*Seven Letters to Melin* - Josef Šafařík  
2020-10-01

*Seven Letters to Melin* is an exploration of man's alienation from nature—and from himself—in the modern technological age. Conceived as a series of letters to Melin, an engineer who believes in the value of science and technical progress, the book grows skeptical of such endeavors, while also examining mankind's search for meaning in life. To help uncover this meaning, Šafařík posits a dichotomy between spectator and participant. The role of participant is played by Robert, an artist who has committed suicide. The spectator, embodied by the scientist Melin, views the world

from a distance and searches for explanations, while the artist-participant creates the world through his own active engagement. Through these exchanges, Šafařík argues for the primacy of artistic creativity over scientific explanation, of truth over accuracy, of internal moral agency over an externally imposed social morality, and of personal religious belief over organized church-going. Šafařík is neither anti-scientific nor anti-rational; however, he argues that science has limited power, and he rejects the idea of science that denies meaning and value to what cannot be measured or calculated. Šafařík's critiques of technology, the wage

economy, and increased professionalization make him an important precursor to the philosophy of deep ecology. This book was also a major influence on the Czech president Václav Havel; in this new translation it will find a fresh cohort of readers interested in what makes us human.

**The 20th Century A-GI** - Frank N. Magill  
2013-05-13

Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All

entries conclude with a fully annotated bibliography.

**Why?** - Mario Livio 2017-07-11

Livio investigates curiosity through the lives of paragons of inquisitiveness as Leonardo da Vinci and Richard Feynman. He interviewed a range of exceptionally curious people from an astronaut with degrees in statistics, medicine, and literature to a rock guitarist with a PhD in astrophysics

**The Steerage and Alfred Stieglitz** - Jason Francisco 2012-02-12

When, in 1907, Alfred Stieglitz took a simple picture of passengers on a ship bound for Europe, he could not have known that The Steerage, as it was soon called, would become a modernist icon and, from today's vantage, arguably the most famous photograph made by an American photographer. In complementary essays, a photo historian and a photographer reassess this important picture, rediscovering the complex social and aesthetic ideas that

## **Leonardo Da Vinci A Psychosexual Study Of An Infantile Reminiscence 1916**

---

informed it and explaining how over the years it has achieved its status as a masterpiece. What aspects of Stieglitz's ideas and sometimes-murky ambitions help us understand the picture's achievements? How should we assess the photograph in relation to Stieglitz's many writings about it? The authors of this book explore what The Steerage might mean in at least two senses—by itself, as a grand and self-sufficient work, and also ineluctably bound up with the many stories told about it. They make the photograph, today, what Stieglitz himself made it over the years—a photo-text work.

*Annuaire Canadien de Droit International 1995* - Don M. McRae 1996

The Canadian Yearbook of International Law is issued annually under the auspices of the Canadian Branch of the International Law Association (Canadian Society of International Law) and the Canadian Council on International Law. The Yearbook contains articles of lasting significance in the field of international legal

studies, a notes and comments section, a digest of international economic law, a section on current Canadian practice in international law, a digest of important Canadian cases in the fields of public international law, private international law, and conflict of laws, a list of recent Canadian treaties, and book reviews.

**Leonardo Da Vinci** - Sigmund Freud 2010  
Originally published: New York: Moffat, Yard, 1916. With new introd.

[Bringing Freud to America](#) - Michael Edmonds  
2023-06-27

In 1900, hardly anyone in America had heard of Sigmund Freud, but by 1920 nearly everyone had. This is the story of the translators, editors, journalists, publishers, promoters and booksellers who first brought Freud to American readers. They included scientists and scoundrels, reckless risk-takers and buttoned-down businessmen, puritans and libertines, anarchists and capitalists, passionate freedom fighters and racist bigots. "American

publishers," Freud wrote to one colleague, "are a dangerous breed." Elsewhere he called them rascals, liars, swindlers, crooks, and pirates. Here are accounts of their drunken parties, political crusades, questionable business practices, criminal prosecutions, shameless marketing, and blatant plagiarism. There's even a suicide and a murder. And lots of sex (it's a book about Freud, after all). Ideas that Freud promoted are woven so tightly into our daily lives today that, like gravity or air, we hardly notice them. This book, based on hundreds of unpublished records, explains how they first took root in American minds more than a century ago.

*Bibliography* - Jacques Waardenburg 2015-08-31  
Since its founding by Jacques Waardenburg in 1971, Religion and Reason has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include (among others) category formation, comparison,

ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism, and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline.

English on the various forms that constitute "life writing." As this term suggests, the Encyclopedia explores not only autobiography and biography proper, but also letters, diaries, memoirs, family histories, case histories, and other ways in which individual lives have been recorded and structured. It includes entries on genres and subgenres, national and regional traditions from around the world, and important autobiographical writers, as well as articles on related areas such as oral history, anthropology, testimonies, and the representation of life stories in non-verbal art forms.

[The Varieties of Metaphysical Poetry](#) - T. S. Eliot  
2014-03-11

The famed series of Trinity College and Johns

Hopkins lectures in which the Nobel Prize winner explored history, poetry, and philosophy. While a student at Harvard in the early years of the twentieth century, T. S. Eliot immersed himself in the verse of Dante, Donne, and the nineteenth-century French poet Jules Laforgue. His study of the relation of thought and feeling in these poets led Eliot, as a poet and critic living in London, to formulate an original theory of the poetry generally termed "metaphysical"—philosophical and intellectual poetry that revels in startlingly unconventional imagery. Eliot came to perceive a gradual "disintegration of the intellect" following three "metaphysical moments" of European civilization—the thirteenth, seventeenth, and nineteenth centuries. The theory is at once a provocative prism through which to view Western intellectual and literary history and an exceptional insight into Eliot's own intellectual development. This annotated edition includes the eight Clark Lectures on metaphysical poetry

## **Leonardo Da Vinci A Psychosexual Study Of An Infantile Reminiscence 1916**

---

that Eliot delivered at Trinity College in Cambridge in 1926, and their revision and extension for his three Turnbull Lectures at Johns Hopkins University in Baltimore in 1933. They reveal in great depth the historical currents of poetry and philosophy that shaped Eliot's own metaphysical moment in the twentieth century.

*Freud and his discontents* - Derek Dey  
2021-05-12

Freud is not so well considered today. Critiques started early with Melanie Klein declaring an earlier date for infant trauma than Freud's Oedipal theory did. Of late, work by Daniel Stern, John Bowlby, Margaret Mahler and Lawrence Kohlberg, all offer different accounts. Such research moved psychology beyond the Oedipal framework. Freud also left confusion

over the feminine, of which he likened it to an obfuscated, "Dark Continent." Moreover, Freud left us with identity confusion related to two mothers and two fathers, broadly recorded and also encoded in his last book, 'Moses and Monotheism'. Some of his sexual theories can be traced to Albert Moll, one of a number involved in such studies at the time. Nevertheless, a number of Freudians meeting at the Vienna Psychoanalytic Society in his own home on Wednesdays to discuss Freudian notions had some such as, C.G. Jung and Alfred Adler, leaving as 'discontents' and forging separate psychological disciplines. Paradoxically they supported Freud's idea that psychoanalysis / psychology should become an international affair as their ideas also spread. Therefore, Freud, arguably, remains as a father of modern psychology and is still worthy of further thought.
