Radical Right Parties in Central and Eastern Europe - Bartek Pytlas 2015-10-16

In Central and Eastern Europe, radical right actors significantly impact public debates and mainstream policy agenda. But despite this high discursive influence, the electoral fortune of radical right parties in the region is much less stable. It has been suggested that this may be due to the fact that mainstream competitors increasingly co-opt issues which are fundamental for the radical right. However, the extent to which such tactics play a role in radical right electoral success and failure is still a subject for debate. This book is the first to provide a systematic theoretical framework and in-depth empirical research on the interaction between discursive

influence, party competition and the electoral fortune of radical right parties in Central and Eastern Europe. It argues that in order to fully explain the impact of mainstream party strategies in this regard, it is vital to widen the analysis beyond competition over issues themselves, and towards their various legitimizing narratives and frame ownership. Up-to-date debates over policies of collective identity (minority, morality and nationalizing politics) in Hungary, Poland, and Slovakia serve as best cases to observe these under-researched phenomena. The analytical model is evaluated comparatively using original, primary data combined with election studies and expert surveys. Advancing an innovative, fine-grained approach on the mechanisms

and effects of party competition between radical right and mainstream parties, this book will be of interest to students and scholars researching the far right and European party politics, as well as political contestation and framing.

The Greening of Everyday

Life - John M. Meyer 2016

The Greening of Everyday Life develops a distinctive new way of talking about environmental concerns in post-industrial society. It brings together several conceptual frameworks with a diversity of case studies and practical examples of efforts to orient everyday material practices toward greater sustainability. The volume builds upon internal criticisms of dominant strands of contemporary environmentalism in post-industrial societies, and develops a new approach which emerges from a number of disciplines, but is unified by a normative concern for the material objects and practices familiar to members of societies in their everyday

lives. In exploring alternatives, the chapter authors utilize conceptual frameworks rooted in environmental justice, new materialism, and social practice theory and apply it to the everyday; attention to urban biodiversity, infrastructure for storm water run-off, green home remodelling, household toxicity, community gardens and farmers markets, bicycling and automobility, alternative technologies, and more. With contributions from leading international and emerging scholars, this volume critically explores specific strategies and actions taken to generate homes, communities, and livelihoods that might be scaled-up to promote more sustainable societies.

International Assistance to

Police Reform - steffen eckhard 2016-06-16

This book compares police reform operations in Kosovo and Afghanistan, addressing the internal machinery that makes peace operations work—or not. Recognizing that the chances for effective

peacebuilding vary widely across contexts, this book investigates the impact of one of the few variables that peacebuilders do control: the management and design of peace operations. Building on field research and over one hundred expert interviews, International assistance to police reform: Managing Peacebuilding systematically compares such operations in two different contexts—Kosovo and Afghanistan—by focusing specifically on international assistance for local police reform since 1999. Four comprehensive case studies examine operations in Kosovo and Afghanistan before and after the European Union took over police reform responsibilities: in Kosovo from the Organization for Security and Co-operation in Europe (OSCE) and in Afghanistan from the German government. Speaking to scholars and practitioners in domestic and international organizations, the book drills in the complex relation between headquarter diplomats and field level

conflict experts. Its findings combine to a set of recommendations for policy-makers to better align their operations to the contentious politics of conflict management and peacebuilding.

Business Cycles and Strike Activity - Julia Casutt-Schneeberger 2012

Hauptbeschreibung Labour disputes are a central analytical category in social sciences. The magnitude of strike activity has always served as an indicator for socio-economic development and particularly for the shape of the relationship between capital and labour. Research, therefore, has usually focused on the long-term development and determinants of strike levels and their trend. Short-

term fluctuations and determinants of the cyclical patterns of industrial conflicts have been addressed to a lesser extent. The present study takes up this question for the three predominantly German-speaking.

Sexual Function in the Prostate Cancer Patient -

John P Mulhall 2009-02-27

Sexual dysfunction presents a major challenge to physicians who take on the task of treating men with prostate cancer. While curing the disease and saving a life is paramount, improving technologies and therapies offer skilled surgeons and clinical oncologists the opportunity to eradicate the disease without compromising sexual function. In Sexual Function of the Prostate Cancer Patient, John Mulhall and a panel of internationally recognized experts on prostate cancer and sexual function assess in detail the current state of prostate cancer treatment. The authors offer a broad overview of the pathophysiology and treatment

of erectile dysfunction in men with prostate cancer, reviewing the latest findings regarding erection-sparing radiation therapy and sexual function outcomes after laparoscopic and robotic prostatectomy. Additional chapters discuss intra-operative maneuvers to minimize post-operative erectile dysfunction and pharmacologic penile preservation and rehabilitation. Timely and authoritative, *Sexual Function in the Prostate Cancer Patient* is a highly readable guide to preserving post-prostate cancer sexual function that no urologist or radiation and medical oncologist should be without.

Linguistic Identities, Language Shift and Language Policy in Europe - Bert Cornillie 2009

The papers in this volume reflect the changes in the linguistic landscape, and illustrate the dynamics of linguistic situations in Europe. Whereas some contributions offer theoretically distanced views on linguistic identity, linguistic internationalisation

and linguistic adaptation, other papers provide empirical documentation on language policies, language loss or retention, code-switching in migrant communities, and linguistic rights. The volume offers important materials for a comprehensive overview of the social, political, and cultural status of language varieties in Europe. The papers, covering data from a wide array of languages (Germanic, Romance, Slavic, Baltic, Finno-Ugric, Greek and Turkish), are preceded by an introduction focusing on the ecolinguistic setting of the study of linguistic identities, language shifts and linguistic ideologies. The contributions are intended to reflect essential features of European language study, past and present: European language awareness in relation to highly diversified linguistic and cultural situations; the development of linguistic models, and the construction of key concepts in general linguistics; the interest in systemic variation; translation theory and practice.

Claus Offe and the Critical Theory of the Capitalist State

State - Jens Borchert

2016-04-28

Back in 1972, German political sociologist Claus Offe published a book on the Structural Problems of Late Capitalism which, for almost two decades, inspired and stimulated an international and transdisciplinary debate on the role of the state in contemporary capitalism. An academic debate which, paradoxically, began to wane as the issues about which Offe had been writing became even more prominent: the "Contradictions of the Welfare State" (the title of a collection of Offe's main contributions to the debate published in English in 1984) and democratic capitalism's reality of the permanent "crises of crisis management". Since 2008, it has again become a widely shared diagnosis that advanced capitalism is in crisis. However, there is either scholarly disagreement or (more often so) mere perplexity when it comes to understanding this

crisis and to explaining the prevalent patterns in dealing with it. In this volume, Jens Borchert and Stephan Lessenich critically combine a reconstruction Claus Offe's approach to state theory with an analysis of the current constellation of democratic capitalism based on that same theory. In doing so, they expertly argue that his relational approach to state theory is much better equipped analytically to grasp the contradictory dynamics of the financial crisis and its political regulation than competing contributions. This is why systematically revisiting the theory of "late capitalism" is not only of a historical concern, but constitutes an essential contribution to a political sociology of our time.

The Politics of Judicial Review - Christian Adam
2016-04-20

This book unites scholarship on law and politics with compliance research in the EU to shed light on the political role of a neglected dimension of litigation in the EU: the political role of governmental actions for annulment. The book does not portray national governments as passive actors within the EU's judicial arena. Instead it focuses on cases in which national governments turn to the Court of Justice to litigate against the European Commission, and provides several answers to the question of why EU member state

governments take this decision. Governments hope, on the one hand, to evade costly domestic adjustments where the Commission uses administrative acts to interfere with domestic policy application. On the other hand, governments hope to provoke judicial law-making to influence the long-term development of EU administrative law and sectoral regulation. The book will be of particular interest to political scientists and legal scholars. . .

Skill Formation Regimes in South Asia - Markus Maurer 2011

In the face of accelerated economic globalisation, many of the industries in economically less developed countries have become more technology-intensive. Skill formation processes, both inside and outside firms, are therefore changing. This study scrutinises such transformations by comparing - from the perspective of historical institutionalism - the skill formation regimes of the garment industries in Sri

Lanka and Bangladesh. It sheds light on the differences between the trajectories of the in-firm skill formation regimes of the two countries, and reveals the important part that varying paths of educational development in both countries have played in shaping these trajectories. At the same time, the study shows how, in both countries, state-led skill formation regimes have been transformed not only by market forces and the growing importance of corporate business interests, but also by the social demand for educational credentials.

Organic Semiconductor Interfaces with Insulators and Metals - Kathrin Müller 2009-10-12

The electronic interactions of

self-assembled organic semiconductors with metals, metal-oxides and ultrathin insulator surfaces have been investigated by complementary analysis techniques comprising scanning tunnelling microscopy and spectroscopy, low energy electron diffraction, x-ray photoelectron spectroscopy and ultraviolet photoelectron spectroscopy. Two model systems have been chosen and investigated: The first model system comprises the electronic interactions and the self-assembly of pentacene molecules on the Cu(110) as well as on the oxidized Cu(110) surface. In a second model system the interface of octa-ethyl porphyrins with ultrathin insulator films and metals has been investigated. The adsorption of molecules on insulator surfaces is especially interesting due to the strong reduction of the electronic and chemical interactions between the molecules and the substrate. The investigation of pentacene on the Cu(110) surface revealed a multi-phase behaviour, which is

characterized by molecular bending, molecular mobility, different relative orientation of the molecules and different packing densities. Furthermore, the influence of the adsorbate layer on the Shockley surface state of the Cu(110) has been investigated. A complex interplay of different phenomena, like Pauli repulsion, charge transfer, mixing and hybridization of electronic states as well as the polarization of the organic adsorbate in the surface dipolar field, lead to a shift of the surface state to higher binding energies. Additionally, the occupation of the surface state is increased for the adsorption of one monolayer of pentacene. This particular behaviour has not been reported for any other molecular/metal system so far. The adsorption of pentacene on the oxidized Cu(110) surface reveals that the electronic interactions and the surface corrugation determine the self-assembly of the molecular ad-layer. The second project in this thesis comprises the

electronic interactions of porphyrin molecules, another representative of molecular semiconductors, with ultrathin insulator layers. The main question here was how the electronic interactions between the molecules and the substrate change with increasing insulator thickness and whether it is possible to electronically decouple the molecules from the substrate for one or two monolayer thin insulator films. A detailed growth study of NaCl on different metal surfaces led to samples, which were homogeneously covered with 1 ML of NaCl and thus could be investigated by non-local analysis techniques like UPS and XPS. Low temperature STS and angle-resolved UPS data showed that the CuOEP molecules strongly interact with the Cu(111) and Ag(111) substrate leading to unoccupied electronic states in the band gap of the molecule on Ag(111) and to quenching of the Shockley surface state for the adsorption of CuOEP on Cu(111). Further UPS and XPS

measurements revealed a strong influence of the chemical environment on the binding energies, as identified by shifted peaks for CuOEP on NaCl compared to CuOEP on the metal surfaces. These peak shifts have been related to strong screening of the photoelectron hole.

The Cambridge Companion to Fichte - David James
2016-12-13

Johann Gottlieb Fichte (1762-1814) was the founding figure of the philosophical movement known as German idealism, a branch of thought which grew out of Kant's critical philosophy. Fichte's work formed the crucial link between eighteenth-century Enlightenment thought and philosophical, as well as literary, Romanticism. Some of his ideas also foreshadow later nineteenth- and twentieth-century developments in philosophy and in political thought, including existentialism, nationalism and socialism. This volume offers essays on all the major aspects of Fichte's philosophy, ranging

from the successive versions of his foundational philosophical science or Wissenschaftslehre, through his ethical and political thought, to his philosophies of history and religion. All the main stages of Fichte's philosophical career and development are charted, and his ideas are placed in their historical and intellectual context. New readers will find this the most convenient and accessible guide to Fichte currently available. Advanced students and specialists will find a conspectus of recent developments in the interpretation of Fichte.

The Reception of the Homeric Hymns - Andrew Faulkner
2016

The Reception of the Homeric Hymns is a collection of original essays exploring the reception of the Homeric Hymns and other early hexameter poems in the literature and scholarship of the first century BC and beyond. Although much work has been done on the Hymns over the past few decades, and despite their importance within

the Western literary tradition, their influence on authors after the fourth century BC has so far received relatively little attention and there remains much to explore, particularly in the area of their reception in later Greco-Roman literature and art. This volume aims to address this gap in scholarship by discussing a variety of Latin and Greek texts and authors across the late Hellenistic, Imperial, and Late Antique periods, including studies of major Latin authors, such as Virgil, Horace, and Ovid, and Byzantine authors writing in classicizing verse. While much of the book deals with classical reception of the Hymns, including looking beyond the textual realm to their influence on art, the editors and contributors have extended its scope to include discussion of Italian literature of the fifteenth century, German scholarship of the nineteenth century, and the English Romantic poets, demonstrating the enduring legacy of the Homeric Hymns in the literary world.

Variational Text Linguistics - Christoph Schubert 2016-05-24
Owing to the ever-increasing possibilities of communication, especially with the advent of modern communication technologies, register analysis offers a constantly widening range of research opportunities. Still, research has mainly concentrated on well-established and frequent registers such as newspaper articles, while many descriptive and theoretical issues have not yet been sufficiently investigated. This volume gives a state-of-the-art insight into register studies and points out emerging trends as well as new directions for future research. Furthermore, it provides a forum for the description and discussion of registers which have not received an appropriate amount of attention so far. In particular, it deals with specialized offline and online registers, cross-register comparison as well as regional, contrastive, and diachronic register variation. In parallel to the new discipline of variational pragmatics, this

volume aims to foster the discipline of 'variational text linguistics' and to initiate fundamental investigations in this area. This field of research provides new insights into the concept of register, since it covers both functional and regional types of textual variation.

Members of the European Parliament on the Web -

Jessica Kunert 2016

The Members of the European Parliament are often ignored by citizens and media. Their work is perceived as being far away from the citizens, as just another part of the opaque institutions of the European Union. Just as far away seems to be the national level, which the European parliamentarians have to keep in mind for their work as well as their further political career. Online communication on personal websites has the potential to address these problems since parliamentarians may present their work in depth. This study looks at the websites of Members of the European Parliament with a quantitative

content analysis, with the themes of information, transparency and representation being in the focus. For this, a comparison with national parliamentarians is made. The results show that differences between political levels as well as national and ideological factors play a role when assessing how parliamentarians present themselves online.
