, El Paso, and Buffalo. Eviane Leidig offers an in-depth look into the world of far-right women influencers, exploring the digital lives they cultivate as they seek new recruits for white

nationalism. Going beyond stereotypes of the typical male white supremacist, she uncovers how young, attractive women are playing key roles as propagandists, organizers, fundraisers, and entrepreneurs. Leidig argues that far-right women are marketing themselves as authentic and accessible in order to reach new followers and spread a hateful ideology. This insidious—and highly gendered—strategy takes advantage of the structure of social media platforms, where far-right women influencers’ content is shared with and promoted to mainstream audiences. Providing much-needed expertise on gender and the far right, this timely and accessible book also details online and offline approaches to countering extremism.

for Samoan and Sudanese youth in church contexts has given rise to new considerations of diversity, cultural identity and the religious practices and rituals that inform them. For these young people, their culture-specific churches provide a safe if "imagined community" (Anderson, 2006) in which they can express these emerging identities, which move beyond simple framings like "multicultural" to explicitly include faith practices. These identities emerge in combination with popular cultural art forms like hip hop, R-&B and gospel music traditions, and performance influences drawn from American, British and European popular cultural forms (including fashion, reality television, social media, gaming, and online video-sharing). The book also examines the ways in which diasporic experiences are reshaping these cultural and gendered identities and locations.

"Over a decade after its publication, one book on dating has people firmly in its grip." —The New

York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. How to create immense attraction through text without being awkward even if you've never texted a woman before! Do you find yourself

constantly checking your phone to see if the girl has texted you back only to be disappointed? I remember the times where I would meet a girl that was perfect for me, we would talk for hours and have amazing face to face interactions only to have our connection destroyed by texting. If you have had a similar experience, I completely understand you. I've been there. You text a girl trying to build a conversation only to have her reply with boring one word answers. When you finally do manage to have a normal conversation she leaves you on "Seen" out of the blue. You text her back and she doesn't reply until 3 hours later! Don't worry, I can guarantee you this will never happen to you again. I have dedicated my life to understand women and attraction, and to apply everything I learnt to see what works and what doesn't. My mission is to share my knowledge with you and help you discover how to create attraction with women effortlessly. Why Women Have Sex - Cindy Meston
2010-04-01

Why do women have sex? Is it purely for pleasure or the desire to reproduce? In their

ground-breaking book, clinical psychologist Cindy Meston and evolutionary psychologist David Buss investigate the underlying sexual desires of women and identify 237 distinct motivations for sex. Drawing on more than a thousand intensive interviews conducted solely for the book, as well as their pioneering research on physiological response and evolutionary emotions, Meston and Buss give us a remarkably complex and nuanced portrait of female sexuality. They explore the use of sex as a defensive tactic against a man's infidelity (protection), as a ploy to boost self-confidence (status), as a barter for gifts (resource acquisition), or even as a cure for a headache (medication). *Why Women Have Sex* explores the deep-seated psychology and biology of female sexuality, and promises to inform every woman's - and her partner's - awareness of her relationship to sex and her own sexuality.
