Southern Cultivator and Farming 1860

From Moorepark to 'Wine Alley' Seán Damer 1989 For more than 150 years, empowering practices have been used by social workers in their work with families, but the techniques of today differ significantly from those of the pioneers or even from those of a few years ago. Today's practitioners recognize that empowering others is impossible; social workers can, however, assist others as they empower themselves. This book integrates time-honored approaches with today's more modest goals, mindful of what empowerment can and cannot do. Synthesizing several theoretical supports—the strengths perspective, system theory, theories of family well-being, and theories of coping—the author responds to the question "What works?" with today's families in need. Practice illustrations are provided throughout to bring concepts to life and, more important, to present families describing their own experiences with achieving empowerment.

The Blood of the Colony Owen White 2021-01-12 The surprising story of the wine industry's role in the rise of French Algeria and the fall of empire. "We owe to wine a blessing far more precious than gold: the peopling of Algeria with Frenchmen," stated agriculturist Pierre Berthault in the early 1930s. In the last decades of the nineteenth century, Europeans had displaced Algerians from the colony's best agricultural land and planted grapevines. Soon enough, wine was the primary export of a region whose mostly Muslim inhabitants didn't drink alcohol. Settlers made fortunes while drawing large numbers of Algerians into salaried work for the first time. But the success of Algerian wine resulted in friction with French producers, challenging the traditional view that imperial possessions should complement, not compete with, the metropole. By the middle of the twentieth century, amid the fight for independence, Algerians had come to

see the rows of vines as an especially hated symbol of French domination. After the war, Algerians had to decide how far they would go to undo the transformations the colonists had wrought—including the world’s fourth-biggest wine industry. Owen White examines Algeria’s experiment with nationalized wine production in worker-run vineyards, the pressures that resulted in the failure of that experiment, and the eventual uprooting of most of the country’s vines. With a special focus on individual experiences of empire, from the wealthiest Europeans to the poorest laborers in the fields, *The Blood of the Colony* shows the central role of wine in the economic life of French Algeria and in its settler culture. White makes clear that the industry left a long-term mark on the development of the nation.

The Rise of the Image, the Fall of the Word Mitchell Stephens
1998-10-08 For decades educators and cultural critics have deplored the corrosive effects of electronic media on the national consciousness. The average American reads less often, writes less well. And, numbed by the frenetic image-bombardment of music videos, commercials and sound bites, we may also, it is argued, think less profoundly. But wait. Is it just possible that some good might arise from the ashes of the printed word? Most emphatically yes, argues Mitchell Stephens, who asserts that the moving image is likely to make our thoughts not more feeble but more robust. Through a fascinating overview of previous communications revolutions, Stephens demonstrates that the charges that have been leveled against television have been faced by most new media, including writing and print. Centuries elapsed before most of these new forms of communication would be used to produce works of art and intellect of sufficient stature to overcome this inevitable mistrust and nostalgia. Using examples taken from the history of photography and film, as well as MTV, experimental films, and Pepsi commercials, the author considers the kinds of work that might unleash, in time, the full power of moving images. And he argues that these works--an

emerging computer-edited and -distributed "new video"--have the potential to inspire transformations in thought on a level with those inspired by the products of writing and print. Stephens sees in video's complexities, simultaneities, and juxtapositions, new ways of understanding and perhaps even surmounting the tumult and confusions of contemporary life. Sure to spark lively--even heated--debate, *The Rise of the Image, the Fall of the Word* belongs in the library of millennium-watchers everywhere.

Washington Wines and Wineries Paul Gregutt 2007-10-19

"Unquestionably the most comprehensive book on the topic, *Washington Wines and Wineries* is a new benchmark in learning about this exciting wine region."—Evan Goldstein, author of *Perfect Pairings* "I never miss a chance for lunch or a tasting with Paul Gregutt. He is an eclectic student of wine and an astute taster who never takes himself too seriously. But his *Washington Wines & Wineries* is a serious publication. The number of Washington wineries has exploded since the turn of the millennium. There are several important new AVAs. Many wonderful wines are being made. So there was an urgent need for this splendid new guide, written with passion and authority. No one who loves Washington wines--in fact, no one serious about wine--should fail to get a copy."—Oz Clarke

and trends that help you develop, implement, and maintain strategic competitive advantages. The book looks at case studies of business operations, seasonality, destination image, and the development of business networks. Equally valuable as a professional resource for practitioners and as a textbook for upper-level and graduate students in tourism, hospitality, and wine and food studies, *Wine, Food, and Tourism Marketing* examines the importance of food and wine tourism to rural regional development. The book presents destination management planning and marketing initiatives for specific markets that can be easily adapted and applied to a wider range of wine tourism settings. Tourism marketing researchers and academics address vital issues such as the importance of collective marketing strategies, viticulture, design factors for online tourism information, and the use of food images in promotional material and positioning strategies. The book includes: a 2001 research study on French public sector management of wine tourism an examination of the cider industry in Somerset, England a look at the implications of non resident tourist markets on British Columbia's emerging wine tourism industry an analysis of the types of food images used in French regional tourism brochures a national study of seasonality issues on wine tourism in New Zealand a look at post-apartheid tourism trends on South Africa's Western Cape a survey of eight wineries on the Niagara Falls wine route with implications for marketing strategies a study of the use of local and regional food for destination marketing of South Africa a look at how food-related tourism in the United Kingdom is being promoted using the World Wide Web *Wine, Food, and Tourism Marketing* is an essential read for practitioners and educators involved in tourism and hospitality, marketing, food and wine studies, and rural regional development.

The Way to Make Wine Sheridan Warrick 2015-09-08 "Geared to everyday wine lovers who want to drink well and save money, this book reveals everything needed to make delicious wines--both reds and whites--from start to finish. It highlights the most recent advances and trends in winemaking, including new chapters on specialty yeasts, natural wines, and international wines styles. Detailed how-to illustrations depict important steps and procedures, while sidebars and new winemaker interviews bring sharp focus to topics of wide interest. The book also includes the only clear and comprehensive guide to minimizing sulfites in wine and launching and running fault-free fermentations."--Provided by publisher.

Over a Barrel Thomas Pellechia 2015-02-11 How a small family company in the Finger Lakes became one of the most important wine producers in the United States, only to be taken down by corporate greed and mismanagement. In 1880, Walter Stephen Taylor, a cooper's son, started a commercial grape juice company in New York's Finger Lakes region. Two years later, wine production was added, and by the 1920s, the Taylor Wine Company was firmly established. Walter Taylor's three sons carefully guided the company through Prohibition and beyond, making it the most important winery in the Northeast and profoundly affecting the people and community of Hammondsport, where the company was headquartered. In the 1960s, the Taylor family took the company public. Ranked sixth in domestic wine production and ripe for corporate takeover, the company was sold to Coca-Cola in 1977. Three more changes of corporate ownership followed until, in 1995, this once-dynamic and important wine producer was obliterated, tearing apart the local economy and changing a way of life that had lasted for

nearly a century. Drawing on archival research as well as interviews with many of the principal players, Thomas Pellechia skillfully traces the economic dynamism of the Finger Lakes wine region, the passion and ingenuity of the Taylor family, and the shortsighted corporate takeover scenario that took down a once-proud American family company. In addition to providing important lessons for business innovators, *Over a Barrel* is a cautionary tale for a wine region that is repeating its formative history. Thomas Pellechia is an independent journalist and writer who previously produced wine in the Finger Lakes and operated a wine shop in Manhattan. He is the author of *Wine: The 8,000-Year-Old Story of the Wine Trade*, *The Complete Idiot's Guide to Starting and Running a Winery*, and *Timeless Bounty: Food and Wine in New York's Finger Lakes*. He lives in Hammondsport, New York.

published, are larger than those for 1881, but the figures furnished by Mr. Stone, the statistician of the Merchants Exchange, give wine brandy, from which I am led to believe that those for 1881 are too large. The total production of wine for 1878 has been stated to be from to gallons, for 1879, for 1880, to gallons. Notwithstanding the increased acreage of our vineyards, the product in 1881 fell off one or two million gallons, and in the second annual report of the State Viti cultural Commission, just published, the loss is estimated at one third of the crop, making the product gallons, or a little less. That of 1882 is about gallons. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
