*The Formulas of Popular Fiction - Anna Faktorovich* 2014-09-17

This book creates a taxonomy for the major bestselling fictional genres: romance (e.g., authors Heyer, Cartland, Woodiwiss and Roberts), religious and inspirational (Corelli and Douglas), mystery and detective (Conan Doyle, Christie and Mankell), and science fiction, horror and fantasy (Wells, Tolkien, Orwell, Niven, King and Rowling). Chapters look at a genre from its roots to its most recent works. The structural patterns in the plot, characters and setting of these genres are then explained. The book also provides a critique of currently popular hyper-formulaic, hack, unliterary writings that have multiplied in recent decades. Special topics such as the publishing oligopoly and the resulting homogeneity among bestselling works and the steady movement from literary to unliterary fiction are also examined.

### **The Art of Starting Over - Kin Corder 2012-09**

It's a fact: life happens. It's easy to feel that your life is beyond your control or that your dreams are out of reach. Occasionally, bad decisions or bad luck can put you in a place where you wish

you could just start over-and that first step is often the hardest to make. *The Art of Starting Over* allows you to look at your life from a variety of angles and to discover what's missing. Using the life lesson and exercises within, you can learn how to plan and take the steps you need to create the life you desire. Whether you're starting over by choice or from circumstances beyond your control, this guide can take you down a path that can make the journey back to your ideal new life more enjoyable-and productive. But first, you have to understand what makes you happy. What's important to you may not be important to someone else- and vice versa. That is why you can't rely on what others say to determine what is right for you. Only you can know what your perfect life looks like. Be unapologetic and proud of the ideas you have for your life. You can achieve it. All you need is the guidance, accountability, and motivation. Life is not about keeping up with the Joneses or impressing others; it's about discovering what makes you happy, what's important to you-and why.

**The Woman Who Stopped Running** - John Cary 2017-11-01

The daughter of an ambitious medical family, Helen Jeffers appears to have it all: wealth, looks, a warm heart and a successful career. But not successful enough for her demanding parents. She is a young woman under pressure: like them, she blames herself for her brother's death; life in Boston is tormented and claustrophobic. The 9/11 attack offers the chance to escape. She joins a US Army medical unit and is sent to Iraq as a theatre sister in war torn Baghdad. There she falls for Stephen Vernon, a British surgeon, and they begin a passionate affair, until she discovers he already has a wife and children. Unable to trust her feelings, she seeks a transfer to Afghanistan. Stephen follows her and convinces her of his

love. As they travel through bandit country, their ambulance is destroyed by a roadside bomb. He dies; she survives but falls into the hands of the Taliban. Rescued by an Afghan doctor, she is compelled to spend a winter in hiding, masquerading as an Afghan woman, an experience that will change her life. When she finally returns to the United States, a hero, her 'captivity' is exposed and she faces trial, disgrace and death threats. She flees back to Afghanistan, determined t

*LOOKING BACKWARD (A Utopia) & LOOKING FURTHER BACKWARD (A Dystopia)* - Edward Bellamy 2018-11-02

Looking Backward - Julian West, a young American, towards the end of the 19th century falls into a deep, hypnosis-induced sleep and wakes up 113 years later. He finds himself in the same location (Boston, Massachusetts), but in a totally changed world: It is the year 2000, and while he was sleeping, the United States has been transformed into a socialist utopia. The young man readily finds a guide, Doctor Leete, who shows him around and explains all the advances of this new age, including drastically reduced working hours for people performing menial jobs and almost instantaneous, Internet-like delivery of goods. The two start working on improving the future with the experiences from the past and the present. Looking Further Backward - Set in future of 2023 the book narrates the story of how China invades USA in 2020 after China has adopted rampant capitalism as opposed to rest of the world who are in throes of Nationalism, a socialism like set up. Written in a form of a diary, the novel directly hits out at Edward Bellamy's 1888 Utopian novel Looking Backward. The political drama that unfolds in this novel will make you deeply wonder how the author could foresee so much!

*The Statistical Probability of Love at First Sight* - Jennifer E. Smith 2012-01-05

Who would have guessed that four minutes could change everything? Imagine if she hadn't forgotten the book. Or if there hadn't been traffic on the expressway. Or if she hadn't fumbled the coins for the toll. What if she'd run just that little bit faster and caught the flight she was supposed to be on. Would it have been something else - the weather over the Atlantic or a fault with the

plane? Hadley isn't sure if she believes in destiny or fate but, on what is potentially the worst day of each of their lives, it's the quirks of timing and chance events that mean Hadley meets Oliver... Set over a 24-hour-period, Hadley and Oliver's story will make you believe that true love finds you when you're least expecting it.

**Love at First Sight Quotes** - Relationship Engineer 2021-06-18

Love is something that happens naturally and you realize it when your heart speaks about someone instead of you. Love at first sight quotes is all about the beginning of your love story. Love is a bonding that makes you more strong and happy even if you have nothing. It is really surprising that one simple inspiring word from your loved one can change your entire world. Imagine, you are just an ordinary boy/girl. Your life is going as usual. But one day somewhere you have seen someone and his/her smile, attitude, and talk make you crazy for him/her. You are having a crush for that person. And if those feelings continue to vibrate your heart, then you are in love. But one thing you should remember that you must check your feelings. Is it a temporary mental state or a long-lasting feeling? If you get the answer, then you should move forward. Otherwise, you should stop there. No doubt, it is wonderful to love someone at first sight. It would be more wonderful if you can make him/her fall for you and start your romance life. Here are 60 love at

first sight quotes for you if you are seeking some good quotes that express your feelings of love.

*Looking Backward, 2000 to 1887* - Edward Bellamy 2016-06-20

Living as we do in the closing year of the twentieth century, enjoying the blessings of a social order at once so simple and logical that it seems but the triumph of common sense, it is no doubt difficult for those whose studies have not been largely historical to realize that the present organization of society is, in its completeness, less than a century old. No historical fact is, however, better established than that till nearly the end of the nineteenth century it was the general belief that the ancient industrial system, with all its shocking social consequences, was destined to last, with possibly a little patching, to the end of time. How strange and wellnigh incredible does it seem that so prodigious a moral and material transformation as has taken place since then could have been accomplished in so brief an interval! The readiness with which men accustom themselves, as matters of course, to improvements in their condition, which, when anticipated, seemed to leave nothing more to be desired, could not be more strikingly illustrated. What reflection could be better calculated to moderate the enthusiasm of reformers who count for their reward on the lively gratitude of future ages! The object of this volume is to assist persons who, while desiring to gain a more definite idea of the social contrasts between the nineteenth and twentieth centuries, are daunted by the formal aspect of the histories which treat the subject. Warned by a teacher's experience that learning is accounted a weariness to the flesh, the author has sought to alleviate the instructive quality of the book by casting it in the form of a romantic narrative, which he would be glad to fancy not wholly devoid of interest on its own account. The reader, to whom modern social institutions and their underlying principles are matters of course, may at times find Dr. Leete's explanations of them rather trite—but it must be remembered that to Dr. Leete's guest they were not matters of course, and that this book is written for the express purpose of inducing the reader to forget for the nonce that they are so to him. One word more. The almost universal theme of the writers and orators who have celebrated this bimillennial epoch has been

the future rather than the past, not the advance that has been made, but the progress that shall be made, ever onward and upward, till the race shall achieve its ineffable destiny. This is well, wholly well, but it seems to me that nowhere can we find more solid ground for daring anticipations of human development during the next one thousand years, than by "Looking Backward" upon the progress of the last one hundred. That this volume may be so fortunate as to find readers whose interest in the subject shall incline them to overlook the deficiencies of

the treatment is the hope in which the author steps aside and leaves Mr. Julian West to speak for himself.
