**Discrimination in Childhood and Adolescence** - Christia Spears Brown  
2017-03-27

Discrimination impacts most youth at some point. Almost all children and adolescents belong to at least one stigmatized group, whether they are a Black or Latino boy in school; an immigrant or refugee; a gay, lesbian, or bisexual teen; or a girl in physics class. Discrimination on the basis of race/ethnicity, immigration status, gender, sexual orientation, and gender identity can have long-term academic, psychological, and social repercussions, especially when it is directed at a cognitively developing child or an emotionally vulnerable adolescent. How children and adolescents are impacted by this discrimination depends on their cognitive ability to perceive the bias, the context in which the bias occurs, and resources they have to help cope with the bias. This book details, synthesizes, and analyzes the perception and impact of discrimination in childhood and adolescence across multiple stigmatized social groups to help us better understand the complex phenomenon of discrimination and its long-term consequences. By looking at the similarities and differences in discrimination across all social groups, we can more fully understand its mechanisms of influence. Before we can fully address the persistent achievement gap between White and ethnic minority children, the high rates of suicidal thoughts among LGBT youth, and the underrepresentation of girls in STEM careers, we must first examine the ways in which discrimination influences and is understood by children, with their unique cognitive constraints and within the specific contexts in which they live.

Teaching Gender? - Tricia Szirom 2017-06-26  
Originally published in 1988. This book provides a unique perspective on the creation of gender and the way in which sex education programs in schools contribute to this. Through a series of conversations with young people, a picture is developed of the way in which young women and young men view their own sexuality and that of the opposite sex. The book demonstrates that, in spite of the 'sexual revolution', young people's sexuality is still expressed within traditional gender constraints. The research reveals that, in spite of its 'radical' reputation, current sex education policy is consistent with the rest of the school curriculum: in failing to address the links between gender stereotypes and the social construction of sexuality, sex education implicitly and explicitly reinforces traditional attitudes to women's sexuality. The book provides a conceptual framework for the discussion of the construction of gender and the place of theories of sexuality within this: examples of young people's attitudes and practice; an historical perspective for and current analysis of the provision of sex education; and, most important, practical strategies for change.

**Gender, Policy and Educational Change -**

Sheila Riddell 2003-05-20

Gender equality has been a major educational theme for the past two decades and has become interwoven with other policy themes, including those of marketisation and managerialism.

Contributors to this strong collection are key researchers in their fields and seek to address the following questions: \* What patterns are discernible in the educational attainment of girls and boys over the past two decades? \* To what extent are changes attributable to gender equality policies? \* What form have gender equality policies taken in different parts of the UK? \* What has been the impact of European equality policies? \* How have gender equality policies been experienced by particular groups including pupils from ethnic minority and working-class backgrounds? This book aims to take an overall look at how significant have been the changes in experiences, aspirations and culture of girls and boys and male and female teachers. It explores how attempts to improve equal opportunities in education have fared and examines the tensions and contradictions in recent policies.

**Gender and Lifelong Learning -**

Carole Leathwood 2006-10-03

This insightful book is ideal for students, researchers and policy makers wanting a sound overview of the critical issues of gender in lifelong learning. Asking pertinent questions relating to discourses on policy, the authors offer the reader a rare view of lifelong learning from a gender-focused perspective, filling a gap in the literature and moving current debate on into new areas. Questions addressed include: To what extent can the policy discourses and institutional contexts of lifelong learning be seen as masculinised and/or feminised? What are the gender implications of lifelong learning policy? In what ways are learners' identities constructed

through lifelong learning? Does lifelong learning provide opportunities to challenge or transgress gender binaries? What are the implications for practice?

**Feminism and 'The Schooling Scandal' -**

Christine Skelton 2009-01-13

Feminism and 'The Schooling Scandal' brings together feminist contributions from two generations of educational researchers, evaluating and celebrating the field of gender

and education. The focus throughout is on the years of compulsory schooling, examining key concepts in gender and education identified and developed by international thinkers in educational feminism. Topics covered include: social class, ethnicity and sexuality in relation to experiences in school; theories and methodologies for understanding gender; pedagogy and practice in education; and the direction of educational policy and the 'problem of boys'. Providing a comprehensive overview of contemporary research and theory emerging from 'second wave' feminism and assessing their impact on pupils and teachers in today's schools and classrooms, this book forms essential reading for anyone studying gender and education.
