Comparative Biomechanics - Steven Vogel
2013-06-17

The classic textbook on comparative biomechanics—revised and expanded Why do you switch from walking to running at a specific speed? Why do tall trees rarely blow over in high winds? And why does a spore ejected into air at seventy miles per hour travel only a fraction of an inch? *Comparative Biomechanics* is the first and only textbook that takes a comprehensive look at the mechanical aspects of life—covering animals and plants, structure and movement, and solids and fluids. An ideal entry point into the ways living creatures interact with their immediate physical world, this revised and updated edition examines how the forms and activities of animals and plants reflect the

materials available to nature, considers rules for fluid flow and structural design, and explores how organisms contend with environmental forces. Drawing on physics and mechanical engineering, Steven Vogel looks at how animals swim and fly, modes of terrestrial locomotion, organism responses to winds and water currents, circulatory and suspension-feeding systems, and the relationship between size and mechanical design. He also investigates links between the properties of biological materials—such as spider silk, jellyfish jelly, and muscle—and their structural and functional roles. Early chapters and appendices introduce relevant physical variables for quantification, and problem sets are provided at the end of each chapter. *Comparative Biomechanics* is useful for

Downloaded from
legacy.opendemocracy.net on 2023-07-21
by guest

physical scientists and engineers seeking a guide to state-of-the-art biomechanics. For a wider audience, the textbook establishes the basic biological context for applied areas—including ergonomics, orthopedics, mechanical prosthetics, kinesiology, sports medicine, and biomimetics—and provides materials for exhibit designers at science museums. Problem sets at the ends of chapters Appendices cover basic background information Updated and expanded documentation and materials Revised figures and text Increased coverage of friction, viscoelastic materials, surface tension, diverse modes of locomotion, and biomimetics

The Daily Grind - Susan Ward Diamond

2011-04-27

How do you begin your day? All of us have our daily rituals, which have a way of influencing the rest of our day. In her book, *The Daily Grind: GOD With Your Coffee*, author Susan Ward Diamond shares stories and reflections gleaned

from years of praying and meditating early each morning over a cup of coffee. Begun as a personal spiritual discipline, Diamond began sharing her Thoughts for the Day with her congregation by email. Before long, her meditations had made their way around the globe, encouraging others on their life journey to experience Gods joyful, unconditional love each day. Sometimes painful, sometimes humorous, always honest, you will find yourself in the stories this pastor has to share. Story is the common thread that binds us to one another. As the great novelist Willa Cather said, There are only two or three human stories, and they go on repeating themselves as fiercely as if they had never happened before. Life is difficult in fact, at times it can feel like a grind. But when God is invited into the daily-ness of our lives, we begin to find a blend that is filled with a marvelous aroma! *The Daily Grind: GOD with Your Coffee* will be a great addition to your day whatever time of the day you choose to read it.

Mastering LEGO® MINDSTORMS - Barbara Bratzel 2022-10-25

Take your LEGO® robotics skills to the next level. You've learned the basics of LEGO® robotics, and now you're ready for more. Mastering LEGO® MINDSTORMS teaches you everything you need to know to level up your robotics engineering skills, using examples compatible with the LEGO® MINDSTORMS Robot Inventor and SPIKE Prime sets. In no time, you'll be programming autonomous robot vehicles, interactive games, LEGO® musical instruments, and more. Rather than feature step-by-step instructions for building a handful of models, you'll find essential information and expert tips and tricks for designing, building, and programming your own robotic creations. The book teaches the fundamentals of writing text-based code for your robots using the popular Python programming language; shows how to harness gears, linkages, and other mechanisms to create all kinds of motion; and

explores sophisticated programming techniques for popular applications such as line following and obstacle avoidance, using both Python and Scratch-based Word Blocks. As you learn, loads of challenges and open-ended projects will inspire you to try out ideas.

How Do You Light a Fart? - Bobby Mercer
2009-04-18

Fireworks and grenades. Grills and campfires. Burps and farts. Men get a kick out of things that go boom, things that cook with fire, and all forms of bodily gas. What they might not know is that science is what makes it all happen. This book answers all the questions guys have about their favorite topics, such as: How do you make a Lifesaver spark? How do you hotwire a car? Why do kegs float? What is PMS? Why doesn't a cell phone work in metal buildings? Serious science mixed with outrageous humor, this book promises guys the need-to-know info on sports, cars, technology, women, bodily functions, food, and more!

Cast Out - A. L. Beier 2014-06-16

Throughout history, those arrested for vagrancy have generally been poor men and women, often young, able-bodied, unemployed, and homeless. Most histories of vagrancy have focused on the European and American experiences. *Cast Out: Vagrancy and Homelessness in Global and Historical Perspective* is the first book to consider the shared global heritage of vagrancy laws, homelessness, and the historical processes they accompanied. In this ambitious collection, vagrancy and homelessness are used to examine a vast array of phenomena, from the migration of labor to social and governmental responses to poverty through charity, welfare, and prosecution. The essays in *Cast Out* represent the best scholarship on these subjects and include discussions of the lives of the underclass, strategies for surviving and escaping poverty, the criminalization of poverty by the state, the rise of welfare and development programs, the relationship between imperial

powers and colonized peoples, and the struggle to achieve independence after colonial rule. By juxtaposing these histories, the authors explore vagrancy as a common response to poverty, labor dislocation, and changing social norms, as well as how this strategy changed over time and adapted to regional peculiarities. Part of a growing literature on world history, *Cast Out* offers fresh perspectives and new research in fields that have yet to fully investigate vagrancy and homelessness. This book by leading scholars in the field is for policy makers, as well as for courses on poverty, homelessness, and world history. Contributors: Richard B. Allen David Arnold A. L. Beier Andrew Burton Vincent DiGirolamo Andrew A. Gentes Robert Gordon Frank Tobias Higbie Thomas H. Holloway Abby Margolis Paul Ocobock Aminda M. Smith Linda Woodbridge

The Best in Packaging - 1989

Naked Eggs and Flying Potatoes - Steve Spangler 2010

Author, celebrity teacher and science guy Steve Spangler teaches you how to transform the ordinary into the amazing as you make everyday items ooze, bubble, fizz, pop. Make people wonder . . . How did you do that? From Flying Toilet Paper to Bin Smoke Rings, Erupting Soda to Exploding Sandwich Bags, the experiments in this book will spark imaginations and totally impress your friends. Learn how to astound kids and kids at heart with easy and inexpensive experiments like: Bubbling Lava Bottle; The Incredible Can Crusher; Eating Nails for Breakfast; The Amazing Folding Egg; Kitchen Chemistry Quicksand Goo; The Screaming Balloon; Burning Money Surprise; Flying Tea Bag Rocket. This is not your ordinary book of science experiments. This is a geek chic look at Spangler's latest collection of tricks and try-it-at-

home activities that reveal the secrets of science in unexpected ways. Over 200 colour photographs accompany the step-by-step instructions, and simple explanations uncover the how-to and why for each activity. Make potatoes fly, bowling balls float, and soda explode on command. But don't try these experiments at home . . . try them at a friend's home!

How To Stop Elderly Abuse - Anne Hart 2002-07-02

Will you be able to help and protect yourself when you grow frail? How can you stop elderly abuse by personality exploration and learning which pitfalls to avoid? Are you more a directive or an informative person? Do you ask for direction and easily give it? Or do you seek and give information? Your stance can help you take action to prevent elderly abuse-for yourself and others. How will you position yourself to avoid,

prevent, and stop abuse of the aged? What can you do right now? Preliminary findings of four research studies made by the U.S. Department of Health and Human Services suggest that some potential causes of abuse of the elderly include the following: 1. The majority of abused elderly cannot care for themselves. 2. The abuser was experiencing stress. Often the elderly victims and the care they required were identified as the source of stress. 3. Violence begets violence. It's banked throughout life and spent on the person who has the least power over us. Sometimes violence continues from generation to generation as the normative response to stress. 4. Most older individuals are not abandoned by their children. Seventy-five percent of the elderly live with these children or live less than 30 minutes away. Eighty percent of home care to the aged is provided by family members living in the same household. 5. The middle aged adult today is more likely to have a living parent than his counterpart of the past.

Beat Down But Still Standing - Funcine Wingate
2022-09-28

This book, *Beat Down but Still Standing*, is the remembered impressions of what it's like to start out thinking that something was wrong and never being able to place a finger on the culprit of what was happening to me. At a very young age, I noticed that other kids didn't like me; I was picked on, bullied, and talked about most of the time in my face, but my mind never allowed me to become upset, scared, or even angry. I was honestly trying to process how I got in these situations or what I did, knowing that I was not a troublemaker nor did I like witnessing trouble. My adolescent years were pretty much the same but with more intensity to some degree, shape, fashion, and/or form. It seems as though the bad memories outweigh the good memories by a long shot. To experience the unseen and to know that there is some force or something unexplainable attached to my life compelled me to question what, who, how, and why these things were

taking place, which led me to a totally different world I never knew existed. Finding out after my breakdown in November of 2019 that some people will use different ways to manipulate and take advantage of others for their own gain or satisfaction, clout, or even monetary gain, I started to read and research about the world of mysticism. As I receive clarity and receipts of my biography is filled with events that would make someone think that I couldn't possibly be serious. So even though the sequel to this will hopefully be the last extension from being beat down in every way you could think. The next book will have a lighter feel of happy events. I love y'all!
