French Cultural Politics & Music - Jane F. Fulcher 1999

This book argues that French musical meanings and values in the years from 1898 to 1914 are best explained not in terms of contemporary artistic movements, but rather in terms of the political culture, which was undergoing subtle but profound transformation as nationalist Leagues enlarged the arena of political action. Applying recent insights from French history, sociology, political anthropology, and literary theory, the book reveals how nationalists used critics, educational institutions, concert series and lectures to disseminate their values through a discourse on French music and how the Republic and Left responded to this challenge.

Images - Paul Roberts 2001

Paris at the turn of the 20th century was obsessed with the interrelations of the arts. It was a time when artists and writers spoke of poetry as music, sounds as colors, and paintings as symphonies. The music of Claude Debussy, with its unique textures and dazzling colors, was the perfect counterpart to the bold new styles of painting in France. Paul Roberts probes the sources of Debussy's artistic inspiration, relating the "impressionist" titles to the artistic and literary ferment of the time. He also draws on his own performing experience to touch on all the principal technical problems for a performer of Debussy's piano music. His many suggestions about interpreting the music will be particularly valuable to performers as well as listeners.

Kundalini - Lilian Silburn 1988-01-01

Kundalini's power lies dormant in humans until it is awakened. The awakened Kundalini expresses the primal divine impulse and ultimately joins the individual with the divine. The development of the book parallels the development of the Kundalini within. Part One exposes the awakening and unfolding of the Kundalini; Part Two describes the piercing of the energy centers and the stages of ascent through the body; and Part Three examines Kundalini's relation to sexual expression. The book provides a deep understanding of Tantra and of the underlying purpose of Tantracism. The author carefully considers the Caryakrama practices of sexual expression as a means of awakening and controlling Kundalini. Silburn draws together passages from the Trika, Krama, and Kaula systems ranging through Abhinavagupta and Lalla and provides both translation and commentary for them. Chapters on the Chakras, the Nadis, and on mantras further elucidate the topic and lead to a forceful conclusion: Kundalini is the source of ultimate human knowledge and power.

The Mystery Method - Mystery 2007-02-06

"One of the most admired men in the world of seduction" (The New York Times) teaches average guys how to approach, attract and begin intimate relationships with beautiful women For every man who always wondered why some guys have all the luck, Mystery, considered by many to be the world's greatest pickup artist, finally reveals his secrets for finding and forming relationships with some of the world's most beautiful women. Mystery gained mainstream attention for his role in Neil Strauss's New York Times bestselling exposé, The Game. Now he has written the definitive handbook on the art of the pickup. He developed his unique method over years of observing social dynamics and interacting with women in clubs to learn how to overcome the guard shield that many women use to deflect come-ons from "average frustrated chumps." The Mystery Method: How to Get Beautiful Women Into Bed shares tips such as: *Give more attention to her less attractive friend at first, so your target will get jealous and try to win your attention. *Always approach a target within 3 seconds of noticing her. If a woman senses your hesitation, her perception of your value will be lower. *Don't be picky. Approach as many groups of people in a bar as you can and entertain them with fun conversation. As you move about the room, positive perception of you will grow. Now it's easy to meet anyone you want. *Smile. Guys who don't get laid, don't smile.

A Course in Point Set Topology - John B. Conway 2013-11-04

This textbook in point set topology is aimed at an upper-undergraduate audience. Its gentle pace will be useful to students who are still learning to write proofs. Prerequisites include calculus and at least one semester of analysis, where the student has been properly exposed to the ideas of basic set theory such as subsets, unions, intersections, and functions, as well as convergence and other topological notions in the real line. Appendices are included to bridge the gap between this new material

and material found in an analysis course. Metric spaces are one of the more prevalent topological spaces used in other areas and are therefore introduced in the first chapter and emphasized throughout the text. This also conforms to the approach of the book to start with the particular and work toward the more general. Chapter 2 defines and develops abstract topological spaces, with metric spaces as the source of inspiration, and with a focus on Hausdorff spaces. The final chapter concentrates on continuous real-valued functions, culminating in a development of paracompact spaces.

Exuberance - Paul Kurtz 2015-05-13

Happiness is within everyone's grasp and is only a matter of making the right choices. Taking destiny into one's own hands and having the creative audacity to strive, seek, and meet challenges is the essence of life's drama and exaltation. Life per se has no meaning; it only presents opportunity to be seized and acted upon, thus paving the way for personal achievement and the full life. Paul Kurtz, in *Exuberance*, shows his readers how to banish drudgery from life and how to find happiness in the active life. Drawing upon his personal experience, knowledge, and success, Kurtz explains his philosophy of life, discussing learning and work, pleasure, eroticism and sexuality, morality, the need for love and friendship, and participation in contemporary issues. He suggests that self-power, resourcefulness, daring, creativity, and intelligence help guide and control one's life in spite of the many obstacles along the way. Only the individual can initiate his own success and therefore can take

pride in accomplishing what he sets out to do. *Exuberance* also shows the reader how to cope with an ambiguous world. Life is charged with unexpected events and bizarre happenings. It is filled with richly diverse and idiosyncratic characters. Constant effort and exertion is needed in making a living, meeting new friends, falling in love, raising children, seeing projects through, and coming to terms with old age and death. Dealing with these problems directly rather than fleeing from life's risks reinforces a person and leads him towards an exuberant, rich, zestful life. According to Dr. Kurtz, the fulfillment of one's own purpose is in creating one's own ends and expending the power and energy to attain them. Thus, life's great sin, he suggests, is being lazy and noncreative.
