**Clinical Case Formulations** - Barbara Lichner Ingram 2011-03-10

A step-by-step model for individualized case conceptualization This innovative new guide addresses the essential question facing every therapist with a new client: How do I create a treatment plan that is the best match for my client? This unique resource provides a systematic method to integrate ideas, skills, and techniques from different theoretical approaches, empirical research, and clinical experience to create a case formulation that is tailor-made for the client. Clinical Case Formulations is divided into three parts: \* Getting Started--provides an overview that sets forth a framework for case formulation and data gathering. \* 28 Core Clinical Hypotheses--offers a meta-framework embracing all theories, orientations, and mental health intervention models and presents clinical hypotheses within seven categories: Biological Hypotheses; Crisis, Stressful Situations, and Transitions; Behavioral and Learning Models; Cognitive Models; Existential and Spiritual Models; Psychodynamic Models; and Social, Cultural, and Environmental Factors. These hypotheses are combined and integrated to develop a coherent conceptualization of the client's problems. \* Steps to a Complete Case Formulation--provides a structured framework known as the Problem-Oriented Method (POM). Using the POM and integrating multiple hypotheses, the therapist learns how to think intelligently, critically, and creatively in order to develop a tailor-made treatment plan. A list of thirty-three standards

for evaluating the application of this method is provided. With this practical guide you will learn to conceptualize your clients' needs in ways that lead to effective treatment plans while finding the tools for troubleshooting when interventions fail to produce expected benefits.

**Communities in Action** - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Women's Rights in the Middle East and North Africa - Sanja Kelly 2010-07-16

Freedom House's innovative publication Women's Rights in the Middle East and North Africa: Progress Amid Resistance analyzes the status of women in the region, with a special focus on the gains and setbacks for women's rights since the first edition was released in 2005. The study presents a comparative evaluation of conditions for women in 17 countries and one territory: Algeria, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine (Palestinian Authority and Israeli-Occupied Territories), Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen. The publication identifies the causes and consequences of gender inequality in the Middle East, and provides concrete recommendations for national and international policymakers and implementers. Freedom House is an independent nongovernmental organization that supports democratic change, monitors freedom, and advocates for democracy and human rights. The project has been embraced as a resource not only by international players like the United Nations and the World Bank, but also by regional women's rights organizations, individual activists, scholars, and governments worldwide. Women's rights in each country are assessed in five key areas: (1) Nondiscrimination and Access to Justice; (2) Autonomy, Security, and Freedom of the Person; (3) Economic Rights and Equal Opportunity; (4) Political Rights and Civic Voice; and (5) Social and Cultural Rights. The methodology is based on the Universal Declaration of Human Rights, and the study results are presented through a set of numerical scores and analytical narrative reports.

**Freedom of expression and the internet** - Wolfgang Benedek 2020-09-08

An invaluable resource for students of law, politics, international relations and technology as well as for diplomats and civil society actors, this publication demonstrates how the Council of Europe contributes to ensuring that everyone's voice online can be heard. This is key to sustainable, human rights oriented and people-centred digitalisation. Human rights matter on the internet. Without freedom of expression, people cannot participate in everything that the information society has to offer. Yet online free speech is in danger. Between state laws, private rules and algorithms, full participation in the online communicative space faces many challenges. This publication explores the profound impact of the internet on free expression and how it can be effectively secured online. The second, updated edition of this introduction into the protection of freedom of expression online answers essential questions regarding the extent and limits of freedom of expression online and the role of social networks, courts, states and organisations in online communication spaces. In clear language, with vivid examples spanning two decades of internet law, the authors answer questions on freedom of expression in cyberspace. Addressing issues from the protection of bloggers to the right to access online information, the publication also shows the importance of the standard-setting, monitoring and promotion activities of international and non-governmental organisations and includes a chapter on relevant national practice. It pays special attention to the role of European human rights law and the Council of Europe as this region's most important human rights organisation.

*The Social Reintegration of Offenders and Crime*

**The Road to Freedom** - John W. Morin 2002  
A workbook for sex offenders incorporating the latest developments in relapse prevention training. It features the four-path R-P model and invites offenders, in an easy-to-read style, to examine their own approach to offending, addressing the high risk factors that trigger and maintain that approach. This book looks beyond the cognitive and behavioral linchpins of offending to the powerful emotional needs that energize deviant sex. The authors believe that only by learning to meet these needs in healthy ways can offenders attain the positive reinforcements that lead to maintaining important lifestyle changes. Newly-added sections address the role of polygraphy in sex offender treatment and the role of the Internet in sexual compulsivity.

Expert evidence in criminal proceedings in England and Wales - Great Britain: Law Commission 2011-03-22  
This project addressed the admissibility of expert evidence in criminal proceedings in England and Wales. Currently, too much expert opinion evidence is admitted without adequate scrutiny because no clear test is being applied to determine whether the evidence is sufficiently reliable to be admitted. Juries may therefore be reaching conclusions on the basis of unreliable evidence, as confirmed by a number of miscarriages of justice in recent years. Following consultation on a discussion paper (LCCP 190, 2009, ISBN 9780118404655) the Commission recommends that there should be a new reliability-based admissibility test for expert evidence in criminal proceedings. The test would not need to be applied routinely or unnecessarily, but it would be applied in appropriate cases and it would result in the exclusion of unreliable expert opinion evidence. Under the test, expert opinion evidence would not be admitted unless it was adjudged to be sufficiently reliable to go before a jury. The draft Criminal Evidence (Experts) Bill published with the report (as Appendix A) sets out the admissibility test and also provides the guidance judges would need when applying the test, setting out the key reasons why an expert's opinion evidence might be unreliable. The Bill also codifies (with slight modifications) the uncontroversial aspects of the present law, so that all the admissibility requirements for expert evidence would be set out in a single Act of Parliament and carry equal authority.
