Handbook of Relationship Initiation - Susan Sprecher 2018-09-05

The *Handbook of Relationship Initiation* is the first volume to focus specifically on the very beginning stage of relationships – their origin. In this *Handbook*, leading scholars on relationships review the literature on various processes related to the initiation of relationships: how people meet, communicate for the first time, and begin to define themselves as being in a relationship. Topics include attraction, mate selection, influence of social networks on relationship initiation, initiation over the internet, hook-ups among young adults, and flirting and opening gambits. In addition, the dark side of relationship initiation is considered, including unwanted relationship pursuit and barriers to relationship initiation including social anxiety. This volume provides an overdue synthesis of the literature on this topic. It is especially timely in view of the growing prevalence on relationship initiation online, through matchmaking and other social

networking sites, which has increased awareness that science can be used to understand, create, and facilitate compatible matching. This Handbook provides an essential resource for an interdisciplinary range of researchers and students who study relationships, including social psychologists, communication scientists and scholars of marriage and the family.

Romantic Relationships in Emerging

Adulthood - Frank D. Fincham 2010-10-28
Emerging adulthood - the period between the late teens and mid-twenties - is a unique and important developmental period during which people gain relationship experience before settling on someone to partner with. Romantic Relationships in Emerging Adulthood presents a synthesis of research and theory on this topic. Leading scholars from demography, sociology, family studies, and psychology provide original data and theoretical analyses that address the formation, nature, and significance of romantic relationships in emerging adults. Until recently, it was assumed that romantic relationships in emerging adults were not particularly important or formative. The material presented allows this assumption to be thoroughly evaluated. This volume is intended to be a resource for anyone interested in understanding romantic relationships in emerging adulthood. It is especially appropriate for classroom use in upper-level undergraduate and graduate courses in the fields of family sociology, human development and family studies, clinical and developmental psychology, and social work.

The Handbook of Sexuality in Close Relationships - John H. Harvey 2004-04-26
Although sexuality is an integral part of close romantic relationships, research linking these two constructs has been less systematic than other areas pertaining to close relationships. To date, researchers in communication, sociology, family studies, psychology, and psychiatry, have made significant advances in both of these fields. The editors' goal is to integrate this research into one volume. They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality. The emphasis is on theoretical integration and stimulation, methodological

rigor, and critical analysis. This volume explores: *early sexual experiences and their impact on late life sexuality; *how life's stresses impact sexuality and satisfaction with closeness; *the affect of postpartum depression on sexuality; and *the relationship between control, power, anger, as well as revenge and sexual processes in couples. The Handbook of Sexuality in Close Relationships is intended for students and researchers in the disciplines of social, clinical, developmental, and health psychology; family studies; counseling; and interpersonal, family, and health communication. An excellent reference in advanced courses in close relationships taught in psychology, communications, sociology, anthropology, and family studies, the material in Part V will also appeal to clinical psychologists, health professionals, and policymakers.

Give Sorrow Words - John H. Harvey 2016-03-23
Throughout our lives, we are influenced by the sensation of loss. Whether implicit or obvious, the impact of this sense of loss affects our daily thinking and behavior. This new text provides a comprehensive introduction to the study of loss via exploration into three major types of loss: loss of important relationships (divorce or perhaps the dissolution of important relationships and friendships); losses that damage who we are, our self-esteem (loss of employment); and losses resulting from victimization (being the target of violence or prejudice; loss of home in a natural disaster). Students of sociology, theology, and family studies will find this text of key interest.

Moreover, professionals in these fields, including the fields of trauma and loss, will appreciate the thorough literature review, practical language, clinical interventions, and case highlights.

Children of Divorce - John H. Harvey

2011-01-11

Featuring excerpts of essays collected from over one thousand young adults while in the throes of divorce, this book paints a picture of the pain and the hope shown by the storytellers. By framing the narratives with an analysis of the most recent divorce literature, the authors provide readers with a greater and more vivid understanding of the effects of divorce.

Challenging the contention that most children will be irretrievably hurt by their parents' divorce, some stories clearly demonstrate the strength and resilience many have learned in dealing with a divorce in the family. Emphasis is placed on how hope about the possibilities of having close relationships - as well as a willingness to create stronger families in their own lives - represent abiding motivations in this sample of young people. The authors hope that

the use of the raw input of respondents will make the experiences more realistic and ultimately help people deal with major loss events in their lives. Highlights of the new edition include: A new chapter (7) that demonstrates the messiness of divorce (infidelity, dysfunctional interactions, multiple marriages/relationships, and the financial expense), the fading stigma of divorce, the latest divorce rates, the increased average age of first time marriages, and the recent hook-up phenomenon wherein young people are showing a reluctance to commitment Updated throughout with the most current demographic data, new findings from the top researchers in the field, and the latest intervention programs A review of the Divorce Variability and Fluidity Model (DVFM) that helps predict variability in adjusting to divorce More suggestions to help children adapt to divorce, including material on parenting education classes and mediation as a method for easing the process A list of readings and suggested websites for further review More tables and graphs to summarize key concepts. An ideal supplement for courses on divorce, family studies, close relationships, and loss and trauma taught in human development and family studies, and clinical, counseling, and social psychology, as well as communication, social work, and sociology, these engaging stories also appeal to practitioners and those interested in the effects of divorce in general.
