Daniel Goleman Omnibus Daniel Goleman 2004 Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

An Apartment on Uranus Paul B. Preciado 2020-01-28 A "dissident of the gender-sex binary system" reflects on gender transitioning and political and cultural transitions in technoscientific capitalism. Uranus, the frozen giant, is the coldest planet in the solar system as well as a deity in Greek mythology. It is also the inspiration for uranism, a concept coined by the writer Karl Heinrich Ulrich in 1864 to define the "third sex" and the rights of those who "love differently." Following Ulrich, Paul B. Preciado dreams of an apartment on Uranus where he might live beyond existing power, gender and racial strictures invented by modernity. "My trans condition is a new form of uranism," he writes. "I am not a man. I am not a woman. I am not heterosexual. I am not homosexual. I am not bisexual. I am a dissident of the gender-sex binary system. I am the multiplicity of the cosmos trapped in a binary political and epistemological system, shouting in front of you. I am a uranist confined inside the limits of technoscientific capitalism." This book recounts Preciado's transformation from Beatriz into Paul B., but it is not only an account of gender transitioning. Preciado also considers political, cultural, and sexual transition, reflecting on issues that range from the rise of neo-fascism in Europe to the technological appropriation of the uterus, from the harassment of trans children to the role museums might play in the cultural revolution to come. An Apartment on Uranus is a bold, transgressive, and necessary book.

Drugs and Social Context Telmo Mota Ronzani 2018-01-31 This book goes beyond the traditional approaches to drug use and discusses the issue from a societal perspective, integrating contributions from different disciplines such as psychology, public health, anthropology, law, public policies and sociology to address specifically the social aspects of the phenomenon. Given its complexity, drug use demands a multidisciplinary approach from many different perspectives, but despite the vast literature about the topic, the majority of the books are restricted either to a purely medical perspective (focused mainly on treatment techniques) or to a criminological perspective (focused mainly on drug trafficking and organized crime). The social approach adopted in this volume challenges this dichotomy and analyzes both the social contexts to which drug use is related and the social and political consequences of the attitudes and policies adopted by governments and other social groups towards drug users, addressing topics such as: Drugs and poverty Drugs and gender Drugs and race Drugs and territory Stigmatization of drug use Prohibitionism Given its broad and innovative approach, *Drugs and Social Context - Social Perspectives on the Use of Alcohol and Other Drugs* will be of interest for researchers, clinicians and other health professionals, since the study of the social aspects of drug use is central to everyone who deals with the issue.

Changing Places Chris Booth 1996-09-28 This book offers a specifically feminist perspective on women's lives in contemporary cities; one which the editors hope will sustain and influence women's 'ways of being' in those cities. The contributors offer an array of knowledge about women's place and women's places in cities today. The book acknowledges women's positive as well as negative experiences in their roles as workers, mothers, housewives, shoppers and members of social networks. Women are not seen as passive victims of capitalism or of male violence, although the realities of exploitation and the fear of crime are recognized.

Facing Codependence Pia Mellody 2011-11-22 Pia Mellody creates a framework for identifying codependent thinking, emotions and behaviour and provides an effective approach to recovery. Mellody sets forth five primary adult symptoms of this crippling condition, then traces their origin to emotional, spiritual, intellectual, physical and sexual abuses that occur in childhood. Central to Mellody's approach is the concept that the codependent adult's injured inner child needs healing. Recovery from codependence, therefore, involves clearing up the toxic emotions left over from these painful childhood experiences.

Butterfly Politics Catharine A. MacKinnon 2019-04-02 "Sometimes ideas change the world. This astonishing, miraculous, shattering, inspiring book captures the origins and the arc of the movement for sex equality. It's a book whose time has come—always, but perhaps now more than ever." —Cass Sunstein, coauthor of *Nudge* Under certain conditions, small simple actions can produce large and complex "butterfly effects." *Butterfly Politics* shows how Catharine A. MacKinnon turned discrimination law into an effective tool against sexual abuse—grounding and predicting the worldwide #MeToo movement—and proposes concrete steps that could have further butterfly effects on women's rights. Thirty years after she won the U.S. Supreme Court case establishing sexual harassment as illegal, this timely collection of her previously unpublished interventions on consent, rape, and the politics of gender equality captures in action the creative and transformative activism of an icon. "MacKinnon adapts a concept from chaos theory in which the tiny motion of a butterfly's wings can trigger a tornado half a world away. Under the right conditions, she posits, small actions can produce major social transformations." —New York Times "MacKinnon [is] radical, passionate, incorruptible and a beautiful literary stylist... *Butterfly Politics* is a devastating salvo fired in the gender wars... This book has a single overriding aim: to effect global change in the pursuit of equality." —The Australian "Sexual Harassment of Working Women was a revelation. It showed how this anti-discrimination law—Title VII—could be used as a tool... It was the beginning of a field that didn't exist until then." —U.S. Supreme Court Justice Ruth Bader Ginsburg

Stop Street Harassment Holly Kearl 2012-04 Using groundbreaking studies, news stories, and interviews, this book underscores that there will never be gender equity until men stop harassing women in public spaces—and it details strategies for achieving this goal.

Handbook of Workplace Violence E. Kevin Kelloway 2006-01-24 In the *Handbook of Workplace Violence*, editors E. Kevin Kelloway, Julian Barling, and Joseph J. Hurrell Jr. bring together the contributions of leading researchers to provide summaries and unique perspectives on current theory, research, and practice relating to workplace violence. This is the only up to date resource currently available to provide a comprehensive overview of the current state of knowledge regarding all aspects of workplace violence and aggression.

The Subject of Liberty Nancy J. Hirschmann 2009-01-10 This book reconsiders the dominant Western understandings of freedom through the lens of women's real-life experiences of domestic violence, welfare, and Islamic veiling. Nancy Hirschmann argues that the typical approach to freedom found in political philosophy severely reduces the concept's complexity, which is more fully revealed by taking such practical issues into account.

Hirschmann begins by arguing that the dominant Western understanding of freedom does not provide a conceptual vocabulary for accurately characterizing women's experiences. Often, free choice is assumed when women are in fact coerced--as when a battered woman who stays with her abuser out of fear or economic necessity is said to make this choice because it must not be so bad--and coercion is assumed when free choices are made--such as when Westerners assume that all veiled women are oppressed, even though many Islamic women view veiling as an important symbol of cultural identity. Understanding the contexts in which choices arise and are made is central to understanding that freedom is socially constructed through systems of power such as patriarchy, capitalism, and race privilege. Social norms, practices, and language set the conditions within which choices are made, determine what options are available, and shape our individual subjectivity, desires, and self-understandings. Attending to the ways in which contexts construct us as "subjects" of liberty, Hirschmann argues, provides a firmer empirical and theoretical footing for understanding what freedom means and entails politically, intellectually, and socially.

Family Violence: A Canadian Introduction Julianne Momirov 2011-10-11 Family violence is hard for most people to understand. The fact that we are more likely to be killed or assaulted by family members than anyone else seems incredible. Yet for many Canadians the family is a dangerous place, far from the haven of love and security that we would like to believe. In this book, sociologists Julianne Momirov and Ann Duffy explore the many forms that violence can take, from physical abuse to emotional deprivation. The victims, the theories, and the factors increasing risk are all clearly presented. Policies and programs which would address this issue -- from personal intervention to institutional reforms -- are also outlined. This new edition incorporates up-to-date statistical information on the prevalence of family violence. It reports on recent initiatives to find more successful ways to respond to the needs of victims and to rehabilitate the perpetrators. This is the definitive Canadian book for anyone wanting to learn more about this disturbing phenomenon.

Psychology of Liberation Maritza Montero 2009-04-28 Since the mid-1980s, the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America, and beyond; and recent political developments are making its powerful, transformative ideas more relevant than ever before. *Psychology of Liberation: Theory and Applications* updates the activist frameworks developed by Ignacio Martin-Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds, as social science and psychological practice are allied with struggles for peace, justice, and equality. In these chapters, liberation is presented as both an ongoing process and a core dimension of wellbeing, entailing the reconstruction of social identity and the transformation of all parties involved, both oppressed and oppressors. It also expands the social consciousness of professionals, bringing more profound meaning to practice and enhancing related areas such as peace psychology, as shown in articles such as these: Philippines: the role of liberation movements in the transition to democracy. Venezuela: liberation psychology as a therapeutic intervention with street youth. South Africa: the movement for representational knowledge. Muslim world: religion, the state, and the gendering of human rights. Ireland: linking personal and political development. Australia: addressing issues of racism, identity, and immigration. Colombia: building cultures of peace from the devastation of war. *Psychology of Liberation* demonstrates the commitment to overcome social injustices and oppression. The book is a critical resource for social and community psychologists as well as policy analysts. It can also be used as a text for graduate courses in psychology, sociology, social work and community studies.

Domestic Devotions in the Early Modern World Marco Faini 2018 This volume sets out to explore the world of domestic devotions taking place in people's homes across space and time, and is premised on the assumption that the home was a central space of religious practice and experience throughout the early modern world.

The Battered Woman Syndrome Lenore E. Walker 2001-07-26 In this latest edition of her groundbreaking book, Dr. Lenore Walker has provided a thorough update to her original findings in the field of domestic abuse. Each chapter has been expanded to include new research. The volume contains the latest on the impact of exposure to violence on children, marital rape, child abuse, personality characteristics of different types of batterers, new psychotherapy models for batterers and their victims, and more. Walker also speaks out on her involvement in the O.J. Simpson trial as a defense witness and how he does not fit the empirical data known for domestic violence. This volume should be required reading for all professionals in the field of domestic abuse. For Further Information, Please Click Here!

The Will to Violence Susanne Kappeler 2013-06-07 This is a major contribution to feminist theory and debate, addressing issues such as sexual violence, social violence and hatred of foreigners in a lucid and highly original way.

Narrative Methods for the Human Sciences Catherine Kohler Riessman 2008 "Cathy Riessman is the leading figure in narrative research and her new book is a delight. Covering basic issues of transcription and research credibility as well as visual data and engagingly written, it is a goldmine for students and researchers alike. If we want to make narrative research serious and revealing, it is to this book that we should turn." --David Silverman, Professor Emeritus, Goldsmiths' College, University of London "Narrative Methods for the Human Sciences provides an accessible framework for researchers -- to analyse narrative texts with confidence, empathy, and humility. --NARRATIVE INQUIRY "This is a terrific book. Cathy Riessman has an encyclopedic knowledge of this field and of the participants in it. This breadth and depth of knowledge is abundantly clear throughout the book." --Susan Bell, Bowdoin College "This book has been a great source of inspiration to me and my students, not only for its methodological clarity, but also for the spirit of social activism it engenders." --Ian Baptiste, The Pennsylvania State University "Narrative Methods for the Human Sciences is an essential starting point for both students and experienced researchers interested in using narrative analysis in applied or other contexts. Written with admirable clarity, an engaging style, and supported by detailed examples of analysis, the book outlines the main methodological issues and approaches within the exciting and fast-developing field of narrative research. Even researchers already familiar with narrative methods should find the presentation of thematic, structural, dialogic/performance, and visual forms of analysis a fruitful stimulus to new research endeavours." --Brian Roberts, University of Central Lancashire, U.K. "I just had to thank you for paving the path for us new and 'hopeful' narrative researchers. I have been a student of both your books on narrative analysis, and want to thank you for your guidance from your work, and also your latest book Narrative Methods for the Human Sciences. This work and the references you have chosen for us have helped me immensely during this time in my doctoral program, especially as I enter into the analysis phase." --Maria T. Yelle, nursing doctoral candidate, University of Wisconsin-Madison Narrative Methods for the Human Sciences provides a lively overview of research based on constructing and interpreting narrative. Designed to improve research practice, it gives a detailed discussion of four analytic methods that students can adapt. Author Catherine Kohler Riessman explains how to conduct the four kinds of narrative analysis using model studies from sociology, anthropology, psychology, education and nursing. Throughout the book, she compares different approaches including thematic analysis, structural analysis, dialogic/performance analysis, and visual narrative analysis. The book helps students confront specific issues in their research practice, including how to construct a transcript in an interview study; complexities of working with materials translated from another language; defining narrative segments; relating text and context; locating oneself as the researcher in a responsible way in an inquiry; and arguing for the credibility of the case-based approach. Broad in scope, Narrative Methods for the Human Sciences also offers concrete guidance in individual chapters for students and established scholars wanting to join the "narrative turn" in social research. Key Features Focuses on four particular methods of narrative analysis: This text provides specific diverse exemplars of good narrative research, as practiced in several social science and human service

Caliban and the Witch Silvia Federici 2021-07-29 'A groundbreaking work . . . Federici has become a crucial figure for . . . a new generation of feminists' Rachel Kushner, author of *The Mars Room* A cult classic since its publication in the early years of this century, *Caliban and the Witch* is Silvia Federici's history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages through the European witch-hunts, the rise of scientific rationalism and the colonisation of the Americas, it gives a panoramic account of the often horrific violence with which the unruly human material of pre-capitalist societies was transformed into a set of predictable and controllable mechanisms. It is a study of

indigenous traditions crushed, of the enclosure of women's reproductive powers within the nuclear family, and of how our modern world was forged in blood. 'Rewarding . . . allows us to better understand the intimate relationship between modern patriarchy, the rise of the nation state and the transition from feudalism to capitalism' Guardian

Coffee and Conflict in Colombia, 1886-1910 Charles W. Bergquist 1986-03-11 The appearance of Coffee and Conflict in Colombia, 1886-1910, had several important consequences for the entire field of Latin American history, as well as for the study of Colombia. Through Bergquist's analysis of this transitional period in terms of what has been called the dependency theory, he has left his mark on all subsequent studies in Latin American affairs; questions of economic development and political alignment cannot be dealt with without confronting Bergquist's work. He has also provided a major contribution to Colombian history by his examination of the growth of the coffee industry and Thousand Days War.

Cognitive Aging Denise Park 2012-12-06 As our society ages, the topic of cognitive aging is becoming increasingly important. This volume provides an accessible overview of how the cognitive system changes as a function of normal aging. Building on the successful first edition, this volume provides an even more comprehensive coverage of the major issues affecting memory, attention, language, speech and other aspects of cognitive functioning. The essential chapters from the first edition have been thoroughly revised and updated and new chapters have been introduced which draw in neuroscience studies and more applied topics. In addition, contributors were encouraged to ensure their chapters are accessible to students studying the topic for the first time. This therefore makes the volume appealing as a textbook on senior undergraduate and graduate courses.

Who's Afraid of Feminism? Ann Oakley 1998

Workplace Bullying Charlotte Rayner 2003-08-29 Workplace bullying is an area that has attracted significant press attention throughout the last decade. A variety of well publicized surveys have revealed that this is an issue endemic in working life in Britain; and, at a conservative estimate, over half the working population can expect to experience bullying at work (either directly by being bullied or indirectly by witnessing it).

The World's Women 2015 United Nations Department of Economic and Social Affairs 2015-12-07 This publication presents statistics and analysis on the status of women and men in the world, highlighting the current situation and changes over time. It is the sixth in a series published since the World Conference on Women in 1995. It emphasizes that progress towards the goal of gender equality has been made in most areas of concern, although uneven and at low pace. Through a life cycle approach, it reveals the challenges and opportunities faced by women at different stages of life and based on where they reside. Trajectories of women and men are highlighted in the statistical findings of the analysis undertaken on population and families, health, education, work, power and decision-making, violence against women, environment and poverty.

Global Study on Homicide 2013 United Nations 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

Principles and Recommendations for a Vital Statistics System United Nations. Statistical Office 2014 The publication is an international standard on the design and operation of an efficient and accurate vital statistics system at national level. It provides guidelines on collection, compiling and disseminating vital statistics. More specifically it contains (a) basic principles for a vital statistics system; (b) uses of vital statistics and civil registration records; (c) topics to be covered in a vital statistics system; (d) sources of vital statistics and how they function; (e) quality assurance in the vital statistics system and (f) strategies in improving civil registration and vital statistics systems in countries. It also informs policy makers and the general public on the importance of vital statistics and hence further improving the vital statistics system.

Thinking from the Underside of History Linda Alcoff 2000 Enrique Dussel's writings span the theology of liberation, critiques of discourse ethics and evaluations of Marx, Levinas, Habermas, and others. This anthology of articles by US philosophers elucidating Dussel's thought offers critical analyses from a variety of perspectives.

The Family, Education and Society Frank Musgrove 1966 In this provocative study the author challenges many contemporary assumptions about the modern family, the circumstances of home life which lead to academic success and the proper relationship between home and school. The modern family is not 'in decline'; its history is a success story. It is stable, unsociable, emotionally potent. Over the past three centuries it has turned its back on society. It is less remarkable for rebellious children than for the remorseless pressures it can exert upon the young, particularly for 'success' in the school system. In the home-centred society the school is an extension of the home, created in its image. Academic success seems most certain when the 'good home' and the 'good school' form a determined alliance. The combined pressures of home and school often seem to produce withdrawn, self-disparaging and negative young men and women. The author argues that the good school must counter-act many of the influences of the good home and that the educational system must re-order its affairs so that it is able to encourage and assess achievement which comes from joy rather than neurotic drive.

The Health Psychology Reader David F Marks 2002-06-06 The Health Psychology Reader is designed to complement and support the recent textbook Health Psychology: Theory, Research and Practice by David F. Marks, Michael Murray, Brian Evans and Carla Willig (SAGE, 2000). It can also be used as a stand-alone resource given its didactic nature. The Reader explores key topics within the health psychology field with incisive introductions to each section by the Editor and includes a selection of the most important theoretical and empirical published work.

Testo Junkie Paul B. Preciado 2013-09-23 This visionary book on gender and sexuality weaves together high theory and intimate memoir, with "spectacular" results—"and the gendered body will never be the same again" (Jack Halberstam). What constitutes a "real" man or woman in the twenty-first century? Since birth control pills, erectile dysfunction remedies, and factory-made testosterone and estrogen were developed, biology is definitely no longer destiny. In this penetrating analysis of gender, Paul B. Preciado shows the ways in which the synthesis of hormones since the 1950s has fundamentally changed how gender and sexual identity are formulated, and how the pharmaceutical and pornography industries are in the business of creating desire. This riveting continuation of Michel Foucault's *The History of Sexuality* also includes Preciado's diaristic account of his own use of testosterone every day for one year, and its mesmerizing impact on his body as well as his imagination.

Coercive Control Evan Stark 2009 Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.

Temporary Special Measures Ineke Boerefijn 2003 Revised papers and comments that were presented at the meeting organised in Maastricht, in October 2002. The aim of the meeting was threefold: to provide input for the CEDAW Committee; stimulate the legal debate on the issue of temporary measures; and contribute towards the promotion of positive action measures in the Netherlands.

The United Nations World Water Development Report 2021 2021-03-22 Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

Education for Rural Development Food and Agriculture Organization of the United Nations 2003 An international joint study by the Food and Agriculture Organization of the United Nations (FAO) and UNESCO's International Institute for Educational Planning (IIEP) was conducted on education and rural development to review the status of the topic from the standpoint of public policies and the conceptual frameworks on which they are based and also to shed light on what may be called "good practice." The findings of the study are meant to serve not as models, but rather as points of reference for all those who are seeking ways of developing education in rural areas and contributing more effectively to rural development. Chapter I, "Education and Rural Development: Setting the Framework" (David Atchoarena and Charlotte Sedel), provides a contextual and theoretical introduction to the new rural development and poverty reduction thinking, as well as a discussion on the contribution of education to rural development. In Chapter II, "Basic Education in Rural Areas: Status, Issues and Prospects" (Michael Lakin with Lavinia Gasperini), the book reviews in depth the provision of basic education in rural areas and offers some policy directions for improvement. Further exploring a particular dimension of basic education, Chapter III, "Making Learning Relevant: Principles and Evidence from Recent Experiences" (Peter Taylor, Daniel Desmond, James Grieshop and Aarti Subramaniam), devotes specific attention to strategies linking the formal school teaching with students' life environment, including agriculture, and to garden-based learning. The intention is to provide updated information and new insights on much-debated aspects which are often associated with rural areas although their application is much broader. Chapter IV, "Strategies and Institutions for Promoting Skills for Rural Development" (David Atchoarena, Ian Wallace, Kate Green, and Candido Alberto Gomes), shifts the analysis from education to work and discusses the implications of the transformation of rural labor markets for skill development. A particular concern is the rise in rural non-farm employment and the need to enlarge the policy focus from agricultural education and training to technical and vocational education for rural development. This debate is taken further in Chapter V, "Higher Education and Rural Development: A New Perspective" (Charles Maguire and David Atchoarena), which considers higher level skills and the contribution of the tertiary education sector to rural development. Special attention is given to the reform of higher agricultural institutions and lessons based on case studies are provided to document good practice in institutional reform. Finally, Chapter VI, "Main Findings and Implications for Policy and Donor Support" (David Atchoarena with Lavinia Gasperini, Michael Lakin and Charles Maguire), concentrates on the main findings of the study and discusses policy implications and possible responses for donors and countries. (Contains 28 tables, 14 figures, and 64 boxes.).
