

# Jane Goodall The Woman Who Redefined Man

*Visions of Caliban* - Dale Peterson 2000

The authors use Shakespeare's *Tempest* as a metaphor for the relationship between people and chimps, exploring the very human aspects of this remarkable species. Original.

*In the Shadow of Man* - Jane Goodall 2010-12-16

'One of history's most impressive field studies; an instant animal classic' TIME Jane Goodall's classic account of primate research provides an impressively detailed and absorbing account of the early years of her field study of, and adventures with, chimpanzees in Tanzania, Africa. It is a landmark for everyone to enjoy.

**Harvest for Hope** - Jane Goodall 2005-11-01

From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary *Jane*, comes a provocative look into the ways we can positively impact the world by changing our eating habits. "One of those rare, truly great books that can change the world." - John Robbins, author of *The Food Revolution*

The renowned scientist who fundamentally changed the way we view primates and our relationship with the animal kingdom now turns her attention to an incredibly important and deeply personal issue-taking a stand for a more sustainable world. In this provocative and encouraging book, Jane Goodall sounds a clarion

call to Western society, urging us to take a hard look at the food we produce and consume-and showing us how easy it is to create positive change. Offering her hopeful, but stirring vision, Goodall argues convincingly that each individual can make a difference. She offers simple strategies each of us can employ to foster a sustainable society. Brilliant, empowering, and irrepressibly optimistic, Harvest for Hope is one of the most crucial works of our age. If we follow Goodall's sound advice, we just might save ourselves before it's too late.

[The Moral Lives of Animals](#) - Dale Peterson  
2011-03-15

Wild elephants walking along a trail stop and spontaneously try to protect and assist a weak and dying fellow elephant. Laboratory rats, finding other rats caged nearby in distressing circumstances, proceed to rescue them. A chimpanzee in a zoo loses his own life trying to save an unrelated infant who has fallen into a watery moat. The examples above and many

others, argues Dale Peterson, show that our fellow creatures have powerful impulses toward cooperation, generosity, and fairness. Yet it is commonly held that we Homo sapiens are the only animals with a moral sense-that we are somehow above and apart from our fellow creatures. This rigorous and stimulating book challenges that notion, and it shows the profound connections-the moral continuum-that link humans to many other species. Peterson shows how much animal behavior follows principles embodied in humanity's ancient moral codes, from the Ten Commandments to the New Testament. Understanding the moral lives of animals offers new insight into our own.

**My Life with the Chimpanzees** - Jane Goodall  
1996

This autobiography written for younger readers is illustrated throughout with many photos of the author's childhood and years in Africa.

**The Ghosts of Gombe** - Dale Peterson  
2018-04-06

"This book, written by the author of the "definitive" biography of primatologist Jane Goodall, presents in sweeping detail the story of a group of young volunteers and students doing animal behavior research on chimpanzees, baboons, and red colobus monkeys at Dr. Goodall's research site in Tanzania's Gombe Stream National Park during the late 1960s. Goodall, who began her work in the summer of 1960, was originally sponsored by the great paleontologist Louis Leakey and funded by the National Geographic Society. Her early studies of chimpanzees soon made her world famous as one of the great pioneers in primatology, and she began working to transform her original tented camp into a major field station for animal studies. Then came a tragic event that marked the final summer of that promising first decade and is the focus of this book. At aroundnoon, on Saturday, July 12, 1969, Ruth Davis, a young American working at Gombe as a volunteer, walked out of camp to follow a chimpanzee into

the forest and never returned. Her body was found six days later floating in a pool at the base of a high waterfall. The Ghosts of Gombe explores the social tensions that developed among the small community of researchers during 1968 and 1969; considers thoroughly how the death might have happened; and describes the painful personal consequences for some of the surviving researchers."--Provided by publisher.

The Ten Trusts - Jane Goodall 2013-08-06  
World-renowned behavioral scientists Jane Goodall and Marc Bekoff have set forth ten trusts that we must honor as custodians of the planet. They argue passionately and persuasively that if we put these trusts to work in our lives, the earth and all its inhabitants will be able to live together harmoniously. The Ten Trusts expands the concept of our obligation to live in close relationship with animals -- for, of course, we humans are part of the animal kingdom -- challenging us to respect the interconnection

between all living beings as we learn to care about and appreciate all species. The world is changing. We are gradually becoming more aware of the damage we are inflicting on the natural world. At this critical moment for the earth, Goodall and Bekoff share their hope and vision of a world where human cruelty and hatred are transformed into compassion and love for all living beings. They dream of a day when scientists and non-scientists can work together to transform the earth into a place where human beings live in peace and harmony with animals and the natural world. Simple yet profound, *The Ten Trusts* will not only change your perspective regarding how we live on this planet, it will establish your responsibilities as a steward of the natural world and show you how to live with respect for all life.

**Jane Goodall** - Dale Peterson 2014-11-11

A biography of the primatologist that “vividly and significantly enriches our understanding of Goodall”—includes photographs (Booklist,

starred review). This essential biography of one of the most influential women of the past century shows how truly remarkable Jane Goodall’s accomplishments have been. Goodall was a secretarial school graduate when Louis Leakey, unable to find someone with more fitting credentials, first sent her to Gombe to study chimpanzees. In this acclaimed work, Dale Peterson details how this young woman of uncommon resourcefulness and pluck would go on to set radically new standards in the study of animal behavior. He vividly captures the triumphs and setbacks of her dramatic life, including the private quest that led to her now-famous activism. Peterson, a longtime Goodall collaborator, has a unique knowledge of his subject. Candid and illuminating, this work will be a revelation even to readers who are familiar with the public Goodall as presented in her own writing. “Peterson provides colorful descriptions of day-to-day life at Gombe and Goodall’s interaction with the chimps, and ably portrays

her relationship with Leakey, the National Geographic Society (which sponsored much of her work), her two marriages, her reaction to her celebrity and her ventures as an activist for the well-being of chimpanzees.” —Publishers Weekly “Captures the spirit of a remarkable woman in science.” —Library Journal (starred review)

**Seeds of Hope** - Jane Goodall 2014-04-01

From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary Jane, comes a fascinating examination of the critical role that trees and plants play in our world. From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary Jane, comes a fascinating examination of the critical role that trees and plants play in our world. Seeds of Hope takes us from Goodall's home in England to her home-away-from-home in Africa, deep inside the Gombe forest, where she and the chimpanzees are enchanted by the fig and plum

trees they encounter. She introduces us to botanists around the world, as well as places where hope for plants can be found, such as The Millennium Seed Bank. She shows us the secret world of plants with all their mysteries and potential for healing our bodies as well as Planet Earth. Looking at the world as an adventurer, scientist, and devotee of sustainable foods and gardening--and setting forth simple goals we can all take to protect the plants around us--Goodall delivers an enlightening story of the wonders we can find in our own backyards.

*Through a Window* - Jane Goodall 2010-04-07

The renowned British primatologist continues the “engrossing account” of her time among the chimpanzees of Gombe, Tanzania (Publishers Weekly). In her classic, *In the Shadow of Man*, Jane Goodall wrote of her first ten years at Gombe. In *Through a Window* she continues the story, painting a more complete and vivid portrait of our closest relatives. On the shores of Lake Tanganyika, Gombe is a community where

the principal residents are chimpanzees. Through Goodall's eyes we watch young Figan's relentless rise to power and old Mike's crushing defeat. We learn how one mother rears her children to succeed and another dooms hers to failure. We witness horrifying murders, touching moments of affection, joyous births, and wrenching deaths. As Goodall compellingly tells the story of this intimately intertwined community, we are shown human emotions stripped to their essence. In the mirror of chimpanzee life, we see ourselves reflected. "A humbling and exalting book . . . Ranks with the great scientific achievements of the twentieth century." —The Washington Post "[An] absolutely smashing account . . . Thrilling, affectionate, intelligent—a classic." —Kirkus Reviews, starred review  
The Chimpanzee - Jane Goodall 1994

**Beyond Innocence** - Jane Goodall 2002

The second volume of Goodall's autobiography in

letters, this book covers her life after the publication of "In the Shadow of the Man, " the book that made her famous. photos.

**Hope for Animals and Their World** - Jane Goodall 2009-09-02

From world-renowned scientist Jane Goodall, as seen in the new National Geographic documentary Jane, comes an inspiring message about the future of the animal kingdom. With the insatiable curiosity and conversational prose that have made her a bestselling author, Goodall - along with Cincinnati Zoo Director Thane Maynard - shares fascinating survival stories about the American Crocodile, the California Condor, the Black-Footed Ferret, and more; all formerly endangered species and species once on the verge of extinction whose populations are now being regenerated. Interweaving her own first-hand experiences in the field with the compelling research of premier scientists, Goodall illuminates the heroic efforts of dedicated environmentalists and the truly

critical need to protect the habitats of these beloved species. At once a celebration of the animal kingdom and a passionate call to arms, *Hope For Animals Their World* presents an uplifting, hopeful message for the future of animal-human coexistence. Praise for *Hope For Animals Their World* "Goodall's intimate writing style and sense of wonder pull the reader into each account...The mix of personal and scientific makes for a compelling read."-Booklist "These accounts of conservation success are inspirational."-Publishers Weekly

**Africa in My Blood** - Jane Goodall 2000

Covering the years 1934 to 1966, this revealing self-portrait by one of the most remarkable women of our time recounts, through her letters to friends and family, Goodall's enduring love affair with the "dark continent." 16-page photo insert.

**Reason for Hope** - Jane Goodall 1999-12-08

From world-renowned scientist Jane Goodall, as seen in the new National Geographic

documentary *Jane*, comes a poignant memoir about her spiritual epiphany and an appeal for why everyone can find a reason for hope. Dr. Jane Goodall's revolutionary study of chimpanzees in Tanzania's Gombe preserve forever altered the very, definition of humanity. Now, in a poignant and insightful memoir, Jane Goodall explores her extraordinary life and personal spiritual odyssey, with observations as profound as the knowledge she has brought back from the forest.

**Demonic Males** - Richard W. Wrangham 1996

Whatever their virtues, men are more violent than women. Why do men kill, rape, and wage war, and what can be done about it? Drawing on the latest discoveries about human evolution and about our closest living relatives, the great apes, "Demonic Males" offers some startling new answers to these questions.

Jane Goodall - Dale Peterson 2008

Peterson shows clearly and convincingly how truly remarkable Goodall's accomplishments

were and how unlikely it is that anyone else could have duplicated them. This biography details how Goodall helped set radically new standards and a new intellectual style in the study of animal behavior.

*Primates* - Jim Ottaviani 2013-06-11

Jim Ottaviani returns with an action-packed account of the three greatest primatologists of the last century: Jane Goodall, Dian Fossey, and Biruté Galdikas. These three ground-breaking researchers were all students of the great Louis Leakey, and each made profound contributions to primatology—and to our own understanding of ourselves. Tackling Goodall, Fossey, and Galdikas in turn, and covering the highlights of their respective careers, *Primates* is an accessible, entertaining, and informative look at the field of primatology and at the lives of three

of the most remarkable women scientists of the twentieth century. Thanks to the charming and inviting illustrations by Maris Wicks, this is a nonfiction graphic novel with broad appeal.

**Who on Earth is Jane Goodall?** - Victoria Guidi 2009-07-01

"Details Jane Goodall's life, with chapters devoted to her early years, life, work, writings, and foundations"--Provided by publisher.

Jane Goodall - Dale Peterson 2006

Peterson shows clearly and convincingly how truly remarkable Goodall's accomplishments were and how unlikely it is that anyone else could have duplicated them. Peterson details not only how Jane Goodall revolutionized the study of primates, but how she helped set radically new standards and a new intellectual style in the study of animal behavior.
