**Gender and Corruption** - Helena Stensöta 2018-03-27

The link between gender and corruption has been studied since the late 1990s. Debates have been heated and scholars accused of bringing forward stereotypical beliefs about women as the "fair" sex. Policy proposals for bringing more women to office have been criticized for promoting unrealistic quick-fix solutions to deeply rooted problems. This edited volume advances the knowledge surrounding the link between gender and corruption by including studies where the historical roots of corruption are linked to gender and by contextualizing the exploration of relationships, for example by distinguishing between democracies versus authoritarian states and between the electoral arena versus the administrative branch of government—the bureaucracy. Taken together, the chapters display nuances and fine-grained understandings. The book highlights that gender equality processes, rather than the exclusionary categories of "women" and "men", should be at the forefront of analysis, and that developments strengthening the position of women vis-à-vis men affect the quality of government.

**Handbook of the Sociology of Gender** - Barbara J. Risman 2018-06-05

This handbook provides a comprehensive view of the field of the sociology of gender. It presents the most important theories about gender and methods used to study gender, as well as extensive coverage of the latest research on gender in the most important areas of social life, including gendered bodies, sexuality, carework, paid labor, social movements, incarceration, migration, gendered violence, and others. Building from previous publications this handbook includes a vast array of chapters from leading researchers in the sociological study of gender. It synthesizes the diverse field of gender scholarship into a cohesive theoretical framework, gender structure theory, in order to position the specific contributions of each author/chapter as part of a complex and multidimensional gender structure. Through this organization of the handbook, readers do not only gain tremendous insight from each chapter, but they also attain a broader understanding of the way multiple gendered processes are interrelated and mutually constitutive. While the specific focus of the handbook is on gender, the chapters included in the volume also give significant attention to the interrelation of race, class, and other systems of stratification as they intersect and implicate gendered processes.

*Money, Sex, and Power* - Nancy C. M. Hartsock 1985

**Constituting Feminist Subjects** - Kathi Weeks 2018-08-14

A groundbreaking attempt to theorise the feminist subject One of the most important tasks for contemporary feminist theory is to develop a concept of the subject able to meet the challenges facing feminist politics. Although theorists in the 1980s raised the problem of feminist subjectivity, Kathi Weeks contends that the limited nature of that discussion now blocks the further development of feminist theory. While the problems of an already constituted essentialist subject have become patent, what remains as an ongoing project, Weeks contends, is a theory of the constitution of subjects capable of explaining the processes of social construction. This book presents one such account. Drawing on a number of different theoretical frameworks, including feminist standpoint theory, socialist feminism, and poststructuralist thought, as well as theories of performativity and self-valorization, the author proposes a nonessential feminist subject—a theory of constituting subjects.

*Routledge Encyclopedia of Philosophy: Index* - Edward Craig 1998

Contains a full index of all the topics covered in the first nine volumes of the set.

**The Feminist Standpoint Theory Reader** - Sandra G. Harding 2004

First Published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

**Reluctant Bedfellows** - Meredith L. Ralston 2009

"Academic feminist theorizing and identity politics, the two argue, has reached the level of "analysis paralysis" where women and women's groups do not act for fear of being pejoratively labeled. This has many negative consequences for rights-seeking groups, as Ralston and Keeble

experience firsthand in working to bring Angeles City and Canadian women's organizations together. Both an eye-opening picture of the workings of a community seeped in sex tourism and a sharp review of current feminist theorizing, *Reluctant Bedfellows* offers much-needed perspective on ways to bring disputing parties together and actually promote change."--BOOK JACKET.

**The Everyday World As Problematic** - Dorothy E. Smith 2012-01-15

In this collection of essays, sociologist Dorothy E. Smith develops a method for analyzing how women (and men) view contemporary society from specific gendered points of view. She shows how social relations - and the theories that describe them - must express the concrete historical and geographical details of everyday lives. A vital sociology from the standpoint of women, the volume is applicable to a variety of subjects, and will be especially useful in courses in sociological theory and methods.

**Feminist Theory and International Relations in a Postmodern Era** - Christine Sylvester 1994-02-25

This book evaluates the major debates around which the discipline of international relations has developed in the light of contemporary feminist theories.

**Rethinking Obligation** - Nancy J. Hirschmann 2018-08-06

In *Rethinking Obligation*, Nancy J. Hirschmann provides an innovative analysis of liberal obligation theory that uses feminism as a theoretical method for rethinking political obligations from the bottom up. In articulating a feminist method for political theory, Hirschmann skillfully brings together theoretical categories and methods previously seen as opposed: feminist standpoint and postmodernism, gender psychology and anti-essentialism, empiricism and interpretivism. *Rethinking Obligation* mounts a vital challenge to central aspects of liberal theory. Students and scholars of political philosophy, political theory, feminist theory, and women's studies will want to read it.

**Rebellious Feminism** - E. Bartlett 2004-01-16

In what might seem an unusual pairing, Barlett brings together the insights of Albert Camus and feminist thought, and in doing so sheds new light on both. Looking through a Camusian lens, Bartlett reveals a 'rebellious feminism' that simultaneously refuses oppression and affirms human dignity in solidarity with concrete, diverse others and the earth, giving us new insights into this life-affirming ethic.

*Feminism and Social Change* - Heidi Gottfried 1996

"Fresh, original, and brings together in one place a set of authors who are very important to the field." -- Mary Margaret Fonow, coeditor of *Beyond Methodology: Feminist Scholarship as Lived Research* "Finally, a collection dedicated to demonstrating precisely what it means to do feminist research " -- Madonna Harrington Meyer, University of Illinois at Urbana-Champaign How likely is feminist research to promote change in society? Are some research methods more successful at bringing about change than others? Contributors to this volume discuss principles of feminist inquiry, providing examples from their own experience and evaluating research practices for their potential to promote social change. The twelve chapters cover methodologies including ethnographic study, in-depth interviewing, naming, and going public. Also explored are consultative relationships between academic researchers and activist organizations, participatory and advocacy research processes, and coalition building.

**Money, Sex, and Power** - Nancy C. M. Hartsock 1983

**The Oxford Handbook of Feminist Theory** - Lisa Disch 2018-02-01

The *Oxford Handbook of Feminist Theory* provides a rich overview of the analytical frameworks and theoretical concepts that feminist theorists have developed to analyze the known world. Featuring leading feminist theorists from diverse regions of the globe, this collection delves into forty-nine subject areas, demonstrating the complexity of feminist challenges to established knowledge, while also engaging areas of contestation within feminist theory. Demonstrating the interdisciplinary nature of feminist theory, the chapters offer innovative analyses of topics central to social and political science, cultural studies and humanities,

discourses associated with medicine and science, and issues in contemporary critical theory that have been transformed through feminist theorization. The handbook identifies limitations of key epistemic assumptions that inform traditional scholarship and shows how theorizing from women's and men's lives has profound effects on the conceptualization of central categories, whether the field of analysis is aesthetics, biology, cultural studies, development, economics, film studies, health, history, literature, politics, religion, science studies, sexualities, violence, or war.

**Ethics, Norms and the Narratives of War** - Pamela Creed 2013

This book examines the ethics and values that render a war discourse normative, and features the stories of American soldiers who fought in the Iraq War to show how this narrative can change. The invasion of Iraq, launched in March 2003, was led by the United States under the now discredited claim that Iraq was developing weapons of mass destruction (WMD). However, critical questions concerning what we may be able to learn from this experience remain largely unexplored. The focus of this book, therefore, is on soldiers as systems of war - and the internal battle many of them wage as they live a reality that slowly emerges as inconsistent with familiar beliefs and value commitments. This work offers a reflective study of identity struggle from the perspective of emotional psychology and delves into the 'narrative field' of socio-politics. Going beyond the political contestations over the U.S. military intervention in Iraq, the author analyses original research on the evolving beliefs and value-commitments of veterans of the war, exploring their faith in its 'just cause' and their personal sense of self and national identity. This book will be of much interest to students of the Iraq War, US foreign policy, military studies, discourse analysis, and IR in general.

**Patriarchy and Gender in Africa** - Veronica Fynn Bruey 2021-03-25

Patriarchy and Gender in Africa explores historical and contemporary issues of male dominance and control over women in legal, socio-cultural, and political contexts in Africa. Contributors examine patriarchy and inequality across the continent, female resistance, and women's contributions to Africa's growth and development.

**Gendered Wars, Gendered Memories** - Ayşe Gül Altınay 2016-04-06

The Introduction of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at

<http://www.taylorfrancis.com/books/e/9781315584225> The twentieth century has been a century of wars, genocides and violent political conflict; a century of militarization and massive destruction. It has simultaneously been a century of feminist creativity and struggle worldwide, witnessing fundamental changes in the conceptions and everyday practices of gender and sexuality. What are some of the connections between these two seemingly disparate characteristics of the past century? And how do collective memories figure into these connections? Exploring the ways in which wars and their memories are gendered, this book contributes to the feminist search for new words and new methods in understanding the intricacies of war and memory. From the Italian and Spanish Civil Wars to military regimes in Turkey and Greece, from the Armenian genocide and the Holocaust to the wars in

Abkhazia, East Asia, Iraq, Afghanistan, former Yugoslavia, Israel and Palestine, the chapters in this book address a rare selection of contexts and geographies from a wide range of disciplinary perspectives. In recent years, feminist scholarship has fundamentally changed the ways in which pasts, particularly violent pasts, have been conceptualized and narrated. Discussing the participation of women in war, sexual violence in times of conflict, the use of visual and dramatic representations in memory research, and the creative challenges to research and writing posed by feminist scholarship, *Gendered Wars, Gendered Memories* will appeal to scholars working at the intersection of military/war, memory, and gender studies, seeking to chart this emerging territory with 'feminist curiosity'.

**Feminist Theories and Feminist Economics** - Kavous Ardalan 2021-10-30  
In *Feminist Theories and Feminist Economics: A Multi-Paradigmatic Approach*, Kavous Ardalan examines four paradigms of feminist theory and economics, emphasizing the value of an integrative approach to understanding feminism.

**Women of the First Nations** - Christine Miller 1996-08-15

"From diversity comes strength and wisdom": this was the guiding principle for selecting the articles in this collection. Because there is no single voice, identity, history, or cultural experience that represents the women of the First Nations, a realistic picture will have many facets. Accordingly, the authors in *Women of the First Nations* include Native and non-Native scholars, feminists, and activists from across Canada. Their work examines various aspects of Aboriginal women's lives from a variety of theoretical and personal perspectives. They discuss standard media representations, as well as historical and current realities. They bring new perspectives to discussions on Aboriginal art, literature, historical, and cultural contributions, and they offer diverse viewpoints on present economic, environmental, and political issues. This collection counters the marginalization and silencing of First Nations women's voices and reflects the power, strength, and wisdom inherent in their lives.

**The Poetics of Empowerment in David Mitchell's Novels** - Eva-Maria Windberger 2023-07-17

*The Poetics of Empowerment in David Mitchell's Novels* combines the investigation of David Mitchell's novels with the introduction of a new critical concept to literary studies: empowerment. Aiming to situate and establish empowerment firmly within the context of literary studies, it offers the first framework and definition for reading fictional texts with the lens of empowerment and applies it in the analysis of discourse, the fictional characters, and the role of the reader in Mitchell's novels. Drawing on narratological analysis, cognitive approaches to literature, and reader-response theory, it features close readings of *Cloud Atlas* (2004), *Black Swan Green* (2006), and *The Thousand Autumns of Jacob de Zoet* (2010) and dissects the author's strategies, poetics, and agenda of empowering fiction. This book argues for an inherent, indissoluble connection between empowerment and the telling of stories and demonstrates how literary studies can benefit from a serious engagement with empowerment—and how such an engagement can stimulate new responses to fiction and put literary studies in conversation with other disciplines.
