Dot.cons - Yvonne Jewkes 2012-12-06

Cyberspace opens up infinitely new possibilities to the deviant imagination. With access to the Internet and sufficient know-how you can, if you are so inclined, buy a bride, cruise gay bars, go on a global shopping spree with someone else's credit card, break into a bank's security system, plan a demonstration in another country and hack into the Pentagon – all on the same day. In more than any other medium, time and place are transcended, undermining the traditional relationship between physical context and social situation. This book crosses the boundaries of sociological, criminological and cultural discourse in order to explore the implications of these massive transformations in information and communication technologies for the growth of criminal and deviant identities and behaviour on the Internet. This is a book not about computers, nor about legal controversies over the regulation of cyberspace, but about people and the new patterns of human identity, behaviour and association that are emerging as a result of the communications revolution.

Engaging with Policy, Practice and Publics - Hall, Sarah 2020-04-01

Available Open Access under CC-BY-NC licence. Engagement with non-academic groups and actors – such as policy-makers, industry, charities and activist groups, communities, and the public – in the co-production of knowledge and real-world impact is increasingly important in academic research. Drawing on empirical research, interdisciplinary methodologies, and broad international perspectives, this collection offers a critical examination of the liminal space of interactions between policy and research as spaces of difference and engagement, showing them to be far from apolitical. The authors consider what, and who, are present in these encounter spaces and examine how pre-existing perceptions about differences in social identity, positionality and knowledge can affect engagement, equity and research outcomes.

The Tattoo Project - Deborah Davidson
2016-12-15

Disrupting commonly held notions about who gets tattooed and why, The Tattoo Project describes, illustrates, and celebrates the social significances of commemorative tattoos. Written by scholars from various disciplines, as well as by community members and practitioners, this edited collection considers the meanings people make from their experiences of love, loss, trauma, resilience, and change, and why they choose to inscribe those meanings on their bodies. This methods-based text also examines the process of building a community-contributed

digital archive of tattoo photos and stories, the result of which inspired the contributions to this book. Writing at the intersections between the public and the private, the authors consider the production and mobilization of knowledge across communities, disciplines, and space. Featuring beautiful tattoo photography, personal narratives from project participants, and original poetry by Priscila Uppal, *The Tattoo Project* is a novel read that bridges the gap between academic and popular audiences. This timely collection is a valuable resource for courses across the social sciences and humanities and for anyone interested in tattoos and their significance.

Love, Sex and Power - Susan Blackburn 2001

This book presents new trends in writing about women in Southeast Asia, applying concepts of power in unusual areas. What really are the impediments to women sharing power? How do Vietnamese ideals of romantic love that effectively subordinate women to men? Frank interviews explode the myth that marital rape does not happen in Indonesia. There are historical and contemporary examples of the liberating influence of new work for women, and the story of how the Indonesian state spread the message of family planning. And delving into the discipline of cross-cultural women's studies itself is a considered perspective on power relations between the Western scholar and the Asian women she is studying.

Criminology - Yvonne Jewkes 2002-07-24

This reader provides a thorough grounding in issues related to the study of crime, the criminal justice system, and social control. The editors indicate crime's varied and conflicting history as well as its current debates. The mixture of historical and more recent readings shows a variety of perspectives.

Sex Crimes and Offenders - Mary Clifford 2022-05-02

Sex as Crime? - Gayle Letherby 2013-05-13

This book brings together chapters by

academics, researchers and practitioners to analyse how crimes such as sex work, domestic violence and rape and sexual assault have risen up the Government agenda in recent years. For example, the 'Paying the Price' consultation exercise on sex work in 2004, and recent legislation around sex crimes, including the Sex Offences Act (2003). This is a multi-disciplinary, social scientific, pro-feminist collection, which draws upon practice, empirical research, documentary analysis and overviews of research in the areas of sex work and sexual violence. Within Sex as Crime there are two distinct sub-sections: 'Sex for Sale' and 'Sex as Violence', but the broader and overriding link of sex as crime remains a paramount theme that spans the collection. Chapters include discussions of the impact of new regulations on street sex workers, and of street sex work on community residents, the use of the internet by men who pay for sex and men who sell it, sexual violence and identity, sex crimes against children and protecting children online and working with sex offenders. Other chapters explore reasons for such offending behaviour.

Governance Feminism - Janet Halley

2019-03-26

An interdisciplinary, multifaceted look at feminist engagements with governance across the global North and global South *Governance Feminism: Notes from the Field* brings together nineteen chapters from leading feminist scholars and activists to critically describe and assess contemporary feminist engagements with state and state-like power. Gathering examples from North America, South America, Europe, Asia, and the Middle East, it complements and expands on the companion volume *Governance Feminism: An Introduction*. Its chapters argue that governance feminism (GF) is institutionally diverse and globally distributed—emerging from traditional sites of state power as well as from various forms of governance and operating at the grassroots level, in the private sector, in civil society, and in international relations. The book begins by confronting the key role that crime and punishment play in GFeminist projects. Here, contributors explore the ideological and political conditions under which this branch of

GF became so robust and rethink the carceral turn. Other chapters speak to another face of GFeminism: feminists finding, in mundane and seemingly unspectacular bureaucratic tools, leverage to bring about change in policy and governance practices. Several contributions highlight the political, strategic, and ethical challenges that feminists and LGBT activists must negotiate to play on the governmental field. The book concludes with a focus on feminist interventions in postcolonial legal and political orders, looking at new policy spaces opened up by conflict, postconflict, and occupation. Providing a clear, cross-cutting, critical lens through which to map developments in feminist governance around the world, *Governance Feminism: Notes from the Field* makes sense of the costs and benefits of current feminist realities to reimagine feminist futures. Contributors: Libby Adler, Northeastern U; Aziza Ahmed, Northeastern U; Elizabeth Bernstein, Barnard College; Amy J. Cohen, Ohio State U; Karen Engle, U of Texas at Austin; Jacob Gersen, Harvard U; Leigh Goodmark, U of Maryland; Aeyal Gross, Tel Aviv U; Aya Gruber, U of Colorado, Boulder; Janet Halley, Harvard U; Rema Hammami, Birzeit U, Palestine; Vanja Hamzić, U of London; Isabel Cristina Jaramillo-Sierra; Prabha Kotiswaran, King's College London; Maleiha Malik, King's College London; Vasuki Nesiah, New York U; Dianne Otto, Melbourne Law School; Helen Reece; Darren Rosenblum, Pace U; Jeannie Suk Gersen, Harvard U; Mariana Valverde, U of Toronto.

Introduction to Gender - Jennifer Marchbank
2014-06-30

Thoroughly updated in this second edition, *Introduction to Gender* offers an interdisciplinary approach to the main themes and debates in gender studies. This comprehensive and contemporary text explores the idea of gender from the perspectives of history, sociology, social policy, anthropology, psychology, politics, pedagogy and geography and considers issues such as health and illness, work, family, crime and violence, and culture and media. Throughout the text, studies on masculinity are highlighted alongside essential feminist work, producing an integrated investigation of the field. Key features: A thematic structure provides a clear exploration

of each debate without losing sight of the interconnections between disciplines. World in focus boxes and international case studies offer a broad global perspective on gender studies. In-text features and student exercises, including Controversy, A critical look and Stop and think boxes, allow the reader to engage in the debates and revise the material covered. Hotlinks throughout the text make connections between chapters, allowing the reader to follow the path of particular issues and debates between topics and disciplines. New to the second edition: A new chapter explores gender through the discipline of philosophy. A new section on international relations brings this relevant topic into focus. Current discussion on the language of gender across Europe is brought in to Chapter 1. A focus on Europe and Scandinavia as well as the UK gives the text a broader scope. Examples are updated throughout to ensure the text is cutting-edge and relevant. Introduction to Gender, second edition is highly relevant to today's students across the social sciences and is an essential introduction for students of sociology, women's studies and men's studies. *EBOOK: Feminist Research in Theory and Practice* - Gayle Letherby 2003-02-16 "an extremely welcome addition to the field of feminist research." British Journal of Educational Studies This is a clear and accessible exploration of feminist method, methodology and epistemology. After situating herself and her work, Gayle Letherby charts the debates concerned with the epistemological, political and practical issues involved in doing feminist research, and places the debates within a wider consideration of the status of knowledge. The main focus of the book is then the particular and practical issues for feminist researchers. It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production. Throughout the book there is a practical emphasis on specific examples of feminist research in action and, as well as summarizing current theoretical debates, Gayle Letherby adds to them. *Feminist Research in Theory and Practice* is designed and written as a textbook for students (at advanced undergraduate and postgraduate level) but will be a valuable

resource for any researcher or individual interested in women's studies, feminism and in researching in the social sciences.

The SAGE Handbook of Feminist Theory - Mary Evans 2014-08-12

At no point in recorded history has there been an absence of intense, and heated, discussion about the subject of how to conduct relations between women and men. This Handbook provides a comprehensive guide to these omnipresent issues and debates, mapping the present and future of thinking about feminist theory. The chapters gathered here present the state of the art in scholarship in the field, covering: Epistemology and marginality Literary, visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace. The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been (and are) organized. The authors bring a shared commitment to the critical appraisal of gender relations, as well as a recognition that to think 'theoretically' is not to detach concerns from lived experience but to extend the possibilities of understanding. With this focus on theory and theorizing about the world in which we live, this Handbook asks us, across all disciplines and situations, to abandon our taken-for-granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism. It is an essential reference work for advanced students and academics not only of feminist theory, but of gender and sexuality across the humanities and social sciences.

Objectivity and Subjectivity in Social Research - Gayle Letherby 2012-10-03

Objectivity and subjectivity are key concepts in social research. This book, written by leading authors in the field, takes a completely new approach to objectivity and subjectivity, no longer treating them as opposed - as many existing texts do - but as logically and methodologically related in social research. The book debates: - the philosophical bases of objectivity and relativity - relationism and dynamic synthesis - situated objectivity - theorised subjectivity - social objects and realism - objectivity and subjectivity in practice The

authors explain complex arguments with great clarity for social science students, while also

providing the detail and comprehensiveness required to meet the needs of practising researchers and scholars.
