**Gender Protest and Same-Sex Desire in Antebellum American Literature** - David Greven 2016-04-22

Expanding our understanding of the possibilities and challenges inherent in the expression of same-sex desire before the Civil War, David Greven identifies a pattern of what he calls 'gender protest' and sexual possibility recurring in antebellum works. He suggests that major authors such as Margaret Fuller, Edgar Allan Poe, Herman Melville, and Nathaniel Hawthorne consciously sought to represent same-sex desire in their writings. Focusing especially on conceptions of the melancholia of gender identification and shame, Greven argues that same-sex desire was inextricably enmeshed in scenes of gender-role strain, as exemplified in the extent to which *The Narrative of Arthur Gordon Pym* depicts masculine identity adrift and in disarray. Greven finds similarly compelling representations of gender protest in Fuller's exploration of the crisis of gendered identity in *Summer on the Lakes*, in Melville's representation of Redburn's experience of gender nonconformity, and in Hawthorne's complicated delineation of desire in *The Scarlet Letter*. As Greven shows, antebellum authors not only took up the taboo subjects of same-sex desire and female sexuality, but were adept in their use of a variety of rhetorical means for expressing the inexpressible.

**Sex Differences** - Lee Ellis 2013-05-13

This volume is the first to aim at summarizing all of the scientific literature published so far regarding male-female differences and similarities, not only in behavior, but also in basic biology, physiology, health, perceptions, emotions, and attitudes. Results from over 18,000 studies have been condensed into more than 1,900 tables, with each table pertaining to a specific possible sex difference. Even research pertaining to how men and women are perceived (stereotyped) as being different is covered. Throughout this book's eleven years in preparation, no exclusions were made in terms of subject areas, cultures, time periods, or even species. The book is accompanied by a CD containing all 18,000+ references cited in the book. *Sex Differences* is a monumental resource for any researcher, student, or professional who requires an assessment of the weight of evidence that currently exists regarding any sex difference of interest. It is also suitable as a text in graduate courses pertaining to gender or human sexuality.

[In The Name of Love](#) - Aaron Ben-Ze'ev 2008-02-21

We yearn to experience the idealized love depicted in so many novels, movies, poems, and popular songs. Ironically, it is the idealization of love that arms it with its destructive power. Popular media consistently

remind us that love is all we need, but statistics concerning the rate of depression and suicides after divorce or romantic break up remind us what might have happened if "all that we need" is taken away. This book is about our ideals of love, our experiences, of love, the actual disparity between the two, and the manners of coping with this disparity. A major study case of the book concerns men who have murdered their wives or partners allegedly 'out of love'. It is estimated that over 30% of all female murder victims in the United States die at the hands of a former or present spouse or boyfriend. How can murdering a loved one be associated with the assumed moral and altruistic love? Not only is love intrinsically ambivalent, but it can also give rise to dangerous consequences. Some of the worst evils have been committed in the name of love (as in the name of God). A unique collaboration between a leading philosopher in the field of emotions and a social scientist, *In the Name of Love* presents fascinating insights into romantic love and its future in modern society.

*Beyond Reward: Insights from Love and Addiction* - Xiaochu Zhang  
2017-01-19

It is an interesting topic to discuss addiction and love in the context of reward. In this e-book, we begin with an animal study of comparison between drug and natural reward. Then, some papers aim to understand the reward system underlying behavioral addiction focusing on technology, for example Internet addiction and mobile phone dependence. The third part of this e-book addresses the topic of love. Considered as a whole, this e-book demonstrates that drug and behavioral addictions are frequently related with negative consequences, while romantic love is related with a positive consequence. That's why romantic love may be considered as a natural addiction. We think that the notion of romantic love as a positive addiction may offer a new view for future research in the field.

*Emergent Writing Methodologies in Feminist Studies* - Mona Livholts  
2012-03-22

Contemporary challenges for seeking new knowledge in feminist studies are intimately intertwined with methodological renewal that promotes justice and equality in changing global contexts. Written by some of the leading scholars in their fields, this edited collection focuses on the emergence of writing methodologies in feminist studies and their implications for the study of power and change. The book explores some of the central politics, ideas, and dimensions of power that shape and condition knowledge, at the same time as it elaborates critical, embodied, reflective and situated writing practices. By bringing together a variety of multi/transdisciplinary contributions in a single collection, the anthology offers a timely and intellectually stimulating contribution that deals with how new forms of writing research can contribute to promote fruitful analysis of inequality and power relations related to gender, racialisation, ethnicity, class and heteronormativity and their intersections. It also includes the complex relationship between author, text and audiences. The intended audience is postgraduates, researchers and academics within feminist and intersectionality studies across disciplines in the humanities and social sciences. The book is excellent as literature in feminist studies courses and helpful guidance for teaching writing sessions and workshops.

**In the Name of Love** - Jill Tweedie 2000-04-18

All for love, and nothing for reward. Is love the rosy, many-splendored thing that poets proclaim--or is it something altogether darker and more disturbing? Jill Tweedie's eloquent and disarming account of her own experience of love vividly illustrates how painfully and slowly she learned a truth very different from the popular myth. She explores the very nature, process, and purpose of this most powerful of human forces--and the wrongs that have been done in its name over the centuries--and concludes that perhaps love is not all we need. This is both a searing portrait of love (and the passion it inspires) and a deeply personal and affecting account of this mysterious force and its effect on one woman's life.

**Reconsidering the Emergence of the Gay Novel in English and German** - James P. Wilper 2016-02-15

In *Reconsidering the Emergence of the Gay Novel in English and German*, James P. Wilper examines a key moment in the development of the modern gay novel by analyzing four novels by German, British, and American writers. Wilper studies how the texts are influenced by and respond and react to four schools of thought regarding male homosexuality in the late nineteenth and early twentieth centuries. The first is legal codes criminalizing sex acts between men and the religious doctrine that informs them. The second is the ancient Greek erotic philosophy, in which a revival of interest took place in the late nineteenth century. The third is sexual science (or "sexology"), which offered various medical and psychological explanations for same-sex desire and was employed variously to defend, as well as to attempt to cure, this "perversion." And fourth, in the wake of the scandal caused by his trials and conviction for "gross indecency," Oscar Wilde became associated with a homosexual stereotype based on "unmanly" behavior. Wilper analyzes the four novels—Thomas Mann's *Death in Venice*, E. M. Forster's *Maurice*, Edward Prime-Stevenson's *Imre: A Memorandum*, and John Henry Mackay's *The Hustler*—in relation to these schools of thought, and focuses on the exchange and cross-cultural influence between linguistic and cultural contexts on the subject of love and desire between men.

*Women's Sexual Function and Dysfunction* - Irwin Goldstein 2005-11-17

The first, definitive text on female sexual dysfunction, this major new book summarizes the current body of knowledge in the field, traces the history of developments in the area, and identifies work still needed in the future. Reflecting a multidisciplinary approach to the subject, the book details the methods and materials for ensuring the appropriate management of women with sexual health problems, and concentrates on the presentation of evidence-based data concerning the physiology, pathophysiology, diagnosis and treatment of sexual function and dysfunction in women. The inclusion of 'difficult cases' also enhances the use of text as a practical guide to all disciplines concerned with the field of female sexual dysfunction. This important work will become a key resource for basic science researchers, endocrinologists, gynecologists, psychologists, urologists, health care clinicians, and anyone else interested in women's sexual health. All proceeds are donated to the International Society for the Study of Women's Sexual Health.

**Uniform Fantasies** - Jeffrey Schneider 2023-07-26

Starting in the nineteenth century in Germany, colourful military uniforms became a locus for various queer male fantasies, fostering an underground sexual economy of male prostitution as well as a political project to exploit the army's prestige for queer emancipation. In the first decade of the twentieth century, however, a series of scandals derailed this emancipatory project. Simultaneously, public debates began to invoke homosexuality, sadism, transvestism, and other sexological concepts to criticize military policies and practices. In pursuing the threads with which queer authors and activists stitched their fantasies about uniforms, Jeffrey Schneider offers fresh perspectives on key debates over military secrecy, disciplinary abuses in the army, and German militarism. Drawing on a vast trove of materials ranging from sexological case studies, trial transcripts, and parliamentary debates to queer activist tracts, autobiographies, and literary texts, *Uniform Fantasies* uncovers a particularly modern set of concerns about such topics as outing closeted homosexuals, the presence of gay men in the military, and whether men in uniform are more masculine or more insecure about their sexual identity.

**Tough Love** - Cynthia Burack 2014-02-01

*Exposes how ex-gay and postabortion ministries operate on a shared system of thought and analyzes their social implications.*

A staple of the culture wars, the struggle between Christian conservatives and progressives over sexuality and reproductive rights continues. Focusing on ex-gay ministries geared to helping same-sex attracted people resist their sexuality and postabortion ministries dedicated to leading women who have had an abortion to repent that decision, Cynthia Burack argues that both are motivated and characterized by a strain of compassion that is particular to Christian conservatism rather than a bias and hatred toward sexual minorities and sexually active women. This compassion reproduces the sexual ideology of the Christian right and absolves Christian conservatives from responsibility for stigma and other forms of harm to postabortive and same-sex attracted people. Using the democratic theory of Hannah Arendt, the popular fiction of Ayn Rand, and the psychoanalytic thought of Melanie Klein, Burack studies the social and political effects of Christian conservative compassion.

**Love and Sexuality** - Sarah F. Donachie 2005

The papers collected in this volume are selected from the proceedings of the Love and Sexuality conference held at the University of Leeds in 2002. They bring together a cross-section of new directions in the study of love and sexuality currently being explored in French Studies. The central focus of the collection is the representation of love, desire, erotica and sexuality in the couple, in particular in relation to depictions of women. The contributions share a common concern with problematising issues of love and sexuality across various disciplines, focusing on literary texts, cinema, gender studies, theatre studies, history, visual iconography and cultural studies, and ranging from the sixteenth century to the present day.

**This Perversion Called Love** - Margherita Long 2009-10-08

This Perversion Called Love positions one of Japan's most canonical and best translated 20th century authors at the center of contemporary debates in feminism. Examining sexual perversion in Tanizaki's aesthetic essays, cultural criticism, cinema writings and short novels from the 1930s, it argues that Tanizaki understands human subjectivity in remarkably Freudian terms, but that he is much more critical than Freud about what it means for the possibility of love. According to Tanizaki, perversion involves not the proliferation of interesting gender positions, but rather the tragic absence of even two sexes, since femininity is only defined as man's absence, supplement, or complement. In this fascinating work, author Margherita Long reads Tanizaki with a theoretical complexity he demands but has seldom received. As a critique of the historicist and gender-focused paradigms that inform much recent work in Japanese literary and cultural studies, This Perversion Called Love offers exciting new interpretations that should spark controversy in the fields of feminist theory and critical Asian studies.

**IN THE NAME OF LOVE** - Wing-Han May Chui 2017-01-27

All rights not granted by the above license are retained by the author. Abstract: Abstract of thesis entitled In the Name of Love: Violence and Aggression in Courtship among Young Adults in Hong Kong submitted by Chui Wing Han, May for the degree of Master of Philosophy at the University of Hong Kong in June 2002 Courtship violence and aggression has never been a major theme in the academic studies of interpersonal violence in Hong Kong. When data is not available, one may assume that unless courtship violence is indeed non-existent in Hong Kong, it has long been ignored as a result of the lack of relevant data. This thesis aims to examine how and why courtship violence has remained a taboo among local young adults. This study explores: (1) Hong Kong young adults' perceptions of love and intimate relationships, and (2) how these perceptions justify the use of violence, including physical violence, psychological threats or control, and sexual aggression, in the name of love. It is argued that cultural beliefs regarding gender, love, sex and marriage play an important role among young adults in articulating their experiences or expectations of intimate relationships. The approach of the study was to examine two groups of totally seven local young adults (aged 18 - 25) and thirty-seven semi-structured in-depth interviews with eighteen respondents (aged 18 - 32) concerning their understanding of love and intimacy, and, more importantly, how such understanding prevents them from narrating their experiences, such as defining them violent and unacceptable. These data were analyzed thematically with the help of the social constructionist framework. The study shows that it is important to note the sustained power of the cultural and social beliefs about gender role performance and expectations in intimate relationships. Young males/females learn how they should behave in intimacy through interaction with social institutions and significant others. However, after repeated trials and frustrations in love, the concepts of gender, love, and courtship, are redefined from their expectations of an ideal partner to a relationship, which makes them more secure about future marriage. Such beliefs about gender roles and intimate relationships makes young adults accept violence and control, as a way of negotiating and maintaining the relationships, especially when they have no other alternatives to satisfy their need for support, companionship and intimacy. For many respondents, the negative aspects conventionally associated with violent acts are effectively subsumed under the maintenance and management of their "loving" relationships. There are, however, a few respondents who did choose to end the relationship to meet their own needs and to reevaluate their dating experiences. From their accounts, young people are not totally unaware of these unhappy encounters, but most of them refuse to group them under the negative term of "violence." If violence is perceived as an undesirable part of an interpersonal relationship, the results of the study identified at least two urgent tasks. First of all, young people should be given more cultural and societal space to reconceptualize their gender roles and intimate relationships; and secondly, they should be able to conceive of more possibilities for realizing their own needs for companionship and intimacy and validation of self, and for what they see as a good life. Any education efforts and social workers' intervention ag.
