Unidentified: The UFO Phenomenon - Robert Salas 2014-09-22

“A compelling and heartfelt journey through the minefields and thickets of government secrecy . . . a concise history of the modern UFO phenomenon.” —Thomas J. Carey, bestselling coauthor of *Witness to Roswell* In 1969 the US Air Force issued a statement that read, “No UFO reported, investigated and evaluated by the Air Force was ever an indication of threat to our national security.” This statement is patently false. It has been proven untrue by the testimony of many military officers and airmen and documentation of incidents involving UFOs and nuclear weapons, testimonies of which the US Air Force was fully aware. *Unidentified* details many of these testimonies, some for the first time. As partial justification for its position, the Air Force cites a University of Colorado study that was contracted and paid for by federal funds. *Unidentified* reveals how this study was actually just another part of the plan to cover up

the reality of the UFO phenomenon. For the first time, *Unidentified* publishes evidence that the investigators for the Colorado study knew about the UFO-related missile shutdown incidents but did not investigate them or include them in their final report. Robert Salas, a retired United States Air Force Officer, witnessed first-hand a UAP visiting and disabling nuclear missiles at that Malmstrom Air Force Base and shares his experience as well as the many incidents of the last 80 years of similar visits that have been covered-up. A new expanded edition will be published November 2023 under the title *UAPs and the Nuclear Puzzle*. “A sober yet heartfelt narrative which dares you to dismiss it without due consideration.” —*Fortean Times*

Encounter with Tiber - Buzz Aldrin 2013-05-28

An Apollo 11 astronaut and the Nebula

Award-nominated author of Directive 51 present a novel that “conveys the wonder and promise of space” (Publishers Weekly). Born the year of the Moon landing, Chris Terence spends his life fighting to return humanity to that pinnacle. An engineering student with dreams of spaceflight, he finds upon graduation that the United States no longer has need for astronauts. Years of bureaucratic meddling have reduced the space program to a shell of itself, and it will take the greatest scientific find in history to send humanity skyward once more. After years

battling budget hawks, Chris finally gets his chance to walk on the Moon. While there, he finds evidence of an ancient alien civilization, the Tiberians, who visited Earth’s satellite eight thousand years before. Understanding what happened to those long-forgotten travelers will define the lives of Chris and his son, as they fight against all odds to unlock the secrets of the universe. “The collaboration of the first man to pilot a moon lander (Aldrin) with a major voice in contemporary science fiction (Barnes) has produced a fascinating chronicle of man’s first encounter with alien intelligence” (Booklist).
