Maintaining Relationships Through Communication - Daniel J. Canary 2003-01-30

Relational maintenance provides a rallying point for those seeking to discover the behaviors that individuals utilize to sustain their personal relationships. Theoretical models, research programs, and specific studies have examined how people in a variety of close relationships choose to define and maintain those relationships. In addition, relational maintenance turns our attention to communicative processes that help people sustain their close relationships. In this collection, editors Daniel J. Canary and Marianne Dainton focus on the communicative processes critical to the maintenance and enhancement of personal relationships. The volume considers variations in maintaining different types of personal relationships; structural constraints on relationship maintenance; and cultural variations in relational maintenance. Contributions to the volume cover a broad range of relational types, including romantic relationships, family relationships, long-distance relationships, workplace relationships, and Gay and Lesbian relationships, among others. *Maintaining Relationships Through Communication: Relational, Contextual, and Cultural Variations* synthesizes current research in relationship maintenance, emphasizes the ways that behaviors vary in their maintenance functions across relational contexts, discusses alternative explanations for maintaining relationships, and presents avenues for future research. As such, it is intended for students and scholars studying interpersonal communication and personal relationships.

How to Not Die Alone - Logan Ury 2021-02-02

A "must-read" (*The Washington Post*) funny and practical guide to help you find, build, and keep the relationship of your dreams. Have you ever looked around and wondered, "Why has everyone found love except me?" You're not the only one. Great relationships don't just appear in our lives—they're the culmination of a series of decisions, including whom to date, how to end it with the wrong person, and when to commit to the right one. But our brains often get in the way. We make poor decisions, which thwart us on our quest to find lasting love. Drawing from years of research, behavioral scientist turned dating coach Logan Ury reveals the hidden forces that cause those mistakes. But awareness on its own doesn't lead to results. You have to actually change your behavior. Ury shows you how. This "simple-to-use guide" (Lori Gottlieb, *New York Times* bestselling author of *Maybe You Should Talk to Someone*) focuses on a different decision in each chapter, incorporating insights from behavioral science, original research, and real-life stories. You'll learn: - What's holding you back in dating (and how to break the pattern) -What really matters in a long-term partner (and what really doesn't) -How to overcome the perils of online dating (and make the apps work for you) -How to meet more people in real life (while doing activities you love) -

How to make dates fun again (so they stop feeling like job interviews) - Why "the spark" is a myth (but you'll find love anyway) This "data-driven" (*Time*), step-by-step guide to relationships, complete with hands-on exercises, is designed to transform your life. *How to Not Die Alone* will help you find, build, and keep the relationship of your dreams.

Teach from the Heart - Jenell Paris 2016-06-24

How can a teacher remain whole and happy, able to teach well for an entire semester, an entire year, and an entire career? *Teach from the Heart* is about finding, rediscovering, or holding on to the heart of the teaching life, which is, quite literally, the teacher's heart. It is an encouragement to take up teaching as more than a service to provide, a profession to master, or a job to perform. It is an invitation to artisanry, teaching as a craft that we master by working with our hands over long periods of time, producing results that bear the mark of their maker. Whether you're just beginning, or in it for the long haul, sit down with *Teach from the Heart* and deepen your heart for the teaching life. We need not bring to class the wisdom and knowledge we gained elsewhere; we can take up teaching as a spiritual practice, with the classroom as a sacred space for our own formation as persons. With nearly forty years' experience as both student and teacher, Jenell Paris's perspective is hard-won, but still lighthearted and enthusiastic. Teachers from any context will benefit: stories and examples include preschool, K-12, community education, and college teaching.

The Physical University - Paul Temple 2014-03-21

The great universities of the world are to a large extent defined in the public imagination by their physical form: when people think of a university, they usually think of a distinctive place, rather than about say the teaching or the research that might go on there. This is understandable, both because universities usually stay rooted to the same spot over the centuries; and because their physical forms may send powerful messages about the kind of places they are. The physical form of the university, and how the spaces within it become transformed by their users into places which hold meanings for them, has become of increased interest recently from both academic and institutional management perspectives, when trying to understand more about how universities work, and how they may be made more effective. Yet, despite its seemingly obvious importance, the available literature on space and place in higher education internationally is scant when compared to that dealing with, say, teaching and learning methods, or with evaluating quality, or many other topics. This book brings together a range of academic and professional perspectives on university spaces and places, and show how technical matters of building design, maintenance and use interact with academic considerations on the goals of the university. Space issues are located at an intellectual crossroads, where widely differing conceptual and professional perspectives meet, and need to be integrated and this important book brings together perspectives from around the world to show design and use issues are changing Higher Education.. Globally, higher education is being required to do more things - to teach more students, to be better at research, to

engage more with business and communities; and many other things. These pressures are leading universities to reconsider their management processes, as well as their academic structures: an often-quoted saying is that "we make our buildings, and afterwards they make us". At a time when universities and colleges are seeking competitive advantages, ideas and analysis about space design and use is much needed and will be well-received.

Generational IQ for the Workplace and Home Collection - Haydn Shaw 2016-10-01

This collection bundles 2 of popular author Haydn Shaw's books together in one e-book, for a great value! **Sticking Points** This is the first time in American history that we have had four different generations working side-by-side in the workplace: the Traditionalists (born before 1945), the Baby Boomers (born 1945-1964), Gen X (born 1965-1980), and the Millennials (born 1981-2001). Haydn Shaw, popular business speaker and generational expert, has identified 12 places where the 4 generations typically come apart in the workplace (and in life as well). These sticking points revolve around differing attitudes toward managing one's own time, texting, social media, organizational structure, and of course, clothing preferences. If we don't learn to work together and stick together around these 12 sticking points, then we'll be wasting a lot of time fighting each other instead of enjoying a friendly and productive team. **Sticking Points** is a must-read book that will help you understand the generational differences you encounter while teaching how we can learn to speak one another's language and get better results together. **Generational IQ** Why is my daughter drifting from God? Why can't I explain my life choices to my parents? When will my son get a real job? Within the last several decades, the world has shifted dramatically. The cracks of this fundamental shift appear everywhere: in our economy, in our cultural debates, in our political landscape, and, most important, in our churches. The problem is we tend to overreact to these changes, fearing that Christianity is dying. We need better Generational IQ, so we can respond to the changes but not be terrified by them. We need a wise generational coach. Haydn Shaw is that generational expert, showing us the roots of this generational shift and how it affects every one of us. Each generation, whether it's the aging Boomers or the young Millennials, approaches God with a different set of questions and needs based on the times in which they grew up. Haydn walks you through these generational differences and paints a vision of hope for the future.

Defining the DTR - Sarah Varga 2022

The DTR, or define the relationship, conversation is a commonly understood scenario that has yet to be fully explicated by communication scholars. While it is widely acknowledged in the field of communication that all communication has the potential to signal the nature of the relationship between communicators (Watzlawick et al., 1967), researchers have yet to agree on a universal understanding of conversations in which the state of the relationship is both the topic and the outcome. With romantic partners now communicating via multiple channels (Caughlin & Sharabi, 2013), the complexities of relationship talk have never been greater. In order to form a foundation for future studies in this line of research, the current study takes an inductive, qualitative approach to defining the DTR and understand the DTR process. Forty semi-structured interviews were conducted to answer nine research questions about what is occurring before, during, and after the DTR. Findings are discussed in terms of emergent themes and thematic co-occurrences, corresponding exemplars, a definition of the DTR, and an emergent model of the DTR process for future research *Yes, My Accent Is Real* - Kunal Nayyar 2016-07-26

In the spirit of Mindy Kaling's bestseller *Is Everyone Hanging Out Without Me?* or Judd Apatow's *Sick in the Head*, a collection of

humorous, autobiographical essays from Kunal Nayyar, best known as Raj on CBS's #1 hit comedy *The Big Bang Theory*. Of all the charming misfits on television, there's no doubt Raj from *The Big Bang Theory*—the sincere yet incurably geeky Indian astrophysicist—ranks among the misfittingest. Now, we meet the actor who is every bit as loveable as the character he plays on TV. In this revealing collection of essays written in his irreverent, hilarious, and self-deprecating voice, Kunal Nayyar traces his journey from a little boy in New Delhi who mistakes an awkward first kiss for a sacred commitment, gets nosebleeds chugging Coca-Cola to impress other students, and excels in the sport of badminton, to the confident, successful actor on the set of TV's most-watched sitcom since *Friends*. Going behind the scenes of *The Big Bang Theory* and into his personal experiences, Kunal introduces readers to the people who helped him grow, such as his James Bond-loving, mustachioed father. Kunal also walks us through his college years in Portland, where he takes his first sips of alcohol and learns to let loose with his French, 6'8" gentle-giant roommate, works his first-ever job for the university's housekeeping department cleaning toilets for minimum wage, and begins a series of romantic exploits that go just about as well as they would for Raj. (That is, until he meets and marries a former Miss India in an elaborate seven-day event that we get to experience in a chapter titled "My Big Fat Indian Wedding.") Full of heart, but never taking itself too seriously, this witty collection of underdog tales follows a young man as he traverses two continents in search of a dream, along the way transcending culture and language (and many, many embarrassing incidents) to somehow miraculously land the role of a lifetime.
