The English Castle - François Matarasso 2000

The English Castle is a historical guide to the medieval castle, tracing its rise from humble defensive position to magnificent fortified palace. The text is illustrated with over 140 detailed drawings and plans of English castles. A gazetteer lists over 200 of the most interesting castles, many of which are open to the public. Each year these castles draw hundreds of thousands of curious visitors searching for links between past and present. These connections and what they mean form the core of this book.

The Shell Book of the British Coast - Adrian Henry Wardle Robinson 1983

The Norman Conquest - Marc Morris 2022-09-13

A riveting and authoritative history of the single most important event in English history: The Norman Conquest. An upstart French duke who sets out to conquer the most powerful and unified kingdom in Christendom. An invasion force on a scale not seen since the days of the Romans. One of the bloodiest and most decisive battles ever fought. This new history explains why the Norman Conquest was the most significant cultural and military episode in English history. Assessing the original evidence at every turn, Marc Morris goes beyond the familiar outline to explain why England was at once so powerful and yet so vulnerable to William the Conqueror's attack. Morris writes with passion, verve, and scrupulous concern for historical accuracy. This is the definitive account for our times of an extraordinary story, indeed the pivotal moment in the shaping of the English nation.

Castles, Town Defences, and Artillery Fortifications in Britain: 1983-1989 - John R. Kenyon 1978

John Cassell's illustrated history of England. The text, to the reign of Edward i by J.F. Smith; and from that period by W. Howitt - Cassell, ltd 1865

The Wessex Hillforts Project - Andrew Payne 2014-06-15

The earthwork forts that crown many hills in Southern England are among the largest and most dramatic of the prehistoric features that still survive in our modern rural landscape. The Wessex Hillforts Survey collected wide-ranging data on hillfort interiors in a three-year partnership between the former Ancient Monuments Laboratory of English Heritage and Oxford University. These defended enclosures, occupied from the end of the Bronze Age to the last few centuries before the Roman conquest, have long attracted archaeological interest and their function remains central to study of the Iron Age. The communal effort and high degree of social organisation indicated by hillforts feeds debate about whether they were strongholds of Celtic chiefs, communal centres of population or temporary gathering places occupied seasonally or in times of unrest. Yet few have been extensively examined archaeologically. Using non-invasive methods, the survey enabled more elaborate distinctions to be made between different classes of hillforts than has hitherto been possible. The new data reveals not only the complexity of the archaeological record preserved inside hillforts, but also great variation in complexity among sites. Survey of the surrounding countryside revealed hillforts to be far from isolated features

in the later prehistoric landscape. Many have other less visible, forms of enclosed settlement in close proximity. Others occupy significant meeting points of earlier linear ditch systems and some appear to overlie, or be located adjacent to, blocks of earlier prehistoric field systems.
