*Hearts and Minds* - Thomas David Kehoe 2003

Mammals raising their young evolved brains hardwired for emotional relationships. Around this mammalian core, humans evolved a new, larger brain for abstract thinking. Too often our abstract thinking gets in the way of emotionally

connecting with other people. Hearts and Minds shows you how to improve your relationships by integrating these different brain systems. Plus, you'll find: The best places to meet single men and women (page 93). How young men and women fall in love with mirrors of themselves (page 74), when mature men and women love their real partners, including accepting their faults (page 83). Dating, Mating, Relating -  
Pamela Anne Quiroz  
2022-06-21

To fit a changing society, the conventional ways we date and mate have given way to brand new methods. People nowadays marry later in life, choose not to marry at all, seek partners after divorce, outlive spouses, relocate to new areas and even endure pandemics. This signifies that we are moving toward larger dating pools, something made possible through public personal advertising. This text details personal advertising in print and digital media, as well as online dating services, speed dating, the use of mobile dating apps and other topics.

Interviews reveal the appeal and limitations of personal advertising for meeting people. This book offers a window into the development of trust and relationships, as well as the increasing role technology plays in shaping how people

meet and mate in the modern world.

*Mating Intelligence* - Glenn Geher 2008

Human intelligence is sexually attractive, and strongly predicts the success of sexual relationships, but the behavioral sciences have usually ignored the interface between intelligence and mating. This is the first serious scholarly effort to explore that interface, by examining both universal and individual differences in human mating intelligence. Contributors include some of the most prominent evolutionary psychologists and promising new researchers in human intelligence, social psychology, intimate relationships, and sexuality. David Buss' foreword and the opening chapter explore what 'mating intelligence' means, and why it is central to human cognition and sexuality. The book's six sections then examine (1) our mating mechanisms — universal emotional and cognitive adaptations for mating intelligently — that

guide mate search, mate choice, and courtship; (2) how mating intelligence strategically guides our choice of mating tactics and partners given different relationship goals, personality traits, forms of deception, and the existence of children; (3) the genetic and psychiatric causes of individual differences in mating intelligence; (4) how we use mental fitness indicators — forms of human intelligence such as creativity, humor, and emotional intelligence — to attract and retain sexual partners; (5) the ecological and social contexts of mating intelligence; (6) integrative models of mating intelligence that can guide future research. *Mating Intelligence* is intended for researchers, advanced students, and courses in human sexuality, intimate relationships, intelligence research, behavior genetics, and evolutionary, personality, social, and clinical psychology. *Case Studies in Sex Therapy* - Raymond Rosen 1995-05-19 With simple cases of premature ejaculation or anorgasmia

becoming increasingly rare, clinicians are now utilizing a sophisticated array of multidisciplinary approaches to treat a complex variety of challenging problems and patient populations. Bringing together, under one cover, case studies and clinical discussions by the very authorities whose work is changing the field, *Case Studies in Sex Therapy* provides a state-of-the-art guide to current clinical practice. Chapters in the first section focus on cases of sexual desire disorders and explore such issues as desire disparity between partners, clinical interventions in marital and sex therapy, biological aspects of inhibited sexual desire, treatment considerations with a homosexual couple, the application of integrative therapy for treating secondary low sex desire, and the many factors that may contribute to sexual avoidance. The next section demonstrates both the opportunities and the complex challenges posed to the clinician by the array of new medical, surgical, and

pharmacological therapies. Addressing the growing interest in sexual addiction and compulsion, the third section covers controversial issues such as the treatment of a sexually addictive client and the treatment implications when a client has been sexually exploited by another therapist.

**Out of Control** - Ben Young  
2006-03-05

With cell phones, instant messaging, express lanes, and PDAs, we can now cram more activities into our lives than ever before. But is this a blessing or a curse? Could it be that this fast-paced lifestyle is creating an underlying sense of anxiety and fragmentation? Is it any wonder the television is flooded with advertising for anti-anxiety medication? As a nation, we are stressed out, physically exhausted, and spiritually drained. Working professionals caught in the continual push for success or over-extended soccer moms who feel burdened with too many commitments will find in *Out of Control* desperately needed help. This book shares
