The London DMS Bus Matthew (Matt) Wharmby 2016-11-30 Vilified as the great failure of all London Transport bus classes, the DMS family of Daimler Fleetline was more like an unlucky victim of straitened times. Desperate to match staff shortages with falling demand for its services during the late 1960s, London Transport was just one organization to see nationwide possibilities and savings in legislation that was about to permit double-deck one-man-operation and partially fund purpose-built vehicles. However, prohibited by circumstances from developing its own rear-engined Routemaster (FRM) concept, LT instituted comparative trials between contemporary Leyland Atlanteans and Daimler Fleetlines.The latter came out on top, and massive orders followed. The first DMSs entering service on 2 January 1971. In service, however, problems quickly manifested. Sophisticated safety features served only to burn out gearboxes and gulp fuel. The passengers, meanwhile, did not appreciate being funnelled through the DMS's recalcitrant automatic fare-collection machinery only to have to stand for lack of seating. Boarding speeds thus slowed to a crawl, to the extent that the savings made by laying off conductors had to be negated by adding more DMSs to converted routes! Second thoughts caused the ongoing order to be amended to include crew-operated Fleetlines (DMs), noise concerns prompted the development of the B20 [quiet bus] variety, and brave attempts were made to fit the buses into the time-honored system of overhauling at Aldenham Works, but finally the problems proved too much. After enormous expenditure, the first DMSs began to be withdrawn before the final RTs came out of service, and between 1979 and 1983 all but the B20s were sold [as is widely known, the DMSs proved perfectly adequate with provincial operators once their London features had been removed. OPO was to become fashionable again in the 1980s as the politicians turned on London Transport itself, breaking it into pieces in order to sell it off. Not only did the B20 DMSs survive to something approaching a normal lifespan, but the new cheap operators awakening with the onset of tendering made use of the type to undercut LT, and it was not until 1993 that the last DMS operated.

Beyond Collaboration Overload Rob Cross 2021-09-14 Named the Best Management Book of 2021 by strategy+business Named one of "this month's top titles" in the Financial Times in September 2021 Named to the longlist for the 2021 Outstanding Works of Literature (OWL) Award in the

Management & Culture category A plan for conquering collaborative overload to drive performance and innovation, reduce burnout, and enhance well-being. Most organizations have created always-on work contexts that are burning people out and hurting performance rather than delivering productivity, innovation and engagement. Collaborative work consumes 85% of employees' time and is drifting earlier into the morning, later into the night, and deeper into the weekend. The dilemma is that we all need to collaborate more to create effective organizations and vibrant careers for ourselves. But conventional wisdom on teamwork and collaboration has created too much of the wrong kind of collaboration, which hurts our performance, health and overall well-being. In *Beyond Collaboration Overload*, Babson professor Rob Cross solves this paradox by showing how top performers who thrive at work collaborate in a more purposeful way that makes them 18-24% more efficient than their peers. Good collaborators are distinguished by the efficiency and intentionality of their collaboration—not the size of their network or the length of their workday. Through landmark research with more than 300 organizations, in-depth stories, and tools, *Beyond Collaboration Overload* will coach you to reclaim close to a day a week when you: Identify and challenge beliefs that lead you to collaborate too quickly Impose structure in your work to prevent unproductive collaboration Alter behaviors to create more efficient collaboration It then outlines how successful people invest this reclaimed time to: Cultivate a broad network—not a big one—for innovation and scale Energize others—a strong predictor of high performance Connect with others to reduce micro-stressors and enhance physical and mental well-being Cross' framework provides relief from the definitive problem of our age—dysfunctional collaboration at the expense of our performance, health and overall well-being.

The Monsters Know What They're Doing Keith Ammann 2019-10-29 From the creator of the popular blog *The Monsters Know What They're Doing* comes a compilation of villainous battle plans for *Dungeons & Dragons*. In the course of a *Dungeons & Dragons* game, a Dungeon Master has to make one decision after another in response to player behavior—and the better the players, the more unpredictable their behavior! It's easy for even an experienced DM to get bogged down in on-the-spot decision-making or to let combat devolve into a boring slugfest, with enemies running directly at the player characters and biting, bashing, and slashing away. In *The Monsters Know What They're Doing*, Keith Ammann lightens the DM's burden by helping you understand your monsters' abilities and develop battle plans before your fifth edition D&D game session begins. Just as soldiers don't whip out their field manuals for the first time when they're already under fire, a DM shouldn't wait until the PCs have just encountered a dozen bullywugs to figure out how they advance, fight, and retreat. Easy to read and apply, *The Monsters Know What They're Doing* is essential reading for every DM.

Practical VoIP Security Thomas Porter, CISSP, CCNP, CCDA, CCS 2006-03-31 Voice Over IP (VoIP) phone lines now represent over 50% of all new phone line installations. Every one of these new VoIP phone lines and handsets must now be protected from malicious hackers because these devices now reside on the network and are accessible from the Internet just like any server or workstation. This book will cover a wide variety of the publicly available exploit tools and how they can be used specifically against VoIP (Voice over IP) Telephony systems. The book will cover the attack methodologies that are used against the SIP and H.323 protocols as well as VoIP network infrastructure. Significant emphasis will be placed on both attack and defense techniques. This book is designed to be very hands on and scenario intensive · More VoIP phone lines are being installed every day than traditional PBX phone lines · VoIP is vulnerable to the same range of attacks of any network device · VoIP phones can receive as many Spam voice mails as your e-mail can receive Spam e-mails, and as result must have the same types of anti-spam capabilities

Human Chromosomes Eeva Therman 2012-12-06 This book, like the two previous editions, was written as an introduction to human cytogenetics, but it could also be used as a text for a general cytogenetics course, since chromosome structure and behavior are similar in all eukaryotes. Many examples in this book are from organisms other than humans, reflecting our combined backgrounds of molecular and bacterial genetics, and plant and animal cytogenetics. In the rapidly expanding field of human cytogenetics, certain subjects, for instance clinical and cancer cytogenetics, are now covered in recently published, thousand-page volumes. In this book, such subjects are presented only in outline. The enormous growth of information has also made the choice of topics and of examples to illustrate them even more arbitrary and subjective than in the previous editions. Apart from a few pages here and there, the text has been rewritten. Major parts, especially those on molecular matters, have been added. This book would not exist without the dedicated participation of Mrs. Barbara Susman. She has been involved in the project from the planning stages to the final proofreading. She has done the extensive literature research, designed most of the tables and illustrations, and edited and typed the text. For discussions and suggestions we are indebted to many colleagues. We wish especially to mention Drs. Lassi Alvesalo, Evelyn M. Kuhn, and Renata Laxova, who have critically read selected parts of the book, and Dr. Carter Denniston, who has read the whole text.
