Purity and Danger Professor Mary Douglas 2013-06-17 Purity and Danger is acknowledged as a modern masterpiece of anthropology. It is widely cited in non-anthropological works and gave rise to a body of application, rebuttal and development within anthropology. In 1995 the book was included among the Times Literary Supplement's hundred most influential non-fiction works since WWII. Incorporating the philosophy of religion and science and a generally holistic approach to classification, Douglas demonstrates the relevance of anthropological enquiries to an audience outside her immediate academic circle. She offers an approach to understanding rules of purity by examining what is considered unclean in various cultures. She sheds light on the symbolism of what is considered clean and dirty in relation to order in secular and religious, modern and primitive life.

Ada, or Ardor Vladimir Nabokov 2011-02-16 Published two weeks after his seventieth birthday, *Ada, or Ardor* is one of Nabokov's greatest masterpieces, the glorious culmination of his career as a novelist. It tells a love story troubled by incest. It is also at once a fairy tale, epic, philosophical treatise on the nature of time, parody of the history of the novel, and erotic catalogue. *Ada, or Ardor* is no less than the supreme work of an imagination at white heat. This is the first American edition to include the extensive and ingeniously sardonic appendix by the author, written under the anagrammatic pseudonym Vivian Darkbloom.

The History of Sexuality Michel Foucault 1990-04-14 Why we are so fascinated with sex and sexuality—from the preeminent philosopher of the 20th century. Michel Foucault offers an iconoclastic exploration of why we feel compelled to continually analyze and discuss sex, and of the social and mental mechanisms of power that cause us to direct the questions of what we are to what our sexuality is.

Dangerous Science Daniel J. Rozell 2020-02-04 The public is generally enthusiastic about the latest science and technology, but sometimes research threatens the physical safety or ethical norms of society. When this happens, scientists and engineers can find themselves unprepared in the midst of an intense science policy debate. In the absence of convincing evidence, technological optimists and skeptics struggle to find common values on which to build consensus. The best way to avoid these situations is to sidestep the instigating controversy by using a broad risk-benefit assessment as a risk exploration tool to help scientists and engineers design experiments and technologies that accomplish intended goals while avoiding physical or moral dangers. *Dangerous Science* explores the intersection of science policy and risk analysis to detail failures in current science policy practices and what can be done to help minimize the negative impacts of science and technology on society.

The Oxford Handbook of Taboo Words and Language Keith Allan 2019-01-08 This volume brings together experts from a wide range of disciplines to define and describe tabooed words and language and to investigate the reasons and beliefs behind them. In general, taboo is defined as a proscription of behaviour for a specific community, time, and context. In terms of language, taboo applies to instances of language behaviour: the use of certain words in certain contexts. The existence of linguistic taboos and their management lead to the censoring of behaviour and, as a consequence, to language change and development. Chapters in this volume explore the multiple types of tabooed language from a variety of perspectives, such as sociolinguistics, anthropology, philosophy, psychology, historical linguistics, and neurolinguistics, and with reference to fields such as law, publishing, politics, and advertising. Topics covered include impoliteness, swearing, censorship, taboo in deaf communities, translation of tabooed words, and the use of taboo in banter and comedy.

London's Urban Landscape Christopher Tilley 2019-05-07 *London's Urban Landscape* is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. *London's Urban Landscape* returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.

Black Skin, White Masks Frantz Fanon 2017 *Black Skin, White Masks* is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

We Modern People Anindita Banerjee 2013-01-03 Science fiction emerged in Russia considerably earlier than its English version and instantly became the hallmark of Russian modernity. *We Modern People* investigates why science fiction appeared here, on the margins of Europe, before the genre had even been named, and what it meant for people who lived under conditions that Leon Trotsky famously described as "combined and uneven development." Russian science fiction was embraced not only in literary circles and popular culture, but also by scientists, engineers, philosophers, and political visionaries. Anindita Banerjee explores the handful of well-known early practitioners, such as Briusov, Bogdanov, and Zamyatin, within a much larger continuum of new archival material comprised of journalism, scientific papers, popular science texts, advertisements, and independent manifestos on social transformation. In documenting the unusual relationship between Russian science fiction and Russian modernity, this book offers a new critical perspective on the relationship between science, technology, the fictional imagination, and the consciousness of being modern.

The Second Sex Simone de Beauvoir 1997 Of all the writing that emerged from the existentialist movement, Simone de Beauvoir's groundbreaking study of women will probably have the most extensive and enduring impact. It is at once a work of anthropology and sociology, of biology and psychoanalysis, from the pen of a writer and novelist of penetrating imaginative power. *THE SECOND SEX* stands, five decades after its first appearance, as the first landmark in the modern feminist upsurge that has transformed perceptions of the social relationship of man and womankind in our time

Cultural Politics of Emotion Sara Ahmed 2014-06-11 Emotions work to define who we are as well as shape what we do and this is no more powerfully at play than in the world of politics. Ahmed considers how emotions keep us invested in relationships of power, and also shows how this use of emotion could be crucial to areas such as feminist and queer politics. Debates on international terrorism, asylum and migration, as well as reconciliation and reparation, are explored through topical case studies. In this book the difficult issues are confronted head on. *The Cultural Politics of Emotion* is in dialogue with recent literature on emotions within gender studies, cultural studies, sociology, psychology and philosophy. Throughout the book, Ahmed develops a theory of how emotions work, and the effects they have on our day-to-day lives. New for this edition A substantial 15,000-word Afterword on 'Emotions and Their Objects' which provides an original contribution to the burgeoning field of affect studies A revised Bibliography Updated throughout.

Ulysses James Joyce 2022-10-19 Loosely based on the *Odyssey*, this landmark of modern literature follows ordinary Dubliners in 1904. Capturing a single day in the life of Dubliner Leopold Bloom, his friends Buck Mulligan and Stephen Dedalus, his wife Molly, and a scintillating cast of supporting characters, Joyce pushes Celtic lyricism and vulgarity to splendid extremes. Captivating experimental techniques range from interior monologues to exuberant wordplay and earthy humor. A major achievement in 20th century literature.

The Law, the State, and Other Political Writings, 1843-1850 Frédéric Bastiat 2012 Frédéric Bastiat (1801-1850) was a keen observer of political and economic problems and a passionate proponent of liberal economic theory. This book collects nineteen of Bastiat's articles, ranging from the theory of value and rent, public choice and collective action, government intervention and regulation, the balance of trade, education, and trade unions to price controls, capital and growth, and taxation. Throughout his articles, Bastiat demonstrates how the combination of careful logic, consistency of principle, and clarity of exposition is the instrument for solving most economic and social problems. In his famous essay "The Law" Bastiat explains that the law, far from being what it ought to be, "namely the instrument that enabled the state to protect individuals' rights and property", had become the means for what he termed "spoliation" (or plunder). From the article "The State" written at the height of the 1848 Revolution in June, comes perhaps his best-remembered quotation: "The state is the great fiction by which everyone endeavours to live at the expense of everyone else". In this volume readers will find extensive introductory material, including notes on the translation and on the editions of the *uvres completes*, a chronology of Bastiat's life and works, two maps of France showing the cities associated with Bastiat, annotations to the articles, and a bibliography. A special section provides charming, little-known anecdotes about Bastiat and his contemporaries, including his editor Prosper Paillottet, who became Bastiat's firm friend and eventually his executor. This section also includes discussions of key concepts such as individualism, laissez-faire, industry, plunder, and the right to work. Three glossaries explain persons, places, and subjects and terms.

Sex and Eroticism in Mesopotamian Literature Dr Gwendolyn Leick 2013-01-11 Sex and Eroticism in Mesopotamian Literature is a new contribution to current debates about sex and eroticism. It gives an insight into Mesopotamian attitudes to sexuality by examining the oldest preserved written evidence on the subject - the Sumero-Akkadian cuneiform sources - which were written between the 21st and the 5th centuries B.C. Using these long-neglected and often astonishing data, Gwendolyn Leick is able to analyse Mesopotamian views of prostitution, love magic and deviant sexual behaviour as well as more general issues of sexuality and gender. This fascinating book sheds light on the sexual culture of one of the earliest literate civilisations.

The God of Small Things Arundhati Roy 2017-06-13 Still, to say that it all began when Sophie Mol came to Ayemenem is only one way of looking at it. . . It could be argued that it actually began thousands of years ago. Long before the Marxists came. Before the British took Malabar, before the Dutch Ascendancy, before Vasco da Gama arrived, before the Zamorin's conquest of Calicut. Before Christianity arrived in a boat and seeped into Kerala like tea from a teabag. That it really began in the days when the Love Laws were made. The laws that lay down who should be loved, and how. And how much.

The Ritual Process Victor Turner 2017-07-05 In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of “Communitas.” He characterizes it as an absolute inter-human relation beyond any form of structure. *The Ritual Process* has acquired the status of a small classic since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the “liminal phase” of rites of passage to a more general level, and applies it to gain understanding of a wide range of social phenomena. Once thought to be the “vestigial” organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: “Turner argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports.”

We Have Never Been Modern Bruno Latour 2012-10-01 With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape, *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.
