Cognitive Behavioural Treatment of Sexual Offenders William L. Marshall 1999-12-16
Cognitive Behavioural Treatment of Sexual Offenders William L. Marshall, Dana Anderson and Yolanda Fernandez Queen's University, Ontario, Canada, and Bath Institution Sexual Offender's Program, Ontario, Canada Sexual offending is an extensive problem in our societies causing untold harm to many innocent victims. Sexual offenders typically have a personal history of abuse of various kinds and it seems that most of them would prefer to live offence-free lives. It takes courage for these offenders to face their own problems and to deal with the consequences of their actions on their victims, the victim's families, and their own families and friends. This book describes a treatment program which presses these offenders into facing the facts and taking responsibility for their actions, in a firm and supportive manner. The book's aim is to present what is currently known about the treatment of sexual offenders from both a practical and an empirical perspective. The authors describe the features that are assumed to need change and appraise the evidence in support of these assumptions. The authors present an approach to treatment which is unique and the evidence for effective treatment outcome, generally from Correctional Services of Canada programs, is among the most convincing available. Each treatment component is described and the available evidence is outlined to support the value of each component. Finally the authors consider overall evaluations of treatment outcome. All professionals involved in the treatment of sexual offenders will find this book essential for its * comprehensive review of the development and implementation of sexual offender treatment * evidence-based approach to selecting clients for treatment and to selection of treatment components * practical, detailed and research-based guidance on conducting and monitoring treatment * unique approach to treatment supported by good outcome evidence This book is published in the Wiley Series in Forensic Clinical Psychology Series Editors: Clive R. Hollin and Mary McMurrin, both of the Centre for Applied Psychology, The University of Leicester, UK

Treatment of Sex Offenders D. Richard Laws 2016-02-29 This rigorous survey offers a comprehensive rethinking of the assessment and treatment of sexual offenders for a bold challenge to practitioners. It critiques what we understand about offenders and the mechanisms of offending behaviors, and examines how this knowledge can best be used to reduce offending and relapses. To this end, experts weigh the efficacy of common assessment methods and interventions, the value of prevention programs, and the validity of the DSM's classifications of paraphilias. This strengths/weaknesses approach gives professional readers a guide to the current state as well as the future of research, practice, and policy affecting this complex and controversial field. Included in the coverage: Strengths of actuarial risk assessment. Risk formulation: the new frontier in risk assessment and management. Dynamic risk factors and offender rehabilitation: a comparison of the Good Lives Model and the Risk-Need-Responsivity Model. The best intentions: flaws in sexually violent predator laws. Desistance from crime: toward an integrated conceptualization for intervention. From a victim/offender duality to a public health perspective. A call to clear thought and accurate action, Treatment of Sex Offenders will generate discussion and interest among forensic psychologists, psychiatrists, clinical psychologists, and social workers.

Sex Offender Treatment Stephan I. Pennix 2017 Sexual offending has become one of the most important and controversial areas in the field of criminal justice. One component of particular importance is the rehabilitation of sex offenders. Each day sexual offenders are released back into society and sexual reoffending becomes one of the biggest concerns for researchers and policy makers. Treatment programs have attempted to address sexual reoffending, but few have sought to understand the perceptions of sexual offenders and their levels of engagement while in treatment. The purpose of this study is to understand sex offenders' level of satisfaction with the treatment they received while attending treatment in rural South-Western, Virginia. Sex offenders were surveyed about their experience in treatment and their satisfaction with the treatment they received. Sex offender engagement was also measured through facilitator-completed monthly progress reports: examining attendance, participation rating score, and phase in treatment. Ultimately, sex offenders who engage in the treatment process may be more likely to be satisfied with the treatment they received.

In addition to providing an essential overview of the current state of sex offender treatment, this book examines vital areas of service provision and research and points to future directions for the field. On the medical/psychological front, this volume explores the importance of recognizing comorbid psychiatric factors in treatment and of exploring central nervous system function's role as a cause of sexually inappropriate behavior. In the legislative/justice arena it illustrates a "Circles of Support" proposal that mobilizes community resources to aid the adjustment of released offenders rather than branding them as dangerous to the community. And in the area of service provision, this book presents a treatment approach for residential programs that is inspired by research on childhood behavioral problems and special education. This book will increase your effectiveness with: a model of multisystemic treatment for juvenile sex offenders a restorative justice approach for reintegrating adult offenders into the community a study of the physical/mental correlates of organic brain dysfunction a case report on the use of a pharmaceutical treatment (leuprolide acetate) for pedophiles

Understanding Sexual Offending Patrick Lussier 2020-10-25 Addressing common myths and misconceptions about sexual offending, this book highlights the current state of scientific knowledge about the origins and the development of sexual offending. It offers a critical overview of current criminal justice policies and close to 100 years of research on how to best improve these policies through theoretically-grounded and methodologically-rigorous research. Focusing on proactive prevention-oriented strategies, this book revisits popular ideas about sexual offending through an evidence-based lens, addressing ideological and populist discourse that has led to ineffective and reactive policies. It advocates for a clearly defined concept of the phenomenon of sexual offending to underpin research and treatment. Uniquely, authors consider sexual offending from the viewpoint of criminal justice research and practitioners, incorporating the sociohistorical construction of sexual offending as a social problem, developmental life course research, and the impact of social policies. This book is a call for more proactive research on the origins and the development of sexual offending over the life course.

Identifying and Treating Sex Offenders Robert Geffner 2004 *Identifying and Treating Sex Offenders: Current Approaches, Research, and Techniques* brings you up-to-date on the latest significant issues and state-of-the-art tools involved in the evaluation and treatment of adult sex offenders. Experts in the field discuss controversial topics, including diagnoses, classification, public notification, and risk assessment, to help psychologists, therapists, and social workers better understand and work with this specialized population. This book also contains accurate information about sex offender statistics and research for policymakers to use in creating policies and legal statutes that successfully deter recidivism in known sex offenders.

Social Control of Sex Offenders D. Richard Laws 2016-05-11 This book surveys the history, current status, and critical issues regarding the various mechanisms designed to control sex offenders. It shows that the social problem of sex offending is not apparently resolvable by any of the means currently employed. A large array of procedures are used in the attempt to control the difficult population of sex offenders, including: imprisonment, institutional and community treatment, community monitoring by probation and parole, electronic monitoring, registration as a sex offender, community notification of an offender's status, strict limits on behavioral movement in the community, and residence restrictions. However, these constraints on behavior are almost completely the result of public outrage regarding sensational sex crimes, overreaction of media coverage that produce inaccurate statements of potential community risk, and the efforts of the legal profession and politicians to quell this anger and foreboding by enacting legislation that supposedly confronts the risk. This book demonstrates that we have constructed a massive edifice of community control that is socially and politically driven and which has largely failed to contain sex crime.

Treating Sex Offenders Sarah Brown 2013-07-04 This book aims to provide an introduction and overview of sex offender treatment programmes, designed for students and practitioners coming to this field. It seeks to describe the development, theoretical underpinnings, treatment goals and operation of cognitive-behavioural and other programmes to an audience unfamiliar with this form of

rehabilitation. In addition, it aims to examine the effectiveness of these programmes and the difficulties associated with assessing this, the public response to treatment and also the effects on staff responsible for implementing them. The book is concerned particularly to assess the operation of sex offender treatment programmes in the UK context, considering also the issues associated with implementing programmes developed in other contexts, especially the USA and Canada. It will be of interest to practitioners, particularly those who are beginning work on sex offender treatment programmes, or others (such as health workers, social workers, probation officers) who come into contact with these programmes indirectly.

The Effect of Psychotherapy and Pharmacological Treatment on Sex Offender Relapse Rate

[microform] Kevin T. Hansen 2004 The purpose of this study was to determine if sex offender treatment programs that utilize both medication and psychotherapeutic techniques as part of their treatment regimen had a different effect on treatment outcome (as measured by recidivism rate) than programs that were solely psychotherapeutic in technique. The study made use of meta-analytic techniques to quantitatively review the treatment outcome literature that exists for this particular population. Results indicate that treatment programs that use the combination of medication and psychotherapy were able to reduce the recidivism rate of sexual offenders by a larger amount than programs that used only psychotherapy. Some of the methodological problems that exist within the current literature are reviewed and suggestions for ways to improve future research are discussed.

Remaking Relapse Prevention with Sex Offenders D. Richard Laws 2000-04-19 It is estimated that relapse prevention methods are employed in more than 90% of all North American sex offender treatment programs (of which there are more than 2,000). Comparable statistics are true in most industrialized countries around the world. Over the last decade a great deal has been learned about the treatment of sexual offenders, and particularly about relapse prevention. This sourcebook provides clinicians with the most current, practical, useable information about working with sex offenders to prevent relapse. It reflects the advances and insights of the past decade since the publication of *Relapse Prevention with Sex Offenders*, focusing on the major reconceptualizations, revisions, and innovations that will chart treatment programs for the first decade of the new millennium.

Sex Offender Treatment Programs Delivered In-person Or Virtually for Adults Convicted of Sexual Offences in Various Settings

Anusree Subramonian 2020 Sexual offending has been considered a serious crime and social issue because of the nature of the offence and its short-term and long-term effects on victims. Therapeutic interventions aiming to reduce the likelihood of reoffending (recidivism) is the core of treatment programs for individuals convicted of sexual offences (sometimes referred to in the literature as sex offender treatment programs, and herein also called sexual offence programs). Various pharmacological methods (e.g., hormonal treatment with medroxyprogesterone or cyproterone acetate, serotonergic antidepressants) and surgical methods (surgical castration) have been used in individuals convicted of sex offences.

Comprehensive psychological treatment options including components ranging from behavior therapy, cognitive behavioral therapy (CBT) and relapse prevention have been developed as

treatment programs for individuals convicted of sexual offences. In the era of telehealth, there has been interest in delivering sexual offence programs through videoconferencing or other virtual methods. The purpose of this review is to summarize evidence regarding the clinical effectiveness of sexual offence programs offered in the community, and virtually. Additionally, the report will also summarize evidence regarding the clinical effectiveness of culturally specific sexual offence programs, and evidence-based guidelines for best practice models.

Sex Offenders and Preventive Detention Bernadette McSherry 2009 How should society manage sex offenders who are released from prison? How can sex offenders be detained in a way that prevents re-offending while respecting civil liberties? Is preventive detention a type of double punishment? Do prison-based sex offender treatment programs work? What is the best way to protect the community from sex offending? Professors McSherry and Keyzer focus on three key modern policy responses to such questions, and the cases that propelled their development: Earl Shriner in Washington State, and the United States approach of detaining 'sexually violent predators' in special institutions; Dennis Ferguson in Queensland, and the Australian post-sentence detention and supervision schemes; John Cronin in Scotland, and the Scottish approach of making orders for lifelong restriction at the time of sentence.

Rehabilitating Sexual Offenders William L. Marshall 2011 While most sexual offender treatment programs take an aggressive, confrontational approach that targets the offenders' denial, research has indicated that this common approach does not appreciably alter actual risk factors related to reoffense rate. Furthermore, this approach can alienate and demoralize offenders. Over the past 40 years, William L. Marshall and colleagues have developed and refined a motivational, strength-based approach emphasizing warmth, empathy, and support for the offenders. Backed by research, this positive approach does not ignore risk factors but presents them to clients as targets for the development of strengths rather than as deficits to be overcome. Such programs in both prison and community settings achieve a broad range of treatment targets and appear to reduce recidivism for both sexual and nonsexual crimes. This landmark volume challenges how sexual offender treatment is typically conducted. It is thought-provoking reading for psychologists, psychiatrists, social workers, counselors, and parole and probation officers working with sexual offenders. In this wonderful book, Marshall and colleagues describe the surrounding theory and treatment strategies of their positive approach to working with adult sex offenders. Exceptionally well written and clearly structured, in many respects the book represents the fruits of a lifetime of profound reflection and innovation by one of the field's outstanding talents and pioneers. It is a brilliant achievement and provides a coherent and accurate integration of the tenets of positive psychology and strength-based perspectives with contemporary assessment and treatment techniques.---Tony Ward, PhD, Head of School of Psychology, Victoria University of Wellington, New Zealand This volume is a welcome addition to the small, but growing, literature on strength-based work with offenders. It is an invaluable resource for anyone interested in the field of rehabilitation, whether they be practitioners, academics, or students.---Anthony Beech, PhD, Professor of Forensic Psychology, University of Birmingham, United Kingdom
