**Cultural Typologies of Love** - Victor Karandashev 2022-09-01

This timely volume offers an integrative approach and a culturally diverse view of love conceptions, experiences, and expressions, building on both individual and cultural typologies of love. It comprehensively presents cultural and cross-cultural studies on how culture affects love, and offers a systematic description of types and cultural models of love. The comprehensive reviews of methodology and findings provide a solid empirical basis for the creation of formal typologies. This book will be useful for researchers interested in cross-cultural studies of love across many disciplines. Its accessible language also makes it ideal for undergraduate and graduate students. Readers will gain a comprehensive understanding of: Cultural conceptions of love and methods for their research Multiple perspectives in the studies of love across world cultures Cultural models and typologies in an international perspective Cultural models and typologies from an interdisciplinary scientific perspective

**The Oxford Handbook of Evolutionary Psychology and Romantic Relationships** - Todd Kennedy Shackelford 2023-02-28

"Evolutionary social science is having a renaissance. This volume showcases the empirical and theoretical advancements produced by the evolutionary study of romantic relationships. The editors assembled an international collection of contributors to trace how evolved psychological mechanisms shape strategic computation and behavior across the lifespan of a romantic partnership. Each chapter provides an overview of historic and contemporary research on the psychological mechanisms and processes underlying initiation, maintenance, and dissolution of romantic relationships. Contributors discuss popular and cutting-edge methods for data analysis and theory development, critically analyse the state of evolutionary relationship science, and provide discerning recommendations for future research. The handbook integrates a broad range of topics (e.g., partner preference and selection, competition and conflict, jealousy and mate guarding, parenting, partner loss and divorce, and post-relationship affiliation) that are discussed alongside major sources of strategic variation in mating behavior, such as sex and gender diversity, developmental life history, neuroendocrine processes, technological advancement, and culture. Its content promises to enrich students' and established researchers' views on the current state of the discipline and should challenge a diverse cross-section of relationship scholars and clinicians to incorporate evolutionary theorizing into their professional work"--

**The Psychology of Interpersonal Relationships** - Ellen S. Berscheid 2016-01-08

This textbook provides an integrated and organized foundation for students seeking a brief but comprehensive introduction to the field of relationship science. It emphasizes the relationship field's intellectual themes, roots, and milestones; discusses its key constructs and their conceptualizations; describes its methodologies and classic studies; and, most important, presents the theories that have guided relationship scholars and produced the field's major research themes.

**The Handbook of Sexuality in Close Relationships** - John H. Harvey 2004-04-26

Although sexuality is an integral part of close romantic relationships, research linking these two constructs has been less systematic than other areas pertaining to close relationships. To date, researchers in communication, sociology, family studies, psychology, and psychiatry, have made significant advances in both of these fields. The editors' goal is to integrate this research into one volume. They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality. The emphasis is on theoretical integration and stimulation, methodological rigor, and critical analysis. This volume explores: \*early sexual experiences and their impact on late life sexuality; \*how life's stresses impact sexuality and satisfaction with closeness; \*the affect

of postpartum depression on sexuality; and \*the relationship between control, power, anger, as well as revenge and sexual processes in couples. The Handbook of Sexuality in Close Relationships is intended for students and researchers in the disciplines of social, clinical, developmental, and health psychology; family studies; counseling; and interpersonal, family, and health communication. An excellent reference in advanced courses in close relationships taught in psychology, communications, sociology, anthropology, and family studies, the material in Part V will also appeal to clinical psychologists, health professionals, and policymakers.

**Handbook of Cultural Psychology, First Edition** - Shinobu Kitayama 2010-01-04

Bringing together leading authorities, this definitive handbook provides a comprehensive review of the field of cultural psychology. Major theoretical perspectives are explained, and methodological issues and challenges are discussed. The volume examines how topics fundamental to psychology—identity and social relations, the self, cognition, emotion and motivation, and development—are influenced by cultural meanings and practices. It also presents cutting-edge work on the psychological and evolutionary underpinnings of cultural stability and change. In all, more than 60 contributors have written over 30 chapters covering such diverse areas as food, love, religion, intelligence, language, attachment, narratives, and work.

**The Psychology of Friendship** - Mahzad Hojjat 2017

In the late 20th and 21st centuries, the meteoric rise of countless social media platforms and mobile applications have illuminated the profound need friendship and connection have in all of our lives; and yet, very few scholarly volumes have focused on this unique and important bond during this new era of relating to one another. Exploring such topics as friendship and social media, friendship with current and past romantic partners, co-workers, mentors, and even pets, editors Mahzad Hojjat and Anne Moyer lead an expert group of global contributors as they each explore how friendship factors within our lives today. What does it mean to be a friend? What roles do friendships play in our own development? How do we befriend those across the race, ethnicity, gender, and orientation spectrums? What happens when a friendship turns sour? What is the effect of friendship - good and bad - on our mental health? Providing a much needed update to the field of interpersonal relations, *The Psychology of Friendship* serves as a field guide for readers as they shed traditional definitions of friendship in favor of contemporary contexts and connections.

**Emotions** - Monica Greco 2013-10-31

Are emotions becoming more conspicuous in contemporary life? Are the social sciences undergoing an 'affective turn'? This Reader gathers influential and contemporary work in the study of emotion and affective life from across the range of the social sciences. Drawing on both theoretical and empirical research, the collection offers a sense of the diversity of perspectives that have emerged over the last thirty years from a variety of intellectual traditions. Its wide span and trans-disciplinary character is designed to capture the increasing significance of the study of affect and emotion for the social sciences, and to give a sense of how this is played out in the context of specific areas of interest. The volume is divided into four main parts: universals and particulars of affect embodying affect political economies of affect affect, power and justice. Each main part comprises three sections dedicated to substantive themes, including emotions, history and civilization; emotions and culture; emotions selfhood and identity; emotions and the media; emotions and politics; emotions, space and place, with a final section dedicated to themes of compassion, hate and terror. Each of the twelve sections begins with an editorial introduction that contextualizes the readings and highlights points of comparison across the volume. Cross-national in content, the collection provides an introduction to the key debates, concepts and modes of approach that have been developed by social scientist for the study of emotion and affective life.

*The Moral Psychology of Love* - Arina Pismenny 2022-03-28

This book will explore the moral dimensions of love from the standpoint of political philosophy, psychology, and neuroscience.

*What's Next in Love and Sex* - Elaine Hatfield 2020

"What's Next in Love and Sex is a comprehensive examination of contemporary academic findings relating to all matters of the mind, body, and heart in the modern world. Written by one of the pioneers of love and sex research, Dr. Hatfield, along with her colleagues Dr. Purvis and Dr. Rapson, this book uses contemporary scientific findings to provide an updated and relevant explanation for why we do the things we do when we're in love, searching for love, making love, or attempting to keep a faltering relationship together. No other book will give young people such an in-depth scientific understanding of contemporary love and sex while still providing a light-hearted, accessible, and entertaining read."--

**The New Psychology of Love** - Robert J. Sternberg 2018-11-08

This is a much-needed development from the first edition that provides an update on the theory and research on love by world-renowned scientific experts. It explores love from a diverse range of standpoints: social-psychological, evolutionary, neuropsychological, clinical, cultural, and even political. It considers questions such as: how men and women differ in their love, what makes us susceptible to jealousy and envy in relationships, how love differs across various cultures? As the neuropsychological basis of love is examined, this study showcases what attracts people to one another, why love has developed the way it has over time, and what evolutionary purpose it serves. It also analyses why and when love relationships both succeed and fail, which means readers will be rewarded with a better understanding of their own relationships and those of others, as well as what can be done to build a lasting, loving relationship.

*Growing Together* - Frieder R. Lang 2004

This edited volume integrates research on people's relationships from childhood to later adulthood.

**Close Relationships** - Pamela Regan 2011-01-07

This multidisciplinary text introduces the concepts, methodologies, theories, and empirical findings of the field of interpersonal relationships. Information is drawn from psychology, communication, family studies, marriage and family therapy, social work, sociology, anthropology, the health sciences, and other disciplines. Numerous examples capture readers' attention by demonstrating how the material is relevant to their lives. Active learning is encouraged throughout. Each chapter includes an outline to guide students, key terms and definitions to help identify critical concepts, and exploration exercises to promote active thinking. Many chapters include measurement instruments that students can take and score themselves. A website for instructors features a test bank with multiple-choice and essay questions and Power Points for each chapter. This text distinguishes itself with: Its focus on family and friend relationships as well as romantic relationships. Its multidisciplinary perspective highlighting the contributions to the field from a wide array of disciplines. Its review of the relationship experiences of a variety of people (of different age groups and cultures; heterosexual and homosexual) and relationship types (dating, cohabiting, marriage, friendships, family relationships). Its focus on methodology and research design with an emphasis on how to interpret empirical findings and engage in the research process. Cutting-edge research on "cyber-flirting" and online relationship formation; the biochemical basis of love; communication and social support; bullying and peer aggression; obsession and relational stalking; sexual violence (and marital rape); and grief and bereavement. The book opens by examining the fundamental principles of relationship science along with the research methods commonly used. The uniquely social nature of humans is then explored including the impact relationships have on health and well-being. Part 2 focuses on relationship development—from attraction to initiation to development and maintenance as well as the factors that guide mate choice and marriage. The development of relationships in both friendships and romantic partnerships is explored. Part 3 examines the processes that shape our interpersonal experiences, including cognitive (thinking) and affective (feeling) processes, communicative and supportive processes, and the dynamics of love and sex. The book concludes with relationship challenges—rejection and betrayal; aggression and violence; conflict and loss; and therapeutic interventions. Intended as a text for courses in interpersonal/close relationships taught in psychology, communication, sociology, anthropology, human development, family studies, marriage and family therapy, and social work, practitioners interested in the latest research on personal relationships will also appreciate this engaging overview of the field.

*Romantic Love in Cultural Contexts* - Victor Karandashev 2016-12-24

This volume presents a conceptual, historical, anthropological, and sociological review of how culture affects our experience and expression of romantic love. What is romantic love and how is it different from and similar to other kinds of love? How is romantic love related to sex and marriage in human history and across contemporary cultures? What cultural factors mediate attraction in love? These are some of the questions the volume explores through its interdisciplinary yet focused lens. Much of the current research evidence suggests that love is a universal emotion experienced by a majority of people, in various historical eras, and in all the world's cultures. Yet, love displays in different ways because culture has an impact on people's conceptions of love and the ways they feel, think, and behave in romantic relationships. This volume summarizes classical knowledge on love and culture while at the same time focusing sharply on recent studies and cutting-edge research that has advanced the field. Divided into three parts, the volume begins by defining and analyzing the concept of romantic love and interdisciplinary approach to its study in cultural context. Part II traces the origin and evolution of romantic love both in various places throughout the world and various time periods throughout history. Part III presents the revolutionary expansion of romantic love ideas and practices in the late 20th and early 21st centuries in various parts of the world, focusing particularly on the development of romantic love as a cultural ideal of the modern cultures. Finally, the book concludes by summarizing the major achievements in this field of study and predicts future development. A timely and thoughtful addition to the literature, *Romantic Love in Cultural Contexts* delivers thought-provoking insights to researchers in relationship scholarship, sociology, anthropology, and cultural studies, and all those interested in the universal human concept of love. Overall I find Dr. Victor Karandashev is an excellent and fine scholar who has a firm grasp of both the fundamental principles of cross-cultural research and of anthropology. In our increasingly connected world *Romantic Love in Cultural Contexts* updates and adds to the descriptions and explanations of similarities and differences in romantic love across generations and cultures. Romantic love encompasses the life span, rather than being a phenomenon largely confined to youthful years. The topic of this project concerns the deepest of our sentiments and pervades life from birth to death. This book contributes to better knowledge of this phenomenon across generations. Félix Neto (Professor of Psychology) Faculdade de Psicologia e de Ciências da Educação Universidade do Porto, Portugal

**Human Sexuality** - Craig A. Hill 2008

"Human Sexuality: Personality and Social Psychological Perspectives presents the topics typically covered in human sexuality courses, rooting the presentation in a strong psychological perspective. Author Craig Hill focuses on personality and social psychological theory to provide students with a conceptual understanding of the psychological factors involved in sexuality, and he encourages students to build upon that foundation by challenging them to think critically about the material in various ways. He also emphasizes the scientific investigation of sexuality, offering a solid review of the research literature."-- Publisher's description.

*The Corsini Encyclopedia of Psychology, Volume 2* - Irving B. Weiner 2010-01-19

Psychologists, researchers, teachers, and students need complete and comprehensive information in the fields of psychology and behavioral science. The Corsini Encyclopedia of Psychology, Volume Two has been the reference of choice for almost three decades. This indispensable resource is updated and expanded to include much new material. It uniquely and effectively blends psychology and behavioral science. The Fourth Edition features over 1,200 entries; complete coverage of DSM disorders; and a bibliography of over 10,000 citations. Readers will benefit from up-to-date and authoritative coverage of every major area of psychology.

*Love Is a Story* - Robert J. Sternberg 1999-06-03

In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story,

the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? Love is a Story shows you how to find out.

**Close Relationships** - Patricia Noller 2013-05-13

Close Relationships: Functions, Forms and Processes provides an overview of current theory and research in the area of close relationships, written by internationally renowned scholars whose work is at the cutting edge of research in the field. The volume consists of three sections: introductory issues, types of relationships, and relationship processes. In the first section, there is an exploration of the functions and benefits of close relationships, the diversity of methodologies used to study them, and the changing social context in which close relationships are embedded. A second section examines the various types of close relationships, including family bonds and friendships. The third section focuses on key relationship processes, including attachment, intimacy, sexuality, and conflict. This book is designed to be an essential resource for senior undergraduate and postgraduate students, researchers, and practitioners, and will be suitable as a resource in advanced courses dealing with the social psychology of close relationships.

**Cross-Cultural Perspectives on the Experience and Expression of Love** - Victor Karandashev 2019-06-05

This ambitious volume integrates findings from various disciplines in a comprehensive description of the modern research on love and provides a systematic review of love experience and expression from cross-cultural perspective. It explores numerous interdisciplinary topics, bringing together research in biological and social sciences to explore love, probing the cross-cultural similarities and differences in the feelings, thoughts, and expressions of love. The book's scope, which includes a review of major theories and key research instruments, provides a comprehensive background for any reader interested in developing an enlightened understanding of the cultural diversity in the concepts, experience, and expression of love. Included among the chapters: How do people in different cultures conceptualize love? How similar and different are the experiences and expressions of love across cultures? What are the cultural factors affecting the experience and expression of love? Cross-cultural understanding of love as passion, joy,

commitment, union, respect, submission, intimacy, dependency, and more. A review of the past and looking into the future of cross-cultural love research. Critical reading for our global age, Cross-Cultural Perspectives on the Experience and Expression of Love promotes a thorough understanding of cross-cultural similarities and differences in love, and in so doing is valuable not only for love scholars, emotion researchers, and social psychologists, but also for practitioners and clinicians working with multicultural couples and families. "The most striking feature of this book is the broad array of perspectives that is covered. Love is portrayed as a universally found emotion with biological underpinnings. The text expands from this core, incorporating a wide range of manifestations of love: passion, admiration of and submission to a partner, gift giving and benevolence, attachment and trust, etc. Information on each topic comes from a variety of sources, cross-culturally and interdisciplinary. The text is integrative with a focus on informational value of ideas and findings. If you take an interest in how love in its broadest sense is experienced and expressed, you will find this to be a very rich text." Ype H. Poortinga, Tilburg University, The Netherlands & Catholic University of Leuven, Leuven, Belgium "In this wide-ranging book, Victor Karandashev expertly guides us through the dazzling complexity of our concept and experience of love. Not only does he show the many different ingredients that make up our conceptions of love in particular cultures, such as idealization of the beloved, commitment, union, intimacy, friendship, and others, he draws our attention to the bewildering array of differences between their applications in different cultural contexts, or to their presence or absence in a culture. In reading the book, we also get as a bonus an idea of how an elusive concept such as love can be scientifically studied by a variety of methodologies - all to our benefit. A masterful accomplishment." Kövecses Zoltán, Eötvös Loránd University, Budapest, Hungary "Long considered a research purview of only a portion of the world's cultures, we know today that love is universal albeit with many cultural differences in meaning, form, and expression. Moreover, love has a rich history of scholarship across multiple disciplines. Within this backdrop, Karandashev has compiled a remarkably comprehensive global review of how people experience and express their emotions in love. Covering the topic from a truly international and interdisciplinary perspective, this book is an indispensable source of knowledge about cultural and cross-cultural studies conducted in recent decades and is a must read for anyone interested in the universal and culturally diverse aspects of love." David Matsumoto, San Francisco State University, Director of SFSU's Culture and Emotion Research Laboratory

**Social Relationships** - Joseph P. Forgas 2008

Understanding how people initiate, develop, maintain, and terminate relationships is a core issue in psychology, and the subject matter of this book. The contributors explore and integrate the subtle influence that evolutionary, socio-cultural, and intra-psychic (cognitive, affective and motivational) variables play in relationship processes.
