

Economics Of Sex Differentials

Sex Differences in Economic Well-being - Victor R. Fuchs 1986

The Longest War - Carol Tavris 1984

The Economics of Women, Men, and Work - Francine D. Blau 1986

This book introduces readers to the findings of research on women, men, and work in the labor market and household. The Third Edition has been expanded and updated to reflect recent changes in the labor market and the family. All data have been revised and references have been updated to consider the most recent research on each subject covered.

Girls and Women in Education - Organisation for Economic Co-operation and Development 1986

This report examines how far Organisation for Economic Co-operation and Development (OECD) countries have come towards realizing equality between the sexes in education and the factors that facilitate or hinder progress in this regard. The report examines students in the formal education system of schools and colleges and reviews research findings on factors contributing to sex inequalities in education. The book is organized into two parts. Part 1 is titled "The Nature of Sex Differences in Learning and Education" and has three chapters. Chapter 1, "The Female Experience of Schools and Colleges: A Descriptive Overview," describes the strides made in higher levels of female enrollments and the inequalities that remain; chapter 2, "Sex Differences in Early Socialization and Upbringing and Their Consequences for Educational Choices and Outcomes," discusses traditional sex roles, how different socialization agents reinforce each other, and different ways in which schools and teachers contribute to this process; and chapter 3, "The Development of Sex Stereotyped Attitudes Among Boys and Girls: Different Models of Their Origins and Their Educational Implications," examines three models of the origins and development of sex differences in attitudes and educational attainment. Chapters 1 and 3 include extensive bibliographies. Part 2 of the report provides statistical evidence in the form of tables. (KWL)

Earnings and Sex Differentials for Manual and Non-manual Workers - B. Chiplin 1977

The Economics of Discrimination by Sex - James Philip Laakeo 1970

Sex Differences - Michael S. Teitelbaum 1976

The Economics of Gender - Joyce Jacobsen 2007-02-27

The Economics of Gender, 3e offers an affordable, comprehensive, and up-to-date introduction to the contemporary research being conducted on the differences between women's and men's economic opportunities, activities, and rewards. While focusing on contemporary US patterns, this text integrates a uniquely international comparative perspective. Discusses the pros and cons of various policies, including comparable worth and welfare programs. Revisions to the 3rd edition include fully updated data, inclusion of new research, and new examples and studies. Clear, readable, and provocative with helpful appendices to provide additional information for readers who have little experience with economics, while simultaneously providing further detail for the economically sophisticated. Flexible in design, for use by both labor economics students and women's studies programs without labor economics prerequisites.

Gender and Risk-Taking - Julie A. Nelson 2017-07-14

The belief that men and women have fundamentally distinct natures, resulting in divergent preferences and behaviours, is widespread. Recently, economists have also engaged in the search for gender differences, with a number claiming to find fundamental gender differences regarding risk-taking, altruism, and competition. In particular, the idea that "women are more risk-averse than men" has become accepted as a truism. But is it true? And what are its causes and consequences? Gender and Risk Taking makes three contributions. First, it asks whether the belief that men and women have distinct risk preferences is backed up by high quality empirical evidence. The answer turns out to be "no." This leads to a second question: Why, then, does so much of the literature claim to find evidence of "difference"? This, it will be shown, can be attributed to biases arising from too-easy categorical

thinking, widespread stereotyping, and a tendency to prefer results that are publishable and that fit one's prior beliefs. Third, the book explores the economic implications of the conventional association of risk-taking with masculinity and risk-aversion with femininity. Not only fairness in employment, but also the health of the financial sector and national responses to climate change, this book argues, are being compromised. This volume will be eye-opening for anyone interested in gender, decision-making, cognition, and/or risk, especially in areas relating to employment, finance, management, or public policy.

Sex Differences in Labor Markets - David Neumark 2004-01-29

Sex differences abound in labor markets. In the United States three differences in particular have attracted the most attention: the earnings gap, occupational segregation, and the greater responsibility of women for child care and housework, and consequential lower participation in the labor market. This volume brings together David Neumark's work of the past fifteen years: in it he tries to understand and analyze the relative importance of family economic decision-making and sex discrimination in generating sex differences in labor markets. Neumark's research covers three main levels of inquiry. The first studies non-discriminatory sources of sex differences in labor markets; the second grapples with the problem of sex discrimination; while the third evaluates policies to combat and reduce sex differences in labor markets.

New Evidence on Sex Segregation and Sex Differences in Wages from Matched Employee-employer Data - Kimberly Bayard 1999

We assemble a new matched employer-employee data set covering essentially all industries and occupations across all regions of the U.S. We use this data set to re-examine the question of the relative contributions to the overall sex gap in wages of sex segregation vs. wage differences by sex within occupation, industry, establishment, and occupation-establishment cells. This new data set is especially useful because earlier research on this topic relied on data sets that covered only a narrow range of industries, occupations, or regions. Our results indicate that a sizable fraction of the sex gap in wages is accounted for by the segregation of women into lower-paying occupations, industries, establishments, and occupations within establishments. Nonetheless, a substantial part of the sex gap in wages remains attributable to the individual's sex. This latter finding contrasts sharply with the conclusions of previous research (especially Groshen, 1991), which indicated that sex segregation accounted for essentially all of the sex wage gap. Further research into the sources of within-establishment within-occupation sex wage differences is therefore much more important than previously thought.

Earning Differentials by Sex in the Soviet Union - Gur Ofer 1979

Gender and Economics - Jane Humphries 1995

Presents 27 articles dating from 1923 to 1994 on gender differences, female labour supply, male-female wage differences and on the historical significance of women's work.
