The Guyde - Howie Reith 2016-11-19

The Guyde is the most comprehensive men's dating and self-improvement book ever written, designed to be everything you need to transform into the most confident version of yourself.

There are no lines or routines; instead you'll find exercises and information to improve your self-esteem, social skills, and other elements integral to social success. Everything in these pages is backed with scientific evidence, and when I say scientific evidence, I mean cited peer-reviewed literature, not pop evolutionary psychology or the "law of attraction." You won't be reading anecdotes telling you about my "successes" or opinions; you'll be learning the practical steps necessary for the specific changes you want to manifest in your life. The Guyde is divided into four sections: Part I - Psychology Part I focuses on the internal elements of social interaction. How do you overcome your toxic self-limiting beliefs that keep you from being authentic with people? How do you overcome your fears? How can you stay motivated to make your changes? You will learn clinically effective approaches to all of these and more. Part II - Social Skills For many men, the biggest barrier between themselves and social success is a lack of social skills and awareness. In Part II, you'll learn how to shore up this weakness. You will learn how to listen, banter, share stories, and assert yourself with others. You'll learn how to improve your body language and vocal tonality to project confidence and charisma. Part III - Physical Attractiveness Part III will teach you how to improve your physical features. The first two chapters detail the most clinically effective approaches to diet and exercise. We'll also discuss the basics of fashion and how to dress to impress. Master Part III, and when you go out, you will turn heads. Part IV - Dating The final portion of The Guyde deals with dating, in this version, in a heterosexual male context. You'll

learn the best places to meet potential dates, how to flirt, and how to ask someone out. You'll learn how to plan brag-worthy romantic evenings and how to address problems like rude cancellations and "ghosting." You'll learn how to interact physically while being sensitive to your date's wishes, as well as how to perform better in bed. You'll learn why relationships fail and how to avoid the pitfalls most couples fall into, and you'll come to understand a bit about what it's like to date from a woman's perspective, including many of the cultural factors they face that most men don't understand. The Guyde is a labor of love. I wrote it to be everything I wish I'd known when I was younger, the sorts of things that turned my life around for the better. I hope it does the same for you.

Healing Young Brains - Robert W. Hill
2009-04-14

Neurofeedback is a scientifically proven form of brainwave feedback that trains the child's brain to overcome slow brainwave activity, and increase and maintain its speed permanently. Neurofeedback is quick, noninvasive and cost effective. In fact, 80 percent of the time,

neurofeedback is effective without any of the side effects associated with drugs commonly used to such childhood disorders as autism, ADHD, dyslexia, sleep disorders, and emotional problems. *Healing young Brains* examines each disorder separately and explains in lay terms: the manifestation of the disorder, the diagnosis, and the rationale for treating the disorder with brainwave training. *Healing Young Brains* is parents' guide to all they need to know about treating their children with neurofeedback as an alternative to drugs.

Major-General Thomas Harrison - David Farr
2016-05-13

Thomas Harrison is today perhaps best remembered for the manner of his death. As a leading member of the republican regime and signatory to Charles I's death warrant, he was hanged, drawn and quartered by the Restoration government in 1660; a spectacle witnessed by Samuel Pepys who recorded him 'looking as cheerful as any man could do in that condition'. Beginning with this grisly event, this book employs a thematic, rather than chronological approach, to illustrate the role of millenarianism and providence in the English Revolution, religion within the new model army, literature, image and reputation, and Harrison's relationship with key individuals like Ireton and Cromwell as well as groups, most notably the Fifth Monarchists. Divided in three parts, the study starts with an analysis of Harrison's last year of life, the nature of his response to the political collapse of the Interregnum regimes, and his apparent acceptance of the Restoration without overt resistance. Part two considers Harrison's years of 'power', analysing his political activities and influence in the New Model, especially with regard to the regicide. The final part ties Harrison's political retreat to his initial emergence from obscurity; arguing that Harrison's relative political quietism during the later 1650s was a reflection of the development of his millenarianism. Unlike the only two previous full length studies of Harrison the present work makes use of a full range of manuscript, primary and secondary sources, including the huge range of new material that has fundamentally changed how the early modern period is now understood. Fully footnoted and referenced, this study provides

the first modern academic study of Harrison, and through him illuminates the key themes of this contested period.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-12-21
Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further

research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

A Life Together - Bishop Seraphim Sigrist
2011-04-01

Written in the tradition of the Orthodox East's "desert tradition" of short meditations on spiritual themes, Bishop Seraphim's new book is the Eastern Church's answer to Bonhoeffer's great reflection on similar themes. Here, Bishop Seraphim explores the Russian understanding of the term *Sobornost*, a word for "community" first introduced in the 19th century, which has taken shape as a key concept for exploring what community means and how unity between human beings is truly possible. This uniquely Eastern perspective on a topic of interest to people everywhere will appeal to anyone hungry for a new understanding of community that can inspire daily life. The book will also leave readers with the happy awareness that the history of the Church is not something closed and complete, nor is Christianity an exhausted creed which has run its course. Instead, Christianity is young and ever new, and the Church is just beginning to discover the inwardness that is implicit in the Gospels.

A Traitor in Skyhold - John Bierce 2019-09-08
Hugh and his friends have, to his great displeasure, become the center of attention among the student body at Skyhold. It turns out that surviving the depths of the labyrinth and helping stop a coup both tend to draw a good bit of attention. If Hugh had his way, he'd happily go back to being just another anonymous student. He has more than enough to deal with already as he starts his second year, between his crushing load of schoolwork, training as a prospective candidate to the Librarians Errant, and navigating a long distance relationship. Oh, and the fact that Hugh and company have been dragged into trying to catch a traitor on the Skyhold Council doesn't make life any easier. Nor does it help that the traitor is working with the demon Bakori, who lurks in the depths of the labyrinth below Skyhold, waiting for his chance at revenge.

The Implication of Prevention of Conflicts for Justice and Peace - Asega Primus 2007

The author investigates the extend to which one can ethically apply the principle of «prevention» to conflicts as reflected in the pastoral letter «Gerechter Friede» of the German Episcopal Conference. He critically analyses the text of the second part of the pastoral letter, examines the outstanding controversies on it, reflects on the ethical meaning of «conflict» and «prevention» and finally attempts to apply his conclusions to the African paradigm of Church as Family. The investigation leads the author to the conclusion that conflicts are daily human experiences and may not always necessarily lead to violence. Besides, it is difficult to specify with certainty the point at which a particular conflict turns violent. Preventing them arbitrarily could be contra-productive. However, he agrees with «Gerechter Friede» that violence, especially war, can be better combated through undermining the logic of violence and counter violence rather than by its own instruments.
