The Unfolding God of Jung and Milton - James P. Driscoll 2021-10-21

In this first extensive Jungian treatment of Milton's major poems, James P. Driscoll uses archetypal psychology to explore Milton's great themes of God, man, woman, and evil and offers readers deepened understanding of Jung's profound thoughts on Godhead. The Father, the Son, Satan, Messiah, Samson, Adam, and Eve gain new dimensions of meaning as their stories become epiphanies of the archetypes of Godhead. God and Satan of Paradise Lost are seen as the ego and the shadow of a single unfolding personality whose anima is the Holy Spirit and Milton's muse. Samson carries the Yahweh archetype examined by Jung in Answer to Job, and Messiah and Satan in Paradise Regained embody the hostile brothers archetype. Anima, animus and the individuation drive underlie the psychodynamics of Adam and Eve's fall. Driscoll draws on his critical acumen and scholarly knowledge of Renaissance literature to shed new light on Jung's psychology of religion. The Unfolding God of Jung and Milton illumines Jung's heterodox notion of Godhead as a quaternary rather than a trinity, his revolutionary concept of a divine individuation process, his radical solution to the problem of evil, and his wrestling with the feminine in Godhead. The book's glossary of Jungian terms, written for literary critics and theologians rather than clinicians, is exceptionally detailed and insightful. Beyond enriching our understanding of Jung and Milton, Driscoll's discussion contributes to theodicy, to process theology, and to the study of myths and archetypes in literature.

Philosophy and Memory Traces - John Sutton 1998-03-05

Philosophy and Memory Traces defends two theories of autobiographical memory. One is a bewildering historical view of memories as dynamic patterns in fleeting animal spirits, nervous fluids which rummaged through the pores of brain and body. The other is new connectionism, in which memories are 'stored' only superpositionally, and reconstructed rather than reproduced. Both models, argues John Sutton, depart from static archival metaphors by employing distributed representation, which brings interference and confusion between memory traces. Both raise urgent issues about control of the personal past, and about relations between self and body. Sutton demonstrates the role of bizarre body fluids in moral physiology, as philosophers from Descartes and Locke to Coleridge struggled to control their own innards and impose cognitive discipline on 'the phantasmal chaos of association'. Going on to defend connectionism against Fodor and critics of passive mental representations, he shows how problems of the self are implicated in cognitive science.

Comparative Perspectives on Gender Equality in Japan and

Norway - Masako Ishii-Kuntz 2021-11-28

This book compares perspectives on gender equality in Norway and Japan, focusing on family, education, media, and sexuality and reproduction as seen through a gendered lens. What can we learn from a comparison between two countries that stand in significant contrast to each other with respect to gender equality? Norway and Japan differ in terms of historical, cultural and socioeconomic backgrounds. Most importantly, Japan lags far behind Norway when it comes to the World Economic Forum's Gender Gap Report. Rather than taking a narrow approach that takes as its starting point the assumption that Norway has

so much 'more' to offer in terms of gender equality, the authors attempt to show that a comparative perspective of two countries in the West and East can be mutually beneficial to both contexts in the advancement of gender equality. The interdisciplinary team of researchers contributing to this book cover a range of contemporary topics in gender equality, including fatherhood and masculinity, teaching and learning in gender studies education, cultural depictions of gender, trans experiences and feminism. This unique collection is suitable for researchers and students of gender studies, sociology, anthropology, Japan studies and European studies.

Fortuna, Money, and the Sublunar World - Tuomas M. S. Lehtonen 1995-01-01

This study opens up an important perspective to the intellectual history of the 12th and early 13th century. It also proposes a new approach for cultural historical research by using secular Latin poetry as materials for the analysis of the ideological articulation of clerical orders of the time.

Einstein, Relativity and Absolute Simultaneity - William Lane Craig 2007-11-08

Einstein, Relativity and Absolute Simultaneity is an anthology of original essays by an international team of leading philosophers and physicists who have come together to reassess the contemporary paradigm of the relativistic concept of time. A great deal has changed since 1905 when Einstein proposed his Special Theory of Relativity, and this book offers a fresh reassessment of Special Relativity's relativistic concept of time in terms of epistemology, metaphysics, and physics.

The Spelit Power Matrix - June H. Schmieder-Ramirez 2007-05-30

The SPELIT POWER MATRIX is a leadership tool for untangling the organizational environment from a social, political, economic, legal, intercultural and technical view. The SPELIT analysis method was developed for adult learners to have a framework for determining and formulating the answer to the question: What is? There is a need to analyze the environment in all organizations, whether you are entering a new organization or to benchmark the existing organization. The purpose of this text is to show how perceptive leaders can analyze environments in preparation for possible future action. We demonstrate how the methodology aligns with previous theories regarding environmental scanning and produces a workable framework for the perceptive leader. The SPELIT POWER MATRIX is intended for practitioners doing a

market analysis or diagnosis prior to implementing transitions, benchmarking in anticipation of an intervention, and can be used by undergraduate students and seasoned practitioners.

Chinese Characters - Ljon Wiegner 1965-01-01

The heart of this book is a series of etymological lessons, in which approximately 2300 Chinese characters are classified according to 224 'primitives' upon which they are based. For each character Father Wiegner gives the modern form, its archaic form, literary pronunciation (Wade system), explanations of origin, semantic content of component parts, related characters, variant forms, quotations of classical usage, and similar material. To make his book more useful Father Wiegner has also incorporated a tremendous number of reading aids for the student - listings of the primitives; an index of the characters analyzed, arranged by number of strokes; a listing of 858 phonetic elements, arranged by number of strokes; a listing of about 10,000 characters by phonetic element; a lexicon by transliteration, comprising about 7,000 characters; and a lexicon of about 10,000 characters according to the customary modern system of 214 radicals devised by K'ang-hsi.

Crying Out for Change - Deepa Narayan-Parker 2000

A multi-country research initiative to understand poverty from the eyes of the poor, the Voices of the Poor project was undertaken to inform the World Bank's activities and the upcoming World Development Report 2000/01. The research findings are being published in three books: "Can Anyone Hear Us?" gathers the voices of over 40,000 poor women and men in 50 countries from the World Bank's participatory poverty assessments (Deepa Narayan, Raj Patel, Kai Schafft, Anne Rademacher, and Sarah Koch-Schulte, authors). "Crying Out for Change" pulls together new field work conducted in 1999 in 23 countries (Deepa Narayan, Robert Chambers, Meera Shah, and Patti Petesch, authors). "From Many Lands" offers regional patterns and country case-studies (Deepa Narayan and Patti Petesch, editors). Voices of the Poor marks the first time such an exercise has been undertaken in so many developing countries and transition economies around the world. It provides a unique and detailed picture of the life of the poor and explains the constraints poor people face to escape from poverty in a way that more traditional survey techniques do not capture well. Each of the three volumes demonstrates the importance of voice and power in poor people's definition of poverty. Voices of the Poor concludes that we need to expand our conventional views of poverty which focus on income expenditure, education, and health to include measures of voice and empowerment.

Words on Cassette, 2002 - R R Bowker Publishing 2002

Rheostasis - Nicholas Mrosovsky 1990

This work offers a comprehensive re-examination and elaboration of homeostasis, a guiding principle in physiology that has received surprisingly little critical evaluation. Among the key topics addressed are questions concerning the competing demands of different regulatory systems within the body and the problem of maintaining equilibrium in such circumstances. The author makes the important point that the body does not always seek constancy of its internal environment, nor does it always react in ways that prevent change. On the contrary, sometimes physiological mechanisms actively promote change. These changes in regulated levels--termed "rheostasis"--are seen as having an adaptive

value beyond a simple failure of homeostasis. This book compares and categorizes examples of rheostasis for a variety of physiological variables, and presents what is known about conflicts between different regulatory systems and their role in promoting the occurrence of rheostasis. Among other topics covered are weight loss during hibernation, calcium storage and reproduction, fever, and rates of fat deposition in adults. The work of an outstanding scholar, this integrative study represents a refreshing and essential new approach to one of the basic concepts in physiological science.

Dororo - Osamu Tezuka 2020-08-18

Previously published in three installments, the entire run of comic master Osamu Tezuka's enduring classic is herewith available in one volume at a new affordable price. The lauded adventures of a young swordsman and his rogue sidekick that also inspired the cult video game Blood Will Tell have never been as accessible. A samurai lord has bartered away his newborn son's organs to forty-eight demons in exchange for dominance on the battlefield. Yet, the abandoned infant survives thanks to a medicine man who equips him with primitive prosthetics - lethal ones with which the wronged son will use to hunt down the multitude of demons to reclaim his body one piece at a time, before confronting his father. On his journeys the young hero encounters an orphan who claims to be the greatest thief in Japan. Like an unforgettable road movie, Dororo reaches deeper than its swashbuckling surface and offers a thoughtful allegory of becoming what one is, for nobody is born whole.

Learning to Serve - Maureen E. Kenny 2001-12-31

Service learning, as defined by the editors, is the generation of knowledge that is of benefit to the community as a whole. This seventh volume in the Outreach Scholarship book series contributes a unique discussion of how service learning functions as a critical cornerstone of outreach scholarship. The sections and chapters of this book marshal evidence in support of the idea that undergraduate service learning, infused throughout the curriculum and coupled with outreach scholarship, is an integral means through which higher education can engage people and institutions of the communities of this nation in a manner that perpetuate civil society. The editors, through this series of models of service learning, make a powerful argument for the necessity of "engaged institutions".

Organ Shortage: The Solutions - J.-L. Touraine 2012-12-06

Organ Shortage: The Solutions is the latest subject in the Continuing Education series, organized by Fondation Marcel Mérieux and Université Claude Bernard in Lyon. The annual subject is chosen to reflect the status of the topical issues of the year, as taught by leading international experts. The contribution of transplantation and clinical immunology to advanced medicine is considerable and promising. The annual volumes in this series keep the reader abreast of these developments.

English in Mind Level 5 Student's Book with DVD-ROM - Herbert Puchta 2012-02-09

This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 5 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units.
