Outsider in the Promised Land - Nissim

Rejwan 2006-08-01

In 1951, Israel was a young nation surrounded by hostile neighbors. Its tenuous grip on nationhood was made slipperier still by internal tensions among the various communities that had immigrated to the new Jewish state, particularly those between the politically and socially dominant Jewish leadership hailing from Eastern Europe and the more numerous Oriental Jews from the Middle East and North Africa. Into this volatile mix came Nissim Rejwan, a young Iraqi Jewish intellectual who was to become one of the country's leading public intellectuals and authors. Beginning with Rejwan's arrival in 1951 and climaxing with the tensions preceding Israel's victory in the Six-Day War of 1967, this book colorfully chronicles Israel's internal and external struggles to become a nation, as well as the author's integration into a complex culture.

Rejwan documents how the powerful East European leadership, acting as advocates of Western norms and ideals, failed to integrate Israel into the region and let the country take its place as a part of the Middle East. Rejwan's essays and occasional articles are an illuminating example of how minority groups use journalism to gain influence in a society. Finally, the letters and diary entries reproduced in *Outsider in the Promised Land* are full of lively, witty meditations on history, literature, philosophy, education, and art, as well as one man's personal struggle to find his place in a new nation.

Brandfaces - 2007Snapshots: An X-ray of Cameroon's Democracy, Governance and Unification - Sam-Nuvala Fonkem 2014

In the 1960s and 1970s, Third World governments prescribed and imposed a certain kind of journalism variously called 'objective' journalism or 'development journalism'. They understood this as journalism restricted to reporting 'facts' as dished out by their propagandists and did not tolerate the questioning of government policy. By 'development journalism', they meant the mere reporting of government efforts to provide services, amenities and infrastructures and the singing of praises anytime a bridge was inaugurated, irrespective of whether it was well-built or whether the contract to build was awarded according to the norms of transparency and probity. This one-sided journalism was prevalent especially in state-owned media and media practitioners in the few private news publications that existed who did not toe the line were subjected to constant harassment and incarceration. However, with the coming of well-trained journalism graduates into the scene in the 1970s and the advent of global liberalization in the late 1980s and 1990s, daring journalists like Sam-Nuvala Fonkem thought it was time to take the bull by the horn and start taking a more critical look at government pronouncements, matching policy statements with real action in the field; in short, moving from 'objective' journalism to interpretative and investigative journalism. This collection of Sam-Nuvala Fonkem's writings is a sampling of the fruit of

that new spirit to dare where angels hitherto feared to tread, to hold public officials to account and to expose the falsehood cached behind the political masquerade of the ruling class.

Golden - Jeff Coen 2012-09-01

No one did political corruption quite like Rod Blagojevich. The 40th governor of Illinois made international headlines in 2008 when he was roused from his bed and arrested by the FBI at his Chicago home. He was accused of running the state government as a criminal racket and, most shockingly, caught on tape trying to barter away President-elect Barack Obama's US Senate seat. Most politicians would hunker down, stay quiet, and fight the federal case against them. But as he had done for years, Rod Blagojevich proved he was no ordinary politician. Instead, he fueled the headlines, proclaiming his innocence on seemingly every national talk show and street corner he could find. Revealing evidence from the investigation never before made public, Golden is the most complete telling yet of the Blagojevich story, written by two Chicago reporters who covered every step of his rise and fall and spent years sifting through evidence, compiling documents, and conducting more than a hundred interviews with those who have known Blagojevich from his childhood to his time in the governor's office. Dispensing with sensationalism to present the facts about one of the nation's most notorious politicians, the authors detail the mechanics of the corruption that brought the governor down and profile a fascinating and frustrating character who embodies much of what is wrong with modern politics. With Blagojevich now serving 14 years in prison, the time has come for the last word on who Blagojevich was, how he was elected, how he got himself into trouble, and how the feds took him down.

Good Corporation, Bad Corporation - Guillermo C. Jimenez 2016

"This textbook provides an innovative, internationally oriented approach to the

teaching of corporate social responsibility (CSR) and business ethics. Drawing on case studies involving companies and countries around the world, the textbook explores the social, ethical, and business dynamics underlying CSR in such areas as global warming, genetically modified organisms (GMO) in food production, free trade and fair trade, anti-sweatshop and living-wage movements, organic foods and textiles, ethical marketing practices and codes, corporate speech and lobbying, and social enterprise. The book is designed to encourage students and instructors to challenge their own assumptions and prejudices by stimulating a class debate based on each case study"--Provided by publisher.

The Brand Gym - David Taylor 2010-04-09

This refreshingly simple, practical guide demonstrates how brand management can boost business performance. It is the ideal inspiration for creating growth in today's tough economic times. Following the template of the highly successful original version, the book consists of a programme of 8 "workouts" that will help marketers raise their own game in key areas such as: insight, portfolio strategy, positioning and innovation. The tools and techniques in the book have been road-tested on over 100 brandgym projects out of the last 8 years, making this book extremely practical. Based on the inside stories of brand leaders who have achieved success: Tesco, T-Mobile, Unilever and Proctor and Gamble. These companies share their tips, tricks and warn of the traps to avoid. 50% of the content is new or updated with the latest thinking on "recession proof branding", how to win when times are tough, communication briefing, growing the core business and new research with marketing directors on the key success factors of brand leaders. Brand Vision - David Taylor 2007-01-16

David Taylor's third book lifts the lid on why so many brand visioning projects end in failure: an overly theoretical and complex approach he calls 'strategy tourism'. By contrast, his straightforward, no-nonsense programme will ensure that you end up with an inspiring vision and a hands-on action plan to drive growth. Designed in a highly practical format, brandvision shows how to lead your team on a step-by-step 'visioning journey' that builds engagement, energy and alignment. Powerful tips, tools and tricks help you start applying the principles to your business today: Searching for true insight: creating a springboard for visioning by using different 'insight catalysts' that cover consumers, markets and competition The visioning journey: creating a compelling brand purpose, a big idea and a rallying call; combining product 'sausage' and emotional 'sizzle' Test-driving the vision: bringing the vision to life by exploring it within your business and with consumers Brand-led business: translating the vision into a business building mix that covers 'hero product' innovation, communication and internal engagement Thought-provoking and irreverent, brandvision demonstrates all the dos and don'ts of brand visioning with many stories of success (and screw-ups) including T-Mobile, Dove, Porsche, Absolut and James Bond. It is an invaluable toolkit for anyone interested in rethinking a brand vision - whatever its shape or size.

Connecting With Consumers - Allan J. Kimmel 2010-06-03

These are exciting times for business marketing professionals, yet the challenges imposed by ongoing social and technological developments are daunting. This book calls on marketers to make a choice: embrace the ongoing changes as opportunities for reshaping relationships with consumers, or cling to the past at the risk of becoming irrelevant.

Experiential Marketing - Kerry Smith 2016-04-25

The most researched, documented, and comprehensive manifesto on experiential marketing. As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American Express and others—open the next chapter of marketing. . . as experiential brands. inspired to transition into experiential brands. *Working Moms & The Rise Of A Lost Generation* - Dr. Sahadeva Das 2018-01-01
Being a 'devoted mother' is not easy. It is more than a full-time job. A full-time job lasts only for 8 or 9 hours whereas a mother's job lasts 24 hours, 7 days a week. There are no holidays or leaves. But of late, this most important job is becoming the least valued job. In a new book, *The Price of Motherhood: Why the Most Important Job in the World is Still the Least Valued*, author Ann Crittenden looks at how a lack of social support for modern moms forces them to make bitter choices Crittenden's research shows that despite the overall advancement of women, mothers' work remains unappreciated in an economic sense, even though moms are cultivating "human capital." Raising productive citizens directly contributes to the overall health of the economy and wealth of the society. But in our modern culture, "mothering" is substantially, but not uniquely, a woman's role.
