Memories of Utopia Bronwen Neil 2022-06 These essays examine how various communities remembered and commemorated their shared past through the lens of utopia and its corollary, dystopia, providing a framework for the reinterpretation of rapidly changing religious, cultural, and political realities of the turbulent period from 300 to 750 CE. The common theme of the chapters is the utopian ideals of religious groups, whether these are inscribed on the body, on the landscape, in texts, or on other cultural objects. The volume is the first to apply this conceptual framework to Late Antiquity, when historically significant conflicts arose between the adherents of four major religious identities: Greaco-Roman 'pagans', newly dominant Christians; diaspora Jews, who were more or less persecuted, depending on the current regime; and the emerging religion and power of Islam. Late Antiquity was thus a period when dystopian realities competed with memories of a mythical Golden Age, variously conceived according to the religious identity of the group. The contributors come from a range of disciplines, including cultural studies, religious studies, ancient history, and art history, and employ both theoretical and empirical approaches. This volume is unique in the range of evidence it draws upon, both visual and textual, to support the basic argument that utopia in Late Antiquity, whether conceived spiritually, artistically, or politically, was a place of the past but also of the future, even of the afterlife. *Memories of Utopia* will be of interest to historians, archaeologists, and art historians of the later Roman Empire, and those working on religion in Late Antiquity and Byzantium.

Race and Epistemologies of Ignorance Shannon Sullivan 2012-02-01 Offering a wide variety of

philosophical approaches to the neglected philosophical problem of ignorance, this groundbreaking collection builds on Charles Mills's claim that racism involves an inverted epistemology, an epistemology of ignorance. Contributors, explore how different forms of ignorance linked to race are produced and sustained and what role they play in promoting racism and white privilege. They argue that the ignorance that underpins racism is not a simple gap in knowledge, the accidental result of an epistemological oversight. In the case of racial oppression, ignorance often is actively produced for purposes of domination and exploitation. But as these essays demonstrate, ignorance is not simply a tool of oppression wielded by the powerful. It can also be a strategy for survival, an important tool for people of color to wield against white privilege and white supremacy. The book concludes that understanding ignorance and the politics of such ignorance should be a key element of epistemological and social/political analyses, for it has the potential to reveal the role of power in the construction of what is known and provide a lens for the political values at work in knowledge practices. prison, and medicine are enduring classics. From 1971 until his death in 1984, Foucault gave public lectures at the famous Collge de France. These seminal events, attended by thousands, created the benchmarks for contemporary social enquiry. The lectures comprising *Abnormal* begin by examining the role of psychiatry in modern criminal justice, and its method of categorising individuals who "resemble their crime before they commit it." Building on the themes of societal self-defence developed in earlier works, Foucault shows how defining "normality" became a prerogative of power in the nineteenth century, shaping the institutions-from the prisons to the family-meant to deal with "monstrosity," whether sexual, physical, or spiritual. The Collge de France lectures add immeasurably to our appreciation and understanding of Foucault's thought.

On Diary Philippe Lejeune 2009-04-30 *On Diary* is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Lejeune is a leading European critic and theorist of diary and autobiography. His landmark essay, "The Autobiographical Pact," has shaped life writing studies for more than thirty years, and his many books and essays have repeatedly opened up new vistas for scholarship. As Michael Riffaterre notes, "Lejeune's work on autobiography is the most original, powerful, effective approach to a difficult subject. . . . His style is very personal,

lively. It grabs the reader as scholarship rarely does. Lejeune's erudition and methodology are impeccable." Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies.

A Social History of Knowledge II Peter Burke 2013-04-17 Peter Burke follows up his magisterial *Social History of Knowledge*, picking up where the first volume left off around 1750 at the publication of the French *Encyclopédie* and following the story through to Wikipedia. Like the previous volume, it offers a social history (or a retrospective sociology of knowledge) in the sense that it focuses not on individuals but on groups, institutions, collective practices and general trends. The book is divided into 3 parts. The first argues that activities which appear to be timeless - gathering knowledge, analysing, disseminating and employing it - are in fact time-bound and take different forms in different periods and places. The second part tries to counter the tendency to write a triumphalist history of the 'growth' of knowledge by discussing losses of knowledge and the price of specialization. The third part offers geographical, sociological and chronological overviews, contrasting the experience of centres and peripheries and arguing that each of the main trends of the period - professionalization, secularization, nationalization, democratization, etc, coexisted and interacted with its opposite. As ever, Peter Burke presents a breath-taking range of scholarship in prose of exemplary clarity and accessibility. This highly anticipated second volume will be essential reading across the humanities and social sciences.

interdisciplinary essays at the nexus of material culture, performance studies, and game theory, *Playthings in Early Modernity* emphasizes the rules of the game(s) as well as the breaking of those rules. Thus, the titular "plaything" is understood as both an object and a person, and play, in the early modern world, is treated not merely as a pastime, a leisurely pursuit, but as a pivotal part of daily life, a strategic psychosocial endeavor.

The Later Roman Colonate and Freedom Miroslava Mirković 1997 Dr. Mirkovi, professor of Ancient History at Belgrade University analyzes the colonate of the Later Roman Empire as a historical phenomenon. The status of coloni (tenant farmers who were legally free) represents as much a legal as a sociological problem; although they were free, coloni were tied to another's land—often for a large portion of their lives. Rejecting the most widely accepted theory today that imperial fiscal policy that began with the emperor Diocletian in the 290s created the bound colonate & limited the right of the coloni to leave the land they cultivated, the author traces the development of this institution to the economic condition of the Early Empire. Using the legal, literary &

papyrological evidence, she stresses two facts as significant in limiting the freedom of coloni: a) the relation of the colonus to the landlord, b) the fiscal obligations he endures. Mirkovi_ cites extensively the law of Constantine, C.Th. V 17,1 as the crucial text in discussions of the dependent colonate. She emphasizes continuity in the development of the colonate & that the general principle of binding to the soil can be applied to the agricultural population at large.

Channelling Mobilities Valeska Huber 2013-08-01 The history of globalisation is usually told as a history of shortening distances and acceleration of the flows of people, goods and ideas. Channelling Mobilities refines this picture by looking at a wide variety of mobile people passing through the region of the Suez Canal, a global shortcut opened in 1869. As an empirical contribution to global history, the book asks how the passage between Europe and Asia and Africa was perceived, staged and controlled from the opening of the Canal to the First World War, arguing that this period was neither an era of unhampered acceleration, nor one of hardening borders and increasing controls. Instead, it was characterised by the channelling of mobilities through the differentiation, regulation and bureaucratisation of movement. Telling the stories of tourists, troops, workers, pilgrims, stowaways, caravans, dhow skippers and others, the book reveals the complicated entanglements of empires, internationalist initiatives and private companies.

Scripture and Scholarship in Early Modern England Ariel Hessayon 2006 This volume of essays is the first to embrace both orthodox and heterodox treatments of scripture in early modern England, and in the process to question, challenge and redefine what historians mean when they use these terms. The collection dispels the myth that a critical engagement with sacred texts was the preserve of radical figures: anti-scripturists, Quakers, Deists and freethinkers. While the work of these people was significant, it formed only part of a far broader debate incorporating figures from

Monk's Confession 2010-11-01 A Monk's Confession is the first completely new English translation of Guibert of Nogent's remarkable memoirs in over seventy years. Written around the year 1115, they offer an unparalleled look at the life of a monk in the Middle Ages. Guibert, who lived his entire life in northern France, called these memoirs his book of monodiae, or solitary songs. Many scholars consider them the first Latin autobiography in the West after Augustine's Confessions. Readers will be stirred and surprised by Guibert's intense preoccupation with the sinfulness of his soul, his visions of demons and necromancy, and his frank struggle to come to terms with his sexuality. But Guibert is also a valuable witness to his age. In addition to his personal history, his memoirs give a brief chronicle of the abbey of Nogent--where he served as abbot for some twenty years--and a vivid account of the bloody uprising of the Laon Commune in 1112. His observations give precious insight into education, monastic life, and the beginnings of the great medieval towns. Paul J. Archambault's translation successfully renders Guibert's Latin--at times stylish, at times rustic--into lively, modern English. He consulted Edmond-René Labande's authoritative 1981 Latin edition with French translation. He provides a complete introduction and annotation that help situate Guibert within the history and literature of the Middle Ages while permitting readers to judge for themselves how to interpret this fascinating voice from the past.

Invention of Hysteria Georges Didi-Huberman 2004-09-17 The first English-language publication of a classic French book on the relationship between the development of photography and of the medical category of hysteria. In this classic of French cultural studies, Georges Didi-Huberman traces the

intimate and reciprocal relationship between the disciplines of psychiatry and photography in the late nineteenth century. Focusing on the immense photographic output of the Salpêtrière hospital, the notorious Parisian asylum for insane and incurable women, Didi-Huberman shows the crucial role played by photography in the invention of the category of hysteria. Under the direction of the medical teacher and clinician Jean-Martin Charcot, the inmates of Salpêtrière identified as hysterics were methodically photographed, providing skeptical colleagues with visual proof of hysteria's specific form. These images, many of which appear in this book, provided the materials for the multivolume album *Iconographie photographique de la Salpêtrière*. As Didi-Huberman shows, these photographs were far from simply objective documentation. The subjects were required to portray their hysterical "type"—they performed their own hysteria. Bribed by the special status they enjoyed in the purgatory of experimentation and threatened with transfer back to the inferno of the incurables, the women patiently posed for the photographs and submitted to presentations of hysterical attacks before the crowds that gathered for Charcot's "Tuesday Lectures." Charcot did not stop at voyeuristic observation. Through techniques such as hypnosis, electroshock therapy, and genital manipulation, he instigated the hysterical symptoms in his patients, eventually giving rise to hatred and resistance on their part. Didi-Huberman follows this path from complicity to antipathy in one of Charcot's favorite "cases," that of Augustine, whose image crops up again and again in the *Iconographie*. Augustine's virtuosic performance of hysteria ultimately became one of self-sacrifice, seen in pictures of ecstasy, crucifixion, and silent cries.

National System of Political Economy - Volume 2: The Theory Friedrich List 2006-10-01 One of the most prominent economic philosophers of the 19th century, on a par with-but espousing quite different thinking than-Karl Marx and Adam Smith explores, in the three-volume National System of Political Economy, a reasoned doctrine of national and pan-national management of trade, a global collaboration between government and business. In Volume 2, he delineates his theory of supportive interconnectedness, discussing everything from the value of the individual's ability to produce wealth to the edge established businesses have over new ones. A close reading of this 1841 classic is an absolute necessity for anyone who hopes to understand world economic history of the last 150 years. German economist and journalist FRIEDRICH LIST (1789-1846) served as professor of administration and politics at the University of Tbingen, but was later jailed and later exiled to America for his political views. study of the fifteenth century is acknowledged in the bibliography, but my obligations extend much further. My thanks are due to many librarians who have given me every facility to inspect manuscripts in their care, but to Mr. Falconer Madan of the Bodleian Library at Oxford I am under no ordinary debt of obligation. His consistent kindness and interest has made many paths smooth that would otherwise have been rough. I am indebted to Lord Leicester for his kindness in allowing me to examine a manuscript life of the Duke which forms part of his Library, and to Mr. Yates Thompson for a similar permission with regard to the Duke's Psalter. Still more do I desire to thank Dean Kitchin for his courtesy and kindness in sending me a transcript of a letter in a Durham manuscript, whilst Professor Oman has given me the great encouragement of his sympathy and advice. To Dr. Morris of Bedford I owe assistance on some points of difficulty, and Sir Alfred Scott-Gatty, Garter, was kind enough to answer several questions with regard to the Duke's armorial bearings. To my mother, who has spent many weary hours in copying my manuscript; to my sister, who is largely responsible for the index; and to my friend, Mr. H. W. Ward of Frenchay, whose assistance, both clerical and critical, has been freely given, the mere record of my gratitude is not sufficient.

Redefining and Combating Poverty Council of Europe 2012-01-01 We are at a point in history where economic inequalities are more widespread each day. The situation of extreme poverty experienced by the majority of the populations in developing countries ("Third World" countries) often coincides with an absence of democracy and the violation of the most fundamental rights. But in so-called "First World" countries a non-negligible proportion of inhabitants also live in impoverished conditions (albeit mainly "relative" poverty) and are denied their rights. The European situation, which this publication aims to analyse, is painful: the entire continent is afflicted by

increasing poverty and consequently by the erosion of living conditions and social conflicts. The economic and financial crisis has resulted in the loss of millions of jobs, and created job insecurity for many still working. Economic insecurity raises social tensions, aggravating xenophobia, for instance. Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole. Indeed, poverty in modern societies has never been purely a question of lack of wealth. It is therefore urgent today to devise a new discourse on poverty. In pursuit of this goal, the Council of Europe is following up this publication in the framework of the project "Human rights of people experiencing poverty", co-financed by the European Commission.

Bureaucrats and Beggars Thomas McStay Adams 1991-01-31 In the mid-eighteenth century in France, the royal authorities launched a new campaign to sweep beggars from the streets, pinning their hopes on the creation of a uniform royal network of lock-ups in which anyone found begging might be detained. In this study, Adams probes the accomplishments and the failings of these so-called *dépôts de mendicité*, as seen by critics of the experiment (including learned judges and influential spokesmen of the provincial Estates) and as seen by those responsible for its success: the provincial intendants, the royal engineers, the doctors, the inspectors, the contractors, and various givers of advice. He shows how the debate--both internal and external--over the operation of the *dépôts* contributed to the intellectual ferment of the Enlightenment and the Revolution. The resulting web of reasoning and empirical data gave support to Montesquieu's principle that the state owes every one of its citizens "a secure subsistence, suitable food and clothing, and a manner of life that is not contrary to good health."
