It's Your Hormones - Geoffrey Redmond 2009-10-28

From the renowned director of the Hormone Center of New York: complete cutting-edge medical and alternative strategies for living happily with your hormones--including how to enhance your sex life safely with testosterone. According to Geoffrey Redmond, M.D., a majority of the 42 million American women between the ages of 35 and 55 suffer from vulnerability to their own hormones. Appearance, feelings--and even sex drive--may be affected. Symptoms include thinning hair, persistent acne, mood swings, low energy, loss of pleasure in sex, weight gain, irregular periods, and migraines. While the media has emphasized the problems of menopause, Dr. Redmond explains that many women experience hormonal miseries even in their thirties. Lab tests are often normal because the problem is not the hormones themselves but how a woman's body reacts to them. Healthy, active women suddenly find that once quiescent hormones are ruling their lives. Because their problems are often dismissed as trivial, women who are hormonally vulnerable are frequently thwarted in their quest for help. Too often they are brushed off with remarks such as, "Your tests are normal; there's nothing wrong with you." This is tragic because, as Dr. Redmond demonstrates, hormonal balance can nearly always be restored with the treatments he details, which include individualized use of prescription medications, herbal supplements, lifestyle changes, and even spiritual practices. Many women have heard that testosterone can help sex drive, but most have not been warned about the damage that careless testosterone therapy can cause on skin and hair. In this book, Dr. Redmond, an internationally recognized authority on testosterone in women, explains the only safe ways to use testosterone. With informative sidebars, quizzes, and personal stories of women who have overcome hormone vulnerability, this helpful book will empower you to find treatments for your hormone problems that are tailored to fit your own body, biochemistry, symptoms, and lifestyle.

The Secret Female Hormone - Kathy C. Maupin, M.D. 2015-03-02
You know the experiences all too well. You can't sleep, so you start your day feeling exhausted. Seemingly overnight, you can't remember names, places, appointments—things you could previously recite at the drop of a hat. You want to be more active, but you have zero energy for that. And sex? Forget it! By now, you've probably been told this is "normal," or that it's the "natural" course of aging. And you might even believe it, because so many women approaching midlife have the exact same symptoms. In fact, millions of women worldwide are undiagnosed and untreated for hormone deficiency. As one of the country's leading experts on hormonal balance—and as a woman who experienced these symptoms herself—Dr. Kathy Maupin has identified a debilitating and overlooked health condition: testosterone deficiency syndrome, or TDS. Most people associate testosterone with men, but it's one of the most vital hormones in women, and one of the first hormones that women begin to lose as they enter their 40s. And Dr. Maupin's own research has shown that the symptoms of aging—fatigue, memory loss, moodiness, low libido, and so much more—are initiated and accelerated by testosterone loss. In this book, Dr. Maupin and therapist Brett Newcomb show how testosterone replacement can radically improve your life. They share the history and background of hormone replacement therapy, the latest research on treatment options, as well as: • Tips for dealing with mood swings, changes in sex drive, and maintaining healthy relationships • Surprising information on the long-term effects and health risks of testosterone loss • Common myths and misconceptions regarding estrogen and testosterone replacement therapy • Questionnaires to help you determine your individual hormone deficiencies • Real stories and personal experiences Dr. Maupin's patients share Clear, practical, and easy-to-use, this authoritative guide sheds light on the importance of testosterone and will help you reclaim your physical, mental, emotional, and spiritual health.

Reclaiming Desire - Andrew Goldstein 2009-06-09

I'm so busy and tired, how can I find time for sex? How can I go from mommy one minute to passionate lover the next? What medicines or natural herbs can I take to improve my libido? At some point in their lives, most women experience a decline in their sexual desire. Yet despite the vast number of books devoted to sex, surprisingly few focus on the problem of low libido. Fewer still offer any practical advice to the woman who has lost her sex drive and longs to find it again. *Reclaiming Desire* presents the holistic approach that gynecologist Andrew Goldstein and clinical psychologist Marianne Brandon—co-founders of the Sexual Wellness Center in Annapolis, Maryland—use to successfully treat women with low libido. Capitalizing on their combined medical and psychological expertise, they reveal how a complex set of physical, emotional, intellectual, and spiritual factors—as well as specific life-changing events such as marriage, pregnancy, childbirth, divorce, and menopause—can affect female sex drive. Reading this book, women will come to understand that low libido isn't "all in their heads"—or all in their bodies, for that matter. The problem is real and it's diverse—but it's curable.
