**How to Translate - English Translation Guide in European Union** - Nicolae Sfetcu

**Assessing the Accuracy of Google Translate to Allow Data Extraction from Trials Published in Non-English Languages** - U. S. Department of Health and Human Services 2013-03-21

One of the strengths of systematic reviews is that they aim to include all relevant evidence. However, study eligibility is often restricted to the English language for practical reasons. Google Translate, a free Web-based resource for translation, has recently become available. However, it is unclear whether its translation accuracy is sufficient for systematic reviews. An earlier pilot study provided some evidence that data extraction from translated

articles may be adequate but varies by language. To address several limitations of the pilot study, four collaborating Evidence-based Practice Centers conducted a more rigorous analysis of translations of articles from five languages. Systematic reviews conducted by the Agency for Healthcare Research and Quality (AHRQ) Evidence-based Practice Centers (EPCs) most commonly restrict literature searches to English language publications. In a sample of 10 recent Evidence Reports (numbers 189-198), 8 were restricted to English-language publications. One report included studies in languages for which the EPC had “available fluency” and only one reported not restricting by language. Among 28 other recent Comparative Effectiveness Reviews (CERs) with final or draft documents

downloadable from the AHRQ Web site, 20 were restricted to English-language publications. Four explicitly did not impose any language restriction. Two did not report language restriction in their methods chapter and included one study each in Dutch and German. One placed no language restriction on comparative studies but included only English-language cohort studies. One included German- and French-language studies for nonoperative interventions (which were sparse), but only English-language publications for operative treatments “due to lack of translation resources.” Three of the CERs wrote that the language restriction was due to lack of resources or prohibitive translation costs, despite the recognition in one CER “that requiring studies to be published in English could lead to bias.” The current study was designed to form a collaboration of EPCs to better analyze the accuracy of the freely available, online, translation tool—Google

Translate—for the purposes of data extraction of articles in selected non-English languages. The collaboration allowed for double data extraction and a better consensus determination of the important extraction items to assess; we also implemented an improved analytic technique. The research had the following aims: 1. Compare data extraction of trials done on original-language articles by native speakers with data extraction done on articles translated to English by Google Translate. 2. Track and enumerate the time and resources used for article translation and the extra time and resources required for data extraction related to use of translated articles.

**The Qur'an** - Ali Qarai  
2021-12-08

This is the 6th Edition and 5th revised version of this translation. The Qur'ān is, in its own words, "light," which means that it is self-manifesting, with no need of an external source of illumination; other things need light to

become visible and manifest. With it God guides those who pursue His pleasure to the ways of peace, and brings them out from darkness into light by His will, and guides them to a straight path (5:16). Of course, the Qur'ān is not an exception among revealed scriptures in that it is a source of light and guidance. According to the Qur'an, so were the Torah and the Gospel, scriptures given to Moses and Jesus. All scriptures of Divine origin are a source of light and guidance. Nothing is more important for man than the knowledge of the very Source of reality. Any knowledge that is not informed with this awareness is just a kind of ignorance. All effort that does not derive from this knowledge is ultimately fated to end in futility and failure. The Qur'ān claims to be the most reliable source of this knowledge and the best guide for human endeavour. It teaches that the Source of being is also the chief Source of guidance. Expert Opinions About This Translation: This is a wonderful translation. It is

both faithful and fluent. [The translator has] struck a nice balance here. It is a real improvement over existing translations --Dr Muhammad Legenhausen What Qarai has accomplished... is a revival of the art of translation as an adjunct to the understanding of the original, skillfully adapted to the needs of the English-speaking student of the Qur'an... He has opted always for the maximum degree of closeness to the Arabic compatible with comprehensibility, thereby coordinating translation with original in the most substantial of ways. Although Qarai envisions his translation as a paraphrase of the Qur'anic meanings, as a tool for gaining access to the original, it must be stressed that his translation reads extremely well even if regular cross-reference to the Arabic not be the purpose of the reader. The language Qarai has chosen is clear, chaste, straightforward and dignified, distant from both the archaisms and the modernisms that have been affected by

other English translators of the Qur'an.... It is plain, indeed, that a serious and profound appreciation of the Qur'anic message has animated the whole of Qarai's successful labors. We warmly recommend his translation to all with a serious interest in the Qur'an. - Prof. Hamid Algar As a person who was part of a team that worked on a translation, I was often asked during this process what translation I recommend.... What I want to do in this video is first talk about two translations that I do recommend and I have often recommended, which are those by A. J. Arberry and the one by Ali Quli Qarai.... I really found this (Ali Quli Qarai's) translation to be quite excellent, and I was really surprised when I came upon it, because hardly anybody has spoken about it. One of the great things about this translation for somebody who is learning Arabic is that the translation has Arabic right next to it, but it has it phrase by phrase--not just the whole verse, but the exact phrase is

next to the exact Arabic. So if you are studying Arabic, you can use this very well to identify the exact translation and the Arabic.. . . [I]t is more accurate and more consistent than almost any other translation and more accurate than Arberry, in fact. I don't think I found any passage where I could say that Ali Quli Qarai made an egregious mistake. --Prof. Joseph Lombard (member of the team of translators of The Study Qur'an, in a video talk <https://www.youtube.com/watch?v=cjsyGOaWEBw> Translation and Music - Sebnem Susam-Sarajeva 2016-04-08 Popular and multimodal forms of cultural products are becoming increasingly visible within translation studies research. Interest in translation and music, however, has so far been relatively limited, mainly because translation of musical material has been considered somewhat outside the limits of translation studies, as traditionally conceived.

Difficulties associated with issues such as the 'musicality' of lyrics, the fuzzy boundaries between translation, adaptation and rewriting, and the pervasiveness of covert or unacknowledged translations of musical elements in a variety of settings have generally limited the research in this area to overt and canonized translations such as those done for the opera. Yet the intersection of translation and music can be a fascinating field to explore, and one which can enrich our understanding of what translation is and how it relates to other forms of expression. This special issue is an attempt to open up the field of translation and music to a wider audience within translation studies, and to an extent, within musicology and cultural studies. The volume includes contributions from a wide range of musical genres and languages: from those that investigate translation and code-switching in North African rap and rai, and the intertextual and intersemiotic translations revolving around

Mahler's lieder in Chinese, to the appropriation and after-life of Kurdish folk songs in Turkish, and the emergence of rock'n roll in Russian. Other papers examine the reception of Anglo-American stage musicals and musical films in Italy and Spain, the concept of 'singability' with examples from Scandinavian languages, and the French dubbing of musical episodes of TV series. The volume also offers an annotated bibliography on opera translation and a general bibliography on translation and music.

Translation and Ideology -  
Sonia Cunico 2016-04-08

Ideology has become increasingly central to work in translation studies. To date, however, most studies have focused on literary and religious texts, thus limiting wider understanding of how ideological clashes and encounters pervade any context where power inequalities are present. This special edition of *The Translator* deliberately focuses on ideology in the translation

of a rich variety of lesser-studied genres, namely academic writing, cultural journals, legal and scientific texts, political interviews, advertisements, language policy and European Parliament discourse, in all of which translation as a social practice can be seen to shape, maintain and at times also resist and challenge the asymmetrical nature of exchanges between parties engaged in or subjected to hegemonic practices. The volume opens with two groundbreaking papers that investigate the nature and representation of truth and knowledge in the translation of the sciences, followed by two contributions which approach the issue of shifts in the translation of ideology from the standpoint of critical linguistics and critical discourse analysis, using data from political speeches and interviews and from English and Korean versions of Newsweek. Other contributions discuss the role that translation scholars can play in raising public

awareness of the manipulative devices used in advertising; the way in which potentially competing institutional and individual ideologies are negotiated in the context of interpreting in the European Union; the role translation plays in shaping the politics of a multilingual nation state, with reference to Belgium; and the extent to which the concepts of norms and polysystems may be productive in investigating the link between translation and ideology, with reference to Chinese data.

### **Modern China and the West**

- Hsiao-yen PENG 2014-04-30  
In *Modern China and the West: Translation and Cultural Mediation*, the authors investigate the significant role translation plays in cultural mediation. Transnational organizations that bring about cross-cultural interactions as well as regulating authorities, in the form of both nation-states and ideologies, are under scrutiny.

### **Translation and Minority -**

Lawrence Venuti 2016-04-29

*Downloaded from  
[legacy.opendemocracy.net](http://legacy.opendemocracy.net)  
on 2020-06-04 by guest*

The premise of this volume is a question: What can the concept of minority bring to the practice and study of translation? Minority is understood here to mean a cultural or political position that is subordinate, whether the social context that so defines it is local, national or global. This position is occupied by languages and literatures that lack prestige or authority, the non-standard and the non-canonical, what is not spoken or read much by a hegemonic culture. Yet minorities also include the nations and social groups that are affiliated with these languages and literatures, the politically weak or underrepresented, the colonized and the disenfranchised, the exploited and the stigmatized. Translation today is itself a minor use of language, a lesser art, an invisible craft that commands less cultural capital and fewer legal privileges than original composition. Yet the focus in this collection is not on what translators worldwide

have in common but on the distinctive forms that translating takes when it is done by or on behalf of minorities. The articles in this volume present a variety of case studies that illuminate the linguistic and cultural problems posed by such translating, as well as the economic and political agendas it has served. Together, these pieces show that the concept of minority is worth exploring because it inspires innovation in translation practice and research. Minor cultures are coincident with new translation strategies, new translation theories, and new syntheses of the diverse methodologies that constitute the discipline of translation studies.

### **Translating For Singing -**

Ronnie Apter 2016-05-19  
Translating for Singing discusses the art and craft of translating singable lyrics, a topic of interest in a wide range of fields, including translation, music, creative writing, cultural studies, performance studies, and semiotics. Previously, such

translation has most often been discussed by music critics, many of whom had neither training nor experience in this area. Written by two internationally-known translators, the book focusses mainly on practical techniques for creating translations meant to be sung to pre-existing music, with suggested solutions to such linguistic problems as those associated with rhythm, syllable count, vocal burden, rhyme, repetition and sound. Translation theory and translations of lyrics for other purposes, such as surtitles, are also covered. The book can serve as a primary text in courses on translating lyrics and as a reference and supplementary text for other courses and for professionals in the fields mentioned. Beyond academia, the book is of interest to professional translators and to librettists, singers, conductors, stage directors, and audience members.

**Analysing English-Arabic  
Machine Translation -**  
Zakaryia Almahasees

2021-11-30

Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: The Old Man and

the Sea and The Prophet. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

*Performing Without a Stage* -

Robert Wechsler 1998

*Performing Without a Stage* is a lively and comprehensive introduction to the art of literary translation for readers of foreign fiction and poetry who wonder what it takes to

translate, how the art of literary translation has changed over the centuries, what problems translators face in bringing foreign works into English and how they go about solving these problems. This book will also be of interest to translators, writers, editors, critics, and literature students, dealing as it does, often controversially, with such matters as the translator's fidelity to the author, the publishing and reviewing of translations, the nearly nonexistent public image of the stageless translator, and the value for writers and scholars of studying and practicing translation.

**Becoming A Translator** -

Douglas Robinson 2013-05-13

translators and students of  
translation and language.

**Teaching Translation from  
Spanish to English** - Allison  
Beeby Lonsdale 1996

While many professional  
translators believe the ability  
to translate is a gift that one  
either has or does not have,  
Allison Beeby Lonsdale  
questions this view. In her  
innovative book, she  
demonstrates how teachers can  
guide their students by  
showing them how insights  
from communication theory,  
discourse analysis, pragmatics,

and semiotics can illuminate  
the translation process. Using  
Spanish to English translation  
as her example, she presents  
the basic principles of  
translation through 29  
teaching units, which are  
prefaced by objectives, tasks,  
and commentaries for the  
teacher, and through 48 task  
sheets, which show how to  
present the material to  
students.

seeks to raise questions regarding the translative process of sound: 1) what happens to sound during the process of transfer and transformation; and 2) what transpires in the process of sound production/expression/performance. Sounds in Translation was conceived to take advantage of new technology and a development in book publishing, the electronic book. Much of what is written in the book is best illustrated by the sound itself, and in that sense, permits sound to 'speak for itself'.

**Translation as Stylistic Evolution** - Federico Federici  
2009-01-01

Why did Italo Calvino decide to translate *Les Fleurs bleues* by Raymond Queneau? Was his translation just a way to pay a tribute to one of his models? This study looks at Calvino's translation from a literary and linguistic perspective: Calvino's *I fiori blu* is more than a rewriting and a creative translation, as it contributed to a revolution in his own literary

language and style. Translating Queneau, Calvino discovered a new fictional voice and explored the potentialities of his native tongue, Italian. In fact Calvino's writings show a visible evolution of poetics and style that occurred rather abruptly in the mid 1960s; this sudden change has long been debated. The radical transformation of his style was affected by several factors: Calvino's new interests in linguistics, in translation theory, and in the act of translation. *Translation as Stylistic Evolution* analyses several passages in detail and scrutinizes quantitative data obtained by comparing digital versions of the original and Calvino's translation. The results of such assessment of Calvino's text-consistency suggest clear interpretations of the motives behind Calvino's radical and remarkable change of style that are tied to his notion of creative translation. present a comprehensive study of legal translation, this book is an interdisciplinary study in law and translation theory. It is not bound to any specific languages or legal systems, although emphasis is placed on translation between common law and civil law jurisdictions. The main focus is on the translation of texts which are authoritative sources of the law; examples are cited primarily from statutes, codes and constitutions (Canada, Switzerland and Belgium), as well as instruments of the European Union and international treaties and conventions. Dealing with theoretical as well as practical aspects of the subject matter, the author analyses legal translation as an act of communication in the mechanism of the law, thus making it necessary to redefine the goal of legal translation. This book is intended for both lawyers and linguists, translation theorists, legal translators and drafters, legal lexicographers, as well as teachers and students of

translation.

**Dutch Translation in Practice** - Jane Fenoulhet  
2014-10-17

Dutch Translation in Practice provides an accessible and engaging course in modern Dutch translation. Taking a highly practical approach, it introduces students to the essential concepts of translation studies, heightens their awareness of the problems posed in Dutch translation, and teaches them how to tackle these difficulties successfully. Featured texts have been carefully chosen for their thematic and technical relevance, and a wide range of discursive and grammatical issues are covered throughout. Features include: Nine chapters reflecting different areas of contemporary life and culture in Belgium and the Netherlands such as People and Places, Dutch Language and Culture, Literature, Employment, Finance and Economics, Media and Communications, Art History and Exhibitions, Fashion and Design and the Earth, Energy

and the Environment Authentic extracts drawn from up-to-date Dutch texts used throughout to illustrate and practise various topical and translation issues, with many supporting exercises and open translation activities to encourage active engagement with the material, the development of strong translation skills, and vocabulary acquisition Chapters structured to provide progressive learning, moving from an introductory section explaining the context for the texts to be translated to information on translation techniques, detailed close readings and analyses of words, phrases, style, register and tone A strong focus throughout on addressing issues relevant to contemporary Dutch translation, with practical tips offered for translating websites, dealing with names and handling statistics and numbers in translation Attention to language areas of particular difficulty, including translating 'er', passive constructions, punctuation,

conjunctions and separable verbs Helpful list of grammatical terms, information on useful resources for translators and sample translations of texts available at the back of the book Written by experienced instructors and extensively trialled at University College London, Dutch Translation in Practice will be an essential resource for students on upper-level undergraduate, postgraduate or professional courses in Dutch and Translation Studies. *Translating Cultures* - Abraham Rosman 2020-06-15 The task of the anthropologist is to take ideas, concepts and beliefs from one culture and translate them into first another language, and then into the language of anthropology. This process is both fascinating and complex. Not only does it raise questions about the limitations of language, but it also challenges the ability of the anthropologist to communicate culture accurately. In recent years, postmodern theories have tended to call into question the

legitimacy of translation altogether. This book acknowledges the problems involved, but shows definitively that 'translating cultures' can successfully be achieved. The way we talk, write, read and interpret are all part of a translation process. Many of us are not aware of translation in our everyday lives, but for those living outside their native culture, surrounded by cultural difference, the ability to translate experiences and thoughts becomes a major issue. Drawing on case studies and theories from a wide range of disciplines -including anthropology, philosophy, linguistics, art history, folk theory, and religious studies - this book systematically interrogates the meaning, complexities and importance of translation in anthropology and answers a wide range of provocative questions, such as:

- Can we unravel the true meaning of the Christian doctrine of trinity when there have been so many translations?
- What impact do colonial and postcolonial power

structures have on our understanding of other cultures? - How can we use art as a means of transgressing the limitations of linguistic translation? *Translating Cultures: Perspectives on Translation and Anthropology* is the first book fully to address translation in anthropology. It combines textual and ethnographic analysis to produce a benchmark publication that will be of great importance to anthropologists, philosophers, linguists, historians, and cultural theorists alike.

**Theories of Translation** -  
John Biguenet 2017-12-12

Spanning the centuries, from the seventeenth to the twentieth, and ranging across cultures, from England to Mexico, this collection gathers together important statements on the function and feasibility of literary translation. The essays provide an overview of the historical evolution in thinking about translation and offer strong individual opinions by prominent contemporary theorists. Most of the twenty-one pieces appear in translation, some here in English for the first time and many difficult to find elsewhere. Selections include writings by Scheiermacher, Nietzsche, Ortega, Benjamin, Pound, Jakobson, Paz, Riffaterre, Derrida, and others. A fine companion to *The Craft of Translation*, this volume will be a valuable resource for all those who translate, those who teach translation theory and practice, and those interested in questions of language

*The Oxford Guide to Literature  
in English Translation* - Peter  
France 2000

This book, written by a team of  
experts from many countries,  
provides a comprehensive  
account of the ways in which  
translation has brought the  
major literatures of the world  
into English-speaking culture.  
Part I discusses theoretical  
issues and gives an overview of

the history of translation into  
English. Part II, the bulk of the  
work, arranged by language of  
origin, offers critical  
discussions, with  
bibliographies, of the  
translation history of specific  
texts (e.g. the Koran, the  
Kalevala), authors (e.g.  
Lucretius, Dostoevsky), genres  
(e.g. Chinese poetry, twentieth-  
century Italian prose) and  
national literatures (e.g.  
Hungarian, Afrikaans).
