The Price of Sex - Belinda Brooks-Gordon
2013-06-17

As a society we are buying more sex than ever before. Adult sex shops now take their place amongst retailers in the high street and lap dancing clubs compete for an increased share of the leisure economy; hotel chains offer sexually explicit films as part of their standard service, the party selling of adult toys to women in their homes has become a mainstream activity; and at the traditional end of the sexual service economy, prostitution has experienced new growth. Along with this has come new legal measures and attempts to regulate the sexual leisure economy, and far more comprehensive plans than ever before to regulate prostitution, in particular in the form of the new Sex Offences Act. This book seeks to address the range of issues and contemporary debates on the sex industry, including the demand by customers who buy sex, the policing of women who work in the street sex industry, and the violence that pervades prostitution. It shows how these issues have been addressed in policy terms, the problems that have emerged in this, and how a social policy might be formulated to minimize harm and enhance public understanding. Overall the book aims to provide a critical perspective on prostitution policies and the legal chaos and complexities that surround this.

Analysing Gender in Healthcare - Sarah Cooper
2023-01-01

This book explores regulatory conundrums around adolescent sexual health, abortion and assisted reproductive technologies in the UK. In doing so, it seeks to examine the various stages at which women's reproductive health comes into contact with government action and assesses how these legal and policy fields are shaped through the conceptual lens of policy networks. Transformed expectations of women's roles, along with developed biological capabilities and understandings of gender and sexuality have driven an increasingly complex politics of sex and reproduction. The book

argues that assumed medial control over these issues is overshadowed by government calculations of cost-effectiveness. Moreover, decisions on the design of programmes and levels of access continually reflect traditional family formation. The outcome is unsurprisingly the marginalisation of women in publicly funded healthcare, but with a clear further impact on gender and sex minorities. COVID-19 has disrupted these dynamics further, altering the manner in which previously inhibited patients engage with the NHS. As the pandemic recedes it has become more timely than ever to consider the future of gendered healthcare in the UK, and to question the likelihood of long term change in the ability of patients to inform health policy decisions. The book will appeal to scholars and students of gender and health policy, law and politics, as well as healthcare practitioners.

[Sex Workers and the Cost of Safe Sex: The Compensating Differential for Condom Use in Calcutta](#) - Vijayendra Rao 2015

The Cost of Being Female - Margery Elfin 1996-11-30

The Cost of Being Female is 30 cents, say the authors of this new book on discrimination against women. They demonstrate their thesis by constructing an index that documents the costs of discrimination against women in five aspects of life: economic, political, social, education, and health. The index compares the costs for American women with those of women in Sweden, Norway, France and China, and measures the costs for three time periods: 1990s, 1950s, and the 19th century. The authors interviewed over 70 women, providing a human approach to the statistics of earnings, occupations, political participation, marriage, divorce, childrearing, education, and women's health. The women's narratives are living testimony to the experiences of the costs of being female.

What Price Hollywood? - Elyce Rae Helford 2020-06-23

During the early Hollywood sound era, studio director George Cukor produced nearly fifty films in as many years, famously winning the Best Director Oscar at the 1964 Academy Awards for *My Fair Lady*. His collaborations with so-called difficult actresses such as Katharine Hepburn, Judy Garland, and Marilyn Monroe unsettled producers even as his ticket sales lined their pockets. Fired from *Gone with the Wind* for giving Vivien Leigh more screen time than Clark Gable, Cukor quickly earned a double-sided reputation as a "woman's director." While the label celebrated his ability to help actresses deliver their best performances, the epithet also branded the gay director as suitable only for work on female-centered movies such as melodramas and romantic comedies. Desperate for success after a failed drag film nearly ended his career, Cukor swore to work within Hollywood's constraints. Nevertheless, What

Price Hollywood? Gender and Sex in the Films of George Cukor finds that Cukor continued to explore gender and sexuality on-screen. Drawing on a broad array of theoretical lenses, Elyce Rae Helford examines how Cukor's award-winning films—titles including *My Fair Lady* and *The Philadelphia Story*—as well as his lesser-known films engage Hollywood masculinity and gender performativity through camp, drag, and mixed genres. Blending biography with critical analysis of more than twenty-five films, *What Price Hollywood?* tells the story of a once-in-a-generation director who produced some of the best films in history.

[The Road to Femininity](#) - Katherine Reilly 2016-10-19

This book is a guide for trans women who need help in their first steps to becoming who they are, as well as experienced trans women who wouldn't mind some more advice dealing with everyday issues they might face. *The Road to becoming a Woman* has never been easy. Even though society has changed over the years, humanity still has a long way to go... Some countries are more accepting, while others are not. This book highlights most of my experience as a transitioning woman living in Greece. A country that does not legally accept transgenders or support LGBT rights for that matter. My advice will help you avoid a lot of mistakes I've made in the past and hopefully have an easier time becoming who you are with less heartache. Being who you are is difficult but not impossible. Just stay true to yourself and remember... This is YOUR LIFE!

Understanding the Well-Being of LGBTQI+ Populations - National Academies of Sciences, Engineering, and Medicine 2021-01-23

The increase in prevalence and visibility of sexually gender diverse (SGD) populations illuminates the need for greater understanding of the ways in which current laws, systems, and programs affect their well-being. Individuals who identify as lesbian, gay, bisexual, asexual, transgender, non-binary, queer, or intersex, as well as those who express same-sex or -gender attractions or behaviors, will have experiences across their life course that differ from those of cisgender and heterosexual individuals. Characteristics such as age, race and ethnicity, and geographic location intersect to play a

distinct role in the challenges and opportunities SGD people face. Understanding the Well-Being of LGBTQI+ Populations reviews the available evidence and identifies future research needs related to the well-being of SDG populations across the life course. This report focuses on eight domains of well-being; the effects of various laws and the legal system on SGD populations; the effects of various public policies and structural stigma; community and civic engagement; families and social relationships; education, including school climate and level of attainment; economic experiences (e.g., employment, compensation, and housing); physical and mental health; and health care access and gender-affirming interventions. The recommendations of Understanding the Well-Being of LGBTQI+ Populations aim to identify opportunities to advance understanding of how individuals experience sexuality and gender and how sexual orientation, gender identity, and intersex status affect SGD people over the life course.

Sexual and gender-based violence against women in rural communities in Uganda -

Immaculate Agedo 2018-08-27

Master's Thesis from the year 2016 in the subject Sociology - Gender Studies, grade: A, , language: English, abstract: The study established the effect of socio-cultural factors on the Management of Sexual and Gender Based Violence (SGBV) against women in Apac District, of Uganda. The specific objectives of the study were to assess the extent to which bride price practices affects Management of Sexual and Gender Based Violence against women in Apac District; to explain the effect of cultural norms on Management of Sexual and Gender Based Violence in Apac District; and to establish the extent to which the moderating effect of the composition of LC courts affect the management of sexual and gender based violence against women. Literature on sociocultural and management of SGBV was reviewed. A case study research design was used supplemented by both qualitative and quantitative approaches. An accessible population of 320 elements was used to determine a sample size of 175 respondents. A 71% response rate was obtained. Key findings of the study include a positive significant relationship result for bride price practices (.355**), cultural norms (.580**) and composition of LC courts (.514**) on management of sexual and gender based violence. The study concluded that SGBV acts led to splitting of more families. Fewer women reported domestic violence and women beaten were psychologically tormented and rarely were men apprehended when they beat their wives. However, many community members were not aware of violence in homes. Many women eloped as a result of domestic violence and many were isolated and neglected. Fewer LC courts adhered to a predefined mechanism, many women were dissatisfied with the court set up and injustice prevailed. The study recommends that locally guidelines for payment of bride be formulated, use ceremonies such marriage and naming ceremonies to deliver SGBV information and informing communities that SGBV was punishable under the laws of Uganda. There is

need to introduce a women's desk for more work coordination, need to form a task force to review LC court composition and ensure a fair community evaluation exercise on the role played by the LC courts.

Challenging Popular Myths of Sex, Gender and Biology - Malin Ah-King 2013-11-27

This edited volume challenges popular notions of sex, gender and biology and features international, trans-disciplinary research. The book begins with an exploration of supposedly 'natural' sexual differences, then looks at research in evolutionary biology and examines topics such as gender stereotypes in humans. The first chapters explore important questions: What are the fundamental sex differences? How do genes and hormones influence an individual's sex? Subsequent chapters concern topics including: sex stereotypes in the field of sexual conflict, how the focus on genes in evolutionary biology disregards other means of inheritance, and the development of Darwin's theory of sex differences. The last three chapters look at humans, discussing: an interdisciplinary approach to the evolution of sex differences in body height, biological versus social constructive perspectives on the gendering of voices and nature-culture arguments in the current political debate on paternity leave in Norway.

Strip Club - Kim Price-Glynn 2010-09-14

In *Strip Club*, Kim Price-Glynn takes us behind the scenes at a rundown club where women strip out of economic need, a place where strippers' stories are not glamorous or liberating, but emotionally demanding and physically exhausting. *Strip Club* reveals the intimate working lives of not just the women up on stage, but also the patrons and other workers who make the place run: the owner-manager, bartenders, deejays, doormen, bouncers, housemoms, and cocktail waitresses. Price-Glynn spent fourteen months at The Lion's Den working as a cocktail waitress, and her uncommonly deep access reveals a conflict-ridden workplace, similar to any other workplace, one where gender inequalities are reproduced through the everyday interactions of customers and workers. Taking a novel approach to this controversial and often misunderstood industry, Price-Glynn draws a fascinating portrait of life and work inside the strip club.

Sex Workers and the Cost of Safe Sex - Vijayendra Rao 2003

There have been almost no econometric studies of the market for prostitution despite the fact that perhaps the most important mode of HIV-AIDS transmission in developing countries is unprotected sex with sex workers. However, anecdotal evidence suggests that sex workers who use condoms face large income losses because clients have a preference for condom-free sex. The size of this compensating differential has important implications for AIDS policy. This paper uses a unique data set from a survey of sex workers in Calcutta, India to estimate the compensating differential for

condom-use among prostitutes employing data from a random sample of sex workers in Calcutta. The bias resulting from unobserved heterogeneity common to compensating differentials estimates are corrected via a natural experiment - the non-systematic placement of sex workers in a safe sex information program - to identify the relationship between condom use and the price for sex. We find that sex workers who always use condoms face large losses of between 66 (FIML) and 79 per cent (IV).

Its purpose is to inform you of your alternatives, and to help you make a reasoned and considered choice about how you will spend the rest of your life. Sex Workers and the Cost of Safe Sex -

Vijayendra Rao 2000

Prostitution is often called the world's oldest profession, yet economists almost never study it. The practice of safe sex by commercial sex workers is considered central to preventing the transmission of AIDS in Developing countries, yet sex workers in Calcutta who regularly use condoms suffer a 79 percent loss in their average earnings per sex act.

Gender and Sexual Dimorphism in Flowering Plants

- Monica A. Geber 2012-12-06

Written by the leading experts in the field, this book examines the evolutionary advantages of gender dimorphism and sexual dimorphism in flowering plants. Divided into three sections: the

first introduces readers to the tremendous variety of breeding systems and their evolution in plants and sets the stage for a consideration of the evolution of dimorphism in reproductive and non-reproductive characters. The Prize and the Price - Melissa E. Steyn 2009

"What is the prize, and who pays the price? The desired and the desirable are often constellated through our ideas of what is undesired and undesirable, deeply knotted into our sense of self, our sense of where and how we fit into the world. These notions of desire form the backdrop to this powerful volume which examines the historical continuities and interruptions of heteronormativity in South African society. Leading and emerging scholars disentangle the strands of particular sexual identities, and deepen the reader's understanding of the multiple workings of heteronormativity in South African society in particular, and sexuality in general. Through analyzing where and how heteronormativity intersects with other axes of power and social identity, contributors to this volume reveal that it is not monolithic, and heterosexuality as the South African norm is effectively 'outed' from within heteronormativity. The chapters extend beyond the well researched areas of sexuality - same sexualities, HIV/AIDS and gender-based violence - to less discussed areas, such as childhood sexuality and disability. The multiplicity of issues raised have relevance for a range of readers interested in the fledgling field of Sexualities Studies, and in its significance the scholarship extends well beyond the borders of South Africa"--Cover.
