Debt, Investment, Slaves Richard Holcombe Kilbourne 2014-04 Richard Kilbourne has produced a comprehensive study of the credit system in one Louisiana parish in the antebellum and postbellum periods of the Civil War. East Feliciana Parish was important in terms of both population and the large number of slaves. This book's primary concern is the role of slave property in collateralizing credit relationships and planter perceptions regarding slaves as financial assets.

Black Scare / Red Scare Charisse Burden-Stelly 2023-11-14 A radical explication of the ways anti-Black racial oppression has infused the US government's anti-communist repression. In the early twentieth century, two panics emerged in the United States. The Black Scare was rooted in white Americans' fear of Black Nationalism and dread at what social, economic, and political equality of Black people might entail. The Red Scare, sparked by communist uprisings abroad and subversion at home, established anticapitalism as a force capable of infiltrating and disrupting the American order. In *Black Scare / Red Scare*, Charisse Burden-Stelly meticulously outlines the conjoined nature of these state-sanctioned panics, revealing how they unfolded together as the United States pursued capitalist domination. Antiradical repression, she shows, is inseparable from anti-Black oppression, and vice versa. Beginning her account in 1917—the year of the Bolshevik Revolution, the East St. Louis Race Riot, and the Espionage Act—Burden-Stelly traces the long duration of these intertwined and mutually reinforcing phenomena. She theorizes two bases of the Black Scare / Red Scare: US Capitalist Racist Society, a racially hierarchical political economy built on exploitative labor relationships, and Wall Street Imperialism, the violent processes by which businesses and the US

government structured domestic and foreign policies to consolidate capital and racial domination. In opposition, Radical Blackness embodied the government's fear of both Black insurrection and Red instigation. The state's actions and rhetoric therefore characterized Black anticapitalists as foreign, alien, and undesirable. This reactionary response led to an ideology that Burden-Stelly calls True Americanism, the belief that the best things about America were absolutely not Red and not Black, which were interchangeable threats. Black Scare / Red Scare illuminates the anticommunist nature of the US and its governance, but also shines a light on a misunderstood tradition of struggle for Black liberation. Burden-Stelly highlights the Black anticapitalist organizers working within and alongside the international communist movement and analyzes the ways the Black Scare/Red Scare reverberates through ongoing suppression of Black radical activism today. Drawing on a range of administrative, legal, and archival sources, Burden-Stelly incorporates emancipatory ideas from several disciplines to uncover novel insights into Black political minorities and their legacy.

Can't Pay, Won't Pay Collective Debt 2020-06-23 Debtors have been mocked, scolded and lied to for decades. We have been told that it is perfectly normal to go into debt to get medical care, to go to school, or even to pay for our own incarceration. We've been told there is no way to change an economy that pushes the majority of people into debt while a small minority hoard wealth and power. The coronavirus pandemic has revealed that mass indebtedness and extreme inequality are a political choice. In the early days of the crisis, elected officials drew up plans to spend trillions of dollars. The only question was: where would the money go and who would benefit from the bailout? The truth is that there has never been a lack of money for things like housing, education and health

care. Millions of people never needed to be forced into debt for those things in the first place. Armed with this knowledge, a militant debtors movement has the potential to rewrite the contract and assure that no one has to mortgage their future to survive. Debtors of the World Must Unite. As isolated individuals, debtors have little influence. But as a bloc, we can leverage our debts and devise new tactics to challenge the corporate creditor class and help win reparative, universal public goods. Individually, our debts overwhelm us. But together, our debts can make us powerful.

The Sociology of Debt Featherstone, Mark 2020-12-16 Over the course of the last ten years the issue of debt has become a serious problem that threatens to destroy the global socio-economic system and ruin the everyday lives of millions of people. This collection brings together a range of perspectives of key thinkers on debt to provide a sociological analysis focused upon the social, political, economic, and cultural meanings of indebtedness. The contributors to the book consider both the lived experience of debt and the more abstract processes of financialisation taking place globally. Showing how debt functions on the level of both macro- and microeconomics, the book also provides a more holistic perspective, with accounts that span sociological, cultural, and economic forms of analysis.

In the Red and in the Black Erika Vause 2018-11-09 "The most dishonorable act that can dishonor a man." Such is Félix Grandet's unsparing view of bankruptcy, adding that even a highway robber—who at least "risks his own life in attacking you"—is worthier of respect. Indeed, the France of Balzac's day was an unforgiving place for borrowers. Each year, thousands of debtors found themselves arrested for commercial debts. Those who wished to escape debt imprisonment through bankruptcy sacrificed their honor—losing, among other rights and privileges, the ability to vote, to serve on a jury, or even to enter the stock market. Arguing that French Revolutionary and Napoleonic legislation created a conception of commercial identity that tied together the debtor's social, moral, and physical person, *In the Red and in the Black* examines the history of debt imprisonment and bankruptcy as a means of understanding the changing logic of commercial debt. Following the practical application of these laws throughout the early nineteenth century, Erika Vause traces how financial failure and fraud became legally disentangled. The idea of personhood established in the Revolution's aftermath unraveled over the course of the century owing to a growing penal ideology that stressed the state's virtual monopoly over incarceration and to

investors' desire to insure their financial risks. This meticulously researched study offers a novel conceptualization of how central "the economic" was to new understandings of self, state, and the market. Telling a story deeply resonant in our own age of ambivalence about the innocence of failures by financial institutions and large-scale speculators, Vause reveals how legal personalization and depersonalization of debt was essential for unleashing the latent forces of capitalism itself.
