Witnessing the lifetime spiritual journey of Vinny Pirelli, starting at age six with his very first bicycle, you track his development of being the only boy among many siblings, through growing pains of adolescence and teen years. The Junior Officers' Reading Club Patrick Hennessey 2009-06-25 Patrick Hennessey's *The Junior Officers' Reading Club* is a lucid, witty account of all the horror, boredom and exhilaration of war. Patrick Hennessey is pretty much like any other member of Generation X: he spent the first half of the noughties reading books at university, going out, listening to house music and watching war films. He also, as an officer in the Grenadier guards, fought in some of the most violent combat the British army has seen in decades. Telling the story of how a modern soldier is made, from the testosterone-heavy breeding ground of Sandhurst to the nightmare of Iraq and Afghanistan, *The Junior Officers' Reading Club* is already being hailed as a modern classic. 'Soldiers who can write are as rare as writers who can strip down a machinegun in 40 seconds' Christopher Hart, *Sunday Times* 'An extraordinary memoir ... Hennessey has a reporter's eye for detail and a soldier's nose for bullshit' John Shirley, *Guardian* 'High tempo, full-on, honest and revealing' Patrick Bishop, *Evening Standard* 'The most accomplished work of military witness to emerge from British war-fighting since 1945' Boyd Tonkin, *Independent* 'Remarkable ... conveys vividly what it's like to experience combat' Jeremy Paxman, *Daily Telegraph*, *Books of the Year* Patrick Hennessey (b. 1982) joined the Army in January 2004, undertaking officer training at the Royal Military Academy Sandhurst where he was awarded the Queen's Medal and commissioned into The Grenadier Guards. He served as a Platoon Commander and later Company Operations Officer from the end of 2004 to early 2009 in the Balkans, Africa, South East Asia and the Falkland Islands and on operational tours to Iraq in 2006 and Afghanistan in 2007, where he became the youngest Captain in the Army and was commended for gallantry.

The Precariat Guy Standing 2021-07-15 This book presents the new Precariat - the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

Desperately Seeking Self-Improvement Carl Cederström and André Spicer 2017-10-20 In these pages, the authors of the widely-acclaimed *The Wellness Syndrome* throw themselves headlong into the world of self-optimization, a burgeoning movement that seeks to transcend the limits placed on us by being merely human, whether the feebleness of our bodies or our mental incapacities. Cederström and Spicer, though willing guinea pigs in an extraordinary (and sometimes downright dangerous) range of techniques and technologies, had hitherto undertaken little by way of self-improvement. They had rarely seen the inside of a gym, let alone utilized apps that deliver electric shocks in pursuit of improved concentration. But, in the course of a year spent researching this book, they wore head-bands designed to optimize meditation, attempted to boost their memory through learning associative techniques (and failed to be admitted to MENSAs), trained for weightlifting competitions, wrote what they (still) hope might become a bestselling Scandinavian detective story, enrolled in motivational seminars and tantra sex workshops, attended new-age retreats and man-camps, underwent plastic surgery, and experimented with vibrators and productivity drugs. André even addressed a London subway car whilst (nearly) naked in an attempt to boost attention. Somewhat surprisingly, the two young professors survived this year of rigorous research. Further, they have drawn deeply on it to produce a hilarious and eye-opening book. Written in the form of two parallel diaries, *Desperately Seeking Self-Improvement* provides a biting analysis of the narcissism and individual competitiveness that increasingly pervades a culture in which social solutions are receding and individual self-improvement is the only option left.

Crowd Design Florian Alexander Schmidt 2017-07-24 The digital revolution is interwoven with the promise to empower the user. Yet, the rise of centralized, commercial platforms for crowdsourced work questions the validity of this narrative. In *Crowd-Design*, Florian Alexander Schmidt analyses the workings and the rhetoric of crowdsourced work platforms by comparing the way they address the masses today with historic notions of the crowd. The utopian concepts of early online collaboration are taken as a vantage point from which to view and critique current and, at times, dystopian applications of crowdsourced work. The study is focused on the crowdsourcing of design tasks, but these specific applications are used to

examine the design of the more general mechanisms employed by the platform providers to motivate and control the crowds. Crowd-Design is as much about the crowdsourcing of design as it is about the design of crowdsourcing.

The Future of Nursing 2020-2030 National Academies of Sciences Engineering and Medicine 2021-09-30 The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. *The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity* explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by *The Future of Nursing: Leading Change, Advancing Health* (2011) report.

My Outdoor Life Ray Mears 2013-09-12 'If Ray Mears isn't a Great Living Englishman, then goodness me, who is? Ray is a persuader, pragmatist and populariser in the Durrell-Attenborough-Bellamy tradition.' - Robert Crampton, *The Times* Ray Mears is a household name through his television series *Tracks*, *World of Survival*, *Bushcraft Survival*, *The Real Heroes of Telemark* and many more. He is a private individual who shuns publicity whenever possible and would prefer to let his many skills tell their own tale - until now. In *My Outdoor Life*, Ray tells of his childhood and the formative years when he first developed a passion for both bushcraft and the martial arts skills that are central to his life. Having travelled the world several times over, he is no stranger to risk and has had more than his fair share of dangerous and life-threatening encounters to share with his readers. But his life is so much more than a tale of derring-do. Shortly after he returned to England having narrowly survived a serious helicopter crash, his father died. Just a year later, he had to face the death of his first wife Rachel. The book conveys the many sides of Ray Mears, taking us up to the present day - including the previously untold story of his involvement in the man-hunt for murderer Raoul Moat. *My Outdoor Life* gives us all a chance to share a life-story as rich and as inspirational as a walk in woods with the man himself, Ray Mears.

The Neoliberal Age? Aled Davies 2021-12-07 The late twentieth and early twenty-first centuries are commonly characterised as an age of 'neoliberalism' in which individualism, competition, free markets and privatisation came to dominate Britain's politics, economy and society. This historical framing has proven highly controversial, within both academia and contemporary political and public debate. Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics; according to this narrative, neoliberalism was a right-wing ideology, peddled by political economists, think-tanks and politicians from the 1930s onwards, which finally triumphed in the 1970s and 1980s. *The Neoliberal Age?* suggests this narrative is too simplistic. Where the standard story sees neoliberalism as right-wing, this book points to some left-wing origins, too; where the standard story emphasises the agency of think-tanks and politicians, this book shows that other actors from the business world were also highly significant. Where the standard story can suggest that neoliberalism transformed subjectivities and social lives, this book illuminates other forces which helped make Britain more individualistic in the late twentieth century. The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain. The book showcases cutting-edge research, making it useful to researchers and students, as well as to those interested in understanding the forces that have shaped our recent past.

Good Economics for Hard Times Abhijit V. Banerjee 2019-11-12 FROM THE WINNERS OF THE 2019 NOBEL PRIZE IN ECONOMICS 'Wonderfully refreshing . . . A must read' Thomas Piketty In this revolutionary book, prize-winning economists Abhijit V. Banerjee and Esther Duflo show how economics, when done right, can help us solve the thorniest social and political problems of our day. Original, provocative and urgent, *Good Economics for Hard Times* offers the new thinking that we need. It builds on cutting-edge research in economics - and years of exploring the most effective solutions to alleviate extreme poverty - to make a persuasive case for an intelligent interventionism and a society built on compassion and respect. A much-needed antidote to polarized discourse, this book shines a light to help us appreciate and understand our precariously balanced world.

Visible Learning John Hattie 2008-11-19 This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers – an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

Afghan Napoleon Sandy Gall 2021-09-07 The first biography in a decade of Afghan resistance leader Ahmad Shah Massoud. When the Soviets invaded Afghanistan in 1979, the forces of resistance were disparate. Many groups were caught up in fighting each other and competing for Western arms. The exception were those commanded by Ahmad Shah Massoud, the military strategist and political operator who solidified the resistance and undermined the Russian occupation, leading resistance members to a series of defensive victories. Sandy Gall followed Massoud during Soviet incursions and reported on the war in Afghanistan, and he draws on this first-hand experience in his biography of this charismatic guerrilla commander. Afghan Napoleon includes excerpts from the surviving volumes of Massoud's prolific diaries—many translated into English for the first time—which detail crucial moments in his personal life and during his time in the resistance. Born into a liberalizing Afghanistan in the 1960s, Massoud ardently opposed communism, and he rose to prominence by coordinating the defense of the Panjsher Valley against Soviet offensives. Despite being under-equipped and outnumbered, he orchestrated a series of victories over the Russians. Massoud's assassination in 2001, just two days before the attack on the Twin Towers, is believed to have been ordered by Osama bin Laden. Despite the ultimate frustration of Massoud's attempts to build political consensus, he is recognized today as a national hero.

Straight Line Crazy David Hare 2022-03-31 For forty uninterrupted years, Robert Moses was the most powerful man in New York. Though never elected to office, he manipulated those who were through a mix of guile, charm and intimidation. Motivated at first by a determination to improve the lives of New York City's workers, he created parks, bridges and 627 miles of expressway to connect the people to the great outdoors. But in the

1950s, groups of citizens began to organize against his schemes and against the motor car, campaigning for a very different idea of what a city should be. David Hare's blazing account of a man - played by Ralph Fiennes - whose iron will exposed the weakness of democracy in the face of charismatic conviction, premieres at the Bridge Theatre, London, in March 2022.

Managing Socio-ecological Production Landscapes and Seascapes for Sustainable Communities in Asia Osamu Saito 2020-02-10 This open access book presents up-to-date analyses of community-based approaches to sustainable resource management of SEPLS (socio-ecological production landscapes and seascapes) in areas where a harmonious relationship between the natural environment and the people who inhabit it is essential to ensure community and environmental well-being as well as to build resilience in the ecosystems that support this well-being. Understanding SEPLS and the forces of change that can weaken their resilience requires the integration of knowledge across a wide range of academic disciplines as well as from indigenous knowledge and experience. Moreover, given the wide variation in the socio-ecological makeup of SEPLS around the globe, as well as in their political and economic contexts, individual communities will be at the forefront of developing the measures appropriate for their unique circumstances. This in turn requires robust communication systems and broad participatory approaches. Sustainability science (SuS) research is highly integrated, participatory and solutions driven, and as such is well suited to the study of SEPLS. Through case studies, literature reviews and SuS analyses, the book explores various approaches to stakeholder participation, policy development and appropriate action for the future of SEPLS. It provides communities, researchers and decision-makers at various levels with new tools and strategies for exploring scenarios and creating future visions for sustainable societies.

University and School Collaborations During a Pandemic Fernando M. Reimers 2022 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as "ivory towers" being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach
