*Pink and Blue* - Jo B. Paoletti 2012-02-06

"An insightful analysis of the origins, transformations and consequences of gender distinctions in children's dress over the last 125 years."

—Daniel Thomas Cook, author of *The Commodification of Childhood* Jo B. Paoletti's journey through the history of children's clothing began when she posed the question, "When did we start dressing girls in pink and boys in blue?" To uncover the answer, she looks at advertising, catalogs, dolls, baby books, mommy blogs and discussion forums, and other popular media to examine the surprising shifts in attitudes toward color as a mark of gender in American children's clothing. She chronicles the decline of the white dress for both boys and girls, the introduction of rompers in the early 20th Century, the gendering of pink and blue, the resurgence of unisex fashions, and the origins of today's highly gender-specific baby and toddler clothing. "A fascinating piece of American social history." —Library Journal "An engrossing cultural history of parenthood, as well as childhood." —Worn Through

*Is Fashion a Woman's Right?* - Carolyn Beckingham 2005-05-01

Addresses the evidence for the belief that enjoyment of fashion is necessarily inconsistent with feminist values, from a feminist point of view. This book begins by establishing that many feminists hold this belief, and argues that disagreeing does not mean claiming that feminism was unnecessary or that it is rendered redundant by social mores.

**The Lifespan** - Guy R. Lefrançois 1990

This fascinating text provides a comprehensive overview of human development from conception until death. The text is arranged chronologically, as most Lifespan courses are taught. **Science as Social Knowledge** - Helen E. Longino 2020-03-31

Conventional wisdom has it that the sciences, properly pursued, constitute a pure, value-free method of obtaining knowledge about the natural world. In light of the social and normative dimensions of many scientific debates, Helen Longino finds that general accounts of scientific methodology cannot support this common belief. Focusing on the notion of evidence, the author argues that a methodology powerful enough to account for theories of any scope and depth is incapable of ruling out the influence of social and cultural values in the very structuring of knowledge. The objectivity of scientific inquiry can nevertheless be maintained, she proposes, by understanding scientific inquiry as a social rather than an individual process. Seeking to open a dialogue between methodologists and social critics of the sciences, Longino develops this concept of "contextual empiricism" in an analysis of research programs that have drawn criticism from feminists. Examining theories of human evolution and of prenatal hormonal determination of "gender-role" behavior, of sex differences in cognition, and of sexual orientation, the author shows how assumptions laden with social values affect the description, presentation, and interpretation of data. In particular, Longino argues that research on the hormonal basis of "sex-differentiated behavior" involves assumptions not only about gender relations but also about human action and agency. She concludes with a discussion of the relation between science, values, and ideology, based on the work of Habermas, Foucault, Keller, and Haraway.

*Girls & Boys* - Sara Bonnett Stein 1983

*Your Eight Year Old* - Louise Bates Ames 2012-01-18

The eight-year-old child is an exuberant, outgoing bundle of energy; he meets every challenge head-on, willing to try almost anything.

Sometimes parents are amazed at the enthusiasm and excitement with which their child greets the world. However, eight is also a time when the child begins to do a great deal of analyzing and evaluating, finding fault in himself and others--especially Mother. How do parents help an eight-year-old through this up-and-down age? What should parents expect in their relationships with the child and how can life in the family be made easier? What will the child's relationship with friends and siblings be like? In the successful tradition of the Gesell institute series, *Your Eight-Year-Old* is a well-researched, highly accessible guide.

*Girls and Boys* - Sara Bonnett Stein 1984

*Children, Family and the State* - Thomas, Nigel 2002-10-11

Different theories of childhood, children's rights and the relationships between children, parents and state are examined. The care system and the extent to which children have been, and are involved in decisions is the main focus.

*Interpersonal Communication* - Sarah Trenholm 2008

*Interpersonal Communication* introduces students to the core concepts that underpin interpersonal communication in theory and practice. Trenholm and Jensen introduce a 5 point model of Communication Competence in chapter one, and use it throughout the book to help keep students focused on the key elements of effective communication. The book draws its examples not only from communication, but also from history, psychology, and anthropology, among others, giving students a richer understanding of the roots of interpersonal communication. Updated throughout, special attention had been paid to bringing more contemporary theory in where relevant, expanding the coverage of computer-mediated communication all throughout the book, and making the book even more accessible by adding pedagogical features to aid student comprehension.

*Together Again* - Betty Steele 1991-03-03

In this lively book, Betty Steele argues that feminism has had its day - that men and women once again are drawing towards one another, seeking new understanding and reconciliation. She writes that men and

women today are admitting that they are looking for love and sex that spring from friendship a slow growth of trust, and an affinity of the spirit - which together can lead to a lifetime commitment. Meanwhile, mothers are realizing that motherhood-on-the-run is a shabby excuse for the real thing, that one hour or so a day of "quality time" with their children is

not enough and is shortchanging the next generation. Beyond its incisive analysis and documentation, Together Again offers hope that bridges can be built between the sexes towards a happier, healthier society in the 1990s.
