Review of Some Text to Speech Converters, Voice Changers, Video Editors, Animators, Speaking Avatar Makers and Live Str - Dr. Hedaya Mahmood Alasooly 2020-09-23

As videos are so much important today, I believe that everyone must have some knowledge on creating and editing videos for of common tasks required by his personal or business use. This book has mainly an objective to evaluate some text to speech converters, voice changers, video editors, cartoon animators and video recording and live streaming programs. As I am Arabic, I gave special importance to look for the best tools that can convert Arabic text to voice with good quality because of the lack of these tools. And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. Then I gave quick guide on how to use the two important video editors, VSDC Free Video Editor and Camtasia Studio. Then I gave quick guide on how to use two websites that enable people to create cartoon animation videos in a simple way, animaker.com/ website and powtoon.com website. Then I gave quick guide on how to use one of the best animator programs, which is Reallusion Cartoon Animator 4. I explained also how it is possible to make face mockup through Cartoon Animator 4 Motion Live 2D Plugin. Then I introduced Adobe Character Animator as alternative program to make face mockup. Finally I explained about one of the video recording and live streaming programs, which is OBS Studio. I mentioned briefly how to setup OBS studio to create livestream video on Youtube and Facebook. At the end, I showed how to use Voki website to create customizable speaking avatars This work is divided to the following sections. 1. Some tools to reshape the Arabic letters so they can be converted to voice in other tools. 2. Some tools to convert English text to speech TTS. 3. Some tools to convert Arabic text to speech TTS. 4. Adverse Effects of Vaccines - Institute of Medicine 2012-04-26

In 1900, for every 1,000 babies born in the United States, 100 would die before their first birthday, often due to infectious diseases. Today, vaccines exist for many viral and bacterial diseases. The National Childhood Vaccine Injury Act, passed in 1986, was intended to bolster vaccine research and development through the federal coordination of vaccine initiatives and to provide relief to vaccine manufacturers facing financial burdens. The legislation also intended to address concerns about the safety of vaccines by instituting a compensation program, setting up a passive surveillance system for vaccine adverse events, and by providing information to consumers. A key component of the legislation required the U.S. Department of Health and Human Services to collaborate with the Institute of Medicine to assess concerns about the safety of vaccines and potential adverse events, especially in children. *Adverse Effects of Vaccines* reviews the epidemiological, clinical, and biological evidence regarding adverse health events associated with specific vaccines covered by the National Vaccine Injury Compensation Program (VICP), including the varicella zoster vaccine, influenza vaccines, the hepatitis B vaccine, and the human papillomavirus vaccine, among others. For each possible adverse event, the report reviews peer-

reviewed primary studies, summarizes their findings, and evaluates the epidemiological, clinical, and biological evidence. It finds that while no vaccine is 100 percent safe, very few adverse events are shown to be caused by vaccines. In addition, the evidence shows that vaccines do not cause several conditions. For example, the MMR vaccine is not associated with autism or childhood diabetes. Also, the DTaP vaccine is

not associated with diabetes and the influenza vaccine given as a shot does not exacerbate asthma. Adverse Effects of Vaccines will be of special interest to the National Vaccine Program Office, the VICP, the Centers for Disease Control and Prevention, vaccine safety researchers and manufacturers, parents, caregivers, and health professionals in the private and public sectors.
