**GENDER DISPARITY IN INDIA UNHEARD WHIMPERS** - SIULI SARKAR 2016-06-17

Radical ideologies, revolutionary movements, political upheavals, legal frameworks and many such initiatives have been taken up to prove a Woman's Equality, and uplift her status all over the world. Though the voices raised are loud and heard; but the moot question is whether the word 'Feminism,' in its true sense, has been understood and implemented in the 'still very much' patriarchal society of today. The undercurrent answer to this question is echoed and retorted in this book on Gender studies. Elaborating on the Indian woman, this book comments on the condition of women, from ancient India to the modern day India—her transforming status; the laws devised to protect her; social taboos surmounting her; and the changing social patterns that are being brought to nullify the gender differences—be it at home, within an office and within the society. The book begins with a feminist approach to politics, movements led by the feminists, their treatment in literature, autobiographies, their contribution towards economic sectors, their health, education, e-governance, and role towards environment. A dedicated chapter elaborates on women in Tagore's work, with original text excerpts in Bengali and their literal translations. The final chapter deals with Indian women and their tryst with crime day in and out; the unchanged age-old laws which are in need of serious review; and the role of media and society in providing them the due accreditation of 'being someone'. The book is intended for the students of Gender Studies, Political Science, English, Sociology, and Media Studies.

**Gender discriminations among young children in Asia** - Collectif  
2020-10-09

Subsequent to the demographic transition, Asian countries have been experiencing deep-rooted changes in family structures. In this context, the question of gender relations within the family, and more generally within society, is crucial, in view of the increase in discriminatory practices toward women, beginning at foetal conception and continuing through all stages of life. Asia is the "black continent" for women. Estimates place the deficit in the number of women in the world at between 60 and 100 million, the vast majority of which is found on this continent. This book focuses on the intensity of female discrimination, from a demographic perspective, in the earliest stages of life, and more specifically around birth, in China, India, Pakistan, the Republic of Korea

and Taiwan. These societies share cultural characteristics that are not favourable to women: patriarchal systems, patrilineal families, socialization processes encouraging the submission of wives to their husband's family, etc. In these societies, a son is needed to perpetuate the family line and ensure social and biological reproduction of the family. These are among the reasons why they share a strong son preference, which is in some cases accentuated by economic constraints. A son is generally the only person to support his parents in old age, and as a rule help with work in the fields. Moreover, girls and women still occupy a marginal position in society, whereas a male heir offers countless advantages.

A Gender Atlas of India - Radha Kumar 2018

A Gender Atlas of India is a seminal body of work which comprehensively maps and grades India's performance from 2001 to 2016 on issues of concern for women. Taking into account 8 overall indicators and 28 sub-indicators, it looks at how India is performing on various aspects, including sex ratio, women's education, employment, health, political participation and representation; and prevention of crimes against women. Unlike previous attempts, this book examines the change in India's performance over a 15-year period, compares the situation of women in India to that in its neighborhood and internationally, and rates each Indian state and union territory individually. The findings in this book are both provocative and incentivizing for policymakers--they show that where the central and state governments share concerns India's performance on gender has improved, but where they diverge women's condition has deteriorated even further.

**Endangered Daughters** - Elizabeth Croll 2002-01-04

This unique and groundbreaking book seeks to re-focus gender debate onto the issue of daughter discrimination - a phenomenon still hidden and unacknowledged across the world. It asks the controversial question of why millions of girls do not appear to be surviving to adulthood in contemporary Asia. In the first major study available of this emotive and sensitive issue, Elisabeth Croll investigates the extent of discrimination against female children in Asia and shifts the focus of attention firmly from son-preference to daughter-discrimination. This book brings together demographic data and anthropological field studies to reveal the multiple ways in which girls are disadvantaged, from excessive child mortality to the withholding of health care and education on the basis of gender. Focusing especially on China and India, the book reveals the surprising coincidence of increasing daughter discrimination with rising economic development, declining fertility and the generally improved status of women in East and South Asia. Essential reading for all those interested in gender in contemporary society.

Sex-selective Abortion in India - Mary Elizabeth Shepherd 2008

Does sex-selective abortion have an impact on gender differentials in child morbidity and mortality in India? If prenatal discrimination against girls has been substituting for postnatal discrimination, then eliminating sex-selective abortion may lead to an increase in excess female infant and child mortality. In this careful and thorough study that employs data from a 20-year period, Dr. Mary Elizabeth Shepherd investigates the issues behind the sex ratio imbalance in India. This timely work not only has critical implications for India, but its insightful findings will also be highly informative for many countries or societies dealing with sex ratio imbalances.

**Tackling Daughter Deficits in Tamil Nadu, India** - Arjun S. Bedi 2008

A well-known demographic feature in several East and South Asian countries is the continuing decline in the proportion of girls to boys. In India, till recently, the skewed sex ratio was treated as a Northern and Western Indian phenomenon. However, analysis of the 2001 Census shows that some of the districts with the most unbalanced sex ratios lie in the Southern state of Tamil Nadu. Notwithstanding its recent addition to the list of states exhibiting daughter deficit, the state has pioneered initiatives to prevent daughter elimination and to measure daughter

deficit. The availability of district-level panel data on infant mortality and sex ratio at birth covering the years 1996-1999 and 2003, periods which may be characterized by sharp differences in programs and initiatives to reduce daughter elimination combined with spatial variation in these programs, provides an unusual opportunity to identify the causal effect of interventions on both, pre- and post-birth daughter deficit. We find evidence of daughter deficit in at least half the state's districts with a majority of the deficit (60 to 70 percent) occurring before birth, potentially due to sex selective abortion as compared to after birth due to female infanticide and neglect. The temporal analysis over the period 1996-1999 and 2003, shows a 46 percent decline in post-birth deficit, without a corresponding increase in pre-birth deficit. Our difference-in-differences estimates suggest that at least 79 percent of the decline in post-birth deficit may be attributed to the set of policy interventions pursued by the state and civil society actors.
