**East Asian Men** - Xiaodong Lin 2016-11-11

This book provides a fresh and contemporary take on the study of men and masculinity. It highlights new and exciting approaches to

sexuality, desire, men and masculinity in East Asian contexts, focusing on the interconnections between them. In doing so, it re-examines the key concepts that underpin studies of masculinity, such as homophobia, homosociality and heteronormativity. Developing new ways of thinking about masculinity in local contexts, it fills a significant lacuna in contemporary scholarship. This thought-provoking work will appeal to students and scholars of gender studies, cultural studies and the wider social sciences.

**Men Who Sell Sex** - Peter Aggleton 2014-11-13

All over the world, men as well as women exchange sex for money and other forms of reward, sometimes with other men and sometimes with women. In contrast to female prostitution, however, relatively little is known about male sex work, leaving questions unanswered about the individuals involved: their identities and self-understandings, the practices concerned, and the contexts in which they take place. This book updates the ground-breaking 1998 volume of the same name with an entirely new selection of chapters exploring health, social, political, economic and human rights issues in relation to men who sell sex. Looking at Europe, North America, Latin America and the Caribbean, Africa and the Asia-Pacific, each chapter explores questions such as: What is known about the different ways in which men exchange sex for money or other forms of reward? What are the major contexts in which sexual exchange takes place? What meanings do

such practices carry for the different partners involved? What are the health and other implications of contemporary forms of male sex work? *Men Who Sell Sex* seeks to push the boundaries both of current personal and social understandings and the practices to which these give rise. It is an important reference work for academics and researchers interested in sex work and men's health including those working in public health, sociology, social work, anthropology, human geography and development studies.

**Sex in Cyberspace** - Sarah Earle 2016-04-01

*Sex in Cyberspace* offers a bold and provocative, yet sensitively written, account of an under-investigated area of sociological enquiry. While there is a considerable amount of research documenting the experiences of sex workers, very little data exists on their male clientele. The first empirically-based volume on the experiences of men who pay for sex, this work presents a significant new source of data. The

book is based upon an extensive study of on-line forums in which both the purchasers of sexual services and the workers themselves can exchange information and views - information which is otherwise extremely difficult to obtain. Sarah Earle and Keith Sharp argue that such sites represent a significant change in the social organization of sex work and those who seek and use the services of sex workers. Shedding new light on men's sexual identity, *Sex in Cyberspace* makes a major contribution to the study of sexuality.

**Men and Sex: A Sexual Script Approach** - Philip Jeremy Graham 2017

Informed by sexual script theory, this highly readable book provides a comprehensive account of all aspects of male sexuality.

*Queer Masculinities* - John Landreau 2011-09-28

*Queer Masculinities: A Critical Reader in Education* is a substantial addition to the discussion of queer masculinities, of the interplay between queer masculinities and

education, and to the political gender discourse as a whole. Enriching the discourse of masculinity politics, the cross-section of scholarly interrogations of the complexities and contradictions of queer masculinities in education demonstrates that any serious study of masculinity—hegemonic or otherwise—must consider the theoretical and political contributions that the concept of queer masculinity makes to a more comprehensive and nuanced understanding of masculinity itself. The essays adopt a range of approaches from empirical studies to reflective theorizing, and address themselves to three separate educational realms: the K-12 level, the collegiate level, and the level in popular culture, which could be called ‘cultural pedagogy’. The wealth of detailed analysis includes, for example, the notion that normative expectations and projections on the part of teachers and administrators unnecessarily reinforce the values and behaviors of heteronormative

masculinity, creating an institutionalized loop that disciplines masculinity. At the same time, and for this very reason, schools represent an opportunity to 'provide a setting where a broader menu can be introduced and gender/sexual meanings, expressions, and experiences boys encounter can create new possibilities of what it can mean to be male'. At the collegiate level chapters include analysis of what the authors call 'homosexualization of heterosexual men' on the university dance floor, while the chapters of the third section, on popular culture, include a fascinating analysis of the construction of queer 'counternarratives' that can be constructed watching TV shows of apparently hegemonic bent. In all, this volume's breadth and detail make it a landmark publication in the study of queer masculinities, and thus in critical masculinity studies as a whole.

**Alpha Masculinity** - Eric Louis Russell  
2021-04-15

This book examines the linguistic and discursive mechanisms that realize the mythological American Alpha Male. Providing an in-depth dissection of corpora from an online socio-commercial community, a pop-psychology guru, and fictional gay erotica, it unravels the ways language, gender, and hegemony play out in this ideological figure of neopositive, essentialist masculinity. Through a detailed, multi-level analysis, Russell shows how the Alpha figure combines elements of dominance, normativity, and androcentrism and how these forces intersect with neoliberal and pseudoscientific discourses to establish a uniquely hybridized male hegemony, one that is familiar to most, but

whose internal mechanisms remain largely unquestioned and unexamined. This book will be of interest to academic scholars in sociolinguistics, discourse analysis, cultural studies, and gender and sexualities studies.

**Male Sexuality** - Michael J. Bader 2009

At first glance the sexual male seems easy to understand, but beneath the surface lie complexities that disrupt lives and relationships. Respected psychologist Michael Bader takes an honest look at the nuances of male sexuality, addressing issues such as sexual boredom, internet sex, and sexual fantasies that can leave women bewildered and men ashamed. Illustrated with engaging examples from his practice, *Male Sexuality* gives readers, both women and men, deeper understanding of male behavior. Through increased awareness of the psychology behind the sex, Bader aims to enhance individual self-esteem and improve communication in relationships.

*Male to Male* - Edward Tejirian 2013-04-03

Explore the feelings of men toward other men without the pigeonholing found in terms like “gay” and “straight”! *Male to Male: Sexual Feeling Across the Boundaries of Identity* starts with the evidence that most studies on male sexuality have ignored--the same-sex feelings of men whose identities are heterosexual. Of the more than fifty men in this book, almost half were aware of some degree of same-sex feeling. But beyond percentages, the primary focus of *Male to Male* is the exploration--through their own words--of how these men experienced same-sex feelings, what these feelings meant to them, the fears surrounding them, and the consequences of the collision between their

heterosexual identities and their same-sex feelings. In addition to comparative data on women's same-sex feelings, as well as on what men say in regard to their feelings about women, Male to Male includes material from two in-depth case studies. The first is on Clark, an African-American man who moved into sex with men in prison. His story shows that the need to see gay men as feminine is really a cultural defense against the powerful pull toward the male-to-male bond, and points to the movement to fulfill that bond when this defense is dropped. The second is on Zack, a gay police officer. His story explores the different dimensions and meanings of the male-to-male bond as these unfolded in his own life, while telling about the heterosexually identified men who "came out" to him about their own same-sex feelings. Male to Male will help you explore: same-sex feelings in heterosexual men and women same-sex feelings in the military prison culture and the "heterosexual role" the fear of domination the

aesthetics of fear and power the dynamics of rape passionate relationships between heterosexual-identified men . . . and much more! Male to Male provides evidence showing that the identity that really counts--constituting the deepest source from which men's sexual feelings for each other spring--is not specifically a gay or heterosexual identity. That source is, rather, a male identity, and--beyond that--a human identity.

Sexuality and Eroticism Among Males in Moslem Societies - Arno Schmitt 1992

Here is the first major work published about sexuality and eroticism between males in Islamic society. Through narratives, analytic essays, descriptions, and academic treatises, Sexuality and Eroticism Among Males in Moslem Societies provides a revealing and most fascinating look into what is--for most Westerners--still a very hidden, very foreign culture. Until now there has existed a lack of solid information about sexuality in Islamic society, but this volume

portrays very clearly the relationship between same-sex eroticism and the ideal of the man as penetrator. As a result, *Sexuality and Eroticism Among Males in Moslem Societies* illuminates not only homosexuality but the whole sexual culture and role of gender in the Muslim world. The chapters focus on homosexuality among men in Morocco, Syria, Iran, Turkey, and Israel. Despite its occurrence in this region of the world, sex between males is not considered to be "homosexuality" by most men--a concept that is reiterated in chapter after chapter. In addition to major differences in the attitudes toward homosexual acts in Muslim countries and the West, this enlightening book also shows great differences among the Muslim countries themselves, depending upon the degree to which Islamic law is enforced, the impact of different western colonial influences and legal systems, and the sheer impact of cultural variation within so vast a geographic area. There are some keen observations and insights into the socialization

of boys in Islamic culture, the status and inaccessibility of women, and sex roles and attitudes toward them. *Sexuality and Eroticism Among Males in Moslem Societies* captures a sense of the Muslim countries in the process of rapid change--from the anti-modernist and religious fundamentalism of Iran to the attempts in the cities of Turkey to develop a western style gay way of life, with all the difficulties that involves. An engaging book for readers interested in gay studies, anthropologists, orientalist, historians, students of comparative law, and sexologists, it should also be read by anyone in contact with Arabs, Turks, or Persians--as tourists in Muslim countries, social service professionals working with immigrants, or friends of Muslims. commentary on gender and sexuality inclusion in the antiracist movement. In late 1995, the Million Man March drew hundreds of thousands of black men to Washington, DC, and seemed even to skeptics a powerful sign not only of black male solidarity, but also of black racial solidarity. Yet while generating a sense of community and common purpose, the Million Man March, with its deliberate exclusion of women and implicit rejection of black gay men, also highlighted one of the central faultlines in African American politics: the role of gender and sexuality in antiracist agenda. In this groundbreaking anthology, a companion to the highly successful *Critical Race Feminism*, Devon Carbado changes the terms of the debate over racism, gender, and sexuality in black America. The essays cover

such topics as the legal construction of black male identity, domestic abuse in the black community, the enduring power of black machismo, the politics of black male/white female relationships, racial essentialism, the role of black men in black women's quest for racial equality, and the heterosexist nature of black political engagement. "Featuring work by Cornel West, Huey Newton, Henry Louis Gates, Jr., A. Leon Higginbotham, Jr., Houston Baker, Marlon T. Riggs, Dwight McBride, Michael Awkward, Ishmael Reed, Derrick Bell, and many others, Devon Carbado's anthology stakes out new territory in the American racial landscape."—*Critical America*, A series edited by Richard Delgado and Jean Stephancic
